The training you get at DAU lays the foundation for success in your career, on the job, and in providing what our warfighters need to prevail and to come home safely.
Mission
Provide a global learning environment to develop qualified acquisition, requirements, and contingency professionals who deliver and sustain effective and affordable warfighting capabilities

Vision
Enable the Defense Acquisition Workforce to achieve better acquisition outcomes
Introduction: The Defense Acquisition University

Message from the President
What’s New
DAU offers a full range of learning assets to professionals from the Defense Acquisition Workforce and from the other communities that work to deliver and sustain effective and affordable warfighting capabilities. As the primary acquisition training organization for the Department of Defense, DAU works every day to provide you the training and information you need and expect, while also adapting to the changing environment and finding new ways to help further improve the professionalism and performance of the acquisition workforce.

At DAU, we take pride in delivering quality, timely, and relevant training in the classroom and online. This catalog provides details of the classes we have designed to help you achieve Defense Acquisition Workforce Improvement Act certification and to help you build the foundation for your acquisition career. We recognize that learning extends beyond the classroom and into the workplace. Our online continuous-learning and knowledge-sharing products are available to you around the clock to enhance job performance and help you achieve mission success. We also come to your organization to provide what we call mission assistance—consulting, leadership development, and training tailored to the specific needs of your organization, when your organization needs it. This catalog provides details of many of these learning assets. Additional information is available at www.dau.mil.

DAU also works hard to ensure the quality of your education by maintaining high standards for our processes, infrastructure, and programs. We recently completed a reaffirmation of accreditation site visit by the Council on Occupational Education (COE), certifying that we are meeting stringent criteria approved by the U.S. Department of Education. After a year-long self-study and a successful site visit by a COE team, our reaffirmation of accreditation is pending a vote by the COE commissioners. We will continue to create an environment that exceeds these requirements so that you have the learning experience you deserve.

While our warfighters are still engaged in active conflict, the acquisition community has largely entered the between-the-wars phase, where we must look ahead to what the future may require. These periods inevitably bring uncertainty and budget pressure that add new challenges to the work you do. The environment for DAU is changing as well. We have a new generation of students with different learning needs. We will continue to upgrade course content and delivery methods, improve the online learning experience, and use resources wisely to give you what you need to excel in these interesting times.

James P. Woolsey
President
Defense Acquisition University
The Defense Acquisition University
DEFENSE ACQUISITION UNIVERSITY
9820 BELVOIR ROAD, FORT BELVOIR,
VIRGINIA 22060-5565
NEW DAU PRESIDENT APPOINTED
Mr. James P. Woolsey was appointed as president of DAU on January 17, 2014. He previously served as the first deputy director for performance assessments (PA) in the office of Performance Assessments and Root Cause Analyses. In standing up the PA organization, he created the processes and practices that allowed it to perform its statutory responsibility of assessing the progress of all major defense acquisition programs (MDAPs). The new office also made a substantial contribution to re-invigorating the Defense Acquisition Executive Summary process and provided the Under Secretary of Defense for Acquisition, Technology, and Logistics with unique analyses to give him improved insight into the status of the MDAP portfolio. Mr. Woolsey was previously an assistant director in the Cost Analysis and Research Division of the Institute for Defense Analyses. His responsibilities included management of the division’s cost analysis and research, and leadership of a wide range of cost and acquisition studies. His work included a congressionally directed cost benefit analysis of the F-35 alternate engine, an evaluation of KC-767A lease prices, C-5 re-engineering costs and benefits, F-22 production readiness, Joint Air-to-Surface Standoff Missile costs, and space launch alternatives. Mr. Woolsey also served on a Defense Science Board Task Force on long-range strike. Mr. Woolsey’s other prior positions include service as a structures engineer for F/A-18 aircraft at Naval Air Systems Command and work as an engineer for Lockheed Martin airlift programs. Mr. Woolsey has a bachelor of science in aerospace engineering from Virginia Polytechnic Institute and State University and a master’s in business administration from George Mason University. He was also a fellow in the Massachusetts Institute of Technology Seminar XXI on International Relations.

STUDENT INFORMATION SYSTEM
To help meet the needs of an expanding acquisition workforce and enable more active acquisition career management, DAU is launching a new Student Information System. The vision is clear—a student information system has the potential to transform how the career training of Defense Acquisition Workforce members is managed by integrating people, processes, and technology.

Students will be able to scan the catalog, register for courses, understand certification requirements, and communicate with faculty, all through one simple interface. Implementation of the new Student Information System is expected in the summer of 2015.

NEW COURSES
The following courses will be deployed in FY 2015. For additional details on each, see Appendix A. For information on registration, see pages 126-129.

ENG 301—Leadership in Engineering Defense Systems
Responding to student feedback and the refreshed Engineering functional area competency list, DAU has rewritten its 300-level DAWIA certification course for the Engineering workforce. This 2-week course will instruct students on how to lead engineering teams in the execution and technical risk management of complex, multidisciplinary technical projects. Its 21 modules combine lectures with extensive exercises, covering a variety of topics including system security engineering, open architectures, reliability, and maintainability. Precourse work and a pretest will be required of students. This course is expected to be available for enrollment in January 2015.

LOG 215—Technical Data Management
The new LOG 215 (Technical Data Management) course is being launched early in 2015. This course provides a comprehensive knowledge of technical data management strategies, planning, processes, products, and tools across the life cycle. It is based on DoD policy, guidance, processes, procedures, and best business practices from across the four
Services and industry. LOG 215 was developed as an interdisciplinary course for life-cycle logisticians, program managers, systems engineers, and contracting officers.

LOG 365—Executive Product Support Manager’s Course
Designed as an executive-level course for DoD product support managers (PSMs), LOG 365 focuses on enhancing a PSM’s ability to field and sustain DoD systems. Modeled after PMT 402 (Executive Program Manager’s Course), LOG 365 takes as its central unifying themes the DoD PSM’s roles and responsibilities plus proven practices for developing, validating, and implementing an affordable and successful product support strategy. Experienced PSMs and guest speakers share their lessons learned and leadership tips. Premier learning resources to enhance a PSM’s understanding of business, cost estimating, contracting, program management, leadership, and systems engineering are also key aspects for this course.

Introductory and Intermediate Systems Acquisition Courses
The introductory and intermediate systems acquisition courses are being updated and enhanced. The updates incorporate changes found in the new DoD Instruction 5000.02 (Operation of the Defense Acquisition System) as well as in a number of the Better Buying Power 2.0 initiatives. Enhancements to the visual look and feel, as well as the addition of a capstone simulation activity, are also being introduced to the distance learning courses (formally ACQ 101 and ACQ 201A). FY 2015 opens with the deployment of ACQ 202 and ACQ 203 (replacing ACQ 201A and ACQ 201B respectively), followed by ACQ 102 late in the second quarter (replacing the long-time introductory course, ACQ 101).

SOCIAL MEDIA
The popularity of technology, coupled with consumers’ expectations for fast and relevant information, has led government organizations into the world of social media. DAU is no exception and has been building a social media presence—within the limits of DoD network security considerations—to stay connected to our customers and stakeholders.

If you have any questions or suggestions for DAU’s social media team, email communications@dau.mil.

Facebook
DAU is reaching many members of the Defense Acquisition Workforce with targeted messages about the university’s learning assets and events, as well as relaying new DoD policy and initiatives. In turn, customers and stakeholders have posted valuable feedback on innovations that are important to them. Check us out at www.facebook.com/DAUnow.

Flickr
The photo-hosting Web site Flickr allows DAU to give users a glimpse into life at the university and to share high-resolution photos of acquisition award winners. Take a look at www.flickr.com/defenseacquisitionuniversity.

LinkedIn
DAU’s primary organizational page on LinkedIn can be found at https://www.linkedin.com/company/defense-acquisition-university?trk=company_name; however, LinkedIn also provides an interest group page, where DAU users are able to communicate with professional contacts, creating a community where acquisition workforce members can network, share, and learn from one another. DAU’s interest group page on LinkedIn welcomes users at www.linkedin.com/groups/Defense-Acquisition-University-4556755.

Twitter
The official DAU Twitter account, @DAUnow, allows workforce members to keep up with the latest course offerings, events, facility closings, system outages, and other Defense and acquisition news in 140 characters or less. Follow the university at https://twitter.com/daunow.

YouTube
DAU is leveraging YouTube’s extensive reach to promote its learning assets and to spread awareness of Defense acquisition. Although some DoD organizations block access to the YouTube Web site due to bandwidth concerns, the page is accessible to external audiences where they use the Web site most—at home. Watch at www.youtube.com/defenseacquisition.
Section 1: The Defense Acquisition University
DAU also is an International Association for Continuing Education and Training (IACET) Authorized Provider.

IACET is known as the premier standard-setting organization for continuing education and training. Since 2006, IACET has been approved by the American National Standards Institute (ANSI) as a Standards Developer. In order to award IACET Continuing Education Units (CEUs), an organization must become an IACET Authorized Provider (AP). During the AP application process, the organization provides evidence that it meets the ANSI/IACET Standard for Continuing Education and Training. The organization’s policies, procedures, processes, and supporting documentation are reviewed for compliance with the ANSI/IACET standard, and the applicant agrees to a site visit to verify the contents of the written application.

DAU chose to become an AP because IACET’s commitment to promoting quality education aligns with the university’s mission to develop qualified professionals. By being an IACET AP and adhering to the ANSI/IACET standard, DAU is authorized to award IACET CEUs and does so for all its regularly scheduled training courses.

The Defense Acquisition University (DAU) is the one institution that touches every member of the Defense Acquisition Workforce throughout all professional career stages. The university provides a full range of basic, intermediate, and advanced certification training and assignment-specific training. Additionally, DAU provides targeted training to address an organization’s unique needs and rapid deployment training to quickly train the workforce on new acquisition policy and initiatives. DAU supports acquisition workforce members on the job through online, self-paced, continuous learning modules; online knowledge sharing resources and performance support tools; and job-relevant applied research. We also support acquisition organizations through our mission assistance program, consisting of consulting, acquisition workshops for intact teams, tailored training, executive coaching, and leadership development.

**OUR ACCREDITATION**

The Defense Acquisition University is accredited by the Commission of the Council on Occupational Education.

DAU selected the Council on Occupational Education (COE) as its accrediting body because the standards and criteria established by COE correspond with the university’s training certification mission and the broader view of learning and development. DAU was first awarded accreditation in 2003, it was reaffirmed in 2008, and is pending reaffirmation in late 2014.

The American Council on Education’s College Credit Recommendation Service has recommended many DAU courses for graduate and undergraduate college credit, helping workforce members get a head start in completing their degrees. For more information, see [http://www.dau.mil/training/Pages/studentinformation.aspx](http://www.dau.mil/training/Pages/studentinformation.aspx).
training to the Defense Acquisition Workforce—and two colleges providing specialized training to the Defense Acquisition Workforce members no matter where they are located. DAU also has strategically partnered with academic institutions, professional organizations, corporations, and government agencies to provide professional development, equivalencies, academic credit toward degree programs, as well as certificates for DAU courses.

**OUR ORGANIZATION**

DAU’s leaders are committed to ensuring the university provides the best learning capabilities to those who use DAU learning resources.

The DAU president is responsible for the overall leadership and direction of DAU and reports to the Assistant Secretary of Defense for Acquisition. The DAU president directs all of the acquisition education activities of the university, including training, continuous learning, mission assistance, research, knowledge sharing, and strategic partnerships. Additionally, he directs the internal activities necessary for DAU to deliver learning assets. These include strategic planning, performance and resource management, human resources, curricula development, and e-learning and technology analysis and acquisition.

The vice president assumes the president’s duties when the president is unable to perform them. The vice president is responsible for mission execution and for overseeing the university’s product development and delivery elements.

The chief of staff is responsible for mission execution and for overseeing the university’s operational product delivery elements, including operations, human resources, and information technology. The chief of staff also supervises those elements of the Office of the President responsible for strategic planning, annual performance planning and assessment, accreditation, the Board of Visitors, corporate communications, strategic partnerships, faculty policy, learning analytics, and leadership support.

The director of Performance and Resource Management is responsible for the evaluation and performance measurement of all of our products and services as well as the financial management of the university. The director chairs the DAU Resource Council, which is responsible for setting financial priorities for the university. The director maintains the course schedule and workload system for the university and provides financial management analysis and a centralized programming and budgeting system to control the allocation of resources for conducting defense acquisition training, research, and publication activities.

The director of Mission Assistance and Knowledge Repository is responsible for aligning all DAU mission assistance and knowledge management activities with the Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics (OUSD[AT&L]) and with DAU goals and priorities. The director coordinates with the associate deans for Outreach and Mission Assistance at each of the regions and at Defense Systems Management College (DSMC) for mission assistance efforts. The director is responsible for the operation and maintenance of the DAU Knowledge Repository and Acker Archives (formerly the David D. Acker Library); and for the AT&L Knowledge Management System, which includes the Defense Acquisition Portal, ACQuipedia, Communities of Practice, and performance learning tools.

The director of Strategic Planning and Learning Analytics is responsible for developing the strategic plan and annual performance plan for the university. The director is also responsible for end-of-course/event survey administration, data collection and analysis, and program evaluation of learning assets at each of the four levels in the Kirkpatrick model.

The director of Human Resources reports to the DAU chief of staff and advises the president, vice president, and chief of staff on the appropriate implementation of DAU’s human capital goals and objectives. The director formulates the DAU Human Capital Plan and is responsible for managing workforce planning, recruiting and hiring, employee retention, and performance measurement and appraisal.
The director of the Operations Support Group oversees contracting and logistics support, facilities maintenance, protocol and operations, video services, and visual arts and press. The director also chairs the DAU Facility Council, which reviews major facility issues and initiatives and is responsible for setting priorities and approving large facility projects or expansions/changes.

The director of Information Technology (IT) oversees all computer and information systems at DAU, including hardware, software, firmware, infrastructure, Local Area Network (LAN), Wide Area Network (WAN), telecommunications, and continuity of operations. The director is responsible for daily operations and maintenance of the IT infrastructure; procurement of IT equipment and supplies; operation of the Help Desk; Web and application development, database management, and data integration; network and information security; and system certification and accreditation. The director of IT also serves as the chief information officer (CIO). The CIO provides advice to the president, vice president, and chief of staff to ensure that information resources are acquired, used, and managed in accordance with DoD Directive 8000.01. The CIO sets corporate-wide information resource management policies and chairs the DAU Technology Council.

The general counsel provides policy guidance and serves as the attorney-advisor for administrative and civil law matters. The general counsel furnishes legal advice and opinions, decisions, and services arising out of the administration and operation of the university, including civilian personnel; Freedom of Information Act and Privacy Act matters; use of appropriated and nonappropriated funds; standards of conduct and conflicts of interests; questions relating to congressional inquiries; fiscal law; memoranda of agreements/understanding; and review and revision of DAU regulations.

The Pentagon liaison serves as a link between DAU and all elements of DoD senior staff. The liaison establishes, monitors, and closes out action items from DoD.

The industry chair provides insight to the president, faculty, and students regarding international acquisition and defense industry motivations, concerns, and attitudes. The industry chair also assists with the placement of industry students in select DAU resident courses and helps DAU obtain guest speakers from the defense industry for classes, conferences, symposia, and other forums.

The director of the Learning Capabilities Integration Center is responsible for curricula policy interfaces and interrelationships. The director develops and manages learning assets, including certification and Core-Plus resident and online courses and continuous learning modules; develops course content and determines delivery methods; and prepares course materials. The director coordinates delivery of distance learning and manages the operation of the learning management system and the curriculum authoring/revision tool. The director oversees the Continuing Education Unit (CEU) program; serves as the university’s liaison with the functional leaders and respective executive secretaries regarding content requirements; and oversees the management and sustainment of the DAU course equivalency program for both internal DoD and external institutions. The director also is responsible for faculty professional development.

The regional branch deans are responsible for leading, planning, mission execution, and management in their respective regions. They develop DAU-aligned internal regional policies and procedures as necessary to manage their regions effectively; to deliver acquisition training courses, focused training, and mission assistance to customers using the most effective and efficient means; and to support curricula development, continuous learning, and knowledge sharing efforts.

The dean of DSMC is responsible for the operation of the college, which provides professional education to selected military officers and civilian personnel in all facets of defense systems management. The dean develops, manages, plans, schedules, and conducts executive program management, assignment-specific, international, and requirements courses, and
provides executive-level continuing education and mission assistance to support the Defense Acquisition Workforce. The dean also coordinates the university’s applied research program and products and supervises the Leadership Learning Center of Excellence.

The dean of the College of Contract Management is responsible for developing, maintaining, and delivering a full range of curricula, course offerings, and associated educational development opportunities for specific areas in Contract Management (CM). These areas include contracting, engineering and analysis, aircraft operations, and portfolio management and integration. The dean advises the director of the Defense Contract Management Agency and the DAU president on matters of CM workforce career development, management, and training.

The 4th Estate director of acquisition career management (DACM) reports to the DAU president and is responsible for providing policies, guidance, and oversight to the 4th Estate components (i.e., DoD components outside the military departments) to ensure uniform implementation of planning, programs, and procedures of the DAWIA. The DACM also represents the 4th Estate as a member of the Senior Steering Board and the Workforce Management Group.

ORGANIZATIONS COLOCATED WITH DAU
The director of Human Capital Initiatives performs Defense Acquisition Workforce strategic analysis and human capital planning for the OUSD(AT&L).

The Federal Acquisition Institute, established in 1976 under the Office of Federal Procurement Policy Act, facilitates and promotes career development and strategic human capital management for the civilian acquisition workforce.

OUR FACULTY AND STAFF
DAU faculty members have extensive experience in acquisition as well as the ability to communicate their knowledge in the classroom, online, and in the workplace during consulting efforts. Faculty members are expert practitioners who can draw on real-world experience to relate to students in the classroom and online and to develop training products that are directly applicable to the current challenges students face. Many faculty members join DAU following high-impact careers in the military, defense industry, and civil service because they are seeking an opportunity to share their experiences, to truly make a difference in the lives of the members of the Defense Acquisition Workforce, and to support the vitally important mission of DoD.

DAU staff members provide the support necessary to keep the university running efficiently, including operating and maintaining the university’s automation networks and providing audio, video, and telecommunications in support of classes and DAU/acquisition events. DAU staff also provides services in the areas of public affairs, protocol, administration and logistics, publications management and graphic design, academic support, and information systems support to all of DAU. The university’s staff is highly skilled in the support it provides the university and is essential to ensuring each student receives a positive experience at DAU.

OUR FACILITIES
DAU facilities reflect the university’s commitment to providing an integrated, interactive learning environment. The university has seen unprecedented growth in the number of acquisition students it serves, and, in response, DAU has increased its number of classrooms and support infrastructure. The university’s capabilities include the following:

» Almost 100 classrooms located throughout the university’s regions and college campuses
» More than 175 breakout rooms that can be used for small group discussions during classes
» More than 2,200 laptops available for classrooms, providing each student a computer
» Multiple TelePresence sites, allowing professors to connect remotely to classes and students
» A 400-seat main conference center
» Numerous small conference rooms, seating 25 to 100 people each
Since its inception as an academic institution, DAU has received guidance from the DAU Board of Visitors. The Board of Visitors consists of individuals selected for their preeminence in academia, business, and industry. The members advise the Under Secretary of Defense for Acquisition, Technology, and Logistics and the DAU president on matters such as the university’s organizational management, curricula, methods of instruction, and facilities. All Board of Visitors members, past and present, have been invaluable to the foresight, planning, and progress of DAU as an institution.
The DAU West Region is the primary acquisition learning location for 30,013 Defense Acquisition Workforce professionals in the Pacific Rim. The headquarters of DAU West Region is strategically located in San Diego to support a large contingent of the Defense Acquisition Workforce. From an ideal location on the Pacific Rim, San Diego is the anchor for a region poised for success in an era of growing needs for acquisition learning. The region also has satellite locations in Hill Air Force Base, UT; Los Angeles, CA; Port Hueneme, CA; and Pearl Harbor, HI.

The region’s primary customers are Air Force Space and Missile Center; Space and Naval Warfare Center; Nuclear Warfare Center; AF Air Logistics Center (Hill AFB); Navy Facilities Engineering Command; AF Space Command; and various other acquisition-centric organizations.

DAU has numerous partnerships with colleges and organizations in the DAU West Region. A list of all DAU partnerships can be found at www.dau.mil/aboutDAU/Lists/StrategicPartnership/itemdv.aspx.

The DAU Midwest Region campus is located in Kettering, OH, just south of Wright-Patterson Air Force Base near the city of Dayton. There are three satellite campuses within the region, located in Columbus, OH; Rock Island, IL; and Sterling Heights, MI. The region supports the training needs of 21,307 workforce members.

The DAU Midwest Region faculty and staff members focus on teaching, research, and mission assistance (targeted training, consulting, and partnering with agencies). Their agenda includes working with organizations within the region and staying current on major issues and needs of the Defense Acquisition Workforce.

Highly knowledgeable and experienced faculty members teach resident Defense Acquisition Workforce Improvement Act certification classes in various functional disciplines at the Kettering and satellite campuses, as needed at DAU regional campuses nationwide, and at customer sites across the United States and worldwide when required. The region’s faculty support distance learning courses taught over the Internet.

Responsible for mission assistance (consulting and other noncertification training) for the Defense Acquisition Workforce within the entire U.S. Midwest area, the DAU Midwest Region serves multiple Department of Defense and other federal organizations. DAU has numerous partnerships with colleges and organizations in the DAU Midwest Region. A list of all DAU partnerships can be found at www.dau.mil/aboutDAU/Lists/StrategicPartnership/itemdv.aspx.

With its headquarters in Huntsville, AL, DAU South Region supports the goals and objectives of 35,114 Defense Acquisition Workforce members by providing products and services to the acquisition community. The faculty and staff members of the DAU South Region provide teaching, research, and mission assistance (targeted training, consulting, and partnering with agencies). They focus on working with their customers and staying current on major issues and needs of the acquisition workforce throughout the region.

The South Region main campus is a 68,000-square-foot state-of-the-art teaching facility opened in Huntsville in 2010. DAU South can accommodate diverse student needs, providing classrooms furnished to enhance the overall learning experience and with extensive e-learning capabilities. The building also offers a fitness center, convenient parking, access to nearby shopping, a wide variety of dining facilities, and hotel accommodations.

In addition to the Huntsville campus, satellite facilities at Eglin Air Force Base, FL, and Warner Robins, GA, provide teaching and mission-support activities to the region’s acquisition community.

DAU has numerous partnerships with colleges and organizations in the South Region. A list of all DAU partnerships can be found at www.dau.mil/aboutDAU/Lists/StrategicPartnership/itemdv.aspx.
Huntsville, Alabama

The DAU Mid-Atlantic Region headquarters is strategically located in the town of California, MD, just 7 miles from the Patuxent River Naval Air Station. The headquarters offers a state-of-the-art training facility that includes a telepresence capability. The site has ample parking, a fitness center, and convenient access to nearby hotel accommodations, shopping, and dining. The Mid-Atlantic Region also has three additional training centers, which are located in Chester, VA; Norfolk, VA; and Sembach-Heuberg, Germany.

The faculty and staff of the Mid-Atlantic Region serve a Defense Acquisition Workforce of approximately 29,000 members, and concentrate their efforts on teaching, research, and mission assistance (targeted training, consulting, and partnering with agencies). The region’s faculty members also have extensive knowledge and background in acquisition, which allows them to draw upon real-world experiences to relate to students in the classroom, across various functional disciplines.

DAU has numerous partnerships with colleges and organizations in the DAU Mid-Atlantic Region. A list of all DAU partnerships can be found at www.dau.mil/aboutDAU/Lists/StrategicPartnership/itemdv.aspx.
California, Maryland

The DAU Capital and Northeast Region provides acquisition training and mission assistance services to customers both internationally and regionally. The region serves the needs of 37,846 Defense Acquisition Workforce members.

The regional area covers the states of Maine, Vermont, New Hampshire, Connecticut, Massachusetts, Rhode Island, New York, Pennsylvania, New Jersey, Delaware, most of Maryland (excluding the Patuxent River Naval Air Station), and in Virginia from the Richmond area north, including the national capital area and the District of Columbia. Due to its location in the national capital area, the region has a multitude of key customers, including the Army, Navy, Air Force, Marines, and defense agencies, along with numerous federal agencies.

The DAU Capital and Northeast Region’s main campus is at Fort Belvoir, VA. The post provides a full array of services, including a commissary, post exchange, library, and fitness facility. Student parking is conveniently located nearby. The area surrounding the post offers a wide variety of dining establishments and hotel accommodations.

DAU has numerous partnerships with colleges and organizations in the DAU Capital and Northeast Region. A list of all DAU partnerships can be found at www.dau.mil/aboutDAU/Lists/StrategicPartnerships/Remdv.aspx.
Fort Belvoir, Virginia
HAVE QUESTIONS? CONTACT daucne@dau.mil
Colocated with DAU Headquarters at Fort Belvoir, VA, the Defense Systems Management College (DSMC) is chartered to provide executive-level, international acquisition management and requirements management training, consulting, and research. DAU’s Leadership Learning Center of Excellence is an integral part of DSMC.

A core faculty of former DoD and industry program managers and other senior acquisition practitioners manages a dynamic curriculum and mentors course participants both during and after their DSMC residency. Executive-level courses are tailored to the responsibilities and needs of senior leaders in the DoD and other organizations. Requirements management courses meet the congressionally mandated certification training for operational leaders who identify and establish warfighting capability needs for DoD. International offerings include courses and seminars that promote excellence in structuring, negotiating, and executing international programs. The Leadership Learning Center of Excellence provides a portfolio of leadership courses for Defense Acquisition Workforce leaders and manages DAU’s Executive Coaching program.
The College of Contract Management (CCM) is colocated with Defense Contract Management Agency (DCMA) headquarters at Fort Lee, VA. The CCM is chartered to ensure well-trained faculty, well-designed curricula, and a cost-effective methodology to provide the training necessary to enhance the skills of the workforce within DCMA.

Courses and online learning assets will continue to be fielded throughout fiscal year 2015. Curricula will focus on contract management functional areas such as contract administration, pricing, quality assurance, industrial manufacturing, earned value management, software engineering, engineering technical support to pricing, and aircraft operations.

The CCM will support DCMA’s provision of customer-focused contract administration services, which offer acquisition insight and engagement to enable the Defense Acquisition Workforce to produce the right product or service (quality) at the right time (delivery) and the right price (value). To this end, CCM’s curricula will focus on delivering both formal training on contract management competencies needed for DCMA functional personnel to carry out their jobs and informal learning assets providing on-demand performance support.

CCM training will be in addition to and in alignment with other training under the Defense Acquisition Workforce Improvement Act that DCMA functional personnel will continue to receive. Portions of the CCM curricula also will be of benefit to non-DCMA personnel performing contract management functions.
Fort Lee, Virginia

Section 2: DAU’s Learning Assets

Training and Continuous Learning Courses
Mission Assistance
Knowledge Sharing
Other Services
As the Defense Acquisition Workforce’s premier learning and development center, DAU aligns its certification training with the specific career field requirements as outlined by the various acquisition career field functional leaders. In addition, the university has taken innovative measures to ensure that learning and acquisition support are available beyond certification, creating a global learning environment at the point of need. All DAU’s services, individually and in combination, support the workforce throughout a professional’s career, from entry level to senior leadership. The overview that follows summarizes DAU’s numerous services.

**TRAINING AND CONTINUOUS LEARNING COURSES**

**Training.** DAU delivers training courses in support of the Defense Acquisition Workforce Improvement Act (DAWIA) requirements, allowing a member of the Defense Acquisition Workforce to be certified at Levels I, II, or III. The directors of acquisition career management (DACMs) for the Services and DoD agencies manage attendance at these courses. Normally, the DACMs give priority to Defense Acquisition Workforce members who are pursuing certification in an acquisition career field. For updates to these course descriptions during the training year, consult the online version of the catalog at [http://icatalog.dau.mil/](http://icatalog.dau.mil/).

**Continuous Learning.** DAU also delivers online learning assets designed to help members of the Defense Acquisition Workforce continue to learn about vital acquisition topics for personal awareness. The DAU Continuous Learning Center (CLC) provides those continuous learning modules. Easy-to-use online modules sponsored by Harvard ManageMentor 10 provide information on topics fundamental to managerial success. These topics range from running an effective meeting or managing a project to negotiating skills. Information on these opportunities is available at [www.dau.mil/cdc](http://www.dau.mil/cdc). DAU continually develops and adds new offerings to the CLC site. To see what’s new, check the CLC Web site frequently.

**Targeted/Tailored Team Training** is offered on demand. Our faculty meets with leadership from an acquisition organization to determine specific or unique training needs. Courses focus on particular acquisition-related topics and are delivered onsite. See Appendix C for a list of courses. These courses also can be tailored to an organization’s requirements.

**Rapid Deployment Training** provides quick notification and training by posting new policy training materials online within hours of policy release, then sending DAU training teams to major acquisition field organizations. Rapid deployment training has included DoD 5000-series changes, life-cycle support policy (including creation of the program support manager), and Better Buying Power initiatives.

**MISSION ASSISTANCE**

Today’s acquisition environment is complex and presents many challenges in business, technical, and management areas. Shrinking DoD budgets are creating extraordinary pressures on acquisition organizations and their teams. DAU Mission Assistance provides direct support to acquisition organizations and teams in meeting these challenges. The collective acquisition experience and knowledge of our faculty across DoD acquisition disciplines is available to help with your programs. This assistance is offered through consulting services, acquisition workshops, customized team-training events, and leadership development programs. We also offer rapid deployment training to provide immediate training resources on new acquisition policies.

**Consulting Services** are provided by our seasoned faculty and staff on either a long- or short-term basis. Consulting and facilitation services are offered in many areas, such as strategic planning, acquisition strategy, milestone preparation, collaborative problem solving, and organizational assessments.

**MDAP/MAIS Mission Assistance.** Major defense acquisition programs (MDAPs) and major automated information systems (MAISs) face many challenges throughout their life cycle. An experienced “thinking partner” can help reconcile a wide range of challenges, from leadership to
programmatic, and has proven invaluable for many program managers (PMs) and program management offices (PMOs).

Collaborative Problem-Solving events, facilitated by DAU faculty, provide opportunities for group deliberation and decisionmaking. Teams use networked computers to share information, brainstorm, develop plans, examine alternatives, and address complex problems. This support is available at all DAU locations.

Program Workshops help program office teams navigate through critical stages of a program’s life cycle.

» Acquisition Program Transition Workshops (A PTW) help acquisition teams smoothly transition from one acquisition life-cycle phase to the next one via a well-executed milestone preparation and review process. They address the importance of quickly establishing effective working relationships and task priorities between government and industry program offices.

» Service Acquisition Workshops are just-in-time workshops designed to facilitate specific requirements. Using a seven-step process, DAU faculty members facilitate hands-on training for acquisition teams to develop and execute performance-based Service requirements in their specific domains.

Leadership Development Courses include Leading in the Acquisition Environment, Integrated Acquisition for Decision Makers, and Forging Stakeholder Relationships. Descriptions are available online at catalog.dau.mil.

Defense Acquisition Executive Overview Workshops provides general/flag officers and members of the Senior Executive Service an executive-level understanding of the defense acquisition system and supporting processes. Workshop content is tailored to the needs of the executive, conducted on demand, and delivered in a one-on-one, desk-side session.

Executive Coaching offers one-on-one support for acquisition executives with an experienced executive coach who serves as a mentor and sounding board on current activities and future objectives.

For more information on DAU Mission Assistance offerings and points of contact, visit dau.mil/ma.

**KNOWLEDGE SHARING**

Knowledge sharing—achieved by blending people, processes, and information technology—improves organizational performance through increased efficiency, effectiveness, and innovation. Leveraging advanced portal and collaboration technologies, DAU supports Defense Acquisition Workforce members’ informal learning and job performance. Online resources and interactive venues facilitate the sharing of documented knowledge, experiences, and lessons learned among individuals and organizations. DAU’s primary components of knowledge sharing are the AT&L (Acquisition, Technology, and Logistics) Knowledge Management System (AKMS)—composed of the Defense Acquisition Portal (DAP), the Acquisition Community Connection (ACC), the DoD Acquisition Proven Practices & Lessons Learned (ACQ P$L$L), Ask A Professor (AAP), and the DoD Acquisition Encyclopedia (ACQuipedia)—as well as the DAU Knowledge Repository and Acker Archives. Users can view short videos and get additional details on all elements of the AKMS at https://acc.dau.mil/at&lkm.

**Defense Acquisition Portal (DAP)**

The DAP is the central repository for acquisition policy and reference materials. It focuses on “Big A” processes—describing all phases of the acquisition process, from requirements generation and budget development through overall management of the acquisition process.

Using the DAP, the acquisition professional can quickly access necessary information to accomplish specific tasks directly related to program and project support. The DAP is organized as a series of pages under tabbed labels, making it easy for the user to locate information. The DAP provides the Defense Acquisition Workforce with information on and links to the following:

» Better Buying Power Initiative Gateway (http://bbp.dau.mil/)

» Acquisition Proven Practices and Lessons Learned—A consolidation of proven practices and lessons learned including the BBP Should-cost repository (https://dap.dau.mil/apl)

» Defense acquisition policy and regulations

» Defense Acquisition Guidebook (https://dag.dau.mil)

» Milestone Document Identification tool (https://dap.dau.mil/mdid)

» Federal Acquisition Regulation (FAR), Defense Federal Acquisition Regulation Supplement, and other FAR supplements

» Education and professional development

» Career management and DoD human capital initiatives

» Community areas
DAU’s Learning Assets

» Overview of industry’s role in DoD processes
» Special topic and functional “Gateways”
» News, publications, and events
» Ask A Professor site (https://dap.dau.mil/aap)
» DAU Video Stream library (https://dap.dau.mil/daustream)
» Application “smart” page of DAU quick-links to acquisition Web sites, education/training, job aides, guides, and other resources (https://dap.dau.mil/smart)
» Service Acquisition Mall and Acquisition Requirements Roadmap Tool (http://sam.dau.mil)
» ACQuipedia site (https://dap.dau.mil/acquipedia)
» Glossaries and acronyms

Users can access information and sites directly using the URLs provided or through the DAP at https://dap.dau.mil.

Acquisition Community Connection (ACC)
The ACC is an online forum that includes communities of practice and collaborative workspaces centered on acquisition-specific topics. ACC is available to the Defense Acquisition Workforce 24/7 to collaborate, share, and connect with one another in an online environment. Community members are able to interact and share lessons learned and experiences to support job performance, avoid the duplication of effort, and advance the connection of people and ideas.

Communities play a central role in helping the workforce stay connected to expertise and in providing the tools, resources, and connections that help people improve performance. Users can access the ACC at https://acc.dau.mil or through their DAU single sign-on capability.

Performance Support Tools
Performance support tools fill the gaps between formal courses and on-the-job learning. These tools assist you by enhancing online certification courses, continuous learning modules, and knowledge sharing opportunities by providing job support at the point of need and enabling you to “learn by doing.” These tools include the Program Manager’s e-Tool Kit and the Acquisition Requirements Roadmap Tool (ARRT) These and
other tools can be accessed at https://acc.dau.mil then clicking on “Guidebooks and Tools.”

**ACQuipedia**

ACQuipedia is an online encyclopedia of common defense acquisition topics and was developed as a collaborative project to create content around acquisition-related topics. ACQuipedia provides the Defense Acquisition Workforce with quick access to information in a succinct and digestible format. Article content aggregates the most relevant references and learning assets to focus users and quickly provide high-value content.

Each topic is identified as an article, and each article contains a definition, a brief narrative that provides context, and links to the most pertinent policy, guidance, tools, practices, and training on the subject. ACQuipedia articles support the DoD Integrated Product Support Implementation Roadmap, community-of-practice libraries, and course material, as well as the PM e-Tool Kit and other performance learning tools. Users can access ACQuipedia at https://dap.dau.mil/acquipedia.

**Program Managers e-Tool Kit**

The Web version of the popular Program Managers e-Tool Kit is easy to update with the latest information; key text and diagrams link directly to cited policy, related communities of practice, and comprehensive ACQuipedia articles. Visitors to the e-Tool Kit will find a table of contents listing all information in the handbook, and clicking on a topic will send them directly to that page in the handbook. Table of contents topics are available in the left-hand menu, and clearly labeled navigation buttons allow users to view each individual page in the handbook. Users can access the Program Managers e-Tool Kit at https://pmtoolkit.dau.mil.

**DAU Video Stream’s iTunes University, and YouTube**

The DAU video library provides access to videos on a variety of topics for all Defense Acquisition Workforce career fields, and the university continues to add new videos. The DAU Video Stream is merged with iTunes, making DAU the first corporate university to appear on Apple’s iTunes University, and it provides users with video access from their mobile devices. All content is free to the public. The videos are available at https://deimos.apple.com/WebObjects/Core.woa/Browse/dau.mil or open iTunes, click on the iTunes Store link, select the Universities & Colleges link, and look for Defense Acquisition University.

And iTunesU Media can be accessed via iTunes-enabled mobile devices such as the iPhone, iTouch, or iPad. DAU also is leveraging You Tube’s extensive reach to promote its learning assets and to spread awareness of Defense acquisition.

Users can access the DAU video stream at https://dap.dau.mil/daustream.

**DAU Knowledge Repository and Acker Archives**

The DAU Knowledge Repository and Acker Archives (KR & AA) is positioning itself to reach beyond the DAU community and support the greater Defense Acquisition Workforce. It will provide products, via physical and virtual environments, and exceptional user-oriented service to facilitate a Defense Acquisition Workforce that is fully knowledge-enabled by the focused power of information and enhanced in its ability to agilely support the warfighter’s capability needs, both now and in the future. As a result, the current KR & AA Web site, www.dau.mil/pubscats/Pages/Acker%20Library.aspx, is in transition and will be optimizing its resources to support the workforce.

The Acker Archives provides access to historical DAU and other uniquely relevant materials that are deemed pertinent in the history of Defense acquisition. Digitization efforts are underway to provide online access to these materials. Archival assistance (working with the requestor to identify and provide requested materials) is available via appointment with the KR & AA staff. The KR & AA physical collection is located in Building 270 at DAU Fort Belvoir. Interlibrary loans through the Online Computer Library Center are obtained for items not available in the collection.

**OTHER SERVICES**

**Strategic Partnerships**

DAU has established strategic partnerships with universities and colleges so Defense Acquisition Workforce members can apply DAU coursework toward college and university degrees and certificates. While each partnership is unique in what it offers, the objective of the partnership program is to provide workforce members with opportunities to maximize academic accomplishments by receiving credit for DAU courses toward a graduate, undergraduate, or certificate program offered by a strategic partner.
DAU’s Learning Assets

For help in finding a program that suits individual needs, prospective students can visit the DAU Strategic Partnership page at the DAU Web site (www.dau.mil/aboutDAU/Lists/StrategicPartnership/itemdv.aspx). Various colleges and universities with which DAU has current partnership agreements are listed on that page. To view specific information on the various partnership benefits offered by each school, simply click the school’s name to be linked to a corresponding landing page. Landing pages will provide additional information on degree and certificate programs, including a point of contact at the school and application directions.

The Strategic Partnership page also contains a link to the Excelerate program. This unique partnership with select schools allows DAU students who have achieved Level II and Level III Defense Acquisition Workforce Improvement Act (DAWIA) certification to apply these credits toward bachelor’s and master’s degrees and certificates. For a current list of partners participating in the Excelerate program, go to www.dau.mil/AboutDAU/pages/excelerate.aspx.

Equivalency Program
DAU has partnered with other education and training providers that offer courses, programs of instruction, or assessment processes that are substantially similar to the learning outcomes addressed in specific DAU courses. Equivalency courses can be used in lieu of a DAU course when seeking certification in an acquisition career field.

For current and potential providers of equivalency courses, go to http://catalog.dau.mil/appg.aspx.

Senior Service College Fellowship
The Senior Service College Fellowship (SSCF) program at DAU conducts offerings in Huntsville, AL; Warren, MI; and Aberdeen Proving Ground, MD. This 10-month, in-residence, leadership education program is a partnership between the Army and DAU designed to provide senior-level civilians equivalent training to their military counterparts in preparation for senior-level leadership responsibilities.

Target Attendees: Civilians at the GS-14 or -15 level (or equivalent pay band) in all acquisition career fields who are members of the Army Acquisition Corps and seek to develop and apply leadership skills and competencies.

Prerequisite(s): Level III certification in a primary acquisition career field; commander’s letter of endorsement. Participants in this program are selected by a central selection board convened annually by the Army Acquisition Corps in Washington, DC. Upon completion of the program, participants will receive credit by the Army for Senior Service College equivalent to its Army War College (Military Education Level-1) attendance and credit for the Program Manager’s Course (PMT 401). This program also offers the opportunity to secure a master’s degree in leadership.

The program contains the following core areas: leadership, mentoring, and research. The program offers nationally recognized speakers, university courses, a national security module, PMT 401, battlefield and Unified Combatant Command tours, and a number of DAU classes related to leadership. The SSCF program assistance is centrally funded by the U.S. Army Acquisition Support Center. The program is intense and provides time to think and reflect without the distractions of the typical government workplace.

Center for Defense Acquisition Research
The DAU Center for Defense Acquisition Research supports the Defense Acquisition, Technology, and Logistics (AT&L) community by focusing research on the acquisition of defense-related materiel and services. The Center helps bring analytical research and insight to bear on critical issues that affect policies, processes, and the workforce. These issues have been identified by the leaders of the entire AT&L community, across government, industry, and academia. The Center coordinates investigations performed by a wide range of researchers: DAU faculty, staff, and students; federally funded research and development centers; think tanks; academia; and members of the wider acquisition community, in both government and industry, whether in the United States or abroad.
Learn more about research products and participate in the creation of new knowledge at https://acc.dau.mil/research or contact research@dau.mil.

**Periodicals**

In an effort to maximize resources, the *Defense AT&L* magazine and the *Defense Acquisition Research Journal (ARJ)* are now available to individual subscribers only online.

To be alerted by email when the new issue of either publication is available, sign up for the DAU LISTSERV by sending an email to datlonline@dau.mil and/or darjonline@dau.mil with “Add to LISTSERVE” in the subject line.

**Publications**

Printed copies of *Defense AT&L* and *Defense ARJ* are available only to organizations and technical libraries, while supplies last. Requests should be sent to DAU, ATTN: Publications, 9820 Belvoir Road, Suite 3, Fort Belvoir, VA 22060-5565; call 703-805-4923; or fax requests to 703-805-3726.

The certification standards published in this Catalog are in effect as of October 1, 2014. Updates are posted in the DAU iCatalog at www.icatalog.dau.mil as they occur. Check the iCatalog for current information on certification standards and courses.
The functional leaders are senior leaders who specialize in a functional area of acquisition, technology, and logistics. Requirements for career fields may change as a result of new technologies, mission requirements, or Service member needs, and it is the job of the functional leaders to ensure that their respective career fields maintain relevance. Functional leaders are involved in chairing integrated product teams (IPTs) to address career development issues and identify training, education, and experience requirements.

The results from the IPTs help provide course relevance and direction of course content to curricula developers and course authors, as well as a rigorous, ongoing quality assessment of DAU course offerings.

An overview of each functional leader’s area of responsibility and the certification and core plus table for the functional area are provided on the following pages.
ACQUISITION AND PROGRAM MANAGEMENT FUNCTIONAL COMMUNITY

Acquisition professionals in the Program Management career field are concerned with all of the functions of a program management office (PMO) or a program executive office (PEO). Program management professionals serve in a wide range of PMO and PEO positions to accomplish program objectives for the development, production, and sustainment of systems to meet the user’s operational needs. They may also serve in a number of support and management positions throughout the workforce. A program manager (PM) exercises authority and responsibility to accomplish program objectives for planning, organizing, staffing, controlling, and leading the combined efforts of acquisition personnel in the management of a defense acquisition program throughout the system’s life cycle. The fundamental responsibilities of the PM are to balance and be accountable for credible cost, schedule, and performance reporting; to interpret the DoD 5000 Series regulations and tailor procedures consistent with sound business practices and the risks associated with the product being acquired; and to ensure that high-quality, affordable, supportable, and effective defense systems are delivered to satisfy warfighter needs on or ahead of schedule and within budget.

INTERNATIONAL ACQUISITION FUNCTIONAL COMMUNITY

International Acquisition is a career path created by the Under Secretary of Defense for Acquisition, Technology, and Logistics. International Acquisition establishes a formal career path across all applicable acquisition career fields. Formalizing the career path systematically with the personnel systems enables two important actions. First, specific billets can be subcoded as international acquisition positions requiring individuals possessing both core and international acquisition qualifications to fill the respective positions and receive the necessary training. Second, the existing personnel management infrastructure will record each Defense Acquisition Workforce member’s achievement toward this special qualification. This information ultimately will provide visibility to members of senior management, enabling them to identify and select internationally qualified persons to lead international programs.
### Program Management Level I

<table>
<thead>
<tr>
<th>Type of Assignment</th>
<th>Representative Activities</th>

**EDUCATION:** Baccalaureate degree, preferably with a major in engineering, systems management, or business administration

**EXPERIENCE:** 1 year of acquisition experience (in addition to core certification experience)

¹The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.

²When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

**NOTE:**  
• Some continuous learning (CL) modules have been created by extracting lessons in their entirety from a training course. If this is the case for the CL module(s) identified in the above core certification standards, the course the CL module was extracted from is identified in the “Notes” section of the CL course description, and the course can be substituted to meet the certification standard.
### Program Management Level II

#### Type of Assignment

<table>
<thead>
<tr>
<th>Type of Assignment</th>
<th>Representative Activities</th>
</tr>
</thead>
</table>
| » Weapon Systems             | - Structures and guides systems engineering activities  
- Establishes a risk/opportunity program; structures and conducts technical reviews  
- Works with contracting personnel  
- Maintains configuration control  
- Leads IPTs in support of developing and delivering a weapon system, Command and Control (C2)/network-centric system, or space system |

| » Services                   | - Structures incentives tied to desired outcomes for service contracts, prepares plans for mitigating risks, provides contract tracking and oversight  
- Performs most acquisition planning tasks as established in Attachment 1 to AT&L Services Memo of Oct. 2, 2006 |

| » Business Management Systems/IT | Leads IPTs, identifies and manages enterprise-level business systems and issues, and applies performance measures within the acquisition community and program office context that directly impact systems under development |

| » International Acquisition | Participates in successful cooperative development, production partnership, or system modification/transfer during pre-system acquisition or system acquisition with allied and friendly nations, either cooperative or security assistance in nature. |

#### Core Certification Standards¹ (Required for DAWIA certification)

| » Acquisition Training       | - ACQ 202 Intermediate Systems Acquisition, Part A  
- ACQ 203 Intermediate Systems Acquisition, Part B (R) |

AUDITING FUNCTIONAL COMMUNITY

Persons in this career field perform contract auditing, accounting, and financial advisory services for DoD and other government agencies in negotiation, administration, and settlement of contracts and subcontracts. Duties include evaluating information about contractor economic assertions, comparing those assertions to established criteria, and reporting the results to interested third parties.

Some reasons for audits include proposal submissions, incurred cost, compliance with the Truth in Negotiations Act, compliance with the Cost Accounting Standards, contract terminations, claims for abnormal conditions, contractor financial condition, and contractor systems and operations.

- "(R)" following a course title indicates the course is delivered as resident-based instruction.
BUSINESS FUNCTIONAL COMMUNITIES

Business—Cost Estimating

Business—Cost Estimating is the area of Business where engineering judgment and experience are utilized in the application of scientific principles and techniques to the problems of cost estimation, cost control, and profitability. The key objective in cost estimating is to arrive at a defendable estimate that provides leadership with realistic funding expectations. This functional community covers positions that manage, supervise, lead, or perform scientific work that involves designing, developing, and adapting mathematical, statistical, econometric, and other scientific methods and techniques. The work also involves analyzing management problems and providing advice and insight about the probable effects of alternative solutions to these problems.

Business—Financial Management

Business—Financial Management is the area of Business concerned primarily with the total financial affairs of an organization, department, or program and the translation of actions past, present, and proposed into meaningful and relevant information for use in management. It includes the functions of budgeting, accounting, reporting, and the analysis and interpretation of the financial significance of past events and future plans. It sometimes also includes other related functions such as internal auditing, management analysis, and others. It is not primarily concerned with the technical procedures and methodology of those individual functions.

Financial management involves the art of interrelating data to obtain a perspective of the total financial situation that will assist managers in program planning and decisionmaking. A very simple operating program may require only a minimum of financial management, and this, in some cases, can be provided by the manager. Complex programs need broad financial advice and know-how, and this can only be furnished following the synthesizing, analyzing, and interrelating of meaningful financial data with programming and planning information by an organization and officials particularly adept in financial matters.

### Education

Formal education not required for certification

### Experience

2 years of acquisition experience in budgeting, financial, and/or earned value management in support of an acquisition program

---

¹The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.

²When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

NOTE: “(R)” following a course title indicates the course is delivered as resident-based instruction.

---

EDUCATION: Associate in Applied Science (A.A.S.) degree or equivalent in business or a business-related field

EXPERIENCE: 2 years of acquisition experience in budgeting, financial, and/or earned value management in support of an acquisition program
# Business—Financial Management Level II

## Type of Assignment

### Budget/Program FM Analyst
- Applies general knowledge of budget and program principles, policies, procedures, concepts, standards, terminology, and financial management and business operation systems
- Applies knowledge of acquisition life-cycle process and supports development and preparation of acquisition documents
- Prepares and/or reviews acquisition and financial management documents
- Reviews, allocates, or manages acquisition resources and programs

### EVM Analyst
- Interprets program status and predicts trends by analyzing earned value cost and schedule data as elements of integrated program management
- Applies EVM concepts as principal EVM member of an IBR review IPT
- Interprets ANSI EVM standard as entry-level EVMS review team evaluator
- Completes EVM requirements for acquisition solicitation packages

## Core Certification Standards¹ (Required for DAWIA certification)

### Acquisition Training
- ACQ 202 Intermediate Systems Acquisition, Part A
- ACQ 203 Intermediate Systems Acquisition, Part B (R)

### Functional Training
- BCF 106 Fundamentals of Cost Analysis
  - If not already completed (as required) at Level I, AND
- BCF 205 Contractor Business Strategies (R)
- BCF 220 Acquisition Business Management Concepts
- BCF 225 Acquisition Business Management Application (R)
- CLM 017 Risk Management
- CLM 024 Contracting Overview
- EVM 201 Intermediate Earned Value Management (R)

1. The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.
2. When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

NOTE: "(R)" following a course title indicates the course is delivered as resident-based instruction.
CONTRACTING, PURCHASING, AND INDUSTRIAL/CONTRACT PROPERTY MANAGEMENT FUNCTIONAL COMMUNITIES

Contracting
Contracting specialists create effective, efficient, and proper business arrangements, have a strategic focus on acquisition, and leverage DoD spending to use taxpayers’ money prudently based upon customers’ needs. The Contracting career field includes the positions of contract negotiator, contract specialist, contract administrator, contract termination specialist, contract price and/or cost analyst, procuring contracting officer, administrative contracting officer, termination contracting officer, small business specialist, and procurement analyst. These individuals develop, manage, supervise, or perform procedures involving the procurement of supplies and services (including construction and research and development); acquisition planning; cost and price analysis; solicitation packages; competitive source selections; preparation, negotiation, and award of contracts through sealed bidding or negotiation procedures; all phases of contract administration; and termination or closeout of contracts. Individuals are required to have knowledge of the legislation, policies, regulations, and methods used in contracting, as well as knowledge of business and industry practices, sources of supply, cost factors, cost and price analysis techniques, negotiation techniques, and general requirements characteristics.

Industrial/Contract Property Management
The Property career field includes the industrial property management specialist and industrial property clearance specialist, which includes the property administrator and plant clearance officer. It can also include contract and industrial specialists, if they are assigned contract property management responsibilities. Individuals in this career field oversee and manage life-cycle processes for government-owned property being utilized by contractors; provide advice and assistance on property-related matters during acquisition planning, contract formation, and contract management; review the contractor’s purchasing system as it pertains to property; audit the contractor’s property management system; coordinate and process contract property disposal actions; perform investigations of instances of loss, theft, damage, or destruction of government property and grant relief or recommend liability; and develop policies and procedures for government property management.

Purchasing
Purchasing career field members typically are purchasing agents or supervisory purchasing agents. They purchase, rent, or lease supplies, services, and equipment through either simplified acquisition procedures or placement of orders against pre-established contractual instruments to support operational requirements. This function requires knowledge of legislation, policies, and regulations pertaining to these methods of acquisition, as well as knowledge of commercial supply sources and of common business practices for roles, prices, discounts, deliveries, stocks, and shipments.

1. The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.
2. See 10 U.S.C. 1724 (provides for limited exceptions).
3. Workforce members assigned to the positions(s) identified in the Unique Position Training Standards section should meet the training standard(s) identified within 6 months of assignment.
4. When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

NOTE: "(R)" following a course title indicates the course is delivered as resident-based instruction.
Contracting Level III

**Type of Assignment** | **Representative Activities**
--- | ---
1 - Operational Contracting | Contracting functions in support of post, camp, station, or base
2 - Research and Development | Contracting functions in support of research and development
3 - Systems Acquisition | Contracting functions in support of systems acquisition including all ACAT programs
4 - Logistics and Sustainment | Contracting functions performed by the Defense Logistics Agency or by other offices to sustain weapon systems
5 - Construction/A&E | Contracting functions in support of construction and/or architect and engineering services
6 - Contingency/Combat Operations | Contracting functions performed in a contingency or combat environment
7 - Contract Administration Office | Contracting functions primarily focused on contract administration
8 - Contract Cost/Price Analyst | Contracting functions primarily focused on advanced cost/price analysis
9 - Small Business Specialist | Contracting functions primarily focused on advising small businesses or on strategies for maximizing use of small businesses
10 - Other | Contracting functions that perform a variety of assignments or are at a headquarters, secretary, or OSD

### Core Certification Standards

(Required for DAWIA certification)

**Acquisition Training**

- **ACQ 202** Intermediate Systems Acquisition, Part A

**Functional Training**

- **CON 360** Contracting for Decision Makers (R)
- 1 additional course from the Harvard Business Management Modules
- 1 additional course from the list below:
  - **ACQ 265** Mission-Focused Services Acquisition (R)
  - **ACQ 315** Understanding Industry (Business Acumen) (R)
  - **ACQ 370** Acquisition Law (R)
  - **CON 232** Overhead Management of Defense Contracts (R)
  - **CON 244** Construction Contracting (R)
  - **CON 253** Fundamentals of Cost Accounting Standards (R)
  - **CON 334** Advanced Contingency Contracting Officer’s Course (R)
  - **CON 370** Advanced Contract Pricing (R)

**Education**

- At least 24 semester hours in accounting, law, business, finance, contracts, purchasing, economics, industrial management, marketing, quantitative methods, or organization and management
- Baccalaureate degree (any field of study)

**Experience**

- 4 years of contracting experience

### Unique Position Training Standards

**Level III Contracting personnel assigned to or devoting at least 50 percent of their time in support of an MDAP/MAIS program**

**ACQ 203** Intermediate Systems Acquisition, Part B (R)

**EXPERIENCE:** None specified

---

³ Level II is the highest certification level for this career field.

² The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level. To attain certification at Level II, workforce members must also possess a Level I certification in Purchasing.

³ When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

**NOTES:**

- *(R)* following a course title indicates the course is delivered as resident-based instruction.
- Some continuous learning (CL) modules have been created by extracting lessons in their entirety from a training course. If this is the case for the CL module(s) identified in the above certification standards, the course the CL module was extracted from is identified in the "Notes" section of the CL course description, and the course can be substituted to meet the certification standard.
In the Engineering and the Production, Quality, and Manufacturing career fields, our emphasis is on acquisition excellence. Our goal is to position the Defense Acquisition Workforce for future success by focusing on technical excellence and providing consistent and integrated policy and guidance. This will help ensure we have the right breadth and depth of skills and capabilities in the workforce.

**Engineering**
The Engineering career field’s workforce has a vital role in fielding high-quality, affordable, supportable, and effective defense systems. Its role requires evolving and verifying an integrated, total life-cycle, balanced set of systems, people, and process solutions that satisfy the customer’s needs and meet DoD affordability goals. This requires technical competency, critical and strategic thinking, knowledge of various product domains, and knowledge of other engineering disciplines.

The Engineering career field curriculum is designed to bring breadth and depth of knowledge to the workforce at the appropriate certification level. The curriculum focuses on the technical processes, technical management processes, application of system engineering throughout the system acquisition life cycle, and the ability to apply critical systems-thinking concepts to complex technical management problems.

**Production, Quality, and Manufacturing (PQM)**
The PQM career field plays a vital role in ensuring DoD products are delivered on time, perform as expected, and are cost effective. The evolution in systems design has increased the demand for manufacturing talent throughout the full acquisition life cycle. The DoD will continue to develop sophisticated systems, which frequently push the state of the art, as DoD responds to a variety of demands. To address our systems’ complexity, DoD needs a competent PQM workforce.

The PQM curriculum reflects the understanding that production readiness should not wait until the end of the development process. Producibility should be systematically examined throughout the design and development process so manufacturing cost drivers and risks can be identified and mitigated early in system development. PQM courses are designed to produce quality professionals who can advise and collaborate with customers and suppliers to help them integrate quality practices into their manufacturing processes.

Last year the functional leader reorganized the Systems, Planning, Research, Development and Engineering (SPRDE) career field by merging the SPRDE-Systems Engineering and SPRDE Program Systems Engineer career paths into a single career field and renaming the combined population as the Engineering career field.
## Engineering Level I

### Type of Assignment

<table>
<thead>
<tr>
<th>Type of Assignment</th>
<th>Representative Activities</th>
</tr>
</thead>
</table>
| » Functional Engineer                       | • Plans, organizes, conducts, and/or monitors engineering activities relating to the design, development, fabrication, installation, modification, sustainment, and/or analysis of systems or systems components for a functional specialty (i.e., reliability and maintainability, systems safety, materials, avionics, structures, propulsion, chemical/biological, human systems interfaces, weapons, computer engineer/scientist, etc.)
|                                             | • Demonstrates how systems engineering technical processes and technical management processes guide engineering activities for a functional specialty                                                                                                                                                    |
| » General Engineer                          | • Plans, organizes, conducts, and/or monitors engineering design, development, and sustainment activities for systems or systems components                                                                                                                                                                                                                       |
|                                             | • Demonstrates how systems engineering technical processes and technical management processes guide design, development, and sustainment activities                                                                                                                                                                                                                       |
| » Research Engineer or Scientist            | • Plans, organizes, and conducts science and technology research and engineering activities supporting acquisition programs, projects, or activities                                                                                                                                                                                                                   |
|                                             | • Demonstrates how systems engineering technical processes and technical management processes guide science and technology research and engineering activities                                                                                                                                                                                                                   |
| » Technical Support (applicable to Level I only) | • Plans, organizes, and conducts technical activities relating to the design, development, research, fabrication, installation, modification, sustainment, inspection, production, application, standardization, testing, and, or analysis of systems or systems components for a technical specialty                                                                                       |
|                                             | • Demonstrates how systems engineering technical processes and technical support processes guide design, development, and sustainment activities                                                                                                                                                                                                                       |

EDUCATION: Graduate degree in a discipline such as engineering, physics, chemistry, biology, mathematics, operations research, engineering management, or computer science

EXPERIENCE: 4 years of technical experience (in addition to core certification experience)

The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.

When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

NOTES:
- "(R)" following a course title indicates the course is delivered as resident-based instruction.
- Some continuous learning (CL) modules have been created by extracting lessons in their entirety from a training course. If this is the case for the CL module(s) identified in the above core certification standards, the course the CL module was extracted from is identified in the "Notes" section of the CL course description, and the course can be substituted to meet the certification standard.
Type of Assignment | Representative Activities
--- | ---
Engine | • Establishes production planning and control process and measures the overall effectiveness of the organization, methods, systems, and procedures  
• Builds producibility into designs (tooling, facilities, and products)  
• Builds quality characteristics into the designs of products and services
Industrial Specialist | • Develops and carries out plans for the expansion, conversion, integration, or utilization of industrial production facilities and conducts surveys of industrial plants to determine capacity and potential for production of specific commodities.  
• Performs production surveillance/oversight of Defense contractors providing services or supplies (including contractor proposal reviews) based on mission and function of each agency and local organization.  
• Performs industrial base studies for capability and capacity.  
• Participates in pre- and post-award conferences as subject matter experts.
Quality Assurance Specialist | • Ensures the proper quality characteristics have been integrated into the products and validates/verifies adherence to specified requirements through test and measurement  
• Performs quality assurance surveillance/oversight of Defense contractors providing services or supplies (including contractor proposal reviews) based on mission and function of each agency and local organization.  
• Performs industrial base studies for quality management  
• Participates in pre- and post-award conferences as subject matter experts.
Business/Industrial Specialist | Performs planning, estimating, scheduling, or inspecting of the use of labor, machines, and materials in manufacturing operations producing equipment, systems, facilities, supplies, or maintenance

### Core Certification Standards

1 (Required for DAWIA certification)

**Acquisition Training**

- ACQ 101 Fundamentals of Systems Acquisition Management

**Functional Training**

- PQM 101 Production, Quality, and Manufacturing Fundamentals  
- CLE 003 Technical Reviews  
- CLM 017 Risk Management

**Education**

- Formal education not required for certification

**Experience**

- 1 year of acquisition experience in manufacturing, production, or quality assurance  
- Similar experiences gained from other government or industry positions that meet above standards

The Facilities Engineering career field encompasses a variety of professional individuals with diverse skills focused on the design, construction, and life-cycle maintenance of military installations, facilities, civil works projects, airfields, roadways, and oceanic facilities. It involves all facets of life-cycle management from planning through disposal, including design, construction, environmental protection, base operations and support, housing, real estate, and real property maintenance. Additional duties include advising or assisting commanders and acting as, or advising, program managers and other officials as necessary in executing all aspects of their responsibilities for facility management and the mitigation or elimination of environmental impact in direct support of the defense acquisition process.

INFORMATION TECHNOLOGY FUNCTIONAL COMMUNITY

This career field includes computer scientists, information technology (IT) management specialists, computer engineers, telecommunications managers, IT program and project managers, and others who directly support the acquisition of IT. Personnel in this career field typically provide direct support for acquisitions that use IT, including national security systems, Defense business systems, and platform IT for weapon systems. They apply IT-related laws, policies, and directives, and provide IT-related guidance throughout the total acquisition life cycle. The employee typically identifies requirements; writes and/or reviews specifications; identifies costs; obtains resources (manpower, funding, and training); conducts or supports portfolio management, cybersecurity risk management framework, Joint Information Environment and Department of Defense Information Network compliance, and IT architecture-related activities; and tests, evaluates, plans, obtains, and manages IT life-cycle development and support (operations, maintenance, and replacement).
## Information Technology Level I

**Type of Assignment** | **Representative Activities**
--- | ---
CIO Office | Identifies and describes the following: policies, laws, and regulations; emerging IT acquisition strategies; best practices; IT-related performance measures and quality management; capital planning and investment control; acquisition planning, solicitation, and administration; and information assurance/cybersecurity
Central Design Activity (CDA) | Identifies and describes the following: basic concepts of software engineering and development activities; enterprise architecture; best practices; IT systems engineering; information assurance/cybersecurity; IT-related technologies; test and evaluation processes; and verification and validation processes
Project Office/Field Activities | Identifies and describes the following: IT program management approaches; emerging IT acquisition strategies; best practices; IT-related performance measures and quality management; acquisition planning, solicitation, and administration; information assurance/cybersecurity; test and evaluation processes; verification and validation processes; and fielding and sustaining IT systems

### Core Certification Standards

**EDUCATION:** Master’s degree, preferably with a major in computer science, information systems management, business administration, cyber security, or a related field

**EXPERIENCE:** 4 years of information technology acquisition experience (in addition to core certification experience)

¹The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.

²When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

NOTE: "(R)" following a course title indicates the course is delivered as resident-based instruction.
LIFE CYCLE LOGISTICS FUNCTIONAL COMMUNITY

The Life Cycle Logistics career field spans the system life cycle, encompassing acquisition and sustainment activities, and includes professionals responsible for planning, development, implementation, and management of effective and affordable weapons, materiel, or information systems product support strategies. Details are available in the Defense AT&L Workforce Position Category Description for the Life Cycle Logistics functional community and in the 2008 DoD Logistics Human Capital Strategy.

Life-cycle logisticians perform a critical joint and/or DoD-component logistics role to ensure that product support strategies meet program goals for operational effectiveness and readiness; ensure that supportability requirements are addressed consistently with cost, schedule, and performance; ensure that supportability considerations are implemented during system design; meet system materiel availability, reliability, operating and support cost, and mean downtime objectives; and deliver optimal life-cycle product support. They must be proficient across the following 7 competency areas spanning the 12 Integrated Product Support (IPS) Elements: (1) logistics design influence, (2) integrated logistics support planning, (3) product support and sustainment, (4) configuration management, (5) reliability and maintainability analysis, (6) technical/product data management, and (7) supportability analysis.

Life-cycle logisticians pursue two primary objectives: to see that weapon systems are designed, maintained, and modified to continuously reduce the demand for logistics; and to ensure effective and efficient logistics support. The resources required for product support must be minimized while meeting warfighter needs and guaranteeing long-term affordable materiel readiness. They achieve these objectives by ensuring integration across the 12 IPS elements to maximize supportability, reliability, availability, maintainability, mission effectiveness, and affordability of the system throughout its life cycle. They influence system design and provide effective, timely product support capabilities that drive effective, best-value product support planning and execution. Emphasis is placed on guaranteeing materiel readiness at optimal life-cycle costs and integrating life-cycle management principles by designing and implementing performance-based life-cycle product support strategies to provide effective system support. Life-cycle logisticians can work directly in a program management office, in support of the program manager (PM), or in other logistics activity offices for support and sustainment.

Defense Acquisition Workforce Improvement Act Level III-certified life-cycle logisticians can also serve as DoD product support managers, responsible for the following:

» Providing weapon systems product support subject matter expertise to the PM for execution of the PM’s duties as the total life-cycle systems manager
» Developing and implementing a comprehensive, outcome-based product support strategy
» Promoting opportunities to maximize competition while meeting the objective of providing best-value, long-term outcomes to the warfighter
» Seeking to leverage enterprise opportunities across programs and DoD components
» Using appropriate analytical tools and conducting appropriate cost analyses to determine the most affordable and effective product support strategy
» Developing and implementing appropriate product support arrangements
» Assessing and adjusting resource allocations and performance requirements for product support to meet validated warfighter requirements and optimize implementation of the product support strategy
» Documenting the product support strategy in the Life Cycle Sustainment Plan
» Conducting periodic product support strategy reviews and revalidating the supporting business case analysis
» Ensuring that the product support strategy maximizes small business participation at the appropriate tiers
» Ensuring identification of obsolete parts utilized in specifications and developing plans for suitable replacements
» Influencing the system design and sustainment strategy to achieve affordability goals and caps

Thus, both life-cycle logisticians and product support managers are ultimately responsible for designing, developing, implementing, and sustaining tailored life-cycle product support that optimizes affordability, materiel readiness, and joint warfighter requirements, thereby providing the Nation an enduring strategic advantage over its adversaries.
<table>
<thead>
<tr>
<th>Type of Assignment</th>
<th>Representative Activities</th>
</tr>
</thead>
<tbody>
<tr>
<td>L1 Product Support Management</td>
<td>Support and provide inputs into cost and performance management across the product support value chain, from design through disposal.</td>
</tr>
<tr>
<td>L2 Supply Support</td>
<td>Support the identification, planning, resourcing, and implementation of management actions to acquire repair parts, spares, and all classes of supply to ensure the best equipment/capability is available to support the warfighter or maintainer when it is needed at the lowest possible cost.</td>
</tr>
<tr>
<td>L3 Packaging, Handling, Storage and Transportation</td>
<td>Support the identification, planning, resourcing, and implementation of management actions to facilitate acquisition of packaging/preservation, handling, storage, and transportation (PHS&amp;T) requirements to maximize availability and usability of the materiel, including support items whenever they are needed for training or mission.</td>
</tr>
<tr>
<td>L4 Maintenance Planning and Management</td>
<td>Support the identification, planning, resourcing, and implementation of maintenance concepts and requirements to ensure the best possible equipment/capability is available when the warfighter needs it at the lowest possible Total Ownership Cost (TOC).</td>
</tr>
<tr>
<td>L5 Design Interface</td>
<td>Understand and support the systems engineering process to impact the design from its inception throughout the life cycle, facilitating supportability to maximize the availability, effectiveness and capability of the system at the lowest Total Ownership Cost (TOC).</td>
</tr>
<tr>
<td>L6 Sustaining Engineering</td>
<td>Understand, recognize the importance of, and assist in supporting in-service systems in their operational environments.</td>
</tr>
<tr>
<td>L7 Technical Data</td>
<td>Support the identification, planning, resourcing, and implementation of actions to facilitate development and acquisition of information to operate, install, maintain, and train on the equipment to maximize its effectiveness and availability; effectively catalog and acquire spare/repair parts, support equipment, and all classes of supply; define the configuration baseline of the system (hardware and software) to support the warfighter effectively with the best capability at the time it is needed.</td>
</tr>
<tr>
<td>L8 Computer Resources</td>
<td>Support the identification, planning, resourcing, and implementation of actions to facilitate the acquisition and maintenance of facilities, hardware, software, documentation, and personnel necessary for planning and management of mission-critical computer hardware and software systems. Coordinate and implement agreements necessary to manage technical interfaces and to manage the work performed during maintenance activities. Establish and update plans for periodic test and certification activities required throughout the life cycle.</td>
</tr>
<tr>
<td>L9 Facilities and Infrastructure</td>
<td>Support the identification, planning, resourcing, and implementation of actions to facilitate the acquisition and maintenance of facilities to enable training, maintenance, and storage to maximize the effectiveness of system operation and the logistics support system at the lowest Total Ownership Cost (TOC). Identify and prepare plans for the acquisition of facilities to enable responsive support for the warfighter.</td>
</tr>
<tr>
<td>L10 Manpower and Personnel</td>
<td>Support the identification, planning, resourcing, and implementation of actions to facilitate the acquisition and support of personnel, civilian and military, with the grades and skills required to operate equipment, to complete the missions, to fight or support the fight effectively, to win our Nation’s wars; and to support the warfighter effectively and ensure the best capability is available for the warfighter when needed.</td>
</tr>
<tr>
<td>L11 Support Equipment</td>
<td>Support the identification, planning, resourcing, and implementation of management actions to acquire and maintain support equipment (mobile or fixed) required to sustain the operation and maintenance of the system to ensure that the system is available to the warfighter when it is needed at the lowest Total Ownership Cost (TOC).</td>
</tr>
<tr>
<td>L12 Training and Training Support</td>
<td>Support the identification, planning, resourcing, and implementation of a cohesive integrated strategy early in the development process to train military and civilian personnel to maximize the effectiveness of the doctrine and of the personnel’s ability to operate, fight with, and maintain the equipment throughout the life cycle. As part of the strategy, to plan, resource, and implement management actions that identify, develop, and acquire training aids, devices, simulators and simulations (TADS) to maximize the effectiveness of the personnel’s ability to operate, fight with, and sustain equipment at the lowest Total Ownership Cost (TOC).</td>
</tr>

### Core Certification Standards

1. **Acquisition Training**
   - ACQ 101 Fundamentals of Systems Acquisition Management
   - SYS 101 Fundamentals of Systems Planning, Research, Development, and Engineering

2. **Functional Training**
   - CLL 008 Designing for Supportability in DoD Systems
   - CLL 011 Performance-Based Life-Cycle Product Support (PBL)
   - LOG 101 Acquisition Logistics Fundamentals
   - LOG 102 Fundamentals of System Sustainment Management
   - LOG 103 Reliability, Availability, and Maintainability (RAM)

3. **Education**
   - Formal education not required for certification

4. **Experience**
   - 1 year of life-cycle logistics in an acquisition and/or sustainment organization.

---

1. The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.
2. When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

**NOTES:**
- A “C” following a course title indicates the course is delivered as resident-based instruction.
- Some continuous learning (CL) modules have been created by extracting lessons from training courses. If this is the case for the CL module identified in the above core certification standards, the course the CL module was extracted from is identified in the “Notes” section of the CL course description, and the course can be substituted to meet the certification standard.

**EDUCATION:** Baccalaureate degree in a technical, scientific, or managerial field Leadership and management courses such as Harvard Business School (HBS) training modules on the Continuous Learning page of the iCatalog.

**EXPERIENCE:** 2 years of life-cycle logistics experience in support of acquisition or sustainment of DoD weapons/materiel systems

1 The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.
2 When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

**NOTES:**
- "(R)" following a course title indicates the course is delivered as resident-based instruction.
- Some continuous learning (CL) modules have been created by extracting lessons in their entirety from a training course. If this is the case for the CL module(s) identified in the above core certification standards, the course the CL module was extracted from is identified in the “Notes” section of the CL course description, and the course can be substituted to meet the certification standard.
2 When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.

- **L1 Product Support Management**
  - Plan and manage cost and performance across the product support value chain, from design through disposal.

- **L2 Supply Support**
  - Identify, plan for, resource, and implement management actions to acquire repair parts, spares, and all classes of supply to ensure the best equipment/capability is available to support the warfighter or maintainer when it is needed at the lowest possible cost.

- **L3 Packaging, Handling, Storage and Transportation**
  - Identify, plan, resource, and acquire packaging/preservation, handling, storage, and transportation (PHIS&T) requirements to maximize availability and usability of the materiel, including support items whenever they are needed for training or mission.

- **L4 Maintenance Planning and Management**
  - Identify, plan, resource, and implement maintenance concepts and requirements to ensure the best possible equipment/capability is available when the warfighter needs it at the lowest possible Total Ownership Cost (TOC).

- **L5 Design Interface**
  - Participate in and leverage the systems engineering process to impact the design from its inception throughout the life cycle, facilitating supportability to maximize the availability, effectiveness, and capability of the system at the lowest Total Ownership Cost (TOC).

- **L6 Sustaining Engineering**
  - Support in-service systems in their operational environments.

- **L7 Technical Data**
  - Identify, plan, resource and implement management actions to develop and acquire information to operate, install, maintain, and train on the equipment to maximize its effectiveness and availability; effectively catalog and acquire spare/repair parts, support equipment, and all classes of supply; define the configuration baseline of the system (hardware and software) to support the warfighter effectively with the best capability at the time it is needed.

- **L8 Computer Resources**
  - Identify, plan, resource, and acquire facilities, hardware, software, documentation, and personnel necessary for planning and management of mission-critical computer hardware and software systems. Coordinate and implement agreements necessary to manage technical interfaces, and to manage the work performed during maintenance activities. Establish and update plans for periodic test and certification activities required throughout the life cycle.

- **L9 Facilities and Infrastructure**
  - Identify, plan, resource, and acquire facilities to enable training, maintenance, and storage to maximize the effectiveness of system operation and the logistics support system at the lowest Total Ownership Cost (TOC). Identify and prepare plans for the acquisition of facilities to enable responsive support for the warfighter.

- **L10 Manpower and Personnel**
  - Identify, plan, resource, and acquire personnel, civilian and military, with the grades and skills required to operate equipment, to complete the missions, to fight or support the fight effectively, to win our Nation’s wars; and to support the warfighter effectively and ensure the best capability is available for the warfighter when needed.

- **L11 Support Equipment**
  - Identify, plan, resource, and implement management actions to acquire and support the equipment (mobile or fixed) required to sustain the operation and maintenance of the system to ensure that the system is available to the warfighter when it is needed at the lowest Total Ownership Cost (TOC).

- **L12 Training and Training Support**
  - Plan, resource, and implement a cohesive integrated strategy early in the development process to train military and civilian personnel to maximize the effectiveness of the doctrine and of the personnel’s ability, to operate, fight with, and maintain the equipment throughout the life cycle. As part of the strategy, to plan, resource, and implement management actions to identify, develop, and acquire training aids devices simulators, and simulations (TADDS) to maximize the effectiveness of the personnel’s ability to operate, fight with, and sustain equipment at the lowest Total Ownership Cost (TOC).

**Core Certification Standards** (Required for DAWIA certification)

Life Cycle Logistics Level III

<table>
<thead>
<tr>
<th>Type of Assignment</th>
<th>Representative Activities</th>
</tr>
</thead>
<tbody>
<tr>
<td>» L1 Product Support Management</td>
<td>Lead and oversee cost and performance across the product support value chain, from design through disposal.</td>
</tr>
<tr>
<td>» L2 Supply Support</td>
<td>Oversee the identification, planning, resourcing, and implementation of management actions to acquire repair parts, spares, and all classes of supply to ensure the best equipment/capability is available to support the warfighter or maintainer when it is needed at the lowest possible cost.</td>
</tr>
<tr>
<td>» L3 Packaging, Handling, Storage and Transportation</td>
<td>Oversee the identification, planning, resourcing, and acquisition of packaging/preservation, handling, storage, and transportation (PHS&amp;T) requirements to maximize availability and usability of the materiel, including support items whenever they are needed for training or mission.</td>
</tr>
<tr>
<td>» L4 Maintenance Planning and Management</td>
<td>Oversee the identification, planning, resourcing, and implementation of maintenance concepts and requirements to ensure the best possible equipment/capability is available when the warfighter needs it at the lowest possible Total Ownership Cost (TOC).</td>
</tr>
<tr>
<td>» L5 Design Interface</td>
<td>Collaboratively engage in and leverage the systems engineering process to impact the design from its inception throughout the life cycle, facilitating supportability to maximize the availability, effectiveness, and capability of the system at the lowest Total Ownership Cost (TOC).</td>
</tr>
<tr>
<td>» L6 Sustaining Engineering</td>
<td>Oversee, lead, or influence the design, implementation, and execution of support for in-service systems in their operational environments.</td>
</tr>
<tr>
<td>» L7 Technical Data</td>
<td>Oversee the identification, planning, resourcing, and implementation of management actions to develop and acquire information to operate, install, maintain, and train on the equipment to maximize its effectiveness and availability; effectively catalog and acquire spare/repair parts, support equipment, and all classes of supply; define the configuration baseline of the system (hardware and software) to support the warfighter effectively with the best capability at the time it is needed.</td>
</tr>
<tr>
<td>» L8 Computer Resources</td>
<td>Oversee the identification, planning, resourcing, and implementation of management actions to acquire and maintain facilities, hardware, software, documentation, and personnel necessary for planning and management of mission-critical computer hardware and software systems. Coordinate and implement agreements necessary to manage technical interfaces, and to manage the work performed during maintenance activities. Establish and update plans for periodic test and certification activities required throughout the life cycle.</td>
</tr>
<tr>
<td>» L9 Facilities and Infrastructure</td>
<td>Oversee the identification of requirements for, planning for, resourcing, and implementation of management of personnel, civilian and military, with the grades and skills required to operate equipment, to complete the missions, to fight or support the fight effectively, to win our Nation’s wars; and to support the warfighter effectively and ensure the best capability is available for the warfighter when needed.</td>
</tr>
<tr>
<td>» L10 Manpower and Personnel</td>
<td>Oversee the identification of requirements for, planning for, resourcing, and implementation of management actions to acquire and maintain support equipment (mobile or fixed) required to sustain the operation and maintenance of the system to ensure that the system is available to the warfighter when it is needed at the lowest Total Ownership Cost (TOC).</td>
</tr>
<tr>
<td>» L11 Support Equipment</td>
<td>Oversee the identification of requirements for, planning for, resourcing, and implementation of management actions to acquire and maintain support equipment (mobile or fixed) required to sustain the operation and maintenance of the system to ensure that the system is available to the warfighter when it is needed at the lowest Total Ownership Cost (TOC).</td>
</tr>
<tr>
<td>» L12 Training and Training Support</td>
<td>Oversee the identification of requirements for, planning for, resourcing, and implementation of management actions to acquire and support a cohesive integrated strategy early in the development process to train military and civilian personnel to maximize the effectiveness of the doctrine, and of the personnel’s ability, to operate, fight with, and maintain the equipment throughout the life cycle. As part of the strategy, to plan, resource, and implement management actions to identify, develop, and acquire training aids devices simulators and simulations (TADSS) to maximize the effectiveness of personnel’s ability to operate, sustain equipment at the lowest Total Ownership Cost (TOC).</td>
</tr>

SCIENCE AND TECHNOLOGY FUNCTIONAL COMMUNITY

SCIENCE AND TECHNOLOGY MANAGER

Science and technology managers are typically scientists and engineers primarily involved in the material solution analysis, technology maturation, and risk reduction phases of the defense acquisition system. They may, however, be involved in any phase of the acquisition process from basic research through deployment and demilitarization. Primary duties include developing overall program goals for science and technology funds; acquiring the services of scientists, engineers, and technical support personnel who are experts in their fields to perform science and technology research for DoD; providing funds to and oversight of science and technology performers (including universities, industry, and federal government organizations); and interfacing with the customer to expedite the transition of technology to the user.

## Science and Technology Manager Level II

### Type of Assignment
- Science and Technology
  - Organizes, conducts, and/or monitors science and technology activities including basic research, applied research, and/or advanced technology development; may also provide direct support to acquisition program managers

### Core Certification Standards1 (Required for DAWIA certification)
- Acquisition Training
  - ACQ 202 Intermediate Systems Acquisition, Part A
- Functional Training
  - CLE 021 Technology Readiness Assessments
  - STM 202 Intermediate S&T Management (R)
- Education
  - Baccalaureate or graduate degree in a technical or scientific field such as, but not limited to, engineering, physics, chemistry, biology, psychology, mathematics, operations research, engineering management, or computer science
- Experience
  - 2 years of technical experience related to science and technology management

## Science and Technology Manager - Level III

### Type of Assignment

<table>
<thead>
<tr>
<th>Science and Technology</th>
</tr>
</thead>
</table>

### Representative Activities

Leads and/or manages science and technology activities including basic research, applied research, and/or advanced technology development; may also provide direct support to acquisition program managers.

### Core Certification Standards

*(Required for DAWIA certification)*

### Type of Assignment

<table>
<thead>
<tr>
<th>Acquisition Training</th>
</tr>
</thead>
<tbody>
<tr>
<td>CLM 014 IPT Management and Leadership</td>

### Type of Assignment

| Science and Technology |

### Education:

Graduate-level degree in engineering, physics, chemistry, biology, mathematics, operations research, management, or a related field.

### Experience:

None specified

---

1 The Core Certification Standards section lists the training, education, and experience *REQUIRED* for certification at this level.

2 The training listed in the Unique Position Training Standards section for workforce members assigned to these positions is recommended.

3 When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

**NOTE:** *(R)* following a course title indicates the course is delivered as resident-based instruction.
As the functional leader for the Test and Evaluation (T&E) career field, my primary goals are to enhance the quality of the T&E workforce and guide consistent and integrated T&E policy. The responsibility to train and maintain the T&E workforce requires that we keep current the T&E functional acquisition competencies, certification standards, and T&E position category description.

T&E professionals assist program managers in improving cost, schedule, and performance of their acquisition programs by providing timely, objective assessments at key decision points. Our T&E courses provide essential knowledge that T&E professionals need to perform DoD T&E activities effectively. This includes understanding technical maturity and performance baselines; knowledge and application of technical reviews, design considerations, and reliability growth; and the practical use of T&E concepts and principles during planning, execution, and reporting on an acquisition program.

My priority is to focus on earlier Developmental T&E activities to identify and fix problems during development. My initiatives include improving the current curriculum to ensure T&E professionals are able to create developmental evaluation frameworks as well as understand how to conduct T&E activities relating to interoperability, cybersecurity, reliability, and maintainability.

The T&E workforce requires increasing knowledge and skills to adequately evaluate complex systems. Since T&E in joint programs and system-of-systems comprehension presents challenges, it is important to prepare the workforce for complex system dependencies and interoperability issues. A part of my mission is to ensure a high-quality T&E workforce to provide the warfighter with affordable, supportable, and effective performance-based systems.

As the functional leader, I oversee DAU T&E education and training requirements and validate the certification standards for all T&E levels and for the Chief Developmental Tester. The requirements are updated when necessary and reflect the latest changes in statutory and regulatory acquisition policies, practices, and procedures. On an annual basis, we review and update the curriculum to ensure technical accuracy and consistency with DoD acquisition policy.
Test and Evaluation Level I

**Type of Assignment**

- **Headquarters and Staff (OSD, JS, COCOMs, JITC, SYSCOMs, etc.)**
  - Supports research and development of T&E policy, practices, metrics, and procedures
  - Supports development of evaluation methodology and framework
  - Supports the identification, direction, and guidance applicable to the Service/agency involvement in T&E
  - Supports T&E office representative to T&E meetings and other forums
  - Supports tracking/auditing of the T&E aspects of products/systems in the acquisition process
  - Supports development of the T&E career management plan for recruiting, training, and retaining a professional T&E workforce
  - Supports development and execution of T&E processes, standards, methods, and techniques

- **Program Management and Matrix Support**
  - Supports the program’s T&E working-level IPT
  - Member of Chief Developmental Tester’s team developing a test and evaluation master plan (TEMP)
  - Supports development of program’s test and evaluation strategy, approach, process, schedule, and resource requirements
  - Supports implementation of evaluation methodology and framework relative to product/system under test
  - Supports development of T&E documentation and data for technical and progress reviews, including risk assessment

- **Range/Lab/Field Supporting Activities**
  - Supports identification, process, schedule for T&E resources including workforce, infrastructure, and budgets to support testing as expected for the respective facility
  - Supports facility test plan development
  - Assists in test execution, data collection, analysis, and reporting
  - Supports the maintenance of the physical facility, environment, and coordination of renovations and repairs as necessary
  - Assists in the execution of Service/agency or DoD cybersecurity and system assurance (SA) testing

---

**Core Certification Standards**

**Acquisition Training**
- **ACQ 101** Fundamentals of Systems Acquisition Management

**Functional Training**
- **CLE 023** Modeling and Simulation for Test and Evaluation
- **CLE 025** Information Assurance (IA)
- **SYS 101** Fundamentals of Systems Planning, Research, Development, and Engineering
- **TST 102** Fundamentals of Test and Evaluation

**Education**
- Associate’s degree in any discipline

**Experience**
- 1 year of test and evaluation experience

</tr>
</thead>
</table>
| Headquarters and Staff (OSD, JS, COCOMs, JITC, SYSCOMs, etc.) | • Supports research and development of test and evaluation strategy (TES), policy, practices, procedures, and implementation direction and guidance  
• Supports development of evaluation methodology and framework  
• Supports the identification, direction, and guidance applicable to the headquarters  
• Serves as or supports the T&E office representative at T&E meetings and other forums  
• Manages tracking/auditing of the T&E aspects of products/systems in the acquisition process and identifies T&E issues  
• Coordinates TES, test and evaluation master plans (TEMPs), test concepts, and test plans, as well as certifies annual T&E budgets  
• Supports development of the T&E career management plan for recruiting, training, and retaining a professional T&E workforce  
• Supports development and execution of T&E processes, standards, methods, and techniques |
| Program Management and Matrix Support | • Member of the program’s T&E working-level IPT  
• Directs/manages development and/or implementation of evaluation methodology and framework relative to product/system under test  
• Drafts and coordinates TEMP  
• Directs coordination of cybersecurity test and evaluation per DoD Risk Management Framework Process  
• Directs/manages development of program’s T&E approach, process, schedule, and resource requirements  
• Directs/manages development of T&E materials/data for technical and progress reviews, including risk assessment  
• Identifies and coordinates T&E personnel and financial resources requirements  
• Provides guidance on development of test concepts and test plans and submits annual T&E budgets |
| Range/Lab/Field Supporting Activities | • Identifies and schedules facility resources for T&E resources, including workforce, infrastructure, and budgets to support testing  
• Ensures facility test and evaluation tools (IT, video, targets, simulators, stimulators, instrumentation, etc.) are capable of supporting T&E as expected for the respective facility  
• Leads facility test plan development and coordination  
• Ensures technical adequacy of T&E plans and mitigation of safety risks for test plans and during test execution  
• Leads test execution, data collection, analysis, and reporting  
• Supports the maintenance of the physical facility, environment, and coordination of renovations and repairs as necessary  
• Manages the implementation of Service/agency or DoD cybersecurity and system assurance (SA) policies  
• Leads the evaluation and reporting of test results |

**EDUCATION:** None specified

**EXPERIENCE:** At least 2 years of hands-on T&E field activities

The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.

\(^1\)When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

\(^2\)“(R)” following a course title indicates the course is delivered as resident-based instruction.
DEFENSE CONTRACT MANAGEMENT COMMUNITY

The Defense Contract Management Agency (DCMA) is the DoD component that works directly with Defense suppliers to help ensure that DoD, federal, and allied government supplies and services meet all performance requirements and are delivered on time, at projected cost. DCMA directly contributes to the military readiness of the United States and its allies and helps preserve the Nation’s freedom.

DCMA professionals serve as “information brokers” and in-plant representatives for military, federal, and allied government buying agencies—both during the initial stages of the acquisition cycle and throughout the life of the resulting contracts.

Before contract award, DCMA professionals provide advice and information to help construct effective solicitations, identify potential risks, select the most capable contractors, and write contracts that meet the needs of our customers in DoD, federal, and allied government agencies.

After contract award, DCMA professionals monitor contractors’ performance and management systems to ensure that cost, product performance, and delivery schedules comply with the terms and conditions of the contracts.

Colocated with the DCMA headquarters at Fort Lee, VA, the College of Contract Management (CCM) is chartered to ensure that well-trained faculty, well-designed curricula, and a cost-effective methodology will provide the professional, accredited courses necessary to enhance the skills of the workforce within the DCMA. Portions of the CCM’s curricula are envisioned to benefit non-DCMA personnel performing contract management functions.

EARNED VALUE MANAGEMENT FUNCTIONAL COMMUNITY

Earned Value Management (EVM) is a disciplined, program management approach to integrating the cost, schedule, and technical work scope aspects of the contract. As such, EVM has earned the reputation as one of DoD’s and industry’s most powerful program management tools and plays an important role in successfully delivering acquisition programs by providing program managers and their integrated product teams (IPTs), with timely insight into ongoing program performance. EVM analysis provides actionable information to the IPT so it can proactively manage the many factors that influence cost, schedule, technical performance, and programmatic risk, thereby contributing to the timely delivery of high-quality, affordable, supportable, and effective defense systems to warfighters.

EVM requires cross-functional understanding of integrated program management competencies in various Defense Acquisition Workforce career fields. As the EVM functional leader, the director of Performance Assessments and Root Cause Analyses (PARCA) supports other OSD functional leaders by providing EVM expertise to influence the competency requirements for effective and efficient EVM application within their respective functional areas.
SMALL BUSINESS FUNCTIONAL COMMUNITY

As functional leader for the Small Business (SB) career field, my top priority is to align SB training with Defense readiness efforts. SB professionals play a vital role in maximizing competition and expanding the DoD’s industrial base. In order to optimize small business programs and Defense procurements, SB professionals should be proficient in performing a wide range of functions. The courses in the SB curriculum aim to develop the necessary skills to ensure that SB professionals can do the best job possible for the Department. The following are some of the key functions performed by these individuals:

- Developing, managing, and/or tracking procurement legislation, regulations, and policies affecting small business
- Forming acquisition strategies and participating in peer reviews and program management reviews of planned acquisitions
- Developing and managing subcontracting programs to ensure compliance with requirements
- Determining and recommending the appropriate level of small business participation during the acquisition planning process
- Providing market research expertise
- Collecting and analyzing information regarding commercial capabilities, processes, pricing, incentives, warranties, delivery, and other standard terms and conditions
- Assessing and analyzing the effectiveness of established command or agency small business program initiatives and objectives

SERVICES ACQUISITION FUNCTIONAL COMMUNITY

The Services Acquisition Directorate is responsible for developing, implementing, governing, and executing the acquisition oversight framework for services, and for the championing of strategic sourcing policy and initiatives, for the DoD. A relatively new organization in the office of Defense Procurement and Acquisition Policy, Services Acquisition (DPAP/SA) is tasked to improve the tradecraft in the acquisition of services. Contracted services represent more than 50 percent of the DoD’s total contract spending. DPAP/SA is responsible for ensuring that services procurement results in the best value at the most reasonable cost. As much of the spending is executed in smaller contracts, the DoD wishes to improve its oversight capabilities, develop an expert understanding of where services dollars are spent, and use the knowledge of services tradecraft to make strategic decisions about how to meet the needs of the warfighter most efficiently. Better Buying Power 2.0 has tasked DPAP/SA to:

- Coordinate improvements with military department and 4th Estate senior managers for acquisition of services.
- Measure productivity using the DoD services taxonomy.
- Increase effective use of market research.
- Strengthen contract management outside the normal acquisition chain.
- Expand use of requirements review boards and tripwires.
Section 4: Acquisition Workforce Management and Administration

3. What is the difference between "best value" and "lowest cost"?
OVERVIEW OF ACQUISITION WORKFORCE CAREER MANAGEMENT

Directors, Acquisition Career Management (DACMs)
The DACMs assist in managing the accession, training, education, and career development of their respective components. There is a DACM representative for each of the military Services as well as for the 4th Estate. The 4th Estate DACM represents civilian agencies within the department and outside the military Services.

The DACMs coordinate with DAU to ensure the learning and developmental needs of the Defense Acquisition Workforce are addressed. The DACMs are instrumental in supporting enterprise human capital initiatives to create a high-performing Defense Acquisition Workforce. The following pages list important links and information regarding each DACM.

How to Register
To register for a DAU course, go to your appropriate DACM page in this catalog for links to registration Web sites and contact information. If you do not work as a member of the DoD—for instance, if you are a federal government employee in a civilian agency, an employee working for a company that supports DoD, or an international representative—go to the Registration Procedures for Non-DoD Students section of this catalog.

You are encouraged to review the DAU administrative information in this section, which provides an overview of DAU’s policies and procedures regarding attendance, cancellation, accommodations, transcript services, and other important information regarding taking a course at DAU.
The U.S. Army Director, Acquisition Career Management (DACM) is charged with the responsibility to implement the Defense Acquisition Workforce Improvement Act (DAWIA) for the Army Acquisition Workforce (AAW). The DACM is an advisor and staff assistant to the Assistant Secretary of the Army for Acquisition, Logistics, and Technology (ASA[ALT]) and represents the assistant secretary in all matters relating to efforts to improve the acquisition workforce and its associated acquisition processes through education, training, and career management. The Army DACM reports directly to the ASA(ALT) and also serves as the Principal Military Deputy to the ASA(ALT). The Army DACM is supported by the Deputy DACM, who also serves as the Director of the U.S. Army Acquisition Support Center (USAASC). USAASC’s mission is to provide command-level resource management, human resources, and force structure support to the program executive offices and serve as the advocate for the entire AAW to ensure their professional growth and career development in order to continually improve Army combat capability.

The DACM promotes leadership and professional development of the AAW and ensures individual acquisition skill sets are matched with relevant work requirements, all while promoting an environment of open communication where the workforce can understand its role in equipping and sustaining the world’s premier fighting force. The Army DACM Office also fosters the professional growth of the AAW through functional, developmental, and leadership training.

The DACM’s responsibilities are to:

» Establish and oversee the mission and vision of the Army Acquisition Corps (AAC) and the associated programs for the development and readiness of a professional civilian and military workforce
» Oversee the AAC and the AAW while establishing human capital plans, programs, and strategies to accomplish the acquisition mission and vision for the Army
» Ensure the readiness of a professional civilian and military acquisition workforce through relevant training, education, and experience opportunities
» Oversee all career management activities for the AAC and AAW (e.g., policies, training, opportunities, etc.) in accordance with statutory requirements and congressional mandates
» Grant AAC membership and DAWIA certification and approve waivers
» Designate senior-level representatives to provide guidance and to advise on matters that affect the education, training, and career development of the AAW
» Establish forums/opportunities to address issues facing the acquisition community from the perspective of Army senior leaders
» Represent the Army Acquisition Executive in all matters pertaining to the acquisition mission for the Army

The AAW comprises more than 39,000 civilian and military workforce members who occupy 13 acquisition career fields. The largest numbers of workforce members serve in the acquisition career fields of Engineering, followed by Contracting and Life Cycle Logistics.

WHERE TO FIND INFORMATION

The Army DACM Office resides within the USAASC at Fort Belvoir, Virginia. Its Web site (http://asc.army.mil/web/career-development/dacm-office/) contains information on everything related to acquisition careers. Some of the Army acquisition workforce topic areas, application systems, customer support, and news forums are highlighted below:

» ACC career planning and certification
» Civilian and military proponency
» Legislation and policy
» Tuition assistance, leadership training and development programs
» Army Defense Acquisition University registration: https://www.atrrs.army.mil/channels/aitas/
» Certification Management System and AAC Membership System
» The award-winning Army AL&T magazine
» News and developments
» FAQs and contact information
The Department of the Navy (DoN) Director, Acquisition Career Management (DACM) is the focal point for the management and development of the Navy and Marine Corps military and civilian acquisition workforce. Having the right people in the right job at the right time will translate to effective and efficient program management, execution, and delivery of the finest warfighting capability to our sailors and marines. The DACM seeks to improve the workforce through education, training, and career management.

The foundation of the DACM Office support to the Department of the Navy acquisition workforce is contained in the Better Buying Power (BBP) 2.0 initiative. BBP 2.0 provides guidance on enhancing buying power, improving industry productivity, and providing an affordable, value-added military capability. One of the seven tenets of BBP 2.0 is “Improve the Professionalism of the Total Acquisition Workforce.”

In conjunction with BBP 2.0, the DoN DACM has targeted revitalizing and sustaining a strong, fully trained and qualified acquisition workforce as its key objective. The fundamental precept that guides our acquisition workforce strategy is that the design, development, procurement, and sustainment of the most complex warfighting systems in the world demand a highly skilled and knowledgeable acquisition workforce that is competent across all career fields.

**The DACM goals are to:**

- Revitalize the acquisition workforce through improved education, training, and career management
- Focus on developing and sustaining acquisition professionals with critical skills needed to increase the capability of the acquisition workforce
- Implement policies and processes that lead to an appropriately sized acquisition workforce

**The DACM responsibilities are to:**

- Develop acquisition workforce strategies and policies
- Collaborate with other DoD military Services, agencies, and functional leaders on matters relating to the acquisition workforce education, training, and career development
- Analyze acquisition workforce requirements to ensure the DoN acquisition workforce has the personnel and skills it needs, now and into the future
- Manage critical acquisition positions/key leadership positions and ACAT I/IA and ACAT II program manager assignments
- Manage career development programs and opportunities
- Manage the DoN Defense Acquisition Workforce Development Fund Program
- Oversee the DoN centrally managed Naval Acquisition Development Program
- Manage acquisition workforce awards and recognition
- Ensure workforce reporting requirements are met

The U.S. Air Force Director, Acquisition Career Management (DACM) is designated by the Assistant Secretary of the Air Force for Acquisition as the focal point for management and development of the acquisition workforce. The Air Force DACM works with the Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics; the Defense Acquisition University (DAU); other Services and defense agencies; Air Force acquisition career field functional managers; and Air Force Acquisition Workforce members to improve the acquisition workforce through education, training, and career management.

The Air Force DACM responsibilities are to:

» Assist the Service Acquisition Executive with oversight and execution of acquisition workforce responsibilities
» Develop the Air Force acquisition professional workforce through directing, coordinating, and reviewing actions mandated by the Defense Acquisition Workforce Improvement Act (DAWIA) and DoD directives
» Develop, implement, and oversee policies and procedures for the Air Force Acquisition Professional Development Program (APDP)
» Establish programs, as required, to provide career development opportunities for the acquisition workforce in accordance with DAWIA, associated regulations, and Air Force Acquisition Workforce human capital strategic planning objectives
» Develop, review, and coordinate policy regarding the Air Force Acquisition Workforce, including both organic (Air Force civilians and military) and contracted resources
» Represent the Air Force as point of contact with DAU and other DoD military Services and agencies for matters relating to the AT&L Workforce Education, Training, and Career Development Program
» Oversee Air Force acquisition training selection boards, including the Program Manager’s Course and Industrial College of the Armed Forces Senior Acquisition Course, for the acquisition community
» Manage training matters associated with DAWIA implementation, including DAU course quotas, acquisition training funds, and student course registration
» Centrally administer Defense Acquisition Workforce Development Funds to ensure the Air Force Acquisition Workforce has the capacity it needs in both personnel and skills
» Establish and maintain acquisition career management information systems for training, continuous learning, certification, acquisition personnel records review and waivers, as needed, to execute acquisition workforce responsibilities

WHERE TO FIND INFORMATION

Visit the Career/APDP section of the Acquisition functional area on the AF Portal. The site includes the following topics and links:

» Certification and training

Review Your Acquisition Career Record (ACMS)
The 4th Estate Director, Acquisition Career Management (DACM) represents civilians assigned to the defense agencies outside the military departments—a community comprising more than 21,000 Defense Acquisition Workforce members. The 4th Estate DACM is responsible for collaborating with the defense agencies on all facets of career development and management of the Defense Acquisition Workforce.

**The 4th Estate DACM responsibilities include:**

- Supporting enterprise human capital initiatives to create a high-performing Defense Acquisition Workforce
- Collaborating and coordinating with defense agencies to support implementation of the Defense Acquisition Workforce Development Fund
- Providing policy interpretations on Defense Acquisition Workforce Improvement Act (DAWIA) matters
- Collaborating with senior leaders and functional leaders on matters relating to supporting and improving the Defense Acquisition Workforce
- Ensuring career management tools are available to the 4th Estate community, including a continuous learning tracking system and online application processes for certification and Defense Acquisition Corps membership
- Formulating concepts to develop innovative tools and resources to increase efficiencies

The following career management functions are performed at your specific agency:

- Approval of applications for DAU training
- Approval of DAWIA certification applications
- Approval of Acquisition Corps applications
- Processing and approval of waivers and fulfillment requests
- Documentation of course equivalencies
- Coding and management of acquisition personnel information

**WHERE TO FIND INFORMATION**

The 4th Estate DACM Web site, www.dau.mil/doddacm, provides additional information on the following areas:

- Class registration
- Managing your acquisition career
- Career management tools
- Acquisition Corps
- DAWIA certification
- Workforce manager resources
- Workforce policy
- 4th Estate metrics

**Points of Contact:**

ACQTAS Travel Desk, acqtastravel@asmr.com, 703-645-0161
Course Offerings
DAU courses are offered in a variety of modes:

» Resident—Workforce member attends class at one of the DAU training sites.
» Local—DAU instructor teaches at locations that have sufficient numbers of attendees to constitute a class.
» Distance Learning—Course material is offered entirely or in part via the Internet.
» Facilitated Online Learning Environment—Material is offered online; instruction may be online or in the classroom.
» Hybrid—Course includes both distance learning and classroom (Parts A and B).

Online Requirements
E-learning assets should be developed in accordance with the following minimum specifications for learners’ computers:

» Windows 7 Service Pack 1
» Internet Explorer 8.0
» Browser Settings:
  » Pop-up blockers disabled
  » Cookies enabled at medium-low security level
  » Java Runtime Environment: Enabled, version 1.7 or above—AJAX has replaced the necessity for Java.
  » Adobe Flash Player Version 12.0+
  » Windows Media Player 12.0+
  » Adobe Acrobat Reader Version 10.1.9+
  » Adobe Shockwave Player 12.0+
  » Apple Quicktime 7.7.4
  » Intel Pentium 4 Processor (1.6–2.4 GHz) or faster
  » 40 GB of available hard disk space
  » 1 GB of RAM
  » Recommended Display Settings:
    » 1024 x 768 minimum resolution
    » Font size or DPI set to normal or 100%
    » Internet connection: 56 Kbps+ (1.5 Mbps recommended)
  » 16-bit sound card and speakers

When logging on to the DAU Virtual Campus at https://learn.dau.mil, students should review the computer requirements in the “System Requirements” option under the “Help” menu. This will help students ensure that their computers are able to run online courseware successfully. Some online courses have additional software requirements that are explained at the beginning of the course.

Reporting Instructions
After being accepted for admission into a DAU course, students will receive an email from the university with instructions on how to proceed. In the case of online courses, an email will explain how to access the course material online. For classroom courses, students will receive an email with specific reporting instructions and information on lodging, meals, facilities, and appropriate classroom attire.

DAU offers students Web-based support for classroom activities and precourse assignments through the Blackboard learning management system. Blackboard provides Web sites for elected DAU courses so students can access readings and course activities on demand. Blackboard can support a variety of learning activities as required by a class: assignments, quizzes, surveys, and discussions. It supports group work and provides a place to store and submit files to instructors. A student enrolled in a course using Blackboard will receive information about the course's Web site in course-welcome materials.

Travel, Per Diem, and Reimbursement
Each Service Acquisition Career Management Office or parent organization funds travel expenses and per diem for eligible students based on Service- or agency-specific policy. Students should consult the appropriate Acquisition Career Management Office for policy and guidance concerning travel requirements. It is very important that students arrive with a government credit card to pay for all legitimate travel-related expenses or, if needed, draw cash advances in lieu of receiving advance per diem payments. DAU cannot process travel claims or provide advance per diem payments. Students should know the name and telephone number of the government credit card program coordinator for their Services or organizations. This person will be the student’s point of contact for government credit card-related questions.

Defense Acquisition Workforce members may be eligible for funding of travel and per diem when attending courses required for certification. This is strictly based on the Service component policy. Students should contact their Service component point of contact for the specific funding policy.
covering DAU training. Funding is not provided to cover travel and per diem costs for workforce members who attend DAU courses for the purpose of continuous learning.

Course Registration and Quota Allocation
DAU uses the Army Training Requirements and Resources System (ATRRS) to maintain course schedules, allocate quotas, and manage class registration. Agencies with quota allocations should register workforce members as early as possible before the class start date to ensure their employees are in the ATRRS system and that employees have sufficient time to make necessary arrangements for attending class. After applying for a course, a student will receive an email identifying his or her status as wait-listed, disapproved, or as having a reservation. Approximately 60 days before the class starts (later for late registrants), those with class reservations will receive an email from DAU providing reporting instructions, class start and end times, and location-specific information (e.g., points of contact, hotels, and directions). Points of contact for most courses and locations are listed in the online course schedule. Any workforce member who is registered and has not received reporting instructions 15 days before the class start date should contact the Center for Scheduling and Student Support at either 866-568-6924 (Option 1) or 703-805-3459 (Option 1).

Attendance Policy
Students are expected to attend all scheduled course sessions (including teleconferencing, satellite, and synchronous online sessions) and complete all coursework. Whenever possible, students shall request permission from the instructor in advance of absences, which must be for valid reasons such as illness or family emergency. Cumulative absences that exceed 5 percent of contact time may be grounds for disenrollment (e.g., for a 40-hour course, students are expected to participate in at least 38 hours). Some courses permit students who miss periods of class time to complete supplemental work before receiving a graduation certificate.

Concerning various categories of leave, DAU follows established DoD and Office of Personnel Management guidance for civilians and Service regulations for military personnel.

Transcripts
To obtain transcripts, students should go to [http://www.dau.mil/faq/pages/transcripts certificates.aspx#official](http://www.dau.mil/faq/pages/transcripts certificates.aspx#official) and click “Request a DAU Transcript.” The students will be directed to the online transcript system, where they will be asked to log on using either a Common Access Card (CAC) or Social Security number/date of birth. Once in the transcript system, students can print a transcript at their desk or request that an official transcript with a raised DoD seal be sent to a college. Transcripts are usually processed within 5 working days, though sometimes it takes longer; students will receive an email notice when their transcript has been processed. Questions regarding transcripts should be directed to the Center for Scheduling and Student Support at dauhelp@dau.mil.

Disability Accommodations
Those with disabilities who are scheduled to attend DAU classes should notify their local training office and the Center for Scheduling and Student Support as soon as possible before the start date of the class to ensure that appropriate accommodations are made. DAU fully supports the requirements of Section 508 of the Rehabilitation Act Amendments of 1998. Section 508 requires federal agencies that develop, procure, maintain, or use electronic and information technology to ensure that federal employees with disabilities have access to and use of that information and data. To that end, all new DAU courseware is developed to comply with the standards set forth in Section 508.

Student Policies
A complete overview of all student policies can be found at [http://www.dau.mil/training/Pages/studentinformation.aspx](http://www.dau.mil/training/Pages/studentinformation.aspx).

Academic Integrity
Absolute integrity is expected of every DAU student in all academic undertakings. Integrity entails a firm adherence to a set of values, and the values most essential to an academic community are grounded on the concept of honesty with respect to the intellectual efforts of oneself and others. Academic integrity is expected not only in formal coursework situations, but in all university relationships and interactions connected to the educational process, including the use of university resources.
**Dress Policy**

Dress Policy

Unless otherwise noted in the welcome letter or email, civilian and military students are authorized to wear business casual attire: dress slacks, collared shirts, dress shoes/loafers and the equivalent attire for women. Examples of inappropriate attire are shorts; flip flops; strapless, excessively short or sheer garments; exposed midriffs; jeans; and athletic wear of any kind. The instructor, in advance, may specify exceptions to the above in support of a particular class event. Students also are requested to be cognizant that the heavy use of colognes and perfumes can be a distraction in class and cause allergic reactions in other students. In the case of DAU courses conducted at customer sites, alternative standards, consistent with those of the local command or organization, may prevail.

**Cancellation Policy**

Cancellation Policy

If circumstances dictate canceling course attendance after a student receives notification of acceptance, the procedures set forth by the student’s respective Service or agency should be followed. This may afford other workforce members an opportunity to attend the course.

**Grievance Policy**

Grievance Policy

Any grievance a student may have, academic or otherwise, will first be addressed with the lead instructor of the course. If the lead instructor cannot resolve the issue to the student’s satisfaction, the issue can be elevated as outlined in DAU Directive 704, Student Academic and Administrative Policies. Directive 704 is available at [http://www.dau.mil/training/Pages/studentinformation.aspx](http://www.dau.mil/training/Pages/studentinformation.aspx).

**International Students**

International Students

Foreign military and civilian employees of a foreign government must apply for DAU courses through their country’s training office, who will coordinate the training request through the U.S. Army security assistance officer in the Office of Defense Cooperation or an appropriate official in the U.S. Embassy. The U.S. Army Security Assistance Training Field Activity (SATFA), which is the executive agent for foreign members attending DAU courses, will process each individual’s application through appropriate channels. The SATFA will coordinate all training requests with the DAU Non-DoD Registrar at nondod.registrar@dau.mil or 703-805-4498. Security assistance officers or U.S. Embassy officials sponsoring training requests from the host country should go to [http://jko.jten.mil](http://jko.jten.mil) for information on training available through the foreign military sales training program.

Military and civilian employees of countries that are members of the North Atlantic Treaty Organization (NATO) should initiate their training requests through the SATFA by calling 757-788-3255. The SATFA desk officer for NATO affairs will put the student in contact with appropriate NATO training officials to process and coordinate the training request.

A non-U.S. citizen employed by a U.S. defense industry corporation, working for a foreign corporation that has a contract with DoD or any of the military departments, or assigned to a U.S. military agency or activity may be eligible to apply for DAU courses. For information about applying for a course, contact the DAU Academic Support Office at industry.registrar@dau.mil or 703-805-4498.

**Acquisition Personnel with Federal Civilian Agencies**

Acquisition Personnel with Federal Civilian Agencies

Federal civilian personnel interested in acquisition or acquisition-related training should first consult the Federal Acquisition Institute (FAI) Web site at [www.fai.gov](http://www.fai.gov), which provides information about career, certification, and training programs. Federal civilian personnel interested in attending DAU- or FAI-sponsored training must submit an application using the FAI electronic registration system on the Web at [https://www.attrs.army.mil/Faitas/External/Login/?ReturnUrl=%2ffaitas%2f](https://www.attrs.army.mil/Faitas/External/Login/?ReturnUrl=%2ffaitas%2f), the FAI Internet Training Application (FAITAS) Web site.

Federal civilian personnel can attend DAU and FAI courses at no cost, on a space-available basis for DAU courses. The electronic system streamlines the reservation process and allows...
prospective students to initiate their own training requests via the Internet.

For additional information, students should contact their local acquisition career managers. Points of contact available to assist students are listed on the FAI Web site. You can also contact the FAI help desk at 703-752-9604 or visit www.fai.gov/drupal/content/contact-us.

**Defense Industry Certification**

Unless an organization has its own certification standards, there is no organization or association that confers certification in a functional area for defense industry employees similar to the certification program administered by DoD for its acquisition workforce members. Industry employees may demonstrate comparable training to the members of the DoD Acquisition Workforce by successfully completing DAU courses. They can register for courses at https://www.attrs.army.mil/channels/nondod/logon.asp and will be accepted on a space-available basis.
Appendix A:

Training Courses

See pp. 126-129 for course registration procedures.

Required course prerequisites are listed online in the iCatalog within each course concept card. A consolidated listing is also accessible from the iCatalog Home page at:
http://icatalog.dau.mil/
### ACQ 101
**Fundamentals of Systems Acquisition Management**

This course provides a broad overview of the DoD systems acquisition process, covering all phases of acquisition. It introduces the Joint Capabilities Integration and Development System; the planning, programming, budgeting, and execution process; the DoD 5000-series policy documents; and current issues in systems acquisition management. Designed for individuals who have little or no experience in DoD acquisition management, this course has proven very useful to personnel in headquarters, program management, and functional or support offices. *(This course will be replaced by ACQ 102 in the second quarter of fiscal year 2015.)*

**Course Length:** Approximately 25 hours  
**Method of Delivery:** Distance Learning

### ACQ 120
**Fundamentals of International Acquisition (FIAC)**

This course teaches the fundamentals of international acquisition and its relationship to Security Cooperation, including relevant laws and policies and the roles of involved U.S. Government organizations. It covers International Armaments Cooperation (IAC) and Security Assistance programs, how they relate to the Defense Acquisition System, and the processes and procedures used for these forms of international acquisition. The course also covers international contracting, international logistics, and systems engineering activities as they relate to program protection and interoperability, and technology security basics.

**Course Length:** Approximately 21 hours  
**Method of Delivery:** Distance Learning

### ACQ 130
**Fundamentals of Technology Security/Transfer (FTS/T)**

This course is intended to provide the student with a comprehensive understanding of technology security and transfer as it pertains to international acquisition activities. FTS/T covers the purpose of technology security in international programs, the key legislation and key players involved, and the role of the acquisition professional in the process. Upon completion of this course, students should be able to identify technology security principles, information, and processes, as well as describe the relationships between technology security and acquisition.

**Course Length:** Approximately 12 hours  
**Method of Delivery:** Distance Learning

### ACQ 202
**Intermediate Systems Acquisition, Part A**

This is Part A of a two-course series designed for mid-level acquisition professionals. It presents a dynamic, real-time learning environment oriented towards developing the requisite skills and knowledge to work in integrated product teams by providing an overview of systems acquisition principles, policies, and processes.

**Course Length:** To be determined  
**Method of Delivery:** Distance Learning

### ACQ 203
**Intermediate Systems Acquisition, Part B**

This is Part B of a two-course series designed for mid-level acquisition professionals. It presents a dynamic, real-time learning environment oriented towards developing the requisite skills and knowledge to work in integrated product teams by providing an overview of systems acquisition principles, policies, and processes.

**Course Length:** 4.5 classroom days  
**Method of Delivery:** Resident
ACQ 315

Understanding Industry (Business Acumen)

This course covers a wide range of business acumen competencies, including industry orientation, organization, cost and financial planning, business strategy/development, supplier management, incentives, and negotiating strategies. Business skills will be learned for aligning company strategies, finances, and operations that motivate company decisions, in order to meet business goals and gain fair and reasonable profits while providing best taxpayer value to the government on defense products.

Course Length: 4.5 classroom days
Method of Delivery: Resident

ACQ 370

Acquisition Law

DoD policy now mandates that the acquisition process be conducted through integrated product teams. The employment of integrated product teams in the acquisition process has resulted in the involvement of many non-contracting government personnel. ACQ 370 provides an overview of government contract law, specifically laws and regulations that are applicable to government contracts.

Course Length: 4.5 classroom days
Method of Delivery: Resident

ACQ 230

International Acquisition Integration

This course teaches students to plan, integrate, and implement international acquisition programs within the Defense Acquisition System. It is designed to meet the needs of Defense Acquisition Workforce members in various career fields that are responsible for international acquisition program efforts. The course covers the International Acquisition Career Path competencies using a comprehensive, integrated approach with practical exercises that address the following areas/mechanisms: cooperative programs, foreign military sales, direct commercial sales, building partnership capacity programs, technology security and foreign disclosure, and defense exportability integration.

Course Length: 4.5 classroom days
Method of Delivery: Resident

ACQ 265

Mission-Focused Services Acquisition

This course aims to improve tradecraft in the acquisition of services. It uses a multifunctional approach that gives acquisition team members the tools and techniques necessary to analyze and apply performance-based principles when developing requirements documents and effective business strategies for contractor-provided services. The course employs the seven-step Service Acquisition Process, a team-oriented approach, and multiple interactive, hands-on, learning sessions to apply the principles. ACQ 265 is designed for those who need to improve their skills in developing and defining service requirements, supporting business strategies, and effectively managing the resulting contractor performance. However, this course also offers an opportunity for experienced acquisition personnel to strengthen their understanding of the Service Acquisition Process.

Course Length: 4 classroom days
Method of Delivery: Resident
ACQ 401

Senior Acquisition Course

For Acquisition Level III (or equivalent) certified students selected to attend The Dwight D. Eisenhower School for National Security and Resource Strategy: A preeminent course for members of the acquisition workforce, the Senior Acquisition Course (SAC) consists of the 10-month Eisenhower School curriculum, complemented by a choice of acquisition-related focus electives, graduate-level lessons/seminars, and individual/group research and writing. A limited number of SAC students may take the Defense Acquisition University Program Manager’s Course, PMT 401, in lieu of the focus elective and individual/group research and writing, as a general elective in partial fulfillment of the SAC and the National Security and Resource Strategy curriculum requirements. Those who complete the SAC receive a Master of Science degree in National Security Resource Strategy from The Eisenhower School and a diploma signifying completion of the course. Professionals who also take the Program Manager’s Course as part of their curriculum earn PMT 401 diplomas as well.

Target Attendees: Participants are selected by their respective Services or agencies. Military officers are selected as part of the Senior Service School Selection Process and designated by the directors of acquisition career management.

Course Length: 10 months

Method of Delivery: Resident

ACQ 403

Defense Acquisition Executive Overview Seminar

This innovative course provides general/flag officers and members of the Senior Executive Service with an executive-level understanding of the defense acquisition system and supporting processes. Tailored to the needs of the executive, the seminar is conducted on demand and delivered in a one-on-one, desk-side forum.

Target Attendees: This course is for DoD general/flag officers; career and political Senior Executive Service personnel; congressional staff; and other executives, such as employees of the Government Accountability Office who are involved in or interface with the DoD acquisition system and processes. Executive participants may include a limited number of direct reports to enhance the value of the learning and dialogue on matters of specific importance to the executive.

Course Length: Varies depending on the number of topics to be addressed; typically 1/2 to 2 classroom days

Method of Delivery: Resident

ACQ 404

Systems Acquisition Management Course

This course provides an understanding of the defense acquisition system, key processes, and current issues and initiatives appropriate for senior decision makers. Distinguished speakers provide the executive participants a forum to discuss motivations, constraints, and perspectives of government and defense executives and those of the Congress and the Government Accountability Office.

Target Attendees: General, flag officers, members of the Senior Executive Service

Course Length: 4.5 classroom days

Method of Delivery: Resident

ACQ 405

Executive Refresher Course

This course provides senior acquisition professionals, from all career fields, an update on DoD acquisition policy, processes, and lessons learned. The ultimate goal is for participants to synthesize classroom information and define their roles and responsibilities as acquisition leaders. Participants hone their expertise through discussions led by DoD, congressional, Government Accountability Office, and industry guest speakers on acquisition updates. Sessions also include specific career field updates provided by DAU instructors in areas such as financial management, systems engineering, contracting, logistics, and test and evaluation. Learners also will participate in specific group discussions on contemporary management and leadership topics, such as partnering with industry, risk management, human capital management, earned value oversight, time management, and leading change.
**ACQ 451**

**Integrated Acquisition for Decision Makers**

This participant-driven, action-based course exposes Defense Acquisition Workforce members to the multidisciplinary acquisition perspectives, integration challenges, and influencing strategies necessary for successful integrated acquisition decisionmaking. Through facilitated discussions, simulations, exercises, case studies, and exposure to decisionmaking tools, participants will formulate strategies that promote effective integration and collaboration for a current integration challenge. Participants will gain a wider view of the acquisition environment and their respective roles and responsibilities.

**Target Attendees:** This course is for DAWIA Level III-certified members of all career fields who are (or have been selected for) O–6, GS–15, or the industry equivalents who are working in DoD weapons systems or information systems acquisition. This course is not designed for individuals currently assigned as program managers for MDAP or MAIS programs.

**Course Length:** 8.5 classroom days  
**Method of Delivery:** Resident

---

**ACQ 452**

**Forging Stakeholder Relationships**

This action-based course introduces professionals to the methods and skills necessary to identify, assess, and promote the building of stakeholder relationships required for success in the acquisition environment. Experiential activities will include a pre-course stakeholder assessment as well as simulation, communication, and critical-thinking activities that will facilitate the development of tailored stakeholder action plans. At the end of the course, professionals will be able to build ownership of acquisition outcomes across the enterprise.

**Target Attendees:** This class is for civilian (GS-13–15) and military (O–5 and O–6) personnel who are Level III-certified (any career field/path) and have at least 3 years of acquisition experience serving in a Level III-coded position. Industry and allied participants are eligible to attend and are encouraged to register on a space-available basis.

**Course Length:** 3.5 classroom days  
**Method of Delivery:** Resident

---

**ACQ 450**

**Leading in the Acquisition Environment**

This action-based-learning course provides an overview of the competencies and skills needed to lead in an acquisition environment. Experiential activities include role-playing, simulation, communication, and critical-thinking exercises; a leadership challenge; and completion of a 360-degree feedback instrument and executive coaching to develop action plans related to the feedback. Participants will learn to apply strategies for leading up, down, and across in an acquisition organization.

**Target Attendees:** This class is for civilians (GS-13–15) and military (O–5 and O–6) personnel in supervisory positions, Level III-certified (any career field/path), and who have at least 3 years of acquisition experience serving in a Level III-coded position. Industry and allied participants are eligible to attend and are encouraged to register on a space-available basis.

**Course Length:** 4 classroom days  
**Method of Delivery:** Resident

---

**ACQ 451**

**Integrated Acquisition for Decision Makers**

This participant-driven, action-based course exposes Defense Acquisition Workforce members to the multidisciplinary acquisition perspectives, integration challenges, and influencing strategies necessary for successful integrated acquisition decisionmaking. Through facilitated discussions, simulations, exercises, case studies, and exposure to decisionmaking tools, participants will formulate strategies that promote effective integration and collaboration for a current integration challenge. Participants will gain a wider view of the acquisition environment and their respective roles and responsibilities.

**Target Attendees:** This course is for DAWIA Level III-certified members of all career fields who are (or have been selected for) O–6, GS–15, or the industry equivalents who are working in DoD weapons systems or information systems acquisition. This course is not designed for individuals currently assigned as program managers for MDAP or MAIS programs.

**Course Length:** 8.5 classroom days  
**Method of Delivery:** Resident
ACQ 453

**Leader as Coach**

This course focuses on the thinking, behaviors, skills, and strategies needed to accomplish a paradigm shift from managers who primarily direct and evaluate subordinates to managers who encourage and reward innovation, agility, listening, collaboration, continuous and purposeful growth, results, and accountability. As leaders, students will develop greater personal awareness and increase the impact of their energy and the energy of their organizations. Students will do this by learning and applying the principles and behaviors of effective performance coaches.

**Target Attendees:** Civilian and military Defense Acquisition Workforce leaders, primarily supervisors in grades equivalent to GS-13–15 and O–4 through O–6, as well as leaders of integrated product teams (IPTs).

**Course Length:** 3 classroom days

**Method of Delivery:** Resident

---

BCF 103

**Fundamentals of Business Financial Management**

Using interactive, computer-based training, professionals will develop the skills necessary for formulating and executing a program office budget. Topics covered in this course include cost analysis; funding policies; the DoD planning, programming, budgeting, and execution process; the congressional enactment process; and the budget execution process.

**Course Length:** Approximately 26 hours

**Method of Delivery:** Distance Learning

---

BCF 106

**Fundamentals of Cost Analysis**

Professionals are introduced to policies and techniques that are used for preparing system cost estimates, including DoD estimating requirements and guidance, estimate use and structure, analogy estimates, parametric estimating, improvement curves, inflation, risk, economic analysis, and software cost estimating. Through practical exercises, professionals gain the opportunity to apply the policies and techniques to real-world examples.

**Course Length:** Approximately 37 hours

**Method of Delivery:** Distance Learning

---

BCF 107

**Applied Cost Analysis**

In this course, cost-estimating techniques learned in BCF 106 are applied in developing cost estimates. Professionals will engage in guided discussions, investigate case scenarios, develop recommendations, and learn how to present their findings. Professionals also will explore techniques for using Excel and other computer applications to analyze data, develop cost-estimating relationships, and create supporting documentation.

**Course Length:** 4.5 classroom days

**Method of Delivery:** Resident

---

BCF 204

**Intermediate Cost Analysis**

Intermediate Cost Analysis emphasizes development and application of cost-analysis techniques and estimate interpretation. The course addresses estimate definition and planning, data collection, formulation, review and presentation, and documentation. Estimating techniques—such as parametrics, analogies, expert opinions, and cost improvement curves—are discussed in more depth. Computations are done using both spreadsheets and automated cost-estimating integrated tools.

**Course Length:** 9.5 classroom days

**Method of Delivery:** Resident
BCF 205  
**Contractor Business Strategies**

Contractor Business Strategies is an active-learning experience designed to improve professionals’ understanding of the federal government marketplace from a business perspective. Initially, participants are actively engaged in the life-cycle process by which a typical manufacturing company produces and sells a product, receives payment for that sale, and ultimately earns a profit or incurs a loss. During this process, the participants interact with company customers, bankers, shareholders, boards of directors, and other stakeholders. Participants deal with the allocation of indirect costs to multiple products, analyze the impact on overhead rates of the loss of projected government contracts, and develop a pricing strategy to win a government contract. While the scenarios and dilemmas focus primarily on these business activities from a contractor’s perspective, participants are also placed in the position of a government employee to evaluate the impact that contractors’ business strategies have on the government.

**Course Length:** 3.5 classroom days  
**Method of Delivery:** Resident

BCF 206  
**Cost Risk Analysis**

Cost analysts taking this course receive an overview of how to model the cost/risk associated with a defense acquisition program. Topics covered include basic probability concepts, subjective probability assessment, goodness-of-fit testing, basic simulation concepts, and spreadsheet-based simulation. Practical exercises and a small-group, Monte Carlo simulation-based, cost/risk case reinforce the techniques taught.

**Course Length:** 3.5 classroom days  
**Method of Delivery:** Resident

BCF 207  
**Comparative Analysis**

This course prepares professionals to conduct analyses within the DoD environment. Topics include decision analysis, cost analysis, present value, and sensitivity analysis.

**Course Length:** To be determined  
**Method of Delivery:** Resident

BCF 209  
**Acquisition Reporting for MDAPs and MAIS**

Acquisition Reporting for MDAPs (Major Defense Acquisition Programs) and MAIS (Major Automated Information Systems) provides training on how to prepare an Acquisition Program Baseline (APB), a Defense Acquisition Executive Summary (DAES), and a Selected Acquisition Report (SAR). Nunn-McCurdy unit cost reporting for MDAPs is also addressed. During the in-class lecture and computer-assisted case studies, the participants learn step-by-step report preparation using the Defense Acquisition Management Information Retrieval Web application.

**Course Length:** 5 classroom days  
**Method of Delivery:** Resident

BCF 215  
**Operating and Support Cost Analysis**

Participants learn the concepts and methodologies needed to develop operating and support cost estimates, total ownership cost-reduction studies, cost as an independent variable, management processes, and other management decisions in which operating and support costs are relevant.

**Course Length:** 4.5 classroom days  
**Method of Delivery:** Resident
BCF 220

Acquisition Business Management Concepts

The objective of this Web-based course is to give mid-level financial management professionals an ample grasp of the concepts and procedures necessary for application during follow-on, in-class exercises. Although BCF 220 is designed for students who are required to take BCF 225, a resident course, it may also provide an opportunity for experienced acquisition personnel to improve their understanding of common financial topics such as cost estimating; earned value management (EVM) analysis; planning, programming, budgeting, and execution (PPBE); congressional enactment; and budget preparation and execution.

Course Length: Approximately 27 hours
Method of Delivery: Distance Learning

BCF 225

Acquisition Business Management Application

This course offers hands-on experience in dealing with common financial issues in acquisition that include cost estimating; earned value management (EVM) analysis; planning, programming, budgeting, and execution (PPBE); congressional enactment; and budget preparation and execution.

Course Length: 5 classroom days
Method of Delivery: Resident

BCF 301

This capstone course teaches professionals how to apply business, cost estimating, and financial management concepts, techniques, and on-the-job experience to functional interrelationships and opportunities among the disciplines of cost estimating, earned value management, and financial management.

Course Length: 8.5 classroom days
Method of Delivery: Resident

BCF 302

Advanced Concepts in Cost Analysis

This course is designed for mid- to senior-level cost estimators to apply their skills in developing cost estimates for all ACAT levels within the major automated information system (MAIS) and major defense acquisition program (MDAP) designations. Students will use their critical-thinking and analytical skills to execute all steps in assessing credible, repeatable, and defensible cost estimates. Case study-driven practical exercises will require cost estimators to conduct research and perform leadership responsibilities in a small group, decisionmaking environment.

Course Length: 8.5 classroom days
Method of Delivery: Resident

CMA 211

Government Flight Representative (GFR)

This course provides certification required to perform surveillance of a contractor’s flight and ground operations in accordance with the contract and Defense Contract Management Agency Instruction (DCMAI) 8210.1. The course is intended for rated U.S. Military officers, or government civilians in an aviation position, to whom the Approving Authority will delegate responsibility for approval of contractor flights, procedures, and crewmembers, and for ensuring contractor compliance with the contract and DCMAI 8210.1.

Course Length: 4 classroom days
Method of Delivery: Resident
CMA 221

**Government Ground Representative (GGR)**

This course provides certification required to perform surveillance of a contractor’s ground operations in accordance with the contract and Defense Contract Management Agency Instruction (DCMAI) 8210.1. This course is intended for U.S. Military aircraft maintenance officers or NCOs (E–7 or above), or government civilian equivalent, with responsibility for surveillance of contractor aircraft ground operations in accordance with the applicable provisions of the contract and DCMAI 8210.1.

**Course Length:** 4 classroom days  
**Method of Delivery:** Resident

CMA 231

**DCMA Aviation Safety Officer (ASO)**

This course provides required training to perform surveillance of a contractor’s ground operations in accordance with the contract and Defense Contract Management Agency (DCMA) Instruction 8210.1. The course is intended for U.S. Military rated officers onboarding to DCMA, who are serving in the position of Government Flight Representative (GFR) at DCMA units with flight operations conducted by DCMA aircrews.

**Course Length:** 2 classroom days  
**Method of Delivery:** Resident

CMM 100

**Surveillance Implications of Manufacturing and Subcontractor Management**

The course provides students with concepts and tools in manufacturing planning and control and in supply chain management, enabling them to assess manufacturing systems, predict costs, monitor technical performance, and evaluate supply-chain risk levels. After completing the course, participants will be able to evaluate the likelihood that a given supplier will fulfill the requirements of a given contract, thereby enabling industrial specialists, industrial engineers, and supply management specialists to make informed acquisition decisions. Prior completion of Statistics and Probability in Six Sigma (SkillPort course ID: Oper_07_a02_bs_enus) is recommended.

**Course Length:** 10 classroom days  
**Method of Delivery:** Resident

CMQ 101

**Government Contract Quality Assurance Fundamentals**

This is a 2-week classroom course providing reduction-to-practice training on the competencies needed for Defense Contract Management Agency (DCMA) 1910s to perform their job responsibilities at their desk or on the shop floor consistent with DCMA quality assurance policies.

**Course Length:** 9.5 classroom days  
**Method of Delivery:** Resident

CMQ 220

**Root Cause Analysis (RCA)**

The purpose of CMQ 220 is to enable students to understand RCA as a procedure for ascertaining and analyzing the causes of problems in an effort to determine what can be done to solve or prevent them. This course uses a variety of instructional methods—including online demonstrations, practical exercises, and case studies—to provide students with an in-depth understanding of how to analyze a system to identify the root causes of problems.

**Course Length:** To be determined  
**Method of Delivery:** Distance Learning
CON 090

**Federal Acquisition Regulation (FAR) Fundamentals**

This foundational course for new hires provides a total immersion into the Federal Acquisition Regulation (Parts 1–53) and the Defense Federal Acquisition Regulation Supplement (DFARS). It will prepare the 21st-century acquisition workforce to operate successfully in a Web-enabled environment. CON 090 is a limited lecture, research-intensive, exercise-based curriculum. Participants will analyze contracting business scenarios developed through research of the FAR and DFARS. The course has four modules: Contracting Overview, Using the FAR and DFARS, Contract Acquisition Planning, Contract Formation, and Contract Management/Administration. Students are expected to become familiar with FAR Parts 1–53, and they will be quizzed daily on it—based in part on knowledge, lecture/lesson content, and homework. Students should be prepared to dedicate 2 to 3 hours per evening for homework. Classroom laptop computers will be provided for each student.

**Course Length:** 4 weeks in classroom  
**Method of Delivery:** Resident

CON 100

**Shaping Smart Business Arrangements**

Personnel new to the contracting career field will gain a broad understanding of the environment in which they will serve. Students will develop professional skills for making business decisions and for advising acquisition team members in successfully meeting customers’ needs. Before beginning their study of technical knowledge and contracting procedures, students will learn about the various DoD mission areas and the types of business arrangements and procurement alternatives commonly used to support each area. Information systems, knowledge management, and recent DoD acquisition initiatives will be introduced in the course, which will also offer interactive exercises.

**Course Length:** Approximately 20 hours  
**Method of Delivery:** Distance Learning

CON 121

**Contract Planning**

This course will introduce personnel new to the contracting field to their role as a business advisor in the acquisition process. It focuses on the students’ role in understanding their customers’ mission and their ability to plan successful mission support strategies based upon their knowledge of the contracting environment and their customers’ needs. Students will learn how to use the Federal Acquisition Regulation (FAR) and Defense Federal Acquisition Regulation Supplement (DFARS) to conduct effective market research, develop alternative acquisition strategies, and understand how socioeconomic programs support the acquisition-planning process.

**Course Length:** Approximately 12 hours  
**Method of Delivery:** Distance Learning

CON 124

**Contract Execution**

This is the second of three online Level I contracting courses. It focuses on executing the acquisition planning through soliciting industry and awarding a contract. It provides students with the knowledge necessary to execute an acquisition that optimizes customer mission performance. Students will learn the techniques and benefits of early industry involvement in shaping requirements. They will also learn basic acquisition procedures for both commercial and noncommercial requirements, effective analysis of market data, and how to determine when a price is fair and reasonable. Finally, students will learn how to conduct basic competitive acquisitions, process awards, and handle protests before and after contract award.

**Course Length:** Approximately 13 hours  
**Method of Delivery:** Distance Learning

CON 127

**Contract Management**

This is the final of three online courses. It builds on the foundation established in CON 121 and CON 124 and provides students with the knowledge necessary to identify
and utilize appropriate performance metrics when evaluating contractor performance. Students will explore processes for working with their customer to ensure contract performance is meeting mission requirements. They will also learn performance assessment strategies and remedies for contractual noncompliance, as well as how to make and price contract changes after award, handle disputes, and close out completed contracts. Additionally, students will gain a fundamental knowledge of the characteristics and principles of the contract termination process.

**Course Length:** Approximately 10 hours  
**Method of Delivery:** Distance Learning

**CON 170**  
**Fundamentals of Cost and Price Analysis**

The course begins with an in-depth review of the market research process and provides instruction to help students understand and analyze contractor pricing strategies. Students will learn to accomplish cost-volume-profit analysis, calculate contribution margin estimates, and develop cost-estimating relationships in order to accomplish an effective price analysis pursuant to Federal Acquisition Regulation Subpart 15.4. The course provides an overview of the regulations and processes of cost analysis and for requiring certified cost and pricing data. Finally, after learning the basic elements of cost and price analysis, students will build and defend a prenegotiation objective, including a minimum and maximum pricing objective with a weighted guidelines assessment. Students are also provided in-depth instruction on contract-financing techniques, including the development and administration of progress payments based on cost and performance-based payments. Students will become proficient with the use of the PBP Analysis Tool.

**Course Length:** 10 classroom days  
**Method of Delivery:** Resident

**CON 200**  
**Business Decisions for Contracting**

This course builds on contracting Level I pre-award business and contracting knowledge necessary to process complex procurements. It emphasizes planning successful mission-support strategies and executing an acquisition that optimizes customer mission performance. Participants will learn various techniques for building successful business relationships, the benefits of strategic sourcing and spend analysis, and the ins and outs of providing contract financing. Students will also take an in-depth look at subcontracting, how to conduct a formal source selection, and how to analyze the information necessary to determine contractor responsibility.

**Course Length:** Approximately 19 hours  
**Method of Delivery:** Distance Learning

**CON 216**  
**Legal Considerations in Contracting**

This course focuses on legal considerations in the procurement process. Participants are introduced to the basic principles and sources of law relevant to procurement, including fiscal law. The course also addresses other legal issues that may develop during the course of a contract, such as protests, assignment of claims, disputes, fraud, contractor debt, performance issues, and contract termination.

**Course Length:** Approximately 23 hours  
**Method of Delivery:** Distance Learning

**CON 232**  
**Overhead Management of Defense Contracts**

This course provides an understanding of industry overhead costs and the costs’ impact on seller pricing/business strategies under various acquisition environments with differing contract types. Attendees will understand the development and application of overhead rates used in contract formation, administration, and closeout. A case study provides hands-on application of the overhead-rate process, in which attendees determine their own final overhead rates.

**Course Length:** 10 classroom days  
**Method of Delivery:** Resident
**Appendix A Training Courses**

- **CON 234**
  - **Joint Contingency Contracting Course**
  - This course develops skills for contracting support provided to Joint Forces across the full spectrum of military and disaster-relief operations. Exercises focus on unique aspects of contingency, critical-thinking skills, and the execution of appropriate contractual instruments.
  - **Course Length:** 8 classroom days
  - **Method of Delivery:** Resident

- **CON 237**
  - **Simplified Acquisition Procedures**
  - Professionals participating in this course will gain training on Part 13 of the Federal Acquisition Regulation and Part 213 of the Defense Federal Acquisition Regulation Supplement.
  - **Course Length:** Approximately 6 hours
  - **Method of Delivery:** Distance Learning

- **CON 243**
  - **Architect-Engineer Contracting**
  - Focusing on contracting for architect-engineers, this course covers issues across the contracting spectrum, including acquisition planning, source selection, proposal analysis, contract award and work, and contract management. Specific topics and practical exercises allow professionals to gain knowledge of the Brooks Act, Standard Form 330, the slate and selection process, the review of government estimates, liability, Title II services, modifications, and the responsibilities of the contracting officer’s technical representative.
  - **Course Length:** 4.5 classroom days
  - **Method of Delivery:** Resident

- **CON 244**
  - **Construction Contracting**
  - This course focuses on issues involving acquisition planning, contract performance management, funding, environmental concerns, construction contract language, construction contracting in the commercial setting, the Davis-Bacon Act, design/build, basic schedule delay analysis, construction changes, acceleration, and construction contract quality management.
  - **Course Length:** 4.5 classroom days
  - **Method of Delivery:** Resident

- **CON 252**
  - **Fundamentals of Cost Accounting Standards**
  - This course replaces former courses CON 250 and CON 251. The course provides detailed, hands-on instruction in the various aspects of Public Law 100-679, including the rules and regulations of the Cost Accounting Standards Board, the requirements of the cost accounting standards, disclosure statements, cost accounting practice changes, and calculating cost impacts for federal contracts.
  - **Course Length:** 8 classroom days
  - **Method of Delivery:** Resident

- **CON 260A**
  - **The Small Business Program, Part A**
  - This course provides an overview of the fundamentals of the DoD Small Business Program and focuses particular attention on the small business specialist’s role as a vital member of the acquisition team.
  - **Course Length:** Approximately 10 hours
  - **Method of Delivery:** Distance Learning
The Small Business Program, Part B

A follow-on to CON 260A, this course focuses on developing the skills and knowledge necessary for a small business specialist. Associated programs and initiatives that support the program and DoD’s efforts to improve small business participation in both prime contracting and subcontracting will also be reviewed, with particular attention to the small business specialist’s role as a vital member of the acquisition team.

Course Length: 3 classroom days
Method of Delivery: Resident

Intermediate Cost and Price Analysis

This course builds upon the fundamental contract-pricing principles covered in the Level I Contracting curriculum, the Contract Pricing Reference Guide, and DoD policy. The course is divided into three segments, which address contract pricing issues from pre-award, negotiation-preparation, and post-award perspectives. In the course, students will be introduced to quantitative techniques and tools used to quantify and facilitate decisionmaking in determining a fair and reasonable price. Students will apply various cost analysis techniques and quantitative tools to analyze a contractor’s cost proposal and to develop a government negotiation range and objective. The course is designed to prepare students for follow-on DAWIA Level II certification courses; serve as a gateway into more advanced, targeted, contract-pricing courses; and give the students some practical tools in pricing government contracts. The ultimate objective of the course is to help students become better business advisors in developing contract arrangements that are in the best interest of the government.

Course Length: 9.5 classroom days
Method of Delivery: Resident

Source Selection and Administration of Service Contracts

This course builds on the foundation established through the Level I curriculum and the course prerequisites. The primary focus is on the acquisition of services under Federal Acquisition Regulation Part 15 procedures, with an emphasis on performance-based acquisitions (PBA) for services, contract types, contract incentives, source selection, and contract administration. Students will learn the fundamentals of a performance-based service acquisition—from acquisition planning to contract closeout—through a realistic case study. The course takes students through the solicitation process using the mandatory DoD Source Selection Procedures. Students will prepare contractual documents and develop and deliver high-level source selection briefings with recommendations for contract award.

Course Length: 9.5 classroom days
Method of Delivery: Resident

Contract Administration and Negotiation Techniques in a Supply Environment

In this case-based course, students apply contracting concepts and techniques learned in prerequisite courses to meet customer supply requirements and resolve complex contracting issues. Special emphasis is placed on applying legal concepts from CON 216, intermediate pricing concepts from CON 270, and negotiation techniques from HBS 428. Students experience the full spectrum of contracting processes and issues by following a supply requirement through all phases of the acquisition life cycle, from acquisition planning through contract close-out. Research, analysis, and communication skills are honed through development and presentation of a critical-thinking project requiring in-depth focus on one area of contracting. Negotiation skills are sharpened through active student participation in two simulated contract negotiations.

Course Length: 9.5 classroom days
Method of Delivery: Resident
## Appendix A Training Courses

**CON 334**

**Advanced Contingency Contracting Officer’s Course**

This course develops skills for people who will be running the contingency contracting support operation provided to Joint Forces across the full spectrum of military operations. Exercises focus on unique aspects of contingency operations, critical-thinking skills, and the execution of appropriate contractual instruments. Attendees will gain insight into tactical and strategic Contingency Contracting Mission Support.

**Course Length:** 4 classroom days  
**Method of Delivery:** Resident

---

**CON 360**

**Contracting for Decision Makers**

Through realistic, scenario-based learning, students work individually and in teams to practice developing sound business solutions as valued strategic and expert business advisors. Students will learn to analyze complex contracting situations, with emphasis on critical thinking, problem solving, research, and risk reduction. Student course work is designed to contribute real solutions on real acquisition problems to senior leadership and local supervisors.

**Course Length:** 9.5 classroom days  
**Method of Delivery:** Resident

---

**CON 370**

**Advanced Contract Pricing**

This course uses a scenario-based approach to lead students to a deeper understanding of defense acquisition policy, the factors affecting price comparability, and quantitative analysis techniques. Topics include selected areas of business microeconomics; interpreting and shaping regulatory policy; data normalization; forecasting techniques; Monte Carlo risk analysis; simple linear, nonlinear, and multivariate regression techniques; cost improvement curve methodologies such as the unit and cumulative average formulations; and dealing with breaks in production.

**Course Length:** 9.5 classroom days  
**Method of Delivery:** Resident

---

**COR 206**

**Contracting Officer’s Representative in a Contingency Environment**

This course is designed specifically for Contracting Officer’s Representatives (CORs) who are deployed in a contingency environment. It covers the basics of contracting, along with the ethical situations and cultural differences a COR may experience while deployed in a contingency operation. Note: The course is offered only at the requesting agency’s location (typically not DAU) under a fee arrangement between the requesting organization and DAU.

**Course Length:** 3 hours  
**Method of Delivery:** Resident

---

**COR 222**

**Contracting Officer’s Representative Course**

This course will provide Contracting Officer’s Representatives (CORs) with the breadth of knowledge required to perform their responsibilities, including fundamentals of contracting regulations, types, phases, and other elements; awareness of ethical and legal factors that affect COR responsibilities; and information necessary to evaluate situations effectively, apply knowledge gained, and make correct decisions to carry out COR responsibilities. This is a fee-for-service, onsite course delivered for requesting organizations after coordination between the organization’s representative and the appropriate DAU representative. The course is also available to individuals as a distance learning course (see CLC 222).

**Course Length:** 4 classroom days  
**Method of Delivery:** Resident

---

---
ENG 102

Fundamentals of Systems Engineering

This course is a technically rigorous, comprehensive introduction to systems engineering and the various technical and technical management processes involved in its application. Based on the systems engineering processes outlined in the Defense Acquisition Guidebook, ENG 102 provides the foundation needed for systems planning, research, development, and engineering careerists and others—such as program management personnel and life-cycle support managers—to participate effectively in the application and management of DoD systems engineering processes and their related activities. (This course replaces SYS 101; it is scheduled to deploy in January 2015.)

Course Length: To be determined
Method of Delivery: Distance Learning

ENG 204

Applied Systems Engineering in Defense Acquisition, Part 1

This course provides an understanding of how DoD’s systems engineering technical and technical management processes can be applied to a notional system within the context of the acquisition life cycle. The course content includes information on the scope and role of systems engineering, its major inputs and outputs, timing of technical baselines, the role of technical reviews, important design considerations, and other related areas. (This course replaces SYS 202; it is scheduled to deploy in January 2015.)

Course Length: To be determined
Method of Delivery: Distance Learning

ENG 205

Applied Systems Engineering in Defense Acquisition, Part 2

This course gives students the opportunity to use the DoD systems engineering processes and techniques learned in SYS 202. Participants will work in integrated product teams and apply systems engineering technical processes and technical management processes to a defense system as it gets developed across the various phases of the acquisition life cycle. (This course replaces SYS 203; it is scheduled to deploy in January 2015.)

Course Length: To be determined
Method of Delivery: Resident

ENG 301

Leadership in Engineering Defense Systems

Designed for senior DoD technical acquisition personnel, ENG 301 focuses on the application of technical leadership skills within a typical DoD systems engineering environment. Participants must have sufficient background knowledge of DoD systems engineering management processes, knowledge of the application of systems engineering to each acquisition phase, and the capability to apply these concepts to complex technical management problems involving critical thinking. This 2-week course will instruct students on how to lead engineering teams in the execution and technical risk management of complex, multidisciplinary technical projects while promoting a holistic life-cycle perspective to defense system development. Its 21 modules combine lectures with extensive exercises to cover a variety of topics, including system security engineering, open architectures, reliability, and maintainability. Precourse work and a pretest are also required. (This course replaces SYS 302; it is scheduled to deploy in January 2015.)

Course Length: 9.5 classroom days
Method of Delivery: Resident
**Appendix A Training Courses**

**EVM 101**  
**Fundamentals of Earned Value Management**

In a virtual classroom environment, professionals learn additional information about earned value management (EVM), which is introduced in ACQ 101. The course summarizes the language, data reports, metrics, and management processes associated with EVM as they apply to DoD acquisition management. Professionals also learn the processes related to the performance measurement baseline, the Integrated Baseline Review, and the American National Standards Institute/Electronic Industries Alliance (ANSI/EIA) for EVM systems. Finally, professionals evaluate and compute basic EVM metrics and EVM metric-based estimates at completion.

**Course Length:** Approximately 18 hours  
**Method of Delivery:** Distance Learning

**EVM 201**  
**Intermediate Earned Value Management**

Professionals taking this course work as members of an integrated product team for the system development and demonstration phase of a small ACAT I program. In the context of integrated program management, participants review, develop, and experience the earned value management (EVM)-related processes associated with requirements generation, acquisition strategy development, request-for-proposal development, source selection, risk management, Integrated Baseline Review, and analysis during program execution.

**Course Length:** 8.5 classroom days  
**Method of Delivery:** Resident

**EVM 262**  
**EVMS Validation and Surveillance**

Gain the knowledge needed to review integrated management systems and to determine their compliance with the American National Standards Institute/Electronic Industries Alliance (ANSI/EIA) 748B Earned Value Management System (EVMS) standard. Course material, individual exercises, and group exercises review the 32 ANSI/EIA 748B EVMS guidelines and the processes associated with validation and surveillance of contractor and government integrated management systems.

**Course Length:** 8 classroom days  
**Method of Delivery:** Resident

**EVM 263**  
**Principles of Schedule Management**

This course provides the knowledge needed to interpret network schedules required by DoD policy and the American National Standards Institute/Electronic Industries Alliance (ANSI/EIA) 748 Earned Value Management System (EVMS) standard. Course material, individual exercises, and group exercises using Microsoft Project demonstrate the schedule development/maintenance process. Two scored exercises require participants to create a Microsoft Project network schedule and apply a schedule assessment model to analyze a complex, 700-line Microsoft Project network schedule.

**Course Length:** 3 classroom days  
**Method of Delivery:** Resident

**FE 201**  
**Intermediate Facilities Engineering**

The course provides a broad understanding of the overall facilities-engineering process and the roles and responsibilities of acquisition team members as they relate to the facility life cycle in support of military missions.

**Course Length:** Approximately 18 hours  
**Method of Delivery:** Distance Learning
Students will explore the Federal Acquisition Regulation (FAR); Defense Federal Acquisition Regulation Supplement (DFARS); DFARS Procedures, Guidance and Information (PGI); and other relevant guidance. The course will take students through the contract formation process, identification of contract content pertaining to contract property, administration requirements, and disposal processes for contract property. Students are expected to complete self-paced online tasks and study assignments before arriving in the classroom.

**Course Length:** 9 classroom days  
**Method of Delivery:** Resident

---

**IND 205**

**Contract Government Property Management Systems and Auditing Concepts**

This course will enable students to identify the factors that help determine the adequacy of a contractor’s property management system (PMS). This will include fundamental auditing concepts. Lessons will teach students how to select the sample size for a given population; evaluate the sample and generalize to the population; analyze the essentials required for a PMS audit; prepare the spreadsheets and narratives involved with a PMS audit; determine the requirements for the disposal of contract inventory; and analyze a property management case study, including background information, solutions, alternative solutions, and documentation.

**Course Length:** 9.5 classroom days  
**Method of Delivery:** Resident

---

**FE 301**

**Advanced Facilities Engineering**

Advanced Facilities Engineering is the Level III certification course in the Facilities Engineering (FE) career field. Through realistic, scenario-based learning, professionals work in teams to practice developing solutions to a variety of challenges that FE professionals encounter within DoD. Course work is designed to teach professionals how to contribute solutions to senior leadership and how to provide resources for the FE career field via the course community of practice.

**Course Length:** 4.5 classroom days, preceded by required online assignments  
**Method of Delivery:** Resident

---

**GRT 201**

**Grants and Agreements Management**

This course presents the foundational knowledge required to work as a grants officer. Course participants learn about grants, cooperative agreements, and technology investment agreements. The course also provides a brief overview of other types of assistance transactions. Please note that this course does not address other transactions used to carry out prototype projects, which involve acquisitions instead of assistance, and therefore fall outside the scope of this course.

**Course Length:** 4 classroom days  
**Method of Delivery:** Resident

---

**IND 105**

**Contract Property Fundamentals**

This course provides foundational knowledge, training, and skill development on the placement and administration of contract property, with special attention given to the administration of the contractor’s property management system for contract property, the disposal of contract property, and the identification of risks inherent in such placement. Instruction will also include the life cycle of a property management system and the processes and outcomes to be evaluated in a property management system audit.
IRM 101

**Basic Information Systems Acquisition**

Within the framework of a program office integrated product team (IPT), this course covers introductory concepts in DoD information systems and software acquisition management. Key areas covered include DoD regulatory and technical frameworks, common software risks, software and system architectures, life-cycle reviews, and software development and integration processes. Software standards, information assurance, software and system measures, testing, contracting issues, software quality, the role of process maturity, and best practices for the management of software systems are also introduced.

**Course Length:** Approximately 34 hours  
**Method of Delivery:** Distance Learning

---

IRM 202

**Intermediate Information Systems Acquisition**

This course focuses on the application of DoD policies, concepts, and best practices for the management and acquisition of software-intensive and information technology systems. Exercises, lectures, group discussion, and a comprehensive student-led practicum are used in IRM 202 to cover topics such as strategic planning, information assurance, architectures, system engineering, requirements management, software design and development, risk management, contracting, cost estimation, metrics, process maturity, quality, and testing.

**Course Length:** 9.5 classroom days  
**Method of Delivery:** Resident

---

IRM 304

**Advanced Information Systems Acquisition**

Via the use of case studies, this course focuses on decision making and management in the development of DoD information technology (IT) systems, the role of capital planning and investment control, use of enterprise architectures, information assurance, acquisition planning, and IT systems engineering. Supplemented with industry speakers who provide industry perspectives on IT management and contracting, IRM 304 integrates a variety of advanced topics critical to successful IT systems acquisition.

**Course Length:** 5 classroom days preceded by required online assignments  
**Method of Delivery:** Resident

---

LOG 101

**Acquisition Logistics Fundamentals**

Acquisition Logistics Fundamentals provides a broad overview of the role of acquisition logistics in the systems acquisition life cycle and systems engineering processes. Modules cover the logistics-relevant aspects of requirements identification, life-cycle costing, integrated product-and-process development, sustainment logistics, supportability analysis, product support, contracting, and contractor support.

**Course Length:** Approximately 27 hours  
**Method of Delivery:** Distance Learning

---

LOG 102

**Fundamentals of System Sustainment Management**

This course provides a broad overview of the life-cycle logistician’s role during the sustainment phase of a weapon system’s life cycle. Modules cover logistics/supply-chain management concepts, maintenance processes, end-to-end distribution, best commercial practices as applied to weapon systems sustainment, performance metrics, partnering/alliance opportunities and experiences, performance-based support, enterprise business environment and opportunities, and reduction in life-cycle/total ownership costs.

**Course Length:** Approximately 25 hours  
**Method of Delivery:** Distance Learning
LOG 103

Reliability, Availability, and Maintainability (RAM)

Professionals who take this course will be able to understand the relationship between reliability, availability, and maintainability (RAM) as a critical factor in design, performance, cost, and sustainment. The course addresses the cross-disciplinary actions of program management, systems engineering, test and evaluation, acquisition logistics, and sustainment to evaluate the impact of reliability and maintainability decisions. Stressing a conceptual approach, the course presents basic RAM terminology and engineering practices. It discusses current legislation and DoD policy that have invigorated systems engineering and logistics engineering to improve the requirements process, minimize risk through reliability growth programs, and ensure effectiveness and suitability through developmental and operational test and evaluation.

Course Length: Approximately 20 hours
Method of Delivery: Distance Learning

LOG 200

Intermediate Acquisition Logistics, Part A

LOG 200 is the first part in a two-course series designed for intermediate acquisition logistics professionals. It provides a dynamic, real-time learning environment oriented toward developing the managerial and technical logistics competencies of the life-cycle logistician. Special emphasis is placed on the roles and responsibilities of the life-cycle logistician in the areas of regulatory environment, oversight, and review; management processes; technical activities; and the DoD planning, programming, budgeting, and execution process. The course requires participants to review current policy and guidance and demonstrate an understanding of how early integration of operational supportability into the system development process leads to achievement of DoD’s strategic logistics goals.

Course Length: Approximately 32 hours
Method of Delivery: Distance Learning
LOG 201

Intermediate Acquisition Logistics, Part B

LOG 201 is the second part in a two-course series designed for intermediate acquisition logistics professionals. The course provides a dynamic, group-based, facilitated learning environment oriented toward further developing logistics competencies required by the life-cycle logistician during weapons and equipment systems development. It challenges the professional to think critically, differentiate support alternatives, and provide solutions to ensure the early integration of operational supportability into the system development process. These skills are refined by instructor-facilitated group exercises and discussions. Special emphasis is placed on developing and delivering the required logistics inputs that ensure supportability is designed into a system.

Course Length: 4.5 classroom days
Method of Delivery: Resident

LOG 204

Configuration Management

This fast-paced, cross-disciplinary course teaches professionals about the interrelationship of configuration management and life-cycle activities, while covering configuration management concepts and basic practices such as configuration identification, status accounting, audits and verification, configuration change management, performance measures, and configuration management planning. The course also provides an overview of requirements for designing, developing, implementing, overseeing, and operating a configuration management program across the system life cycle. Professionals will gain knowledge of the impact on configuration management by issues such as total life-cycle systems management, product data management, item-unique identification, evolutionary acquisition, performance-based logistics, condition-based maintenance, prognostics and health management, and diminishing manufacturing sources and material shortages.

Course Length: Approximately 18 hours
Method of Delivery: Distance Learning

LOG 206

Intermediate Systems Sustainment Management

This course provides a comprehensive understanding of logistics sustainment management principles and fundamentals, including the roles, responsibilities, and functions of a logistician assigned to a major weapon systems acquisition program. The course explains the role of a life-cycle logistician during the sustainment phase of a weapon system’s life cycle; identifies concepts, policies, and practices of logistics/supply chain management as they apply to new and legacy systems during the sustainment phase of their respective life cycles; identifies best practices in developing and implementing performance-based logistics support; explains materiel availability, materiel reliability, and mean downtime principles; relates the principles contained in recent DoD guidance regarding logistics sustainment enablers; and explains the concepts of systems sustainment as described by DoD Instruction 5000.02, paragraph 3.9.

Course Length: Approximately 27 hours
Method of Learning: Distance Learning

LOG 211

Supportability Analysis

Designed as DAU’s foundational course for the instruction of supportability analysis, LOG 211 builds on the supportability concepts presented in LOG 201. It uses a notional scenario to engage life-cycle logisticians and other students within the systems engineering career field and to ensure that design characteristics such as reliability, availability, and maintainability (RAM), as well as affordability, are included as system performance requirements, and that the system is concurrently designed, developed, and acquired with the optimal product-support infrastructure and resources. In addition, LOG 211 provides detailed process-oriented instruction in specific techniques and tools of supportability analysis. The instructional methodology uses student exercises, gaming, and simulations focused on selected subsystems and components to illustrate the influence of supportability principles and trade studies in maturing both the system design and its sustainment infrastructure while achieving affordability.

Course Length: 4.5 classroom days
Method of Delivery: Resident
LOG 215

Technical Data Management

This course provides a comprehensive knowledge and understanding of technical data management strategies, planning, processes, products, and tools across the life cycle based on DoD policy, guidance, processes, procedures, and best business practices from across the four Services and industry.

**Course Length:** Approximately 38 hours
**Method of Delivery:** Distance Learning

LOG 235

Performance-Based Logistics

Performance-Based Logistics provides a dynamic, real-time learning environment oriented toward developing a range of logistics competencies. It challenges the participant to review current policy and demonstrate an understanding of how early integration of performance-based support concepts into the systems-development process leads to the achievement of DoD’s logistics goals. It is intended for mid-level logistics professionals who need the skills required to excel in today’s demanding and dynamic product-support environment.

**Course Length:** Approximately 19 hours
**Method of Delivery:** Distance Learning

LOG 340

Life-Cycle Product Support

This course is designed to help prepare the life-cycle logistician to perform in a senior-level life-cycle logistics role over the life cycle of a system as a product support manager. It emphasizes developing and implementing a life-cycle product-support strategy. Students will apply tools and techniques from the 12-Step Product Support Strategy Process Model in analyzing and comparing alternative product-support strategies for adoption. The course challenges students to think critically in instructor-facilitated group exercises to justify and make sound recommendations in devising the best mix of product support providers that will satisfy the warfighter’s outcome-based requirements.

**Course Length:** 4.5 classroom days
**Method of Delivery:** Resident

LOG 350

Enterprise Life-Cycle Logistics Management

This course prepares the life-cycle logistician to perform in senior-level life-cycle logistics management and policymaking positions. Professionals are required to conduct research, engage in critical-thinking exercises, and perform leadership responsibilities in a small group decision-making environment. Professionals engage in a dynamic, fast-paced, threaded exercise addressing complex relationships in life-cycle logistics support planning, acquisition policy, support-ability analysis, program management, performance-based logistics, and business case analysis. The course spans a system’s entire life cycle from concept through demilitarization and disposal, including planning for acquisition logistics and operations-and-support sustainment.

**Course Length:** 9.5 classroom days
**Method of Delivery:** Resident

LOG 365

Executive Product Support Manager’s Course

Designed as an executive-level course for DoD product support managers (PSMs), LOG 365 focuses on enhancing a PSM’s ability to field and sustain DoD systems. PSM roles and responsibilities—as well as best practices for developing, validating, and implementing a product support strategy—serve as the central unifying themes. Premier learning resources to improve a PSM’s business and technical skills will also be highlighted. Course participants will create their own Stakeholder Tactical Engagement Plan (STEP) and a Professional Development Plan to enhance their effectiveness at fielding and sustaining defense systems. PSMs and speakers will share their lessons learned and leadership tips.

**Course Length:** 9.5 classroom days
**Method of Delivery:** Resident
PMT 251

Program Management Tools Course, Part 1

This course provides application skills needed in a program office as an integrated product team lead. It is a follow-on course to ACQ 203 and is designed to enhance journeyman-level skills. This course prepares defense acquisition professionals for work in the program offices and for the Program Management Office Course, PMT 352, Parts A and B.

Course Length: Approximately 20 hours over 60 calendar days to complete this course
Method of Delivery: Distance Learning

PMT 257

Program Management Tools Course, Part 2

This course provides application skills needed in a program office as an integrated product team lead. It is a follow-on course to PMT 251 and is designed to enhance journeyman-level skills. This course prepares defense acquisition professionals for work in the program offices and for the Program Management Office Course, PMT 352, Parts A and B.

Course Length: 4.5 classroom days
Method of Delivery: Facilitated/Online

PMT 304

Advanced International Management Workshop

This course is designed to prepare professionals to participate effectively in the development and negotiation of defense armaments cooperation agreements ranging from simple data exchange annexes to complex cooperative development, production, and support agreements. Students who successfully complete this course will be able to synthesize, integrate, and apply U.S. policy on international cooperative defense acquisition, including policies of the Departments of Defense, State, Commerce, and Treasury. The final outcome of the week is to formulate and practice negotiation of international acquisition agreements in accordance with U.S. policies, statutes, and regulations.

Course Length: 5 classroom days
Method of Delivery: Resident

PMT 313

Advanced Technology Security/Control Workshop

This course explores issues associated with the proper means of analyzing, synthesizing, and applying security principles and concepts for effective technology transfer. Specific topics include DoD policies and experiences, the role of executive departments and Congress, International Traffic in Arms Regulations (ITAR) exemptions, international security policy documentation, anti-tamper, NATO-EU-other international organizations’ defense policies, and export control reform.

Course Length: 5 classroom days
Method of Delivery: Resident

PMT 352A

Program Management Office Course, Part A

This is the first part of the Level III certification course in the Program Management career field. It is a follow-on to ACQ 203 and PMT 257 and is designed to train Level II certified professionals to be effective leaders in a program office by honing analysis, synthesis, and evaluative skills. PMT 352A focuses on key program management office knowledge and skills not covered in the prerequisite courses. This course must be completed before attending PMT 352B.

Course Length: Approximately 22 hours
Method of Delivery: Distance Learning
PMT 352B
Program Management Office Course, Part B

This is the second part of the Level III certification course in the Program Management career field. It is a follow-on to ACQ 203 and PMT 257 and is designed to train Level II certified professionals to be effective leaders in a program office by honing analysis, synthesis, and evaluative skills. In a classroom setting, PMT 352B gives attendees scenario-based practical exercises with topical themes such as interoperability, prototyping, and evolutionary acquisition.

Course Length: 18.5 classroom days
Method of Delivery: Resident

PMT 400
Program Manager’s Skills Course

This course provides O–5/GS-14, Level III Program Management career field professionals with the latest acquisition policies and proven practices in the areas of requirements, acquisition, finance, and technical management. Additionally, students will have an opportunity to examine and discuss key program manager skills and lessons learned and to develop a plan for strengthening their skills for program success.

Course Length: 9.5 classroom days
Method of Delivery: Resident

PMT 401
Program Manager’s Course

This course is designed to improve DoD acquisition outcomes by strengthening the analytical, critical thinking, and decisionmaking skills of potential leaders of major defense acquisition programs and program support organizations. Applying the proven doctrine of “train as you fight,” participants analyze acquisition case studies representing contemporary acquisition program challenges and dilemmas; apply a broad cross-section of knowledge of the acquisition environment and experience; and deepen their understanding of acquisition principles and practices through peer and instructor mentoring and coaching. Speakers, team projects, media training, and management simulations round out and enrich the course.

Target Attendees: Level III Program Management career field members who have demonstrated the potential to become major program or project managers. Also, limited numbers (up to 15 percent) of high-potential Level III acquisition professionals in other career fields, such as Contracting, Logistics, and Financial Management. Participants must be O–5 or GS-14 or above with extensive experience in acquisition, including 4 years in or directly supporting a program organization. Industry participants with equivalent experience are also sought. Board–selected ACAT I or II program managers should attend the course before beginning their assignment.

Course Length: 10 weeks
Method of Delivery: Resident

PMT 402
Executive Program Manager’s Course

This assignment-specific course is designed to meet the learning and performance needs of newly selected PEOs, DPEOs, and ACAT I and II program managers and deputy program managers. Skills and behaviors are developed through a concentrated 4-week period, preceded by approximately 8–16 hours of work on an advanced pre-course assignment.

Target Attendees: PEOs, DPEOs, ACAT I and II program managers and deputy program managers
Course Length: 20 classroom days preceded by an online workshop
Method of Delivery: Resident

PQM 101
Production, Quality, and Manufacturing Fundamentals

This entry-level course emphasizes basic production, manufacturing, and quality assurance principles, policies, processes, and practices.

Course Length: Approximately 13 hours
Method of Delivery: Distance Learning
characterization of commercial items, the development and use of market acceptability criteria, and the development of performance-based salient characteristics. Current policy on the use of commercial item descriptions and performance specifications is discussed. This course uses an interactive, asynchronous learning environment focused on self-paced learning that is demonstrated in a virtual group environment.

**Course Length:** Approximately 12 hours within 15 calendar days
**Method of Delivery:** Facilitated/Online

**PQM 301**

**Advanced Production, Quality, and Manufacturing**

This rigorous leadership course is structured around integrated production, quality, and manufacturing processes. Professionals will learn and practice advanced production and quality approaches supporting DoD acquisition activities. Key areas covered include problem-solving and decisionmaking issues relevant to successfully managing core technical areas.

**Course Length:** 9.5 classroom days
**Method of Delivery:** Resident

**RQM 110**

**Core Concepts for Requirements Management**

In this course, professionals study the role of the requirements manager and requirements management within the “Big A” acquisition construct. They examine the capabilities and the process from an end-to-end perspective that highlights the intersection between acquisition, resources, and requirements.

**Course Length:** Approximately 19 hours
**Method of Delivery:** Distance Learning
RQM 310
Advanced Concepts and Skills for Requirements Management

The functions of requirements managers and their supervisors are studied in RQM 310, which begins by reviewing the prerequisite material, Capability-Based Assessments (CBAs), and developing requirements. The course continues by examining the requirements manager’s interactions with the Defense Acquisition System (DAS), within the Joint Capabilities Integration and Development System (JCIDS), and with Functional Capability Boards (FCBs).

Course Length: 4.5 classroom days
Method of Delivery: Resident

RQM 403
Requirements Executive Overview Workshop

This course discusses the top-level functions of requirements management and meets the certification requirement for general- and flag-level executives. It examines the interactions between the Joint Capabilities Integration and Development System (JCIDS), the Defense Acquisition System (DAS), and planning, programming, budgeting, and execution (PPBE).

Target Attendees: This course is for DoD general/flag officers, equivalent career Senior Executive Service personnel, and political appointees.
Course Length: Varies depending on the number of topics to be addressed; typically 1 classroom day
Method of Delivery: Resident

RQM 413
Senior Leader Requirements Course

This course discusses the top-level functions of requirements management. It examines the interactions between the Joint Capabilities Integration and Development System (JCIDS), the Defense Acquisition System (DAS), and planning, programming, budgeting, and execution (PPBE). RQM 413 meets the requirements certification requirement for four-star-level executives.

Course Length: Approximately 2 hours
Method of Delivery: Resident

SAM 301
Advanced Software Acquisition Management

This is a seminar-based course for senior personnel who acquire, engineer, test, and evaluate DoD software-intensive systems. SAM 301 is also for acquisition professionals interested in obtaining comprehensive insight into the risks and issues associated with developing and implementing complex DoD software systems. Exercises, lectures, group discussion, and labs are used to cover topics such as strategic planning, information assurance, architectures, advancing technologies, requirements management, cost estimation, metrics, process maturity, quality, and testing.

Course Length: 4.5 classroom days
Method of Delivery: Resident

STM 202
Intermediate S&T Management

This course provides, for personnel associated with Science and Technology (S&T) project management and others, an understanding of the procedures and mechanisms that DoD uses to transition advanced technologies into warfighting systems. Students will be able to describe the challenges in successfully transitioning technologies into DoD’s weapons system acquisition process or transitioning them directly to the warfighter; to assess the implications of various technology transition mechanisms; and to apply effective technology transition practices.

Course Length: 3 classroom days
Method of Delivery: Resident
STM 303  
**Advanced S&T Management**

This course provides Science and Technology (S&T) professionals and others with an understanding of the procedures and mechanisms that can be used to transition emerging technologies into the DoD’s warfighting systems and the critical skills needed to do so. In areas such as budgeting, systems engineering, and test and evaluation, attendees will be able to apply skills that are essential for effective technology project management. Additionally, they will learn how to analyze and apply effective technology transition practices from basic research to acquisition or deployment.

**Course Length:** 3.5 classroom days  
**Method of Delivery:** Resident

SYS 101  
**Fundamentals of Systems Planning, Research, Development, and Engineering**

This course is a technically rigorous, comprehensive introduction to systems engineering and the various technical management processes involved in its application. Based on the systems engineering processes outlined in the *Defense Acquisition Guidebook*, SYS 101 provides the foundations needed for systems planning, research, development, and engineering careerists and others—such as program management personnel and life-cycle support managers—to participate effectively in the application and management of DoD systems engineering processes and their related activities. *(This course is expected to be replaced by ENG 102 in January 2015.)*

**Course Length:** Approximately 35 hours  
**Method of Delivery:** Distance Learning

SYS 120  
**Defense Standardization Workshop**

The Defense Standardization Workshop covers DoD policies and procedures for developing, managing, and using nongovernment standards, commercial item descriptions, and specifications and standards. Practical exercises for individuals and groups emphasize the application of standardization tools, policies, and procedures described in CLE 028 (Market Research for Engineering and Technical Personnel), CLE 064 (Standardization in the Acquisition Life Cycle), and CLE 065 (Standardization Documents).

**Course Length:** 2.5 classroom days  
**Method of Delivery:** Resident

SYS 130  
**Specification Selection and Application**

This course provides instruction on the appropriate selection and correct application of nongovernmental standards, commercial item descriptions, specifications and standards, and related documents in the acquisition process. Emphasis is placed on current acquisition initiatives such as interoperability and the proper use of standardization documents.

**Course Length:** 2 classroom days  
**Method of Delivery:** Resident

SYS 202  
**Intermediate Systems Planning, Research, Development, and Engineering, Part 1**

This distance learning course provides an understanding of how DoD’s systems engineering technical and technical management processes can be applied to a notional system within the context of the acquisition life cycle. Course content includes the scope and role of systems engineering and its major technical inputs and outputs, timing of technical baselines, the role of technical reviews, important design considerations, and other related areas. *(This course is expected to be replaced by ENG 204 in January 2015.)*

**Course Length:** Approximately 9 hours  
**Method of Delivery:** Distance Learning
the integrated T&E processes outlined in the *Defense Acquisition Guidebook* and provides the foundational knowledge needed by T&E professionals and others to participate more effectively in DoD T&E activities.

**Course Length:** Approximately 18 hours  
**Method of Delivery:** Distance Learning

**TST 204**  
**Intermediate Test and Evaluation**

This course builds upon professionals’ knowledge, skills, and on-the-job experience relating to DoD test and evaluation (T&E) policies, processes, and practices. A number of problem-solving situations engage participants in the application of T&E concepts and principles. Course topics include the role of T&E in systems acquisition; T&E planning and the T&E strategy; T&E master plan development; managing a T&E program; and planning, conducting, and processing the results of T&E events.

**Course Length:** 9.5 classroom days  
**Method of Delivery:** Resident

**SYS 302**  
**Technical Leadership in Systems Engineering**

Designed for senior DoD acquisition personnel, SYS 302 focuses on the application of technical leadership skills within a typical DoD systems engineering environment. Participants are expected to have sufficient background knowledge of the DoD’s systems engineering management processes, knowledge of the application of systems engineering to each acquisition phase, and the capability to apply these concepts to complex technical management problems involving critical thinking. As part of the SYS 302 course, participants will lead and participate in an engineering team that analyzes and resolves a variety of technical engineering critical issues. Class exercises are supplemented by lessons on current policy, architectures, and design considerations. *(This course is expected to be replaced by ENG 301 in January 2015.)*

**Course Length:** 9.5 classroom days  
**Method of Delivery:** Resident

**TST 303**  
**Advanced Test and Evaluation**

Designed for senior DoD acquisition personnel, this course focuses on leadership and management issues in a test and evaluation (T&E) environment. TST 303 involves facilitated discussion of current DoD policies, strategies, processes, and practices as they are applied and used in the T&E planning and management of DoD systems. This course covers a variety of knowledge-building and interactive problem-solving skills using case studies developed around lessons learned from actual system acquisitions. Class discussion and study group efforts culminate in participant presentations based on case analysis and solution analysis. Knowledge and skills developed in this course will facilitate successful professional participation as a T&E member in integrated planning and development activities for major programs.

**Course Length:** 4.5 classroom days  
**Method of Delivery:** Resident

Appendix C: Targeted Training

Visit [http://catalog.dau.mil](http://catalog.dau.mil) to request Targeted Training courses.
Appendix C Targeted Training

Generally, these are resident courses at DAU.

**BUSINESS**

**TTB 001**

**Activity-Based Costing Principles (ABCP)**

This course provides an overview of the activity-based costing methodology, which allows acquisition professionals to establish a realistic cost (including indirect costs) for all activity resources for products and services.

**Course Length:** 3.5 classroom days

**TTB 002**

**Budget Execution**

This course reviews the monetary concepts of commitment, obligation, expenditure, and outlay. It also discusses the preparation of obligation and expenditure plans, variance reports, and reclaims to budget adjustments proposed by higher headquarters.

**Course Length:** 1 classroom day

**TTB 004**

**DoD Budget “Primer”**

This course explores how funds are programmed, budgeted, enacted, and executed to enable a successful acquisition program.

**Course Length:** 1 classroom day

**TTB 007**

**POM Development Process**

This course provides an introduction to Program Objective Memorandum (POM) development in the context of the planning, programming, budgeting, and execution process. It includes how the POM is developed, the process of submitting it to the Office of Secretary of Defense (OSD), and how it is reviewed and adjusted during the OSD integrated program and budget review.

**Course Length:** 1 classroom day

**TTB 008**

**Earned Value Management**

This course examines the earned value management (EVM) process, which is key in establishing a realistic program baseline and can help identify program trends for technical, cost, or schedule performance.

**Course Length:** 3 classroom days

**TTB 009**

**Business Financial Management Integration into Programs**

Discover how the business financial manager integrates cost estimating, budget development, and budget defense, as well as ensures timely budget execution to enable the program manager to succeed.

**Course Length:** 1 classroom day

**TTB 011**

**Practical Cost-Benefit Analysis**

A cost-benefit analysis (CBA) is a structured method of quickly and concisely showing the costs and benefits of making a change, thereby detailing the quantifiable impact of making that decision. The course follows the methodology of the *U.S. Army Cost Benefit Analysis Guide* and gives helpful hints and more detailed guidance on what to expect and how to avoid the most common failings. The Office of the Deputy Assistant Secretary of the Army, Cost Estimating (DASA-CE) has reviewed and approved the course as meeting the intent of the CBA creation process against which it will be evaluating proposals. This hands-on course spends more than half of its allotted time analyzing and working through examples and exercises.

**Course Length:** 3.5 classroom days
TTB 012

**Executive Cost-Benefit Analysis**

Designed for executives and other reviewers of cost-benefit analyses, this fast-paced course provides an overview and some practice in reviewing the submissions. The format consists of short lectures about the terms and the rules of the topic area, followed by examples and exercises. This hands-on course spends more than half of its allotted time analyzing and working through examples and exercises.

**Course Length:** 1 classroom day

TTB 013

**Earned Value Management Refresher**

Using a combination of lecture and group exercises, this course provides an opportunity for students to refresh their knowledge and skills related to key terms, metrics, and scheduling principles of earned value management (EVM) before attending EVM 201.

**Course Length:** 2 classroom days

TTB 014

**Intermediate Acquisition Financial Management**

This targeted training uses lecture, discussion, and team and individual exercises to refresh and reinforce the financial manager’s role within an acquisition program management office. It is designed as an intermediate learning opportunity after taking BCF 103 but before taking BCF 225. It may be taken before or after BCF 220. The exercises are designed to have students interpret basic information and apply it to scenarios to determine meaning, impact, and solutions.

**Course Length:** 2 classroom days

TTB 015

**Advanced Acquisition Financial Management**

This targeted training uses lecture, discussion, and team and individual exercises to help students think like a financial manager within an acquisition program management office. It is designed as an advanced learning opportunity after taking BCF 103 and BCF 225 but before taking BCF 301. The exercises are designed to have students interpret complex information and apply it to scenarios to determine meaning, impact, and solutions.

**Course Length:** 2 classroom days

**CONTRACTING**

TTB 016

**Sole Source Commercial Item Pricing**

This course examines when a sole source commercial supply or service should be used and provides methods to determine whether the price is reasonable.

**Course Length:** 1 classroom day

TTB 017

**Source Selection**

This course provides an overview of the source selection process, which applies to competitive negotiated acquisitions per Federal Acquisition Regulation (FAR) and the mandatory DoD Source Selection Procedures.

**Course Length:** 2 classroom days

TTB 018

**Alternative Dispute Resolution (ADR)**

This course reviews the ADR process, which can assist the government and contractor in resolving disputes, leading to mutual agreements that benefit both parties.

**Course Length:** 2 classroom days
Appendix C Targeted Training

Generally, these are resident courses at DAU.

TTC 015

**Negotiation Training for the Acquisition Seminar**

This 2-day, interactive course teaches acquisition professionals how to use interest-based negotiation (IBN) techniques to reach mutually beneficial agreements with vendors, internal departments, colleagues, and other stakeholders. The course includes dynamic, hands-on negotiating exercises that allow participants to apply collaborative problem-solving techniques to realistic acquisition challenges.

**Course Length:** 2 classroom days

TTC 019

**Supervisory Contracting: Refresh and Reboot**

This course provides a senior-level overview for contracting supervisors and leaders. It discusses Federal Acquisition Regulation concepts such as “contracting authority” and “inherently governmental,” as well as the requirement to include earned value management in some contracts.

**Course Length:** 4 classroom days (supervisors with Level III certification in contracting); 1 day for general officers, flag officers, and members of the Senior Executive Service.

**PROFESSIONAL DEVELOPMENT**

TTD 003

**Leading Project Teams Course**

Through the use of practical examples and exercises, this course emphasizes best practices for building and maintaining high-performing teams.

**Course Length:** 3.5 classroom days

TTD 004

**Myers-Briggs Type Indicator (MBTI) Seminar**

The MBTI is a self-report personality inventory based on the theory of psychological types developed by Swiss psychiatrist Carl Jung. This seminar allows participants to complete the instrument and receive individual feedback on their results.

**Course Length:** 1 classroom day

TTD 005

**Crucial Conversations®**

This course shows how individuals, teams, and organizations can overcome problems stemming from under-communicating, withholding information, or failing to act with unity and conviction.

**Course Length:** 2 classroom days

TTD 006

**Leading at the Speed of Trust**

This 2-day seminar, based on the bestselling book *The Speed of Trust* by Stephen M. R. Covey, elevates “trust” from an undervalued or transparent element of organizational effectiveness to a visible element of strategic significance. Leaders and organizations learn that trust enables collaboration, innovation, effectiveness, and efficiency, and that they are able to harvest and reinvest the “dividends” of trust. This highly interactive seminar uses hands-on activities to engage leaders at all levels in identifying and closing trust gaps in their organization.

**Course Length:** 2 classroom days

TTD 007

**Strength Deployment Inventory® Seminar**

The Strength Deployment Inventory (SDI) is a proven, memorable tool for improving team effectiveness and reducing the costs of conflict. During the seminar, you will receive a brief overview of the tool, complete the assessment instrument, do a self-validation, participate in fun activities to reinforce learning, and receive general feedback.

**Course Length:** 4 hours
**Influencer**

Influencer training is ideal for individuals, teams, and organizations looking to overcome profound, persistent, and resistant problems in their organization, team, or personal life. The training provides individuals at any level of an organization with the skills to develop an effective and comprehensive influencer strategy to overcome these problems.

**Course Length:** 2 classroom days

---

**360 Survey Seminar**

This seminar is designed to help organizations assess their employees’ strengths and development needs in their working relationships. The Development Dimensions International Leadership Mirror—a Web-based, multilingual, 360-degree feedback survey—is used to gather observational information. The data are collected from several perspectives regarding the individual’s leadership performance. This includes a self-survey and surveys from supervisors, peers, and subordinates.

**Course Length:** Generally 30 to 35 days

---

**Critical Thinking for Decision Makers and Teams**

This training provides an overview of critical thinking, focusing on defining it and demonstrating “how to do it.” Through facilitated discussions and case study exercises, participants will gain an understanding of the critical-thinking process and identify the crucial steps in thinking critically, as well as learn about the different kinds of thinkers and strategies for developing or improving critical thinking.

**Course Length:** 4 hours

---

**Mount Everest Leadership and Team Simulation**

This is a web-based, multimedia, multi-user simulation that employs the dramatic context of a Mount Everest expedition to reinforce student learning about leading effective team decisionmaking processes. The challenge course involves a series of activities that require various degrees of teamwork and problem solving. The teaching points for the exercise focus on how teams make complex decisions when critical information is distributed unevenly among members and when members have partially conflicting goals.

**Course Length:** 4 hours

---

**Crucial Accountability**

Crucial Accountability provides a step-by-step process for how managers can identify and resolve performance gaps, strengthen accountability, eliminate inconsistency, and reduce resentment throughout an office or organization.

**Course Length:** 2 classroom days (1-day version available for those who have completed TTD 005)

---

**Problem-Solving Techniques for Quality Improvement (PSTQ)**

How can you achieve continuous quality improvement of work processes? This course examines a problem-solving methodology and associated statistical techniques and offers a “tool kit” of ideas that may be used to achieve quality improvement goals.

**Course Length:** 3 classroom days
Appendix C Targeted Training

Generally, these are resident courses at DAU.

TTE 003

Navy Systems Engineering Guide

This course reviews the Naval Air Systems Command's (NAVAIR) approach to systems engineering, focusing on NAVAIR's internal policies and procedures and how to tailor this corporate approach to specific programs or projects.

Course Length: 5 classroom days

TTE 004

DISA Information Systems Engineering Seminar (ISES)

Aimed at Defense Information Systems Agency (DISA) software management teams, this course discusses DISA's role in DoD acquisition and introduces fundamental information regarding procurement, acquisition, and basic systems and software engineering.

Course Length: 3 classroom days

TTE 005

Systems Engineering Plan (SEP)

This course provides students with the knowledge, material, and understanding of internal program documentation to develop an executable SEP for their programs.

Course Length: 4 classroom days

TTE 006

Engineering Management Seminar (EMS)

Using hands-on engineering experience and software-intensive skills needed to build an operating robot, students gain an understanding of the defense acquisition life cycle from a systems- and software-engineering perspective.

Course Length: 5 classroom days

TTE 007

Technology Assessment and Transition Management

This course prepares students to conduct technology assessments; reviews mechanisms available to support transition; and provides training on technology development strategies, technology transition agreements, and other technology transition documentation.

Course Length: 2 classroom days

TTE 008

Resources for the Test and Evaluation Professional

This course explores information and resources available to assist the test and evaluation workforce in performing their day-to-day duties.

Course Length: 1 classroom day

TTE 009

Design of Experiments—Industrial Strength (DOE-IS)

This course provides an overview of the design-of-experiments methodology, which is an iterative product/process improvement method and an important part of a student's Lean, Six Sigma, or quality improvement plans.

Course Length: 10 classroom days (accelerated version, 5 classroom days)

TTE 014

Technical Project Management Using Intermediate Product Breakdown Structures (IPBS)

This course reviews how Naval Air Systems Command's systems engineers/class desk officers should plan, organize, and manage the engineering staffing efforts of acquisition programs.

Course Length: 2.5 classroom days
### TTE 015
**JCTD Execution (How to Run a JCTD)**

This course explores the necessary programmatic, technical, operational, and transition management skills and knowledge that students need to become effective, productive members of the Joint Capability Technology Demonstrations (JCTD) execution team.

**Course Length:** 2.5 classroom days

### TTE 016
**JCTD Transition Management Course**

This course introduces the Joint Capability Technology Demonstrations (JCTD) management team to procurement and acquisition situations that affect many JCTDs during transition.

**Course Length:** 4 classroom days

### TTE 018
**Reliability and Maintainability (R&M) for Engineers**

This course explores how to apply R&M models commonly used by DoD weapons system contractors to the design and development of equipment and systems.

**Course Length:** 3 classroom days

### TTE 019
**ISO 9000 – 2000**

This course is an introduction to the application, interpretation, and evaluation of the ISO 9000 series standards for quality management systems as used in defense acquisitions.

**Course Length:** 2 classroom days

### LOGISTICS

#### TTL 001
**Performance-Based Logistics**

Performance-Based Logistics examines problem-solving and statistical methodologies. It provides students with techniques to improve work processes and achieve quality improvement goals.

**Course Length:** 2.5 classroom days

#### TTL 002
**Provisioning Management**

Provisioning Management examines management-level planning and oversight of logistics-support development for a new system, ensuring that students gain a sound understanding of the normal sequence of events in system provisioning.

**Course Length:** 3 classroom days

#### TTL 003
**Reliability and Maintainability for Logisticians**

This course presents an overview of acquisition reliability and maintainability policy and its application to logistics support.

**Course Length:** 3 classroom days
Appendix C Targeted Training

Generally, these are resident courses at DAU.

TTL 006
Logistics Test and Evaluation

This course provides an overview of DoD Directive 5000.1 and DoD Instruction 5000.2, as well as acquisition processes involved with systems engineering, test and evaluation, acquisition logistics (including reliability, maintainability, and availability), and contractor operations-and-test reporting.

Course Length: 2 classroom days

TTL 007
Supportability Test and Evaluation

This course teaches students how to extract quantitative requirements from the program documents, develop supportability test and evaluation (ST&E) inputs to the test plan, conduct the tests, and provide ST&E inputs to the DT/OT Transition Report. Students will also learn how to use the Logistics Survey Database. It is strongly suggested that students complete CLL 003 (Supportability Test and Evaluation) before attending this course.

Course Length: 3 classroom days

ACQUISITION AND MANAGEMENT

TTM 001
Joint Service Program Attorneys Course

This course facilitates interactions and advice given by the program attorney to programmatic and contracting personnel by providing program attorneys insight into the challenges their clients face in trying to execute a successful program. About half of the instruction consists of overviews by DAU faculty of the DoD Decision Support Systems, acquisition strategy formulation, contract types and their use, program management tools, cost-estimating methodologies, and recent policy and regulatory developments. The other half of the course focuses on case studies, applications, and issues of current critical interest presented by senior attorneys, program managers, executive officers, financial management experts, and other guest speakers.

Course Length: 4.5 classroom days

TTM 002
Risk Management Seminar

This seminar provides an overview of risk management and explores a step-by-step process to identify, evaluate, and develop risk-handling strategies, allowing the student to effectively perform and communicate risk planning.

Course Length: 1 classroom day

TTM 004
Program Management Through the Looking Glass

Using the Looking Glass interactive behavioral management simulation, program managers and their team explore personal leadership and management styles and receive feedback on improving the team’s performance.

Course Length: 3 classroom days

TTM 005
Integrated Baseline Review Seminar

This seminar reviews the integrated baseline review (IBR) process—which was developed to assess the reasonableness, adequacy, and accuracy of this baseline plan—and provides tailored feedback on how best to conduct an IBR for a student’s particular project.

Course Length: 2 classroom days
TTM 007

**Stakeholder Management**
This fast-paced, daylong class provides hands-on experience with identifying, prioritizing, and analyzing stakeholders critical to DoD program success. Attendees will create action plans to improve their relationships with key stakeholders, increasing engagement/commitment and program outcomes. Practical tools, examples, and best practices from defense acquisition and sustainment programs are highlighted throughout.

**Course Length:** 1 classroom day

TTM 008

**Developing Performance Requirements for Service Acquisitions**
This fast-paced, daylong class/seminar provides overview training on the service acquisition process contained in the *Defense Acquisition Guidebook* for the acquisition of services, practical lessons learned, and best practices in developing service requirements. It also offers hands-on experience with the Acquisition Requirements Roadmap Tool (ARRT). Attendees will use the ARRT to create a Performance Work Statement (PWS) based on a case study PWS employed during the class. Practical tools such as the Service Acquisition Mall and best practices from defense service acquisitions are highlighted throughout the day.

**Course Length:** 1 classroom day

TTM 009

**Work Statement Seminar (SOW, SOO, PWS)**
This seminar provides program management personnel an overview of the function of the Work Statement in the acquisition process and gives a procedure for planning, developing, and writing Work Statements.

**Course Length:** 4 classroom days
Appendix D: Continuous Learning

See pp. 126-129 for course registration procedures.
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

**BUSINESS**

**CLB 007**

**Cost Analysis**

Cost Analysis focuses on the basic cost analysis process, one of the fundamental building blocks of any acquisition program. At the end of this module, you should be able to define various financial management terms as they relate to the defense acquisition process, determine when various cost estimates should be prepared, know which estimating methodology is most appropriate, and know what cost data are of interest to various program stakeholders.

**Course Length:** Approximately 4 hours

**CLB 008**

**Program Execution**

Program Execution describes the budget execution process, including the legal concerns and potential impact of poor budget execution. At the end of this module, you should be able to describe the apportionment process (including rules for deferral and rescission), describe the funds execution process and laws that govern it, identify the purposes and contents of obligation and expenditure plans, and identify rules for reprogramming.

**Course Length:** Approximately 3 hours

**CLB 009**

**Planning, Programming, Budgeting, and Execution and Budget Exhibits**

Planning, Programming, Budgeting, and Execution (PPBE) and Budget Exhibits focuses on explaining the PPBE process, including the relationship of each phase to the systems acquisition process. At the end of this module, you should be able to recall the primary purpose of each of the phases of PPBE, identify the interrelationship between PPBE and the defense acquisition system, and identify the purpose, content, and dimensions of the Future Years Defense Program.

**Course Length:** Approximately 3 hours

**CLB 010**

**Congressional Enactment**

Congressional Enactment focuses on the congressional processes that lead to a budget resolution, an authorization act, and an appropriation act, and the implications of those outcomes for defense acquisition programs. At the end of this module, you should be able to identify key DoD and Service organizations that provide liaison to the congressional committees; describe the budget resolution, the authorization and appropriation phases, and their key products; understand the basic rules of DoD appeals; recognize when a continuing resolution is required; and recognize when a program is considered a “new start.”

**Course Length:** Approximately 4 hours

**CLB 011**

**Budget Policy**

Budget Policy focuses on appropriations and the funding policies that are associated with each appropriation. It will relate a defense acquisition program’s cost estimate to its programming and budgeting requirements. At the end of this module, you should be able to identify the major appropriation categories of interest to the defense acquisition community, identify the funding policy that applies to each, recognize situations where exceptions to the funding policies are appropriate, and identify the most appropriate time-phased budget estimate to a given situation.

**Course Length:** Approximately 5 hours

**CLB 014**

**Acquisition Reporting Concepts and Policy Requirements**

This module introduces terms, policies, and requirements for MDAPs and MAIS programs, specifically the APB, the DAES, the SAR, and the UCR. Upon completion of the
module, students will be able to apply these concepts and policies in the preparation and review of reports generated using the Defense Acquisition Management Information Retrieval (DAMIR) software.

Course Length: Approximately 3 hours

CLB 023

Software Cost Estimating

This module provides an overview of software cost estimating. It comprises the five steps of preparation and review of a software cost estimate and will enable managers to determine whether an estimate is realistic and defendable.

Course Length: Approximately 2 hours

CLB 024

Cost Risk Analysis Introduction

This module provides the foundation for an understanding of risk management as it relates to cost estimation. It addresses program risks that help ensure that program costs, schedule, and performance objectives are met.

Course Length: Approximately 3 hours

CLB 025

Total Ownership Cost

The goal of this course is to provide business cost-estimating and financial management personnel with the framework necessary to estimate total ownership cost (TOC) within the acquisition process. It is not intended to duplicate information documented in various DoD and Service-level policy, guidance, and implementing instructions, but to provide a frame of reference for developing TOC estimates.

Course Length: Approximately 3 hours

CLB 026

Forecasting Techniques

The goal of this module is to provide the learner with information on forecasting for the Defense Acquisition Workforce. This will include various forecasting techniques, approaches, and practical exercises, all designed to give the learner foundational knowledge of forecasting.

Course Length: Approximately 2 hours

CLB 029

Rates

The Rates module introduces the basics of wrap rate development as it relates to cost estimating. At the conclusion of this module, you should be familiar with and be able to describe portions of a cost estimate that require the use of wrap rate calculations. You will also be able to describe the components for building an estimate using engineering standards as well as calculate a wrap rate or a fully burdened labor rate (FBLR).

Course Length: Approximately 2 hours

CLB 030

Data Collection and Sources

This module introduces the basics of data sources and collection as they relate to cost estimating. At the conclusion of this module, students should be familiar with and be able to describe various data sources used in the construction of a cost estimate. Students also will be able to explain the necessity of having programmatic and technical data in addition to cost data and provide illustrations of various problems relating to the collection and analysis of data.

Course Length: Approximately 2 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

---

**CLB 031**

**Time-Phasing Techniques**

This module focuses on the methods that cost estimators can use to time phase a cost estimate. Students will learn to recognize the definition, purpose, and utility of time-phasing methods and how they are used in the cost-estimating career field.

**Course Length:** Approximately 1.5 hours

---

**CLB 032**

**Force Structure Costing**

This module explains the definition, purpose, and utility of DoD force-structure-costing techniques as used in the cost-estimating career field.

**Course Length:** Approximately 1.5 hours

---

**CLB 033**

**Databases for Cost Estimates**

This module introduces students to a cross-section of some of the more well-known DoD databases. It is primarily intended for members of the business cost-estimating functional community and also may be of interest to other DoD functional communities. Access to most of the DoD databases is controlled or, in some cases, classified; this limits the databases that can be openly discussed.

**Course Length:** Approximately 2.5 hours

---

**CLB 034**

**Probability Trees**

This module focuses on probability or decision trees used in the context of cost estimating. The module is primarily intended for members of the business cost-estimating functional community and may be of interest to other DoD functional communities.

**Course Length:** Approximately 2 hours

---

**CONTRACTING**

**CLC 001**

**Defense Subcontract Management**

This module provides an overview of the laws, government policies, and regulations that apply to subcontracts and subcontract management. The module addresses subcontracting activities from the perspective of the staff of a defense acquisition program office. Topics include small business subcontracting plans; contractor purchasing system reviews and consent to subcontract; flow-down clauses; subcontract pricing; subcontract administration; and other topics in subcontracting. *(This module is temporarily unavailable because it is undergoing an update.)*

**Course Length:** Approximately 4 hours

---

**CLC 003**

**Sealed Bidding**

This module builds upon the sealed bidding process presented in Federal Acquisition Regulation Part 14. The course is designed to provide acquisition professionals with experience in understanding sealed bidding concepts and processes when contracting for supplies and services. The module covers concerns about using sealed bidding, procedures for soliciting bids, methods for bid receipt and correct handing of bids, how to correct common mistakes in bids, and selection of the correct contractor for award.

**Course Length:** Approximately 2 hours

---

**CLC 004**

**Market Research**

This module provides a foundational understanding of the benefits of effective market research to reduce acquisition costs and cycle times and to afford greater access to advanced technologies. The module covers the differences between tactical and strategic market research and shows how to consolidate market research results to develop an acquisition strategy.

**Course Length:** Approximately 3 hours
CLC 005

**Simplified Acquisition Procedures**

This module is an interactive tutorial designed to provide federal procurement and acquisition professionals with a better understanding of contracting for supplies and services using simplified acquisition procedures.

**Course Length:** Approximately 2 hours

CLC 006

**Contract Terminations**

There are many ways to terminate the obligations of a contract. Most often, parties conclude their contract obligations by performing them. However, sometimes problems arise, and parties cannot or will not complete their obligations under the contract. This module will enable you to prepare and process a termination notice when appropriate.

**Course Length:** Approximately 2 hours

CLC 007

**Contract Source Selection**

This interactive module is designed to provide federal procurement and acquisition professionals with a better understanding of the source selection process and its goals. The module covers planning for source selection, the source selection organization, roles of source selection team members, and notifications and debriefings of offerors. The module emphasizes the importance of close communication between the government and offerors throughout the source selection process.

**Course Length:** Approximately 3 hours

CLC 008

**Indirect Costs**

An indirect cost is any cost not directly identified with a single, final cost objective, but rather is identified with two or more final cost objectives. Indirect costs are used for the pricing of contracts, interim contract billing, and the determination of actual contract costs. This module aims to serve as a primer for those who are unfamiliar with indirect costs.

**Course Length:** Approximately 3 hours

CLC 009

**Service-Disabled, Veteran-Owned Small Business Program**

The Service-Disabled, Veteran-Owned Small Business Program provides certain benefits for businesses owned by Service-disabled veterans seeking contracts with the federal government. This training module explains the basic requirements of the program.

**Course Length:** Approximately 1 hour

CLC 011

**Contracting for the Rest of Us**

This module provides people who do not work in the Contracting career field with a basic knowledge of some of the essential processes and considerations that DoD contracting professionals encounter to satisfy their customers' requirements. The module also provides an introduction to some of the topics that are covered in greater depth in other contracting modules.

**Course Length:** Approximately 2 hours

CLC 013

**Services Acquisition**

This module describes a disciplined seven-step process for the acquisition of services, using the requirements roadmap process to define high-level objectives and tasks, standards, allowable variations, and method of inspection. It will teach the student how to develop acquisition documents such as the performance work statement (PWS) and quality assurance surveillance plan (QASP).

**Course Length:** Approximately 3 hours
### CLC 020

**Commercial Item Determination**

This module is designed to aid acquisition personnel in developing sound business strategies for procuring commercial items. It provides professionals a clear understanding of the guidance and tools contained in the *Commercial Item Determination Handbook*, a practical reference used in such acquisitions.

**Course Length:** Approximately 3.5 hours

### CLC 023

**Commercial Item Determination Executive Overview**

This self-paced module explores the commercial item determination process as outlined in the *Commercial Item Determination Handbook*, a practical reference used in such acquisitions. DoD has designed this module to aid acquisition personnel in developing sound business strategies for procuring commercial items and to gain a clear understanding of the guidance and tools contained in the handbook.

**Course Length:** Approximately 30 minutes

### CLC 024

**Basic Math Tutorial**

This module will help students refresh/increase their basic math skills. Mathematics is a necessary and useful tool when determining price and cost reasonableness. Several performance support tools exist that can assist you with many of the calculations to accomplish your job; however, you may still need to perform your own calculations without the aid of a tool or calculator.

**Course Length:** Approximately 2 hours

### CLC 025

**Small Business Program for Contracting Officers**

This module explains the role of the contracting officer in working with small businesses in the DoD Acquisition Program. DoD policy requires that a fair proportion of DoD total purchases and contracts be placed with small businesses and that such businesses have the maximum practicable opportunity to participate in DoD acquisitions.

**Course Length:** Approximately 2 hours

### CLC 026

**Performance-Based Payments Overview**

This module presents an overview of the fundamental concepts of performance-based payments (PBP) and the guidance necessary for implementing a PBP financing structure as part of a fixed-price contract.

**Course Length:** Approximately 1 hour

### CLC 027

**Buy American Act**

This module provides explanatory materials and practical examples that explain Federal Acquisition Regulation (FAR) Part 25 and Defense Federal Acquisition Regulation Supplement (DFARS) 225, which make up the Buy American Act. This module is intended for contract specialists and contracting officers.

**Course Length:** Approximately 3 hours

### CLC 028

**Past Performance Information**

This self-paced module addresses the rationale behind collecting past performance information, why it should be used, and how its use improves contractor performance. It is based on the DoD guidebook titled *A Guide to Collection and Use of*
CLC 035
Other Transaction Authority for Prototype Projects: Comprehensive Coverage
This module comprises six lessons that present the mandatory requirements and other guidelines to consider and apply, as appropriate, when utilizing other transaction authority for prototype projects.

Course Length: Approximately 3 hours

CLC 039
Contingency Contracting Simulation: Barda Bridge
The Barda Bridge simulation offers professionals an immersion experience in predeployment and deployment decision making. It will provide feedback on how your decisions as a deploying individual and contingency contracting officer affect your family back home as well as your mission forward.

Course Length: Approximately 2 hours

CLC 040
Predictive Analysis and Scheduling
This module provides an overview of the various types of schedules that are used by Defense Contract Management Agency personnel and a background of how predictive analysis is utilized to determine and maintain schedules.

Course Length: Approximately 1 hour

CLC 041
Predictive Analysis and Systems Engineering
This module provides an overview of how predictive analysis plays a role in systems engineering. Professionals also learn about various systems engineering tools.

Course Length: Approximately 2 hours
## Appendix C Continuous Learning

### CLC 042
**Predictive Analysis and Quality Assurance**

This module provides an overview of quality assurance activities and how they relate to the use of predictive analysis as a tool to form assumptions of future events.

**Course Length:** Approximately 1 hour

### CLC 043
**Defense Priorities and Allocations System**

This module aims to ensure that government and industry users are thoroughly familiar with the priorities and allocations authority of the Defense Production Act. It also explains the purpose of the Defense Priorities and Allocations System, which is to assure the timely availability of industrial resources to meet current and future national security and emergency preparedness requirements.

**Course Length:** Approximately 3 hours

### CLC 044
**Alternative Dispute Resolution**

Alternative Dispute Resolution is a tool for resolving contract disputes without litigation. This module explains how to use this tool effectively when disputes arise.

**Course Length:** Approximately 4 hours

### CLC 045
**Partnering**

The Partnering module gives an overview of the benefits of developing good government-contractor relationships. The partnering concept, designed to enhance contractor performance—a key component of alternative dispute resolution—is one method used to prevent disputes as well as minimize disputes that may occur.

**Course Length:** Approximately 2 hours

### CLC 046
**Green Procurement**

Green procurement is the purchase of products and services with favorable energy or environmental attributes in accordance with federally mandated “green” procurement preference programs. DoD's Green Procurement Program is a comprehensive strategy for implementing environmentally preferred practices while sustaining the overall mission. The overall purpose of this lesson is to identify the objectives and background of DoD's Green Procurement Program.

**Course Length:** Approximately 2 hours

### CLC 047
**Contract Negotiation Techniques**

This module will help professionals obtain a better understanding of various analysis techniques and tools to use in the development of a contract's negotiation range. After completion of this course, professionals will be better prepared to develop strategies for their contract negotiations.

**Course Length:** Approximately 2 hours

### CLC 051
**Managing Government Property in the Possession of Contractors**

This module provides an overview of the policies, processes, and procedures used to manage government property in the possession of contractors. It also introduces the concept of government property, terminology used in the management of government property, and accounting and treatment of government property in the possession of contractors.

**Course Length:** Approximately 1.5 hours

### CLC 052
**Contracting with Canada**

This module is intended to provide a “one stop shop” for information specific to the DoD when contracting with Canadian suppliers.

**Course Length:** Approximately 3 hours
CLC 054

Electronic Subcontracting Reporting System (eSRS)

This module presents an overview of the primary purpose of eSRS, which is to provide insight and transparency about how government contracting dollars are being distributed among small disadvantaged businesses. The Internet-based eSRS streamlines the reporting process of subcontracting plans and provides agencies with access to analytical data on subcontracting performance.

Course Length: Approximately 1.5 hours

CLC 055

Competition Requirements

This module is appropriate for all personnel involved in the requirements and acquisition process. It emphasizes key concepts for promoting competition, which is the cornerstone of the acquisition process. This training addresses responsibilities, policies, and procedures critical for ensuring that DoD funds are properly spent to obtain the right equipment, supplies, and services at the right price and on time.

Course Length: Approximately 2 hours

CLC 056

Analyzing Contract Costs

In this module, the student assumes the role of a contract specialist/intern who has been afforded the opportunity to work with the contracting officer of a large, complex, base-operating services contract. The contracting officer acts as a mentor, providing guidance and direction as the student performs various cost and price analysis tasks.

Course Length: Approximately 17 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

CLC 057

Performance-Based Payments
and Value of Cash Flow

This module provides an introduction and overview for performance-based payments (PBP) as applied to structuring and negotiating Win-Win PBP agreements with contractors. A tutorial on the use of the PBP Analysis Tool also is provided.

Course Length: Approximately 4 hours

CLC 058

Introduction to Contract Pricing

During the most recent Contracting Competency Assessment, senior leadership from all Services and agencies viewed cost and price analysis as a fundamental skill for contracting professionals to focus on early in their contracting career. As a result, DAU is infusing cost and price analysis into the entire Defense Acquisition Workforce Improvement Act (DAWIA) curriculum, beginning with the fundamental topics and issues presented in CLC 058, a Level I certification requirement and prerequisite to CON 170, Fundamentals of Cost and Price Analysis.

Course Length: Approximately 2 hours

CLC 060

Time and Materials Contracts

The Time and Materials Contracts module provides professionals with an overview of new time and materials contracting policies—including links to the Federal Acquisition Regulation and Defense Federal Acquisition Regulation Supplement changes and examples of how those documents should be used.

Course Length: Approximately 1 hour

CLC 062

Intra-Governmental Transactions

This module presents an introduction and overview of Intra-Governmental Transactions (IGTs). It covers the basics of IGTs and the root causes of certain challenges, while introducing strategies for addressing problems. An in-depth study of the intra-governmental process through the Business Enterprise Architecture (BEA) and the Intra-governmental Value Added Network (IVAN) system is provided.

Course Length: Approximately 3 hours

CLC 063

Sole Source Proposal Technical Evaluations

This module provides the government technical evaluation team with facts, data, and tools needed to conduct an exceptional technical evaluation. The module focuses strictly on the evaluation of sole source proposals for new contracts or orders or for changes to existing contracts or orders.

Course Length: Approximately 3 hours

CLC 064

Wage Determinations for Service
and Construction Contracts

This module introduces students to the laws and regulations governing the minimum wage and fringe rates to be paid in most construction and service contracts. It is intended primarily for contracting (1102 series) professionals.

Course Length: Approximately 2.5 hours

CLC 065

Suspension and Debarment

This module addresses the fundamental concepts associated with suspension and debarment in the federal government. It covers the bases, causes, and effects of suspension and debarment; government roles and responsibilities; and the System for Award Management Exclusions.

Course Length: Approximately 1 hour
CLC 102

Administration of Other Transactions

Other transactions, authorized by 10 U.S.C. 2371, are conducted outside most federal procurement laws and regulations and are not subject to most of the laws and regulations applicable to grants and cooperative agreements. This module is designed to help professionals distinguish other transactions from contracts, grants, and cooperative agreements; understand what regulations govern other transactions; learn the responsibilities of the various parties involved in managing other transactions; describe the financial implications of other transactions; explain intellectual property, data, and real property rights under other transaction arrangements; and know the issues involved with modification and termination of other transactions.

Course Length: Approximately 1.5 hours

CLC 103

Facilities Capital Cost of Money

This module will help professionals learn to develop a pre-negotiation position for facilities capital cost of money that is fair and reasonable, given market research and proposed information from the offeror.

Course Length: Approximately 1.5 hours

CLC 104

Analyzing Profit or Fee

Determining profit or fee involves rewarding the contractor for performance and acceptance of risk. But what is a reasonable profit or fee for a given contract? Different individuals’ perspectives may vary substantially on this question. That is why proper use of the structured approach required by the Federal Acquisition Regulation is so important. In this module, professionals will learn about this approach and the guidelines for developing a reasonable profit or fee position.

Course Length: Approximately 1 hour

CLC 106

Contracting Officer’s Representative with a Mission Focus

This module provides an overview of the acquisition process, teaming, ethics and integrity, authorities, contract classification, contract types, proper file documentation, performance assessment methods, remedies for poor performance, invoice requirements, contract modifications, and contract management. The construct of this module provides a flexible training set that can be tailored to your agency’s contracting officer’s representative training certification program.

Course Length: Approximately 8 hours

CLC 107

OPSEC Contract Requirements

When a program manager determines that it is appropriate to include operational security (OPSEC) requirements in a contract, it is important that the contract include sufficient guidance to convey to the contractor his or her OPSEC responsibilities. The objectives of this module are to outline the basic elements of OPSEC, identify the role of OPSEC within DoD, and recognize the OPSEC responsibilities of program managers and contracting officers.

Course Length: Approximately 1 hour

CLC 108

Strategic Sourcing Overview

This module provides an overview of strategic sourcing concepts and techniques for helping organizations begin to make the shift from tactical to strategic purchasing.

Course Length: Approximately 4.5 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

CLC 110

Spend Analysis Strategies

This module explains the value and strategies of spend analysis. Spend analysis is one of several tools the U.S. Department of Defense and other federal agencies are using to gain critical insights into the procurement history and spend patterns for purchased goods and services.

Course Length: Approximately 3.5 hours

CLC 112

Contractors Accompanying the Force

This brief module addresses the roles and responsibilities of a commander in planning for the use of contractors authorized to accompany U.S. Armed Forces, with a focus on the guidance in DoD Instruction (DoDI) 3020.41, Contractor Personnel Authorized to Accompany the U.S. Armed Forces. The module also introduces basic acquisition and contract management requirements related to implementing DoDI 3020.41 in field conditions.

Course Length: Approximately 2 hours

CLC 113

Procedures, Guidance, and Information

The Procedures, Guidance, and Information (PGI) module is a companion resource to the Defense Federal Acquisition Regulation Supplement (DFARS). The PGI is a Web-based tool for simple and rapid access to guidance and information relevant to Federal Acquisition Regulation and DFARS topics.

Course Length: Approximately 1 hour

CLC 114

Contingency Contracting Officer Refresher

It is important that contingency contracting officers (CCOs) receive the training they need to excel during their assignments. CCOs need to apply sound procurement techniques, understand funding implications, and effectively administer their contracts while demonstrating exemplary integrity and ethics. CCOs help DoD to accomplish its contingency mission and funnel much-needed funds into regional economies.

Course Length: Approximately 2 hours

CLC 120

Utilities Privatization Contract Administration

This module explains how the government transfers ownership of a utilities system to a qualified contractor. It was developed to provide information to DoD professionals involved in the post-award, contract administration stage of utilities privatization services contracts. The success of this stage depends largely on performing effective quality assurance checks and properly managing contract price changes.

Course Length: Approximately 2 hours

CLC 125

Berry Amendment

After completing this module, DoD acquisition personnel responsible for procuring textiles and other covered items will be able to select the necessary statutory requirements to apply during the acquisition process in order to comply with the provisions of the Berry Amendment.

Course Length: Approximately 1 hour

CLC 131

Commercial Item Pricing

This training module presents an overview of the new procedures, guidance, and information concerning sole-source commercial items and elaboration on the requirements of Federal Acquisition Regulation (FAR) 15.4. It includes links to relevant parts of the FAR; procedures, guidance, and information; and Contract Pricing Reference Guide sections; as well as examples of applications.
of the material. The module’s overall learning objective is to identify the various pricing methodologies that can be used to determine fair and reasonable prices for a commercial acquisition.

Course Length: Approximately 1 hour

CLC 132
Organizational Conflicts of Interest

This module provides an overview on how to recognize situations that could lead to an organizational conflict of interest.

Course Length: Approximately 1 hour

CLC 133
Contract Payment Instructions

This module provides an overview of how to identify and apply Defense Federal Acquisition Regulation Supplement (DFARS) procedures, guidance, and information requirements, as well as procedures for payment and billing under DoD contracts. The module contains valuable illustrative examples of contract line item structure as it pertains to contract payment.

Course Length: Approximately 1 hour

CLC 206
Contracting Officer’s Representatives in a Contingency Environment

This is the same as COR 206, but delivered in a distance-learning environment. CLC 206 is designed specifically for contracting officer’s representatives (CORs) who are deployed in a contingency environment. It covers the basics of contracting, along with the ethical situations and cultural differences a COR may experience while deployed in a contingency operation.

Course Length: Approximately 3 hours

CLC 222
Contracting Officer’s Representative (COR) Online Training

This is the same as COR 222, but delivered in a distance-learning environment. This course is specifically designed for CORs who are responsible for ensuring that contractors are performing the technical portion of their job. It will provide knowledge related to COR roles and responsibilities, as well as fundamentals of contracting regulations, types, phases, and other elements; awareness of ethical, legal, and cultural factors that affect COR responsibilities; and information necessary to evaluate situations effectively, apply knowledge gained, and make correct decisions to carry out COR responsibilities.

Course Length: Approximately 32 hours

ENGINEERING AND TECHNOLOGY

CLE 001
Value Engineering

Value engineering (VE) is recognized as an effective technique for reducing costs, increasing productivity, and improving quality-related features of systems, equipment, facilities, services, and supplies for the purpose of achieving the essential functions at the lowest life-cycle cost consistent with required performance. This module provides an overview of VE from both the acquirer and contractor perspective, how VE can be applied and implemented, and how VE change proposals can be effectively used.

Course Length: Approximately 3 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

CLE 003

Technical Reviews
This module provides a systematic process for employing technical reviews to assess design maturity, technical risk, development status, and programmatic risk for acquisition programs. The module also presents essential, practical guidelines on the effective use of technical reviews as part of the DoD acquisition life cycle and provides access to detailed checklists that can be tailored to support the conduct of individual technical reviews.

Course Length: Approximately 3 hours

CLE 004

Introduction to Lean Enterprise Concepts
This module focuses on the lean concepts most applicable to manufacturing and the management of industrial facilities. It addresses the five fundamental lean principles; lean value streams; lean metrics; identifying manufacturing and information waste within an enterprise; and techniques for implementing lean principles beyond the factory floor, including value stream analysis and mapping.

Course Length: Approximately 3.5 hours

CLE 006

Enterprise Integration Overview
This module introduces fundamental enterprise integration (EI) concepts and implementation strategies and describes suggested EI best practices. The course also gives professionals an overview of the legal and regulatory frameworks, as well as a typical EI acquisition life cycle.

Course Length: Approximately 3 hours

CLE 007

Lean Six Sigma for Manufacturing
As a continuation of the concepts presented in CLE 004, Introduction to Lean Enterprise Concepts, this module addresses the role that lean manufacturing plays as part of an integrated lean technical process and includes its objectives and priorities. It also summarizes the most important lean tools and techniques, such as single piece flow, level production (heijunka), waste (muda), continuous improvement (kaizen), just in time, and automation with a human touch (jidoka).

Course Length: Approximately 6 hours

CLE 008

Six Sigma: Concepts and Processes
This module focuses on Six Sigma concepts most applicable to manufacturing and the management of industrial facilities. It provides an in-depth overview of Six Sigma concept processes, the associated tools and how they can be applied to real-life situations for eliminating waste, and an outline of various quality-measurement methods.

Course Length: Approximately 8 hours

CLE 009

ESOH in Systems Engineering
This module integrates the environment, safety, and occupational health (ESOH) considerations into the DoD systems engineering process. It is based on the requirements of DoD Instruction (DoDI) 5000.02, Operation of the Defense Acquisition System, and identifies the key ESOH activities conducted as part of systems engineering during each phase of the system’s life cycle. DoDI 5000.02 requires programs to either eliminate identified hazards or reduce the associated risks to acceptable levels for hazards that cannot be eliminated.

Course Length: Approximately 3.5 hours
CLE 010

**Privacy Protection**

This module addresses the scope of privacy protection, including laws, policies, and key guidance. It covers potential risks to privacy protection, procedures to promote privacy protection, and ways to recognize privacy breaches. Via a series of three short case studies, the Privacy Protection module enables students to recognize and respond appropriately to fundamental privacy concerns when performing activities in acquisition, requirements development, and research.

**Course Length:** Approximately 1 hour

CLE 011

**Modeling and Simulation for Systems Engineering**

This module provides an overview of how modeling and simulation (M&S) supports the DoD acquisition process, outlines relevant DoD acquisition policy and guidance, and summarizes how M&S supports systems engineering. Students will learn its effective use; the reuse of M&S assets; the key aspects of verification, validation, and accreditation; and how the government should plan for contracting support for M&S. *(This module is temporarily unavailable because it is undergoing an update.)*

**Course Length:** Approximately 3 hours

CLE 012

**DoD Open Systems Architecture (OSA)**

This module introduces DoD open systems architecture (OSA), explains its principles from a business and a technical perspective, and provides examples of successfully implemented OSA programs. It also suggests sources that can assist an organization in implementing OSA.

**Course Length:** Approximately 2 hours

CLE 015

**Continuous Process Improvement Familiarization**

This module familiarizes students with the various continuous process improvement methodologies—such as Six Sigma, lean concepts, and the theory of constraints—which can be employed to improve overall organizational performance. Roles and responsibilities are addressed as well as effective deployment strategies.

**Course Length:** Approximately 1.5 hours

CLE 016

**Outcome-Based Performance Measures**

This module covers performance measurement terminology, DoD policy, and the rationale for their creation; identifies how outcome-based performance measures can be linked to strategic plans; and provides guidance on formulating effective outcome-based performance measures for information technology investments as required by Title 40. Students will be familiarized with the balanced scorecard approach, ways and processes by which effective outcome-based performance measures can be developed, and the role of the post-implementation review.

**Course Length:** Approximately 3 hours

CLE 017

**Technical Planning**

This module presents essential and practical guidance to assist students in formulating a sound technical-planning approach and in learning how it should be integrated into the overall program-planning process.

**Course Length:** Approximately 3 hours
Continuous Learning

Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

CLE 018

E3 and Spectrum Supportability for Acquisition Professionals

This module introduces students to the proper ways to consider electromagnetic environmental effects (E3) and spectrum supportability (SS) as part of the DoD acquisition process. It also offers an appreciation of how E3 and SS certification affect systems acquisition. A checklist for E3/SS processes is provided, and the associated tasks are reviewed to ensure that E3/SS is taken into consideration during systems design, production, and integration to avoid degraded performance, program schedule delays, and funding issues.

Course Length: Approximately 2 hours

CLE 021

Technology Readiness Assessments

This module presents the technology readiness assessment (TRA) process as it relates to defense acquisition. It will enable you to participate in a TRA and to determine how to use the TRA process to enhance program success. The module also provides TRA best practices. This module is primarily intended for program office staff, S&T staff, and subject-matter experts.

Course Length: Approximately 3 hours

CLE 022

Program Manager Introduction to Anti-Tamper

This module introduces program managers to the steps involved in integrating Anti-Tamper into a program or project in order to protect DoD critical program information. Students will learn the importance of Anti-Tamper, the threats to critical DoD technology, current DoD initiatives and programs designed to mitigate them, how to plan for effective use of Anti-Tamper, and how it can be effectively integrated into the overall program.

Course Length: Approximately 3 hours

CLE 023

Modeling and Simulation for Test and Evaluation

This module provides key information, from a test and evaluation (T&E) perspective, about the requirements, benefits, and challenges regarding modeling and simulation (M&S) planning and execution. Effective use of M&S for T&E over the life cycle of a system can substantially reduce program risk and has benefits for program managers, systems engineers, decision makers, and system users.

Course Length: Approximately 3 hours

CLE 025

Information Assurance (IA)

This module discusses the incorporation of IA into defense acquisition programs. It identifies key IA attributes, IA statutory and regulatory requirements, IA strategies for acquisition programs, steps for successfully implementing IA, and an explanation of the IA certification and accreditation process. This module enables program managers and other acquisition professionals to integrate IA into acquisition programs.

Course Length: Approximately 4 hours

CLE 026

Trade Studies

This module addresses the important role that trade studies play in systems acquisition and discusses processes for conducting effective trade studies. It describes a four-phase process that can be used to initiate, develop, evaluate, and perform follow-on action with respect to trade studies, and it outlines success factors.

Course Length: Approximately 4 hours
CLE 028  
**Market Research for Engineering and Technical Personnel**

This module describes market research from the perspective of technical personnel. It explains the practical value of market research and discusses the government mandate to conduct it. The course addresses market research team membership, sources for obtaining market data, and techniques for technical evaluation and documentation of market information.

**Course Length:** Approximately 4 hours

CLE 029  
**Testing in a Joint Environment**

This module will familiarize DoD test and evaluation personnel and other acquisition professionals with the basic principles and practices related to testing in a joint environment.

**Course Length:** Approximately 3 hours

CLE 032  
**Sustainable Manufacturing for DoD – Part 1**

The overall goal of this module is to address environmental topics in sustainability from a very broad perspective and then narrow the focus to look at sustainable manufacturing considerations.

**Course Length:** Approximately 5 hours

CLE 034  
**DIACAP: Understanding the DoD Information Assurance Certification and Accreditation Process**

In order to operate, each DoD information system must be certified and accredited using a standard set of activities defined within the Department of Defense Information Assurance Certification and Accreditation Process, or DIACAP. This module is designed to provide an understanding of that process.

**Course Length:** Approximately 2 hours

CLE 035  
**Introduction to Probability and Statistics**

This module aims to provide participants with a basic introduction to and understanding of probability and statistics for the Test and Evaluation career field. The course should enable participants to describe and apply key aspects of probability, to assess computer-required sample size for testing, and to perform hypothesis testing.

**Course Length:** Approximately 4 hours

CLE 036  
**Engineering Change Proposals for Engineers**

This module addresses the important role that engineering change proposals play in systems acquisition. Students are introduced to engineering change proposals and requests for deviation. They also learn processes to plan, request, submit, evaluate, recommend, and implement engineering change proposals effectively.

**Course Length:** Approximately 5 hours

CLE 037  
**Telemetry**

This module will provide an overview of telemetry, including the components of telemetry systems and applications. Coverage of the material begins with telemetry nomenclature; outlines a brief history of the field of telemetry; moves to the subsystems of a telemetry system; discusses the personnel who work with telemetry data; and touches upon range applications, testing, recording, display, and analysis of telemetry data.

**Course Length:** Approximately 6 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

CLE 038

Time-Space-Position Information

This Defense Test and Evaluation Professional Institute learning module provides a general overview of time-space-position information (TSPI), including the importance of the error volume concept associated with each of the methods to be discussed. This is followed by detailed sections on radars, the global positioning system, optical systems, other TSPI systems, and a discussion of various scoring or miss-distance measurement systems.

Course Length: Approximately 6 hours

CLE 039

Environmental Issues in Testing and Evaluation

This Defense Test and Evaluation Professional Institute learning module focuses on the broad environmental issues and associated procedures affecting the DoD mission related to testing and evaluation.

Course Length: Approximately 5 hours

CLE 040

IUID Marking

This module teaches students how to go about marking a data matrix on an item. It covers technical details of encoding the data matrix; standard practices, methods, and technologies for data matrix marking; and technical documentation requirements and quality considerations.

Course Length: Approximately 3 hours

CLE 041

Software Reuse

This module introduces software reuse. It explains the principles of effective reuse and how these principles can be applied to software reuse in the national security systems.

Course Length: Approximately 2 hours

CLE 045

Introduction to DoD Science and Technology Management

This module provides students with an understanding of DoD Science and Technology (S&T) review processes; the process of S&T development through basic research, applied research, and advanced technology development; the Service processes and DoD technology initiatives; and the concept of technology maturity, including technology readiness levels, critical technology elements, and their use in acquisition technology readiness assessments.

Course Length: Approximately 2 hours

CLE 046

Fundamentals of Executing a JCTD Project

This module provides foundational knowledge, best practices, and lessons learned for the management and execution of a Joint Capability Technology Demonstrations (JCTD) Project. It introduces the JCTD program, addresses the processes used to successfully execute JCTD projects, and discusses project roles and responsibilities.

Course Length: Approximately 4 hours

CLE 047

Grounding, Bonding, and Shielding

This relatively technical module provides students with a comprehensive understanding of the importance of a properly grounded, bonded, and shielded system for minimizing electromagnetic interference (EMI). Students become acquainted with specialized terminology, grounding schematics, bonding practices and types, and the basic rules for the implementation of shields to control radiated EMI.

Course Length: Approximately 2 hours
CLE 060

**Practical Software and Systems Measurement**

This module provides an approach for and develops skills in obtaining and analyzing measurement data and in developing and assessing a measurement process. The module is intended for acquisition professionals, suppliers, managers, technical leads, and measurement analysts.

**Course Length:** Approximately 5 hours

CLE 062

**Human Systems Integration (HSI)**

This module provides the learner with a basic understanding of human systems integration (HSI) as part of DoD’s total systems engineering approach for optimizing system performance and minimizing total ownership costs. Students also will be introduced to the HSI domains of human factors engineering, personnel, habitability, manpower, training, environment, safety and occupational health, and survivability.

**Course Length:** Approximately 2 hours

CLE 063

**Capability Maturity Model Integration (CMMI)**

The CMMI product suite includes models, training, and appraisal methods that provide a set of best practices and a path that suppliers and acquirers can follow to improve their internal processes. The CMMI can be used by both government and industry to increase process capability and improve organizational maturity.

**Course Length:** Approximately 1 hour

CLE 064

**Standardization in the Acquisition Life Cycle**

This module explores the role of effective standardization in defense acquisition and its contribution to program success.

CLE 065

**Standardization Documents**

This module provides the student with knowledge of the standardization documents managed within the DoD. It covers technical details of the specific purpose of each type of document; how to distinguish each type of document based on the document identifier; general rules for stating requirements in standardization documents; policy regarding the adoption and use of nongovernment standards; and format and content requirements for commercial item descriptions and DoD specifications, standards, and handbooks. This module also provides an introduction to federal standards, federal specifications, and guide specifications.

**Course Length:** Approximately 4 hours

CLE 066

**Systems Engineering for Systems of Systems**

This module is intended for program managers, project managers, systems engineers, technical team leaders, logistical support leaders, and others supporting systems-of-systems (SoS) work, particularly as part of a systems engineering (SE) team in an SoS environment. The goal of this module is to provide a resource for those in the SE community by introducing the insights gained by the acquisition community on the issues and approaches to SE for SoS.

**Course Length:** Approximately 4 hours
## Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

### CLE 067

**Strategic Material Selection: Chemical Ranking System**

A chemical ranking system (CRS) is a tool for helping DoD users select safer chemicals and also decrease life-cycle costs. A CRS can assist in evaluating the human health and environmental effects of a range of chemicals used by the DoD. This summary-level module describes the attributes of a CRS and highlights two DoD CRSs currently in use.

**Course Length:** Approximately 2 hours

### CLE 068

**Intellectual Property and Data Rights**

This module provides fundamental information about intellectual property and the effective management of rights in technical data and computer software and their contribution to programmatic success. It addresses concepts and legal guidance related to intellectual property, focusing on the rights in technical data and computer software that are the concerns of the government and of defense contractors. This module is primarily intended for technology managers and other acquisition professionals charged with ensuring that the DoD has the legal rights to the intellectual property necessary to provide the best technology to our warfighters.

**Course Length:** Approximately 4 hours

### CLE 069

**Technology Transfer**

This continuous learning module enables students to apply the principles of technology transfer to the technologies they are developing, with the goal of increasing the rate of technology transfer.

**Course Length:** Approximately 3.5 hours

### CLE 070

**Corrosion and Polymeric Coatings**

This module provides a fundamental overview understanding of how polymeric coatings can be used to help address corrosion prevention and mitigation issues in applications across the DoD.

**Course Length:** Approximately 1 hour

### CLE 201

**ISO 9000**

This module describes the International Organization for Standardization (ISO) and explains the benefits of the ISO 9000 Quality Management System Standard as well as lessons learned regarding its implementation and use. This module is primarily intended for GS-9 to GM-15 personnel in the Production, Quality, and Manufacturing (PQM) and Systems Planning, Research, Development, and Evaluation (SPRDE) career fields.

**Course Length:** Approximately 3 hours

### CLE 301

**Reliability and Maintainability**

This module defines reliability, availability, and maintainability; explores the significant influence of reliability and maintainability on systems; and provides practical techniques that may be applied in an acquisition program to achieve the desired levels of reliability and maintainability.

**Course Length:** Approximately 4 hours

### GOVERNMENT PURCHASE CARD TRAINING

### CLG 001

**DoD Government Purchase Card**

This module presents the requirements and guidelines to consider and apply, as appropriate, when using the government purchase card. Government purchase cardholders and
billing officials will learn to be at ease with using the government purchase card responsibly and accountably.

**Course Length:** Approximately 3.5 hours

---

**CLG 004**

**DoD Government Purchase Card Refresher Training**

This module presents the requirements and guidelines to consider and apply when using the government purchase card. This refresher course is based on the key points in the DoD Government Purchase Card module as well as important new areas of emphasis. It was developed to provide refresher training for government purchase cardholders and approving officials.

**Course Length:** Approximately 3.5 hours

---

**CLG 005**

**Purchase Card Online System (PCOLS)**

This module is designed to inform students about the Purchase Card Online System (PCOLS) and how to obtain help and support when beginning to implement PCOLS within a government purchase card organization. It also provides a detailed presentation of all four PCOLS components currently being used.

**Course Length:** Approximately 4 hours

---

**INTERNATIONAL ARMAMENTS AND INFORMATION EXCHANGE TRAINING**

**CLI 001**

**International Armaments Cooperation (IAC), Part 1**

This module is the first in a three-part series that covers laws, regulations, and policies for conducting IAC and describes the organizations and forums throughout the DoD that are stakeholders in IAC. Part 1 also addresses factors for consideration when planning IAC.

**Course Length:** Approximately 2 hours

---

**CLI 002**

**International Armaments Cooperation (IAC), Part 2**

This module introduces processes and programs that play vital roles in international armaments cooperation. Personnel responsible for implementing cooperative programs will learn about the key policies and processes that apply to DoD international program efforts. This module is second in a three-part series on IAC, which should be completed in sequence. This module is primarily intended for acquisition program managers and other DoD acquisition personnel who may be responsible for or play some role in international programs in the course of their career. Individuals with nonacquisition job responsibilities for security assistance and foreign disclosure also will find helpful information in this module.

**Course Length:** Approximately 2 hours

---

**CLI 003**

**International Armaments Cooperation (IAC), Part 3**

This module provides learners with a solid foundation and basic knowledge about IAC program activities by introducing specific processes and programs that are vital to IAC. It is third in a three-part series on IAC.

**Course Length:** Approximately 1.5 hours

---

**CLI 004**

**Information Exchange Program (IEP), DoD Generic**

This module addresses DoD component-wide requirements for developing, coordinating, negotiating, and executing IEP annexes. CLI 001, 002, and 003 are prerequisites for this module.

**Course Length:** Approximately 2 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

CLI 005

RDT&E (IEP), Army-Specific

This module addresses the purpose of the Information Exchange Program (IEP); details the Army IEP Annex package, the working-level integrated product team, and the Annex Management Framework; and describes the Army’s use of the International Online (IOL) business management system. To learn and fully understand the material presented in this module, students must have an understanding of the material presented in the DoD generic IEP module, CLI 004.

Course Length: Approximately 2.5 hours

CLI 006

RDT&E (IEP), Navy-Specific

This module ensures that Navy acquisition workforce members understand the Navy-specific procedures for implementing DoD’s Information Exchange Program (IEP), why they should participate in the IEP, and how to execute IEP information exchanges.

Course Length: Approximately 1 hour

CLI 007

Technology Transfer and Export Control

This module aims to ensure that program managers and other acquisition workforce members understand the fundamentals of technology transfer in the context of export control. This course formerly was CLM 036, but it has been renumbered to align it with other international continuous learning modules.

Course Length: Approximately 2 hours

LOGISTICS

CLL 001

Life-Cycle Management and Sustainment Metrics

This module addresses the development of life-cycle management and sustainment metrics, a critical element of performance-based product support. The module explores how these metrics are derived and the role of the life-cycle logistician in developing them. It also covers how these metrics evolve over the life cycle of a weapon system and how the logistician’s role evolves with them.

Course Length: Approximately 4 hours

CLL 002

Defense Logistics Agency (DLA) Support to the Program Manager

This module introduces participants to the capabilities of the DLA in delivering support to the warfighter. It gives an overview of the DLA and the benefits the agency provides to the program manager, operational units, and Service inventory control points.

Course Length: Approximately 3 hours

CLL 003

Supportability Test and Evaluation

The objective of this module is to provide a resource to the logistics community to assist in managing the risks involved in developing, producing, operating, and sustaining systems and capabilities.

Course Length: Approximately 3 hours

CLL 004

Life-Cycle Logistics for the Rest of Us

The goal of this module is to provide individuals who do not work in the logistics field with a basic knowledge of
some of the essential processes and considerations that DoD logistics professionals encounter as they satisfy their customers’ requirements.

**Course Length:** Approximately 3 hours

---

**CLL 005**

**Developing a Life-Cycle Sustainment Plan (LCSP)**

This module covers the purpose of a Life-Cycle Sustainment Plan (LCSP), the associated personnel, and the LCSP’s development process and evolution across a program’s life cycle. It complements the material in the Defense Acquisition Guidebook, Chapter 5, Life-Cycle Logistics.

**Course Length:** Approximately 3 hours

---

**CLL 006**

**Depot Maintenance Partnering**

This module introduces professionals to ways in which depot maintenance partnering can be used as a cost-effective technique for applying a performance-based logistics philosophy in the real world.

**Course Length:** Approximately 2 hours

---

**CLL 007**

**Lead-Free Electronics Impact on DoD Programs**

This module provides an overview of the impact of commercial lead-free mandates and their effect on DoD electronics programs. The module addresses the major lead-free-related directives, DoD-related risks and mitigations, program considerations associated with lead-free initiatives, and DoD’s response to the various mandates and policy directives.

**Course Length:** Approximately 3 hours

---

**CLL 008**

**Designing for Supportability in DoD Systems**

This module provides a comprehensive overview of and introduction to incorporating systems engineering principles throughout the system life cycle in order to design, develop, produce, and sustain operationally reliable, supportable, and effective systems. It also introduces the system operational effectiveness model and process. It demonstrates how consistent application of the system operational effectiveness process, during all phases of the acquisition life cycle, facilitates the optimization of system supportability and operational effectiveness.

**Course Length:** Approximately 3 hours

---

**CLL 011**

**Performance-Based Life-Cycle Product Support**

This module presents performance-based logistics as the DoD strategy for product support, focusing on weapon system support as performance outcomes rather than more traditional (and potentially suboptimal) functional transactions to meet the DoD 5000 series requirements. These requirements expect program managers to (a) develop and implement performance-based logistics strategies that optimize total system availability while minimizing the cost and logistics footprint, and (b) develop sustainment strategies that include the best use of public and private sector capabilities through government-industry partnering initiatives, in accordance with statutory requirements.

**Course Length:** Approximately 3 hours
### Appendix D Continuous Learning

CLL 023

Title 10 U.S.C. 2464 Core Statute Implementation

This module provides an introductory presentation of DoD maintenance and reviews the capabilities, methodology, roles, and responsibilities required for services. Public law mandates that DoD maintain an organic core logistics capability with ready and controlled resources necessary to ensure effective and timely responses to mobilizations, national defense contingencies, and other emergency requirements.

Course Length: Approximately 3 hours

CLL 024

Title 10 Limitations on the Performance of Depot-Level Maintenance (50/50)

This module gives an introductory presentation of DoD maintenance. It provides professionals with a review of Section 2466 of Title 10 U.S.C., which mandates that the Services and combatant commanders may not have more than 50 percent of depot maintenance performed by non-DoD personnel.

Course Length: Approximately 3 hours

CLL 025

Depot Maintenance Interservice Support Agreements (DMISA)

This module is for maintenance interservice support offices; managers; and others who prepare, review, negotiate, and manage DMISAs. The module explains key duties and the process for creating DMISAs. Professionals will improve the efficiency of DoD depot maintenance planning through their successful implementation of DMISAs.

Course Length: Approximately 5 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

### CLL 026
**Depot Maintenance Capacity Measurement**

This module provides professionals with a basic understanding of the methods used to measure, record, and report capacity and utilization data for organic activities related to depot maintenance.

**Course Length:** Approximately 4 hours

### CLL 029
**Condition-Based Maintenance Plus (CBM+)**

This module provides the learner with an overview and introduction to depot maintenance management and operations needed in DoD legacy systems. The module will cover DoD maintenance, CBM+ information and background, essential elements, CBM+ implementation, and managing initiatives and measuring success.

**Course Length:** Approximately 2 hours

### CLL 030
**Reliability-Centered Maintenance (RCM)**

This module provides the learner with information on RCM for the Defense Acquisition Workforce. This will include a definition of RCM, an introduction to its history and development, and the process and application of RCM. The overarching objective is for the student to understand RCM, its fundamental process, and its applications.

**Course Length:** Approximately 2 hours

### CLL 032
**Preventing Counterfeit Parts from Entering the DoD Supply System**

This self-paced computer-based training program is designed to facilitate learning about different types of commercial and industry nonconforming, suspect, and counterfeit items; how these items enter the commercial and DoD supply chains; the economic impact of these items; and how to develop basic skills for identifying possible nonconforming and suspect counterfeit items. Participants will also learn how to mitigate the risks involved in procuring these items and how to report these items through the proper channels.

**Course Length:** Approximately 1.5 hours

### CLL 033
**Logistician’s Responsibilities During Technical Reviews**

Technical reviews provide oversight and management of the definition, development, and demonstration of system, subsystem, and component design in accordance with established systems engineering technical processes and technical management processes. This course describes the life-cycle logistician’s role in technical reviews and how the logistician can use that involvement to improve supportability of the system. This module will examine the most common technical reviews and the specific steps the life-cycle logistician can take to prepare for and participate in the review.

**Course Length:** Approximately 4 hours

### CLL 034
**SLAMIS**

This module is an overview of the SSN-LIN Automated Management and Integrating System (SLAMIS) application. It provides a basic understanding of the many SLAMIS modules and capabilities as well as of the events that led to the development of this application, which replaced several legacy processes. Today, SLAMIS continues to address key equipment procurement, fielding, and sustainment issues using the stakeholder’s institutional knowledge, regulations, and expert recommendations to improve processes through the use of automation.

**Course Length:** Approximately 4 hours
CLL 035

Operating and Support Cost Estimating for the Product Support Manager

This module, primarily intended for logisticians, addresses the role and importance of Operating and Support cost estimating in life-cycle product support planning.

Course Length: Approximately 6 hours

CLL 036

Product Support Manager (PSM)

This module provides a basic understanding of the evolution of product support and the role of the PSM in its planning and execution. The module also describes the PSM’s role in assisting in executing the program manager’s life-cycle management responsibilities.

Course Length: Approximately 4 hours

CLL 037

DoD Supply Chain Fundamentals

This learning asset teaches students to identify and recognize key characteristics of DoD supply chain management fundamentals and of effective/efficient supply chains.

Course Length: Approximately 4 hours

CLL 038

Provisioning and Cataloging

This continuous learning module provides instruction on the basics of provisioning and cataloging as an integral part of identifying and fielding initial and replenishment spares during weapon systems product support and sustainment.

Course Length: Approximately 6 hours

CLL 039

Product Support Requirements Identification

This module explains how the logistically translates warfighter requirements into product support requirements. It defines terms and acronyms used in the creation, revision, and implementation of warfighter and product support requirements, and it provides links to references on issues discussed in the module.

Course Length: Approximately 3 hours

CLL 040

Business Case Analysis Tools

The objective of this module is to familiarize DoD personnel with the process, concepts, and application of tools for business case analyses performed to the standards and conventions documented in the DoD Product Support Business Case Analysis Guidebook.

Course Length: Approximately 3 hours

CLL 041

Life-Cycle Cost (LCC) Analysis Tools

This module provides an overview of life-cycle cost analysis and briefly introduces key tools, including methodologies and processes, as well as representative products of such analyses.

Course Length: Approximately 3 hours
### Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

<td>CLL 042</td>
<td>Supportability Analysis Techniques, Procedures, and Tools</td>
<td>This module addresses the importance of defining and understanding supportability analysis techniques, procedures, and tools. Students should take CLL 012, Supportability Analysis, before taking CLL 042.</td>
<td>Approximately 5 hours</td>
</tr>
<tr>
<td>CLL 043</td>
<td>Green Logistics: Planning for Sustainability</td>
<td>This module introduces and addresses the responsibilities of the life-cycle logistician in supporting both DoD and the program manager in planning for the life-cycle “sustainability” of weapon systems and programs. Decisions made regarding sustainability and environmental challenges often have a profound effect on life-cycle product support planning and on life-cycle cost. It is imperative that the life-cycle logistician, as with other system design considerations, become an integral part of the system engineering team.</td>
<td>Approximately 4 hours</td>
</tr>
<tr>
<td>CLL 045</td>
<td>Designing for Transportability</td>
<td>The overall objective of this module is to familiarize program managers, life-cycle logisticians, product support managers, systems engineers, and other defense acquisition members with the approval and certification processes used to ensure the safe and effective transportability of vehicles and equipment.</td>
<td>Approximately 4 hours</td>
</tr>
<tr>
<td>CLL 046</td>
<td>The Twelve Integrated Product Support (IPS) Elements</td>
<td>This module provides guidance on the 12 IPS elements reflected in the DoD Product Support Manager Guidebook and the Integrated Product Support Element Guidebook. It defines the 12 IPS elements, explains their purpose, and tells how they are developed, integrated, and implemented throughout the life cycle. It also gives an introduction to the Integrated Product Support Element Guidebook and suggests how to apply it to product support.</td>
<td>Approximately 4 hours</td>
</tr>
<tr>
<td>CLL 051</td>
<td>System Retirement, Reclamation, Demilitarization, and Materiel Disposition</td>
<td>The goal of this module is to provide the product support managers and life-cycle logisticians familiarity with the terms, activities, and participating organizations associated with system retirement, materiel disposition, reclamation, demilitarization, and disposal. It is not intended to duplicate all the information documented in various DoD and Service-level policy, guidance, and implementing instructions, but to provide a frame of reference for making system retirement decisions.</td>
<td>Approximately 4 hours</td>
</tr>
<tr>
<td>CLL 056</td>
<td>Sustainment of Software Intensive Systems</td>
<td>This module provides the learner with information regarding the terminology, processes, acquisition policy, considerations, and challenges that affect DoD software system sustainment.</td>
<td>Approximately 3.5 hours</td>

</tbody>
</table>
CLL 057

Level of Repair Analysis—Introduction

The Level of Repair Analysis (LORA) is a critical component of the supportability analysis and maintenance planning processes and the most important business decision made about physical supportability analysis during the acquisition of a system. This module describes the process of LORA, its benefits, its limitations, and when it is conducted. The module also introduces the broad concept of supportability analysis and how LORA interfaces with other design and support analyses necessary to maintain the operational readiness of military systems and equipment.

Course Length: Approximately 3 hours

CLL 058

Level of Repair Analysis—Theory and Principles

This is part two of a two-part continuous learning series (CLLs 057 and 058) on Level of Repair Analysis (LORA). The principal purpose of LORA is to determine the most effective maintenance and support structure for a system through iterative evaluations of both economic and noneconomic considerations. This module describes the analytical theory of LORA and its economic and noneconomic factors. It describes the steps in conducting LORA, as well as policies and processes that have shaped and still guide its implementation. The module also provides a detailed explanation of how LORA models are designed and how input data is structured. The module discusses how LORA develops a least-cost maintenance recommendation and how those costs are estimated.

Course Length: Approximately 3 hours

CLL 062

Counterfeit Prevention Awareness

This is an entry-level introduction to the issues of counterfeit material and counterfeiting’s impact on DoD programs and products. The course discusses means of identifying, reporting, and disposing of counterfeit items.

Course Length: Approximately 1 hour

CLL 119

Technical Refreshment Implementation Module

This module introduces you to the basic concepts to be considered in assessing opportunities, planning, and budgeting issues, and addresses the steps necessary to manage effectively the implementation of technology insertion or refreshment.

Course Length: Approximately 3 hours

CLL 120

The DoD Shelf-Life Program

Some items managed by the Department of Defense and the federal supply system have a shelf life (expiration date). CLL 120 includes an introduction and information on acquisition and procurement, integrated material management, receiving, storing, monitoring, material disposition, and use of the Shelf-Life Extension System (SLES) located on the DoD Shelf-Life Program Web site.

Course Length: Approximately 7 hours

CLL 201

Diminishing Manufacturing Sources and Material Shortages (DMSMS) Fundamentals

This module provides professionals with a working-level overview of DMSMS issues. While professionals will not be experts after completing the course, they will have a working knowledge of DMSMS history, issues, tools, and current initiatives, and will have seen real examples of successful proactive DMSMS programs. Professionals will understand why standardization of policies and procedures within the DMSMS community is so important and will become familiar with many other related topics.

Course Length: Approximately 3 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

**CLL 202**

**Diminishing Manufacturing Sources and Material Shortages (DMSMS) Executive Overview**

The module provides concise DMSMS information for executives or program managers who require an understanding of how DMSMS affects their operations.

**Course Length:** Approximately 1 hour

**CLL 203**

**Diminishing Manufacturing Sources and Material Shortages (DMSMS) Essentials**

The DMSMS Essentials module is for professionals who have a working knowledge of DMSMS regulations and policies, and it is recommended that professionals first complete CLL 201 and CLL 202. This module focuses on DMSMS problems regarding electronics, as well as mechanical items and materials. The module will introduce professionals to the Defense Logistics Agency’s DMSMS programs and capabilities and will review basic techniques for component research.

**Course Length:** Approximately 2 hours

**CLL 204**

**Diminishing Manufacturing Sources and Material Shortages (DMSMS) Case Studies**

This module is for professionals who have a working knowledge of DMSMS regulations and policies, and it is recommended that professionals first complete CLL 201, CLL 202, and CLL 203. In this module, professionals will have an opportunity to review some DMSMS program scenarios, evaluating the program’s level of proactivity, and will be able to make DMSMS management decisions.

**Course Length:** Approximately 2 hours

**CLL 205**

**Diminishing Manufacturing Sources and Material Shortages (DMSMS) for Technical Professionals**

While not mandatory, it is assumed that students have previously taken the DMSMS Fundamentals, DMSMS Essentials, and DMSMS Case Studies modules and have a working knowledge of these topics. These core modules explain the basics of proactive DMSMS management, developing a DMSMS plan, component research and cataloging, cost avoidance, and other essential topics. This module covers the current processes, policies, and procedures used by technical professionals to practice proactive management. It focuses on the high-level best practices for running each program. Students can adjust the procedures and techniques to their Service as appropriate.

**Course Length:** Approximately 2 hours

**CLL 206**

**Introduction to Parts Management**

Parts management, previously known as parts control, has been a discretionary practice or a requirement in DoD weapon systems or equipment acquisition contracts since 1957. Today’s weapon systems and equipment acquisition environment is characterized by rapidly changing designs, increases in the use of commercial part types, offshore manufacturing of parts, and diminishing manufacturing sources and material shortages (DMSMS). These factors have increased risk for DoD weapon systems and equipment acquisition contracts. Because of these risks, contractors need more than ever before to have an effective parts management program. The parts management program is an integral part of the acquisition process for design, development, modification, and support of weapon systems and equipment.

**Course Length:** Approximately 1.5 hours
ACQUISITION AND MANAGEMENT

CLM 003

Overview of Acquisition Ethics

This module reinforces the most important legal ethics standards governing interaction between government personnel and DoD contractors. Areas addressed include conflicts of interest; gratuities from contractors; the Procurement Integrity Act; job-hunting for a position with private industry while still employed with the federal government; restrictions on post-government employment of a former federal employee or officer; and ethical problems that can arise when both government and contractor personnel work in common spaces on common goals as a single team.

Course Length: Approximately 2 hours

CLM 005

Industry Proposals and Communication

This module identifies actions that the government can take to create an environment conducive to industry developing better, more timely solutions to meet government needs at affordable prices. The student will be introduced to budget realities and steps to building better buying power for the government.

Course Length: Approximately 3 hours

CLM 012

Scheduling

This module focuses on scheduling processes and tools that can be used to develop schedules for a defense systems acquisition project. Scheduling is the focus of the planning and control process and depends, to a great extent, on program risk and the resources available (time, money, facilities, personnel, and workforce skills). Scheduling is a roadmap for systems development, and thus, it is an inherent part of program management.

Course Length: Approximately 12 hours

---

CLM 013

Work-Breakdown Structure

This module addresses two fundamental and interrelated types of work-breakdown structures: the program work-breakdown structure that is developed by a program management office and the contract work-breakdown structure that is developed by a contractor.

Course Length: Approximately 6 hours

CLM 014

IPT Management and Leadership

This module introduces management and leadership concepts used to organize, manage, and lead an integrated product team (IPT). IPTs are used throughout the acquisition process to open the cross-functional and cross-organizational lines of communication and are formed for the specific purpose of delivering a product for a customer.

Course Length: Approximately 8 hours

CLM 016

Cost Estimating

This module focuses on basic cost-estimating tools and techniques. Cost estimates are one of the fundamental building blocks of the acquisition process. The cost estimate and its supporting budget are a part of the baseline against which a program’s progress and success are measured.

Course Length: Approximately 8 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

**CLM 017**

**Risk Management**

Risk is always a concern in the DoD systems acquisition process. The acquisition process itself is designed, to a large degree, to allow risk to be managed from conception to delivery of the system. Although risk is inherent in any program, risk management ensures that managers take measures to assess and handle risks. This module focuses on tools and processes that can be used to manage risk on a defense systems acquisition project.

**Course Length:** Approximately 8 hours

**CLM 021**

**Introduction to Reducing Total Ownership Costs (R-TOC)**

This module provides R-TOC ideas, tools, and strategies to professionals in the acquisition and logistics communities. The module emphasizes a systems perspective as it orients professionals to the R-TOC requirement, defines key R-TOC concepts, and describes best practices. It is helpful for professionals taking this course to have a solid background in the planning, program, and budgeting system; acquisition process; system engineering; or familiarity with supply chain management.

**Course Length:** Approximately 3 hours

**CLM 023**

**DAU AbilityOne Contracting**

There are over 14 million Americans with severe disabilities, and the unemployment rate for people with severe disabilities is 70 percent. The AbilityOne program helps people with disabilities who are unable to obtain or maintain employment on their own. This module provides professionals and DoD purchase cardholders a better understanding of the AbilityOne program.

**Course Length:** Approximately 1 hour

**CLM 024**

**Contracting Overview**

The Contracting Overview module gives a summary of the market research process, the process for developing criteria or factors for teams to use in evaluating contractors during source selection, and the use of the uniform contract format.

**Course Length:** Approximately 8 hours

**CLM 025**

**Commercial-Off-The-Shelf (COTS) Acquisition for Program Managers**

This module provides an overview of the fundamental challenges faced by organizations when they integrate commercial items to form a system. It addresses the issues involved in buying from the commercial marketplace, summarizes lessons learned from programs that have made extensive use of commercial items, and offers suggestions.

**Course Length:** Approximately 3 hours

**CLM 030**

**Common Supplier Engagement**

This module is designed to help professionals navigate the changes that have occurred because of the government’s elimination of paper methods that were previously used in acquisitions. The module provides an overview of the electronic e-business practices used in acquisitions, including topics on e-business and e-government, and how both of these relate to common supplier engagement.

**Course Length:** Approximately 2 hours

**CLM 031**

**Improved Statement of Work**

This module will help professionals improve statements of objectives, statements of work, and performance work statements that are developed and evaluated by all acquisi-

**CLM 035**

**Environmental Safety and Occupational Health—Lesson from PMT 352A**

This module, excerpted from PMT 352A, focuses on the increased emphasis and importance of environmental safety and occupational health as they relate to acquisition management. Program managers must ensure their programs, regardless of acquisition category, comply with environmental safety and occupational health statutory and regulatory requirements.

**Course Length:** Approximately 4 hours

**CLM 032**

**Evolutionary Acquisition**

This module introduces the ideas and principles of evolutionary acquisition and teaches how to apply them in a rapidly changing environment.

**Course Length:** Approximately 2 hours

**CLM 033**

**DAWIA II**

The Defense Acquisition Workforce Improvement Act (DAWIA) was amended significantly during fiscal years 2004 and 2005. These amendments (generally referred as DAWIA II) provide a number of flexibilities that enable the DoD to develop and manage the Defense Acquisition Workforce more effectively. This module explains the transformative changes that took place in DAWIA II.

**Course Length:** Approximately 3 hours

**CLM 034**

**Science and Technology—Lesson from PMT 352A**

This module, excerpted from the PMT 352A course, provides background on the importance of the science and technology (S&T) role in the systems acquisition process and identifies sources of S&T information. It contains activities that allow participants to assess an S&T project’s compatibility with the Advanced Threat Infrared Countermeasure/Common Missile Warning System Program and to recommend strategies for incorporating the emerging technology.

**Course Length:** Approximately 4 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

**CLM 039**

**Foundations of Government Property**

This module provides DoD financial accounting and property management professionals an overview of government property management. This module will increase professionals' knowledge and understanding of the DoD accounting and accountability approach to the property management life cycle. It also will introduce professionals to essential tools that will help them manage government property.

**Course Length:** Approximately 1.5 hours

**CLM 040**

**Proper Financial Accounting Treatments for Military Equipment**

This module is designed to provide a better understanding of how military equipment values are determined and the process used to ensure consistent execution; the important roles that program managers, business/financial management analysts, and procurement contracting officers play in this process; and the actions required by each role so a structure is in place that ensures proper financial accounting treatments for military equipment.

**Course Length:** Approximately 1.5 hours

**CLM 044**

**Radio Frequency Identification**

This module is designed to provide defense contracting officers with the knowledge necessary to insert the passive radio frequency identification (RFID) Defense Federal Acquisition Regulation Supplement (DFARS) clause into appropriate contracts, thus streamlining DoD’s receiving process. The module also reviews RFID technology and DoD’s RFID implementation strategies.

**Course Length:** Approximately 3 hours

**CLM 047**

**Fiscal and Physical Accountability and Management of DoD Equipment**

This module builds upon the concepts presented in the Foundations of Government Property module (CLM 039). DoD professionals responsible for DoD fiscal and physical property management play a crucial role in the acquisition and life cycle of DoD equipment end-items—both for the warfighter and for the American taxpayer. The module provides an overview of the acquisition and sustainment policy guidance, business rules, and life-cycle management of DoD equipment.

**Course Length:** Approximately 2 hours

**CLM 048**

**Audit Readiness Requirements for DoD Equipment**

This module provides key personnel, both financial and non-financial managers, with “how-to” details on the requirements and processes necessary to prepare for an audit of DoD equipment requiring capitalization.

**Course Length:** Approximately 2 hours

**CLM 049**

**Procurement Fraud Indicators**

This module provides an awareness of procurement fraud indicators. This course was developed as a result of a department-wide review of vulnerabilities to fraud, waste, and abuse in contracting, as directed by Congress.

**Course Length:** Approximately 2 hours

**CLM 051**

**Time Management**

This module introduces the basics of time management, including the identification of common time thieves and an analytical framework for rebalancing the life-work paradigm.

**Course Length:** Approximately 1 hour
CLM 055

Program Leadership

This module identifies the most important leadership competencies necessary for program managers (PMs) in the defense acquisition process and analyzes the attributes of successful PMs through interviews with two highly successful PMs. This module also provides tips on self-assessment of PM leadership skills and references for more information on how to strengthen those skills.

**Course Length:** Approximately 1.5 hours

CLM 056

Portfolio Management

This module introduces the concepts and practices of portfolio management as it occurs in the Department of Defense environment. It also exposes students to a mixture of simple and complex techniques and tools to employ these concepts and practices.

**Course Length:** Approximately 1 hour

CLM 057

Joint DoD-DoE Nuclear Weapons Life-Cycle Activities

This is an entry-level introduction to the full nuclear system life cycle, but with major emphasis on the joint processes and responsibilities for the sustainment of nuclear weapons, also known as phase 6.X. Every member of the nuclear community should at least be aware of the 6.X process; and every member who actually works on the sustainment of our nuclear triad, either within the DoD or within the joint DoD-Energy Department environment, needs to be a practitioner of the 6.X process. The current target audience is all Air Force personnel entering the nuclear acquisition workforce.

**Course Length:** Approximately 3 hours

CLM 059

Small Business Program for Program Managers

This module is designed to provide program managers with the tools and understanding of how to best utilize small businesses in the Defense Acquisition Management System to the maximum extent practical so that both small business and DoD acquisition programs are successful.

**Course Length:** Approximately 4 hours

CLM 071

Introduction to Data Management

This module explains why data management is critical to enhancing support throughout the system life cycle. CLMs 071–CLM 077 will provide acquisition professionals with the fundamental knowledge required to create better data management plans and obtain the necessary data rights for systems being delivered to the warfighter, thus affording opportunities to reduce life-cycle cost and increase Operating and Support competition. CLM 071 is one of seven data management (DM) modules in the DM series (CLM 071–CLM 077).

**Course Length:** Approximately 1.5 hours

CLM 072

Data Management Strategy Development

With advancements in technology and robust products that use those technologies, it has become even more important that the government obtain the necessary data, rights, and licenses to support and maintain its programs. Developing a data management strategy (DMS) is one of the first steps in ensuring this is possible. This module presents the requirements, tools, and processes needed to complete a comprehensive DMS. CLM 072 is one of seven data management (DM) modules in the DM series (CLM 071–CLM 077).

**Course Length:** Approximately 1.5 hours
Continuous Learning

Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

CLM 073
Data Management Planning System

This module explains how conscientious data management (DM) planning contributes to the success of major weapon systems acquisitions. It explores such topics as key personnel roles in DM planning, recent events and changes to DM-planning practices, and the roles of configuration management and the Integrated Digital Environment. Students will emerge with an understanding of the goals, benefits, and challenges associated with DM planning. CLM 073 is one of seven data management (DM) modules in the DM series (CLM 071–CLM 077).

Course Length: Approximately 1.5 hours

CLM 074
Technical Data and Computer Software Rights

This module explores types of data rights and explains how proper allocation of these rights is mutually beneficial to the government and contractors. The module also examines the major factors that must be considered when determining which data rights are appropriate for product support throughout the system’s life cycle. CLM 074 is one of seven data management (DM) modules in the DM series (CLM 071–CLM 077).

Course Length: Approximately 3 hours

CLM 075
Data Acquisition

This module identifies the activities and requirements associated with data acquisition. The goal of this module is to present the activities and requirements associated with drafting a request for proposal (RFP), the process for responding to offerors’ proposals, and the data management considerations after contract award. CLM 075 is one of seven data management (DM) modules in the DM series (CLM 071–CLM 077).

Course Length: Approximately 4 hours

CLM 076
Data Markings

Proper markings are vital to ensuring that data are available to the right people at the right time and that data are protected from unauthorized dissemination. This module explains how to apply the correct markings and distribution statements to technical data and computer software. CLM 076 is one of seven data management (DM) modules in the DM series (CLM 071–CLM 077).

Course Length: Approximately 3.5 hours

CLM 077
Data Management Protection and Storage

Information is one of our Nation’s greatest sources of power. We must treat information as a strategic asset, and we must protect information and information systems against adverse events. This module explains the vital role that data protection and storage play in a major weapon system acquisition program. CLM 077 is one of seven data management (DM) modules in the DM series (CLM 071–CLM 077).

Course Length: Approximately 1.5 hours

CLM 103
Quality Assurance Auditing

The Quality Assurance Auditing module contains material that covers three general types of audits: system, process, and product. These audits are described in three distinct phases: planning and preparation, performance, and reporting and follow-up.

Course Length: Approximately 2 hours

CLM 200
Item-Unique Identification

Item-unique identification enables item tracking in DoD business systems and provides reliable and accurate data for management, financial accountability, and asset manage-
ment purposes. This module provides an overview of item-
unique identification.

Course Length: Approximately 2 hours

CLM 201

Serialized Item Management (SIM)

This module provides students with an understanding of
serialized item management, which enables effective and
efficient life-cycle management of material.

Course Length: Approximately 2.5 hours

REQUIREMENTS

CLR 030

Environment, Safety, and Occupational Health in JCIDS

The module is designed to help the environment, safety,
and occupational health (ESOH) practitioner generate
concise ESOH wording appropriate for Joint Capabilities
Integration and Development System (JCIDS) documents.
The module offers practical guidance in negotiating the
JCIDS process where different interests, ESOH related and
non-ESOH related, often compete among stakeholders in a
resource-constrained context.

Course Length: Approximately 4 hours

CLR 101

Introduction to Joint Capabilities Integration
and Development System

This module provides an overview of JCIDS. The five lessons
focus on terms, definitions, basic concepts, processes, and
roles and responsibilities involved within JCIDS, as well
as on JCIDS’ interaction with the Defense Acquisition
System (DAS) and planning, programming, budgeting, and
execution (PPBE). The module is designed for DoD profes-
sionals who contribute to requirements generation and the
capability-development process, including JCIDS analysis,
subject matter or domain expertise, document staffing and
coordination, and/or administrative support.

Course Length: Approximately 3.5 hours

CLR 151

Analysis of Alternatives

This module presents the process used by DoD to conduct
an Analysis of Alternatives (AoA) in support of require-
ments, system acquisition, and resourcing. The AoA is the
analytical process that DoD organizations use to assess and
prioritize potential materiel solutions to a validated military
capability need.

Course Length: Approximately 3 hours

CLR 250

Capabilities-Based Assessment

This module introduces the planning and organizing of capa-
bilities-based assessments (CBAs). It contains four lessons,
dealing with definitions, planning research, team building and
planning, and the study phase. The module explains how to
conduct and assist effective and efficient CBAs in support of
the Joint Capabilities Integration and Development System.

Course Length: Approximately 5 hours

CLR 252

Developing Key Performance Parameters

This module explains how to develop key performance
parameters (KPPs) and key system attributes (KSAs). It
also discusses mandatory KPPs, examines the relationship
of KPPs and KSAs to technical requirements, includes an
in-depth look at Net Ready-KPP, and explains how to get
top-level requirements through staffing and validation. The
module is for requirements managers and other managers
who prepare and apply system attributes such as KPPs.

Course Length: Approximately 5 hours
EARNED VALUE MANAGEMENT

CLV 016
Introduction to Earned Value Management
This module introduces the basics of earned value management (EVM) as it relates to acquisition program management. You will learn the five independent earned-value variables and the three most common EVM metrics. At the conclusion of this module, you should be familiar with EVM-related laws passed by Congress, the Office of Management and Budget’s implementation of these laws, and current DoD policy guidance regarding EVM requirements. Additionally, you should recognize how work scope, schedule, and resources are combined to establish the EVM performance measurement baseline.

Course Length: Approximately 1 hour

CLV 017
Performance Measurement Baseline
This module introduces the earned value management language and processes associated with developing the performance measurement baseline. The course defines the concepts of total allocated budget, negotiated contract cost, authorized unplanned work, contract budget baseline, over-target baseline, summary-level planning packages, undistributed budget, management reserve, and the performance measurement baseline. The module describes a generic process for developing performance measurement baselines. It concludes by explaining the most common earned value techniques and relating the relative desirability and risks associated with each.

Course Length: Approximately 4.5 hours

CLV 018
Earned Value and Financial Management Reports
This module reviews the most common DoD data reports associated with earned value management, cost estimating, and financial management. It examines the purpose and relationship between the data item description and the contract data requirements list; identifies key players and purposes in reports; and outlines the DoD contract performance report and the tailoring guidance for the integrated master schedule, provided in the *Earned Value Management Implementation Guide*.

Course Length: Approximately 1 hour

CLV 019
Estimate at Completion
This module reviews the process for computing an estimate-at-completion range when given earned value management (EVM) data. It defines the meaning of the cost performance index, the schedule performance index, and the earned value metrics of the to-complete performance index. It also reviews favorable and unfavorable trends in the performance trend charts of the cost performance index and schedule performance index and walks through the calculations needed to compute an estimate-at-completion range by using the standard EVM estimate-at-completion equation.

Course Length: Approximately 1 hour

CLV 020
Baseline Maintenance
This module reviews the concepts associated with performance measurement baseline maintenance. It describes the contract performance chart and the earned value management (EVM) metrics chart for cost/schedule variance. It also defines what a front-loaded baseline, rubber baseline, over-target baseline, and single-point adjustment mean in the context of EVM, and it uses a hypothetical database to depict the effects of contract modifications, management reserve use, the various baselines, and single-point adjustments on the contract performance and cost variance charts.

Course Length: Approximately 1 hour
CONTRACT MANAGEMENT

CLX 110

Fundamentals of GFR and GRR

This module is one component of the overall Government Flight Representative (GFR) and Government Ground Representative (GGR) training program. It presents information on acquisition and contracting, ground and flight operations, contractor procedures, assessments, and safety and mishaps.

**Course Length:** Approximately 5 hours

CLX 130

Fundamentals of Aviation Safety Officer Responsibilities

This module gives the Aviation Safety Officer the information needed to perform the duties and responsibilities of that position successfully. It includes the applicable laws, regulations, and guidance, as well as relevant processes and procedures.

**Course Length:** Approximately 6 hours

FEDERAL ACQUISITION INSTITUTE COURSES AND MODULES

FAC 001

HUBZone Empowerment Contracting Program—Certification and Eligibility

This module familiarizes procurement officials with the certification and eligibility requirements for program participation in the Historically Underutilized Business Zone (HUBZone) Empowerment Contracting Program. The program encourages economic development in HUBZones through the establishment of federal contract award preferences for qualified small businesses located in such areas.

**Course Length:** Approximately 30 minutes

FAC 002

HUBZone Empowerment Contracting Program—Contractual Assistance

This module familiarizes procurement officials with the types of Historically Underutilized Business Zone (HUBZone) contracts and the HUBZone small business’ contract performance requirements. The HUBZone Program encourages economic development in HUBZones through the establishment of federal contract award preferences for qualified small businesses located in such areas.

**Course Length:** Approximately 1 hour

FAC 003

HUBZone Empowerment Contracting Program—Historical Overview

This module familiarizes procurement officials with the historical development of the Historically Underutilized Business Zone (HUBZone) Program and provides an explanation of the program’s statutory and regulatory development. The HUBZone Program encourages economic development in HUBZones through the establishment of federal contract award preferences for qualified small businesses located in such areas.

**Course Length:** Approximately 30 minutes

FAC 004

HUBZone Empowerment Contracting Program—Protests and Appeals

This module familiarizes procurement officials with the procedures for filing a Historically Underutilized Business Zone (HUBZone) protest and/or appeal. The HUBZone Program encourages economic development in HUBZones through the establishment of federal contract award preferences for qualified small businesses located in such areas.

**Course Length:** Approximately 1 hour
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

FAC 005

**Just-in-Time Compliance Training: Central Contractor Registration**

All DoD contractors must be registered in the Central Contractor Registration to help streamline the acquisition process and broaden the use and reliance on e-business applications. The Central Contractor Registration was established to eliminate the need to maintain paper-based sources of contractor information. This module provides an overview of the registration process.

**Course Length:** Approximately 1 hour

FAC 006

**The SAFETY Act and Federal Acquisitions**

The SAFETY Act is designed to encourage the development and deployment of anti-terrorism technologies and services that will substantially enhance the protection of the Nation. This module will explain the SAFETY Act and explain how to incorporate it into an acquisition when appropriate.

**Course Length:** Approximately 1.5 hours

FAC 007

**Certificate of Competency Program**

The Certificate of Competency (COC) Program administered by the Small Business Administration (SBA) is authorized by statutory authority: Section 8(b)(7) of the Small Business Act of 1953 and Regulatory Implementation Code of Federal Regulations (CFR), 13 Part 125.5; Federal Acquisition Regulation (FAR) 48 Part 19.6. The COC Program allows a small business to appeal a contracting officer’s determination that it is unable to fulfill the requirements of a specific government contract on which it is the apparent low bidder. The COC is an appeal procedure available to the apparent successful small business offeror and gives the small business the opportunity to demonstrate it has the capability to perform on a specific federal prime contract. This is not a Certificate of Compliance or Conformance. It is a determination that a firm is responsible or not to perform a specific government contract.

**Course Length:** Approximately 30 minutes

FAC 008

**Competition in Contracting Act (CICA)**

This module, targeted toward the United States Agency for International Development’s (USAID) procurement workforce, provides an overview of the CICA. The module involves a review of the Federal Acquisition Regulation (FAR), the USAID Acquisition Regulation (USAID’s supplement to the FAR), and specific USAID guidance related to CICA. Although this module is targeted toward USAID’s procurement workforce, all USAID employees are encouraged to take it.

**Course Length:** Approximately 1 hour

FAC 010

**Small Business Innovation Research/Small Business Technology Transfer (SBIR/STTR) Programs**

This module gives an overview of SBIR/STTR programs, which encourage small businesses to explore their technological potential by providing them with the incentive to profit from its commercialization. Including qualified small businesses in the Nation’s research and development arena stimulates high-tech innovation and promotes the entrepreneurial spirit as the United States meets its specific research and development needs.

**Course Length:** Approximately 1 hour

FAC 013

**Shaping Smart Business Arrangements—Expert Edition**

This is designed for personnel newly assigned to the contracting workforce. Participants will gain a broad, comprehensive understanding of the environment in which they will serve; develop professional skills for making business
decisions and advising other acquisition team members how to meet customers’ needs; be introduced to knowledge management and information systems; and prepare to provide contracting support within the overarching business relationships of government and industry.

**Course Length:** Approximately 11.5 hours

---

**FAC 016**

**Buy American Act**

This module covers the Buy American Act (BAA) history, applicable statutes and regulations, the policy for supplies, and the exceptions and trade agreements that may waive the BAA. The module provides guidelines for applying the BAA to the solicitation and evaluation of supplies and, through a series of scenarios, guides the learner in applying those guidelines.

**Course Length:** Approximately 2 hours

---

**FAC 017**

**COTR Refresher**

This refresher course consists of two modules. Module 1, “Bridging the Gap,” provides a review of content taken from the contracting officer’s technical representative (COTR) certification course using a game board main screen and a scoring device. Module 1 tests the learner’s ability to recall and apply key COTR concepts in response to scenario-based questions. Module 2, “COTR Contract Administration,” comprises 10 performance-based exercises, using a threaded case study of a service contract as the vehicle through which learners will exercise the COTR’s authority while fulfilling duties and responsibilities when administering a contract.

**Course Length:** Approximately 8 hours

---

**FAC 018**

**Green Purchasing for Civilian Acquisition**

This course offers federal acquisition professionals an overview of the policies, requirements, and best practices for purchasing sustainable products and services.

**Course Length:** Approximately 2 hours

---

**FAC 019**

**FAPIIS Training**

The public availability of Federal Awardee Performance and Integrity Information System (FAPIIS) information, in combination with the mandatory use of FAPIIS, heightens the need for training on the appropriate application of FAPIIS information to the evaluation of potential contract and grant awardees. This module provides the knowledge and skills needed to use FAPIIS effectively to make appropriate decisions related to contract and grant awards.

**Course Length:** Approximately 1.5 hours

---

**FAC 021**

**Price Analysis**

This module provides acquisition personnel with a tool that explains how to conduct price analysis. It also illustrates the proper way to document the results of a business negotiation. Users can take the full course for a solid foundation and then return to it as a resource and refresher on particular topics on an as-needed basis.

**Course Length:** Approximately 8 hours

---

**FAC 022**

**Combating Human Trafficking**

This module informs acquisition professionals about Federal Acquisition Regulation (FAR) clause 52.222-50, in order to assist them in upholding the zero tolerance policy and to provide formal training to heighten awareness across the federal government.

**Course Length:** Approximately 1 hour
Click to view text

Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

FAC 023

Basic Contracting for GSA Schedules

In this module, you will learn about the procedures for placing orders for supplies and services against Multiple Award Schedules as outlined in Federal Acquisition Regulation (FAR) Subpart 8.4. The module is not about general FAR procedures such as protests, acquisition planning, preparation of statements of work, and contract files management, but does discuss these topics as they relate to schedules contracting and ordering procedures.

Course Length: Approximately 4 hours

FAC 024

GSA Global Supply

Students will learn about the GSA Global Supply program and its role within the National Supply System. Information on GSA-managed products, as well as key ordering and fulfillment information, will also be covered.

Course Length: Approximately 2 hours

FAC 025

Energy Savings Performance Contracting Online Course

Learn about one of the government’s premier tools to finance facility energy improvements. Energy Savings Performance Contracting (ESPC) is a contracting vehicle that allows federal agencies to accomplish energy projects for their facilities without depending on appropriations to pay for the improvements. An ESPC project is a partnership between the customer (a government organization) and an energy service company.

Course Length: Approximately 8 hours

FAC 026

Cost Analysis

Federal acquisition requirements are growing in complexity and increasing in cost. Training on current contract pricing and costing requirements is vital for agencies to get fair and reasonable prices for contracts. This module provides acquisition personnel with a tool that explains how to conduct cost estimation and analysis. For those new to the field, this module provides a good foundation and a future resource; for experienced professionals, the most current information.

Course Length: Approximately 8 hours

FAC 027

GSA Schedules and the Utilization of Small Business

Students will learn how buyers in the federal marketplace can utilize small businesses under the GSA Multiple Award Schedules (MAS) program. Every agency is concerned with meeting its annual socioeconomic goals; the MAS program is a simple and easy way to do so.

Course Length: Approximately 1 hour

FAC 028

GSA Schedules and Sustainable Acquisition

This course will teach students about government-wide sustainability goals and how the GSA Multiple Award Schedule can help achieve those goals.

Course Length: Approximately 1 hour

FAC 029

GSA Schedules vs. Open Market

There are three commonly used acquisition methods: issuing task and delivery orders using GSA’s Multiple Award Schedules (MAS) under Federal Acquisition Regulation (FAR) Subpart 8.4 and negotiating a stand-alone order or contract under FAR Part 13 and FAR Part 15. The module explores the differences and similarities of these three methods, their advantages and disadvantages in various situations, and how to analyze alternatives as you develop your acquisition strategy.

Course Length: Approximately 2 hours
FAC 030

A-76 Post-Competition Accountability Training

This is a Federal Acquisition Institute interactive online training module that will help professionals understand how to manage a service provider awarded through the competitive sourcing process. This module explains the steps a federal agency must take to successfully implement the results of a competition between a government entity and private sector vendors. The training illustrates best practices and lessons learned across the federal government and provides an educational tool for stakeholders after the award selection of an A-76 competition.

Course Length: Approximately 1.5 hours

FAC 031

Small Business Programs

Small businesses make up about 99 percent of all the Nation’s businesses and employ half of all Americans, and they are the source for many of our greatest innovations. This module provides federal contracting professionals and program officials an overview of small business types and programs, and provides them with the information they need to encourage small business participation in government acquisitions. It will also help contracting professionals meet specific acquisition requirements related to small business concerns and achieve agency small business goals, while supporting increased opportunities for small businesses.

Course Length: Approximately 2.5 hours

FAC 033

Contract Management: Strategies for Mission Success

This module focuses on improvements made to federal contract management through the collaboration of public and private sector acquisition professionals as part of the Partnership for Public Service’s Acquisition Innovation Initiative.

Course Length: Approximately 3 hours

FAC 034

Interagency Acquisitions Basics

This online training module is an interactive multimedia presentation. It defines and identifies the features and benefits of interagency acquisition; describes the different types of interagency acquisitions; and provides a foundational understanding of what is required to make the decision to use this method, how to get started, keys to success, and resources available to support interagency acquisition activities.

Course Length: Approximately 1 hour

FAC 036

GSA Schedules BPAs and CTAs

This module will discuss the GSA Multiple Award Schedules Program as it pertains to the use of blanket purchase agreements (BPAs) and contractor team arrangements (CTAs).

Course Length: Approximately 2 hours

FAC 037

GSA eBuy: An Overview

Students will learn about the GSA eBuy program and how it functions to benefit both the government buyer and the vendor.

Course Length: Approximately 2 hours

FAC 038

How to Integrate Green into Acquisition

This module examines additional options for minimizing the environmental impact of acquisitions beyond requiring the use or supply of green products. It is possible to incorporate environmental considerations into any acquisition.

Course Length: Approximately 2 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

---

**FAC 039**

**GSA’s Governmentwide Acquisition Contracts (GWACs) for IT Service**

Because most, if not all, government agencies have a need to buy IT services and solutions, the General Services Administration (GSA) has made this purchasing convenient through its GWAC programs. In this module, students learn about the four GWAC programs offered through GSA.

**Course Length:** Approximately 4 hours

---

**FAC 040**

**GSA’s GWAC VETS**

Here students will learn about the Veterans Technology Services (VETS) governmentwide acquisition contract (GWAC) offered through GSA to facilitate purchase of IT services and solutions.

**Course Length:** Approximately 2 hours

---

**FAC 041**

**GSA Alliant GWAC**

Learn about the Alliant & Alliant Small Business GWAC (governmentwide acquisition contract) program offered through GSA to facilitate purchase of IT services and solutions.

**Course Length:** Approximately 2 hours

---

**FAC 042**

**GSA’s GWAC: 8(a) STARS II**

In this module, learn about the governmentwide acquisition contract (GWAC) 8(a) STARS II offered through GSA to facilitate purchase of IT services and solutions.

**Course Length:** Approximately 2 hours

---

**FAC 043**

**Ethics and Procurement Integrity for the Acquisition Workforce**

The Department of Homeland Security (DHS) courseware, “Ethics and Procurement Integrity for the Acquisition Workforce,” satisfies the annual U.S. Office of Government Ethics training requirement for DHS Financial Disclosure Report filers (OGE Form 450 and OGE Form 278) and the annual DHS procurement-ethics-training requirement.

**Course Length:** Approximately 1 hour

---

**FAC 044**

**Contractor Performance Assessment Reporting System (CPARS)**

This online course provides federal employees of civilian agencies with training on CPARS.

**Course Length:** Approximately 6 hours

---

**FAC 045**

**Federal Procurement Data System—Next Generation (FPDS-NG)**

This online course provides an overview of the Federal Procurement Data System—Next Generation. Accessible by multiple user groups, including the public, the FPDS–NG is a single repository for federal procurement award data.

**Course Length:** Approximately 3 hours

---

**FAC 047**

**Micro-purchases and Section 508 Requirements**

This continuous learning module explains what a micro-purchase is, and how and where Section 508 Requirements apply to an information, communication, and technology (ICT) micro-purchase.

**Course Length:** Approximately 0.5 hour
FAC 048
The GSA MAS Program: Buying Services Through GSA Schedules
The General Services Administration (GSA) Schedules program offers a vast array of services and products as well as an easy, streamlined way to acquire them. This course provides valuable information about the services available through GSA Schedules, how to find them, and the procedures and requirements that apply when ordering them.

Course Length: Approximately 4 hours

FAC 054
Federal Strategic Sourcing ALS Video 11/2013
This module consists of a recorded acquisition learning seminar from November 20, 2013. During the seminar, a panel of five experts addresses the core characteristics of strategic sourcing, describes the Federal Strategic Sourcing Initiative (FSSI), and reviews the overall sourcing-process cycle.

Course Length: Approximately 1 hour

HARVARD BUSINESS SCHOOL PUBLISHING MANAGEMENTOR
HBS 301
Managing Difficult Conversations
This module immerses managers in dialogue-based situations that foster learning by doing, where they make key decisions that drive the dialogue and ensuing results. It helps managers identify and adjust thought patterns before approaching the difficult conversations that arise in business. The module provides firsthand experiences in a safe environment and gives managers the opportunity to use interactive tools and apply follow-up action plans.

Course Length: Approximately 3 hours

HBS 302
Negotiating for Results
This module immerses managers in dialogue-based situations that foster learning by doing, where they make key decisions that drive the dialogue and ensuing results. Managers will learn how to avoid common traps and find common ground for opportunities. The interactive module helps managers prepare for and conduct effective negotiations that produce a winning edge for their organizations. The interactive environment will enable managers to tap expert insights, discover proven tactics, and sharpen their own skills for getting results when negotiating.

Course Length: Approximately 3 hours

HBS 303
Leading Teams with Emotional Intelligence
This module immerses managers in dialogue-based situations that foster learning by doing, where they make key decisions that drive the dialogue and ensuing results. The module puts the students in situations where they must be flexible with their own emotional intelligence skills to drive high team performance. Engaging interactive exercises reveal the secret behind exceptionally productive teams. The interactive environment will enable managers to tap into expert insights, discover proven tactics, and sharpen their own skills in the area of emotional intelligence.

Course Length: Approximately 3 hours

HBS 304
Managing Difficult Conversations, High Bandwidth
This module immerses managers in dialogue-based situations that foster learning by doing, where they make key decisions that drive the dialogue and ensuing results. It helps managers identify and adjust thought patterns before approaching the difficult conversations that arise in business. The module provides firsthand experiences in a safe environment and gives managers the opportunity to use interactive tools and apply follow-up action plans.

Course Length: Approximately 3 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

HBS 305

Negotiating for Results, High Bandwidth

This module immerses managers in dialogue-based situations that foster learning by doing where they make key decisions that drive the dialogue and ensuing results. Managers will learn how to avoid common traps and find common ground for opportunities. The interactive module helps managers prepare for and conduct effective negotiations that produce a winning edge for your organization. The interactive environment will enable managers to tap expert insights, discover proven tactics, and sharpen their own skills for getting results when negotiating.

Course Length: Approximately 3 hours

HBS 306

Leading Teams with Emotional Intelligence, High Bandwidth

This module immerses managers in dialogue-based situations that foster learning by doing, where they make key decisions that drive the dialogue and ensuing results. The module puts the student in situations where they must be able to flex their own emotional intelligence skills to drive high team performance. Engaging interactive exercises reveal the secret behind exceptionally productive teams. The interactive environment will enable managers to tap into expert insights, discover proven tactics, and sharpen their own skills in the area of emotional intelligence.

Course Length: Approximately 3 hours

HBS 309

Coaching for Results

In today’s environment of changing technology and evolving organizations, coaching can have a strategic impact. It provides continuous learning and develops people to meet current and future needs. Coaching is an investment that you make in developing your key resource—people—for the long-term benefit of your organization.

Course Length: Approximately 3 hours

HBS 310

Influencing and Motivating Others

This module examines the principles underlying leaders’ abilities to influence other people and to motivate their employees. It is primarily intended for all members of the acquisition community, especially managers and leaders.

Course Length: Approximately 3 hours

HBS 401

Budgeting

This module takes students step by step through the process of building better, more accurate budgets in less time. Learn how to create a budget that functions as a critical strategic tool while exploring the advantages and disadvantages of new techniques and approaches. The course includes easy-to-use budget templates for fast implementation of concepts.

Course Length: Approximately 2 hours

HBS 402

Business Case Development

This module takes you step by step through the process of creating a soundly reasoned and compelling case for your new business initiatives. It addresses topics ranging from identifying business opportunities to measuring their success. The module includes recommendations for assessing risk, weighing costs, developing an implementation plan, and communicating recommendations in a convincing manner.

Course Length: Approximately 2 hours

HBS 403

Business Plan Development

This module moves step by step through the process of preparing an effective plan for a business proposal. The steps taught are applicable to launching a new internal product as well as seeking funding for a new start-up business.

Course Length: Approximately 2 hours
HBS 404

Career Management
This module teaches students how to develop a straightforward approach to managing their career or helping others manage theirs. It includes tools for matching interests, values, and skills to the right job or development opportunity. It also gives valuable advice on resources such as career counselors, mentors, networking, informational interviewing, and professional development reviews.

Course Length: Approximately 2 hours

HBS 405

Change Management
This module is a practical guide to implementing, managing, and communicating change in an organization. Learn how to approach change with an open mind and use it as a stimulus to encourage new ideas and harness enthusiasm for further progress. This module includes steps to help units or organizations become change-ready and planning tools to address resistance to change.

Course Length: Approximately 2 hours

HBS 406

Coaching
Here students will learn how to get the best from their direct reports and, through coaching, help others master new skills. They will learn how to use a four-step process to facilitate the professional growth of those they have agreed to coach. Participants will discover how to strengthen their skills so they can be more effective coaches.

Course Length: Approximately 2 hours

HBS 407

Crisis Management
For managers who know what to do, every crisis is an opportunity to shine. This module instructs how to chart a course through crisis situations, from crisis plan development and contingency thinking to postcrisis management. It is relevant for managers at all levels.

Course Length: Approximately 2 hours

HBS 408

Customer Focus
Customer Focus is a vital orientation tool with value for every employee. This module covers the critical components of servicing internal or external customers, with a compelling overview of the importance of customer service, its relationship to customer satisfaction, and its link to company profitability.

Course Length: Approximately 2 hours

HBS 409

Decision-Making
Effective business decisions require time and input from many individuals throughout an organization. In this module, students will learn to identify underlying issues related to a decision, generate multiple alternatives, evaluate those alternatives, and communicate and implement the decision.

Course Length: Approximately 2 hours

HBS 410

Delegating
In this module, students will learn how to use proven tools for assessing any assignment, matching employee skills to tasks, selecting the right person, and supporting the delegation all the way through completion. It includes strategies for communicating the assignment, monitoring progress, and dealing with “reverse delegation.”

Course Length: Approximately 2 hours
**HBS 411**

**Developing Employees**

Here students will be taught how to easily apply recommendations for addressing employees’ developmental needs. This module includes strategies for maximizing return on management, growing competent employees, and keeping star performers motivated. It also addresses use of development planning to help team members improve individual performance, make the most of career opportunities, and maximize contributions to an organization’s performance.

**Course Length:** Approximately 2 hours

---

**HBS 412**

**Difficult Interactions**

Learn how to discuss and resolve difficult interactions in the workplace—whether with employees, peers, bosses, or even customers and suppliers. This module includes tools and techniques to help students decide which situations are worth resolving, find the source of the difficulty, productively discuss the emotions that difficult interactions can rouse, and overcome barriers to action.

**Course Length:** Approximately 2 hours

---

**HBS 413**

**Dismissing an Employee**

Dismissing an employee is one of the most difficult, painful tasks a manager can face. Learn how to manage a dismissal effectively—including making key decisions before, during, and after the critical event. Handled skillfully, dismissing an employee can set a team—and a company—on a positive new path.

**Course Length:** Approximately 2 hours

---

**HBS 414**

**Diversity**

Learn how to manage diversity to extract maximum value from employees’ differences—including how to recruit diverse talent, resolve diversity-related conflicts, and communicate with employees and customers from other cultures.

**Course Length:** Approximately 2 hours

---

**HBS 415**

**Ethics at Work**

Here students will learn how to use a three-step framework to solve “right versus right” ethical dilemmas and how to foster a climate of integrity within an organization.

**Course Length:** Approximately 2 hours

---

**HBS 416**

**Feedback Essentials**

Learn how and when to use various types of feedback to maximize openness and encourage learning. This module covers information on establishing a receptive work environment, giving effective feedback, receiving feedback openly, being patient with noncommunicators, and managing barriers to feedback.

**Course Length:** Approximately 2 hours

---

**HBS 417**

**Finance Essentials**

This primer shows nonfinancial managers how their units fit into the company’s overall financial picture. It includes easy-to-understand explanations of the income statement, balance sheet, and cash-flow statement, plus practical advice for pulling together a department’s budget and justifying an investment or expenditure.

**Course Length:** Approximately 2 hours

---

**HBS 418**

**Global Collaborations**

This module focuses on how to manage a global collaboration—including how to negotiate, build trust, overcome
language barriers, and navigate geographical as well as cultural challenges.

**Course Length:** Approximately 2 hours

**HBS 419**  
**Goal Setting**

Here students learn how to organize their work around clear and meaningful objectives, with tools and techniques for establishing realistic goals, creating a task list, tracking milestones, and evaluating achievement.

**Course Length:** Approximately 2 hours

**HBS 420**  
**Hiring**

Learn techniques for finding, interviewing, and selecting top performers. This module covers information on screening resumes, checking references, asking effective questions, making the hiring decision, and extending the offer. It also includes tools for creating a job profile, preparing for an interview, and evaluating job candidates.

**Course Length:** Approximately 2 hours

**HBS 421**  
**Innovation and Creativity**

This module shows how to stimulate creative thinking in an intellectually diverse workgroup. Learn to assess and then tailor the physical and psychological environment to stimulate creative thought, and how to manage the process of innovation for maximum impact on an organization.

**Course Length:** Approximately 2 hours

**HBS 422**  
**Innovation Implementation**

This module provides a framework for turning an innovative idea into reality. Innovation is not only about generating creative ideas. Innovation results when a creative idea is put to use. However, the implementation phase is where many good ideas fail. Learn how to implement an innovation, from crafting a vision statement to managing resistance.

**Course Length:** Approximately 2 hours

**HBS 423**  
**Laying Off Employees**

Implementing a layoff is one of the most difficult and painful tasks a manager can face. This module teaches how to effectively manage a layoff—including making key decisions before, during, and after the critical event. Handled skillfully, a layoff can set a team—and a company—on a positive new path.

**Course Length:** Approximately 2 hours

**HBS 424**  
**Leading and Motivating**

A synopsis of the essential tasks of leadership: setting direction, aligning people, and motivating others. Learn how to recognize the skills and characteristics of effective leaders, create an inspiring vision, and energize people to support and work toward goals.

**Course Length:** Approximately 2 hours

**HBS 425**  
**Managing Upward**

Gain insight into developing a mutually rewarding relationship, with skills for communicating and negotiating with a manager. Students will learn tips for presenting problems or opportunities to a supervisor and accepting responsibility for proposed actions.

**Course Length:** Approximately 2 hours
### HBS 426
**Marketing Essentials**
Developed especially for nonmarketing managers, this module includes fundamentals that will help people throughout the organization better understand the importance of marketing and how it relates to them.

**Course Length:** Approximately 2 hours

### HBS 427
**Meeting Management**
This module is a timesaving guide to planning and conducting meetings from start to finish. It includes preparation, keeping the meeting on track, and follow-up. It gives expert advice for dealing with problem behaviors exhibited by meeting participants.

**Course Length:** Approximately 2 hours

### HBS 428
**Negotiating**
Students will learn about the negotiation process, when different types of negotiations are appropriate, essential negotiating strategies, and how to become an effective negotiator. A practical guide includes assessing interests of all parties, developing opportunities that create value, avoiding common barriers to agreement, and implementing strategies to make the negotiation run smoothly.

**Course Length:** Approximately 2 hours

### HBS 429
**New Manager Transitions**
Learn what it means to be a manager, as well as how to navigate the complex and often stressful transition from individual contributor to a new manager.

**Course Length:** Approximately 2 hours

### HBS 430
**Performance Appraisal**
This module provides instruction in how to prepare for, conduct, and follow up on performance evaluations—in ways that link employee performance to company and group goals. This topic includes information on how to use informal performance assessments and feedback as part of regular employee interactions, prepare for a formal performance meeting with a direct report, document a performance meeting, and create a development plan with an employee.

**Course Length:** Approximately 2 hours

### HBS 431
**Performance Measurement**
This module includes a review of financial and nonfinancial measures used in all areas of organizational performance. It addresses both stand-alone measures (including ROI, EVA, and BET) and measurement frameworks such as dashboards, quality models, and the balanced scorecard. Included is a systematic process for tracking performance of initiatives that can generate improvements across the organization.

**Course Length:** Approximately 2 hours

### HBS 432
**Persuading Others**
Learn how to master the art and science behind successful persuasion and begin changing others' attitudes, beliefs, or behavior to create win-win solutions. Formal authority no longer gets managers as far as it once did. To do their job—accomplishing work through others—managers must develop and use skills of persuasion rather than simply issue orders.

**Course Length:** Approximately 2 hours
HBS 437

**Strategic Thinking**

This module offers practical advice for managers in charge of shaping and executing organizational strategy, including tips for analyzing opportunities, challenges, and the potential consequences of high-level action plans. It addresses identification of broad patterns and trends, creative thinking, analysis of complex information, and prioritization of actions.

**Course Length:** Approximately 2 hours

---

HBS 438

**Strategy Execution**

Learn what strategy is, how senior management and units work together to develop strategy, and how units support a company’s strategy by developing and executing action plans for strategic initiatives. In many companies, senior management and units are involved in the strategic-planning process. Why? This ensures that a company’s strategies—both corporate and unit—are tightly aligned and can be successfully implemented.

**Course Length:** Approximately 2 hours

---

HBS 439

**Stress Management**

This module offers practical, hands-on suggestions for managing workplace stress—from short-term “quick fixes” to long-term methods for both changing situations and changing how students respond to them. It teaches the difference between positive stress that enhances productivity and negative stress that breeds tension, lowers productivity, and undercuts job satisfaction. Strategies are taught for dealing with underlying causes of worry and stress, with tactical advice and coping mechanisms for immediate problem management.

**Course Length:** Approximately 2 hours
Appendix D Continuous Learning

Generally, Continuous Learning courses are offered online.

HBS 440
Team Leadership
This module explains how to establish a team with the right mix of skills and personalities and a culture that promotes collaborative work. It includes steps to leading an effective team and innovative, easy-to-implement self-evaluation tools. This course will help students decide whether they should establish a team and how to form a productive team, launch a team effort effectively, lead a team skillfully, and assess the team’s performance.

Course Length: Approximately 2 hours

HBS 441
Team Management
Learn about the problems that frequently throw a team off course and how to prevent them or, if necessary, how to get a team back on track. Focus is essential to effective teamwork. Learn how to diagnose and overcome common problems—such as poor communication and interpersonal conflict—that can impede team progress. Learn to take corrective measures to remove team problems and improve team performance.

Course Length: Approximately 2 hours

HBS 442
Time Management
This module will teach students effective time management—how to take control of their schedules and use their time wisely. Students will learn to analyze how they spend time and to prioritize tasks and avoid common time wasters. They also will be taught to identify which tasks are most critical to achieving their long-term goals; how to use scheduling tools for greater efficiency; and how to put their schedules into action, evaluating and modifying them along the way as needed.

Course Length: Approximately 2 hours

HBS 443
Virtual Teams
Learn how to form a virtual team, assess technology and communication needs, keep virtual projects on track, and ensure that virtual teams produce high-quality work. This module provides concrete suggestions for forming virtual teams, including assessing their technology and communication needs, structuring the team to build trust, and keeping the team on track.

Course Length: Approximately 2 hours

HBS 444
Writing Skills
Students will learn to put readers’ needs first to take the headache out of writing. Skillful writing can enhance respect, extend one’s influence, and help to accomplish business objectives. This module teaches students to create clearer, more effective written communication and includes specific guidelines for preparing memos, letters, emails, and other common business documents.

Course Length: Approximately 2 hours

STANDARD PROCUREMENT SYSTEM TRAINING

SPS 100
Standard Procurement System and Federal Procurement Data System—Next Generation System Administrator
This module contains information required to work at a system-administrator level with the Standard Procurement System (SPS) and Federal Procurement Data System—Next Generation (FPDS-NG) Integration. SPS is one of the first automated contract-writing systems to receive certification for integration with FPDS-NG v1.2. This module is designed primarily for SPS system administrators, and it will enable them to set up their sites, allow users to interact with FPDS-NG, and troubleshoot issues related to user and system access with FPDS-NG.

Course Length: Approximately 1 hour
SPS 101

Standard Procurement System and Federal Procurement Data System—Next Generation User

This module provides professionals with the information required to work with the Standard Procurement System (SPS) and Federal Procurement Data System—Next Generation (FPDS-NG) at the user level. SPS is one of the first automated contract-writing systems to receive certification for integration with FPDS-NG v1.2. This module teaches SPS users how SPS interfaces with FPDS-NG and about the various types of contract action reports that can be created in FPDS-NG through SPS.

Course Length: Approximately 2.5 hours

SPS 102

Contracts for Production

This module supports the daily functions of a contract professional. Consisting of 10 lessons, it focuses on the procurement process as it introduces the “basics” of PD³ Advisor and explains the specific components of the performance requirements process.

Course Length: Approximately 4 hours

SPS 103

SPS System Administration

This module is aimed at system administrators responsible for executing tasks related to configuring and maintaining an organization’s PD³ system. It begins by providing background on the general PD³ environment, and it shows students how to utilize the system’s extensive built-in help resources.

Course Length: Approximately 11 hours

SPS 104

Report Writing

This course is an online version of the existing instructor-led training currently offered by the Joint Program Management Office. The purpose of the conversion is to open the training to more procurement professionals than can be accommodated in the classroom setting, and it is a viable option for procurement professionals who cannot fit the classroom training into their busy schedules.

Course Length: Approximately 7 hours

SPS 105

Adapter Online Support Tool

This module was created to assist the user/learner in troubleshooting the most common problems the field encounters with the PD³ Adapter. This module will review attributes, characteristics, and architecture to provide the learner with a better understanding of how to utilize the PD³ Adapter.

Course Length: Approximately 2 hours

SPS 106

Database Maintenance

This module is an online version of the existing instructor-led training offered by the Joint Program Management Office. The purpose of this conversion is to provide a viable option for procurement professionals who cannot fit the classroom training into their busy schedules.

Course Length: Approximately 4 hours
Appendix E: Workshops

Visit http://catalog.dau.mil to request Workshop courses.
Appendix E Workshops

Generally, these are resident courses at DAU.

WS 001

**Service Acquisition Workshop (SAW)**

The SAW is a facilitated workshop built round a specific acquisition team for their acquisition. The workshop walks the complete team through the service acquisition process from beginning to end. A key focus is on assisting the team in developing their performance requirement using the Acquisition Requirements Roadmap Tool and their supporting business strategy. For the SAW to be effective, all key members of the acquisition team, program manager, contracting officer, and contracting officer’s representatives must attend the complete workshop. It should also be scheduled and conducted early in the acquisition process, before a requirement and acquisition strategy has been finalized.

**Course Length:** 4 classroom days

WS 002

**Acquisition Program Transition Workshop**

This workshop emphasizes better government and industry collaboration after contract award, and it is tailored to meet the specific needs of each program team.

**Course Length:** 3.5 classroom days
Appendix F:

Auditing

Visit [http://www.dcaa.mil/DCAA_Course_Catalog_13_All.pdf](http://www.dcaa.mil/DCAA_Course_Catalog_13_All.pdf) for more information on Auditing courses offered through the Defense Contract Audit Institute.
AUD 1113  
**Orientation to DCAA**

This course is the first in a series of self-study orientation courses. The series is designed to introduce new auditors to the Defense Contract Audit Agency (DCAA), government contract auditing, and federal procurement laws and regulations. This course provides an overview of DCAA and its role in the federal procurement process.

**Course Length:** About 5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

---

AUD 1121  
**Briefing Contracts**

Students will learn to apply the basic skills required to brief routine government contracts. As a result of this course, students will be able to (1) identify and interpret the various parts of Standard Form 26, which is used to award contracts; (2) understand the timing of contract briefings; (3) identify and understand the parts of a contract; and (4) be aware of the significance of special provisions included in the contract.

**Course Length:** About 3 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

---

AUD 1122  
**Accounting System Survey**

Students will learn to describe the basic skills required to perform an accounting system review. This course consists of a student guide with integrated video clips. The video clips simulate an auditor performing an accounting system review from the initial contact with the contractor through the exit conference. The course also discusses the purpose of the review, highlights key items to review during the audit, and provides guidance on completing the Standard Form 1408, Preaward Survey of Prospective Contractor Accounting System.

**Course Length:** About 4 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

---

AUD 1126  
**Adequacy of Proposals**

Students will learn to determine whether a contractor’s proposal is adequate based on the requirements of Federal Acquisition Regulation (FAR) 15.4. Upon completion of this course, students will be able to (1) perform an initial assessment of proposal adequacy before beginning audit field work; (2) determine the adequacy of the contractor’s supporting data for individual cost elements based on FAR 15.4 criteria; (3) describe the contractor’s and auditor’s responsibilities regarding an adequate proposal; (4) list the steps required when inadequacies are identified; and (5) describe requirements.

**Course Length:** About 10 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

---

AUD 1142  
**Progress Payments**

DCAA auditors make up the target audience. Students will be able to (1) discuss the advantages, risks, and sensitivities of contract financing; (2) identify the types of contract financing; (3) distinguish between the types of progress payments; (4) access the Central Contractor Registration (CCR) database; (5) describe the various functions of the progress payment team; (6) identify types of risk assessment; (7) discuss supervision of progress payments; (8) identify the Risk Assessment–Audit Planning Considerations; (9) evaluate the propriety of the information in the progress payment request; and (10) prepare an audit report in accordance with the *Contract Audit Manual* chapter 10-2 and 10-1200 requirements for progress payment evaluations.

**Course Length:** About 7.5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel
AUD 1150  
**Technical Indoctrination**

Newly hired auditors taking this course will learn the basic concepts, techniques, and procedures of contract auditing; the organizational structure of the Defense Contract Audit Agency; and audit guidance processes. Students need a basic proficiency in Microsoft Windows and Office applications.

**Course Length:** 10 classroom days  
**Method of Delivery:** Resident

AUD 1221  
**Basic Flowcharting**

Students will learn to define the basic principles of flowcharting techniques as they relate to systems and program flowcharts: flowchart symbols and techniques, systems and program flowcharting, the purposes and processes of flowcharting systems, and preparing flowcharts for various contractor systems.

**Course Length:** About 3.5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

AUD 1231  
**Intermediate Contract Auditing**

Staff auditors taking this course will obtain information needed to adequately plan and conduct a forward-pricing proposal audit. Class discussions, practical exercises, and group case studies are used to highlight problem areas and evaluate alternative courses of action.

**Course Length:** 5 classroom days  
**Method of Delivery:** Resident

AUD 1249  
**Agreed-Upon Procedures**

Students will learn how to determine the appropriate requirements for performing and reporting on Agreed-Upon Procedures (AUP) in compliance with Generally Accepted Government Auditing Standards (GAGAS), and agency policy.

**Course Length:** About 1 hour  
**Method of Delivery:** CD-ROM for non-DCAA personnel

AUD 1261  
**Scanning Guidance**

Students will learn how to identify what constitutes sufficient and appropriate audit evidence, Contract Audit Manual (CAM) guidance on evidence documentation, CAM guidance on scanning, and CAM guidance on controls over scanned documents.

**Course Length:** About 1 hour  
**Method of Delivery:** CD-ROM for non-DCAA personnel

AUD 1265  
**APPS Performance Support Module**

Defense Contract Audit Institute requires that all new auditors take this course and complete the final exam before attending AUD 1150, Technical Indoctrination. This course introduces new auditors to the APPS interface and APPS' working paper and reporting processes. The course also reviews significant Microsoft Office tools used in APPS to create, manage, and navigate APPS' electronic working-paper packages.

**Course Length:** About 2.5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

AUD 1269  
**Working Paper Documentation**

This course provides an overview of DCAA audit working-paper documentation requirements.

**Course Length:** About 3.5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel
### AUD 1271
**Permanent Files**

Here students will learn to identify the basic skills needed in order to create or upgrade permanent files. The course discusses the purpose and uses for the permanent file, methods for working with contractors to access records, the difference between a permanent file and a current file, and the electronic Permanent File (ECPF) System.

**Course Length:** About 3.5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

### AUD 1283
**Fraud Awareness**

This course offers an overview of the auditor’s responsibility for the consideration of fraud in DCAA’s audits and aims to heighten auditor awareness of the possibility of fraudulent activities.

**Course Length:** About 6.5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

### AUD 1440
**GAGAS**

The student will learn to identify and apply the requirements of Generally Accepted Government Auditing Standards (GAGAS). This course provides information necessary to perform an audit in accordance with these standards. Exercises, examples, and review questions are used to help reinforce the key points throughout each lesson.

**Course Length:** About 9 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

### AUD 1541
**Cost Accounting Standards**

This course is designed to provide the field auditor the ability to apply the Cost Accounting Standards Board (CASB) rules, regulations, and standards most often encountered, including CAS coverage, direct and indirect cost allocation, cost accounting practice changes, and cost impacts. Participants must be GS-11 and above with at least 2 years of DCAA service.

**Course Length:** 5 classroom days  
**Method of Delivery:** Resident

### AUD 1570
**CAS—Administration and Coverage**

Students will learn to recognize the provisions for administration of the Cost Accounting Standards (CAS) and the general requirements for CAS coverage. CAS administration topics include basic CAS definitions, comparisons of CAS with Federal Acquisition Regulation and Generally Accepted Accounting Procedures, format of the standards, and the contractor’s responsibilities under Public Law 91-379. CAS coverage topics include primary CAS exemption criteria, dollar thresholds for full and modified coverage, and effective and applicable dates.

**Course Length:** About 6 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

### AUD 1571
**CAS 401, 402, and 405**

Students will learn to identify the fundamental requirements of Cost Accounting Standard (CAS) 401—Consistency in Estimating, Accumulating, and Reporting Costs; CAS 402—Consistency in Allocating Costs Incurred for the Same Purpose; and CAS 405—Accounting for Unallowable Costs. This course provides information necessary to determine whether a contractor’s policies, procedures, and practices comply with these standards. Exercises, examples, and review questions are used to help reinforce the key points throughout each lesson.

**Course Length:** About 4.5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel
AUD 1572

**CAS 403, 410, 418, and 420**

Students will learn to identify the fundamental requirements of Cost Accounting Standard (CAS) 403—Allocation of Home Office Expenses to Segments; CAS 410—Allocation of Business Unit General and Administrative Expenses to Final Cost Objectives; CAS 418—Allocation of Direct and Indirect Costs; and CAS 420—Accounting for Independent Research and Development and Bid and Proposal Costs. Information is provided to determine whether a contractor’s policies, procedures, and practices comply with these standards. Exercises, examples, and review questions help reinforce the key points throughout each lesson.

**Course Length:** About 10 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

AUD 1573

**CAS 404 and 409**

This course teaches how to identify the fundamental requirements of Cost Accounting Standard (CAS) 404—Capitalization of Tangible Assets and CAS 409—Depreciation of Tangible Capital Assets. Information is provided for determining whether a contractor’s policies, procedures, and practices comply with these standards. Exercises, examples, and review questions are used to help reinforce the key points throughout each lesson.

**Course Length:** About 6.5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

AUD 1574

**CAS 414 and 417**

Students will learn to apply the concepts of Cost Accounting Standard (CAS) 414—Cost of Money as an Element of the Cost of Facilities Capital and CAS 417—Cost of Money as an Element of the Cost of Capital Assets Under Construction and to understand the Cost Accounting Standards Board—Facilities Capital Cost of Money. This course provides information necessary to determine whether a contractor’s policies, procedures, and practices comply with these standards. Exercises, examples, and review questions are used to help reinforce the key points throughout each lesson.

**Course Length:** About 6.5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

AUD 1575

**CAS 406**

Students will learn to identify the fundamental requirements of Cost Accounting Standard (CAS) 406, Cost Accounting Period. This course provides information necessary to determine whether a contractor’s policies, procedures, and practices comply with this standard. Exercises, examples, and review questions are used to help reinforce the key points throughout each lesson.

**Course Length:** About 5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

AUD 1576

**CAS 408 and 415**

Students will learn to identify the fundamental requirements of Cost Accounting Standard (CAS) 408, Accounting for Costs of Compensated Personal Absence, and CAS 415, Accounting for the Costs of Deferred Compensation. This course provides information necessary to determine whether a contractor’s policies, procedures, and practices comply with these standards. Exercises, examples, and review questions reinforce key points throughout each lesson.

**Course Length:** About 6.5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel
AUD 1577
CAS 407
This course teaches how to identify the fundamental requirements of Cost Accounting Standard (CAS) 407, Use of Standard Costs for Direct Material and Direct Labor. This course provides information necessary to determine whether a contractor's policies, procedures, and practices comply with this standard. Exercises, examples, and review questions are used to help reinforce key points throughout each lesson.

Course Length: About 3 hours
Method of Delivery: CD-ROM for non-DCAA personnel

AUD 1578
CAS 416
Students will learn to identify the fundamental requirements of Cost Accounting Standard (CAS) 416, Accounting for Insurance Costs. This course provides information necessary to determine whether a contractor's policies, procedures, and practices comply with this standard. Exercises, examples, and review questions are used to help reinforce the key points throughout each lesson.

Course Length: About 4 hours
Method of Delivery: CD-ROM for non-DCAA personnel

AUD 1579
CAS 411
This course teaches how to identify the fundamental requirements of Cost Accounting Standard (CAS) 411, Accounting for the Acquisition Cost of Material. This course provides information necessary to determine whether a contractor's policies, procedures, and practices comply with this standard. Exercises, examples, and review questions help reinforce the key points throughout each lesson.

Course Length: About 5 hours
Method of Delivery: CD-ROM for non-DCAA personnel

AUD 1580
CASB Disclosure Statements
Students will learn the basic knowledge and skills to audit Disclosure Statements and to fulfill the auditor’s continuous responsibilities. This course provides a foundation for working with contractor Cost Accounting Standards Board (CASB) Disclosure Statements, Form CASB DS-1. Topics include the purpose of the disclosure statement, requirements for disclosure of cost accounting practices, audits of disclosure statements, and the auditor’s continuing disclosure statement responsibilities.

Course Length: About 9 hours
Method of Delivery: CD-ROM for non-DCAA personnel

AUD 1601
FAR 31, Allowable and Unallowable Costs
This course covers selected cost principles in Federal Acquisition Regulation (FAR) 31.2. It teaches how to identify the types of contracts covered by the cost principles and how to define allowability, allocability, reasonableness, and total cost. Students also will learn which costs are always allowable or unallowable, and how to apply the applicable cost principles in audits of commercial activities. Specific costs covered are bonding, labor relations, maintenance and repair, manufacturing and production engineering, material, plant protection, service and warranty, transportation, other business expenses, bad debts, contributions or donations, entertainment, losses on other contracts, organization, goodwill, and alcoholic beverages.

Course Length: About 6.5 hours
Method of Delivery: CD-ROM for non-DCAA personnel

AUD 1602
Allowable Costs with Restrictions
(Non-Employee)
This course covers selected cost principles in Federal Acquisition Regulation (FAR) 31.2. Students will learn about allowable and unallowable costs, with restrictions on nonemployee-related costs. The course also shows how to use applicable cost principles in audits of commercial activi-
AUD 4035

Quantitative Methods Refresher

Students will learn to use the current quantitative methods (statistical sampling, regression analysis, and improvement curves) in contract audits. They will learn to discuss statistical and analytical terms and concepts; identify proper audit applications for statistical sampling, regression analysis, and improvement curve techniques; understand and use the Windows-based EZ-Quant applications for statistical sampling, regression analysis, and improvement curves; evaluate key QM measures and graphs associated with EZ-Quant output; suggest methods of improving EZ-Quant statistical results; and explain how QM results and graphs should be incorporated into the overall audit package and report.

Course Length: About 6.5 hours
Method of Delivery: CD-ROM for non-DCAA personnel

AUD 1603

Allowable Costs with Restrictions (Employee)

This course covers selected cost principles in Federal Acquisition Regulation (FAR) 31.2. Students will learn about restrictions on labor costs and when those costs are allowable and unallowable. The course also shows how to apply the applicable cost principles in audits of commercial activities. Specific costs covered in the course are compensation for personal services; employee morale, health, welfare, food service, and dormitory costs and credits; recruitment costs; training and educational costs; pensions; travel; and relocation.

Course Length: About 6.5 hours
Method of Delivery: CD-ROM for non-DCAA personnel

AUD 2311

Defective Pricing

Students will learn to develop and reinforce skills for planning and performing defective-pricing reviews. This course provides a description and explanation of the law and leads the student through a defective-pricing audit using integrated video clips.

Course Length: About 9.5 hours
Method of Delivery: CD-ROM for non-DCAA personnel

AUD 6115

Effective Report Writing

Students will learn how to write quality audit reports and explain the audit process by which they are generated. This course examines the audit process and relates the audit report to this process. The audit process includes communication (writing techniques), planning (audit program), working papers (conclusion/note), the audit report (purpose, attributes), and follow-up.

Course Length: 5 classroom days
Method of Delivery: Resident
AUD 6220

Auditor Interview and Interpersonal Reactions

This course teaches students how to improve communications with contractor, procurement, and DCAA personnel. Students will learn how to identify interpersonal challenges in the audit environment; develop a model of communication and discuss the various components; describe effective listening guidelines and barriers; recognize the difference between positive and negative manipulation; identify the four communication styles and discuss the characteristics of each style; identify a systematic approach for effective interviews; and identify expressed and wanted behavior with respect to inclusion, control, and affection. Students will demonstrate understanding of course concepts through role-playing exercises.

Course Length: 5 classroom days
Method of Delivery: Resident

AUD 6240

Oral Presentation Workshop

This course offers instruction in making informative and persuasive presentations. Students will be able to describe to an audience the assertions in their audit reports; effectively use common visual aids; employ bridging techniques when answering tough discussion questions; use techniques to decrease stage fright; and explain and apply professional nonverbal modes of communication.

Course Length: 5 classroom days
Method of Delivery: Resident

AUD 8414

DDI Leadership Skills

This course explores how communication and relationship skills tie into the Defense Contract Audit Agency’s (DCAA) Core Values of integrity, mutual respect, trust, excellence, accountability, and teamwork. The course also explores the DCAA leadership principles of exhibiting a positive attitude, being involved, communicating interactively, modeling professionalism, demonstrating ethical behavior, responding flexibly, acting decisively, and showing responsibility.

AUD 8564

Administration and Management of Audits for Supervisors

Students will learn to prepare a program plan; prepare and manage an operating plan; prepare reimbursable billings; use the Defense Contract Audit Agency Management Information System (DMIS) to set up an assignment; and document supervisory review, including initial and interim guidance and final review comments. They will use DMIS in disposition assignments, calculate audit statistics for incurred cost and forward pricing, and describe the Price Negotiation Memorandum follow-up process. Students will also learn to identify the critical reports available for managing the life cycle of audits.

Course Length: 5 classroom days
Method of Delivery: Resident

AUD 8565

Supervision

This course stresses the importance of employee development and active supervisory involvement in achieving the Defense Contract Audit Agency’s goal to deliver quality audits. It discusses a broad range of human resource topics.

Course Length: 5 classroom days
Method of Delivery: Resident

AUD 8611

EEO for Supervisors

Upon successful completion of this course, the student will be able to understand Equal Employment Opportunity (EEO) laws, the complaint process, and EEO-related issues commonly faced by supervisors. The student also will be able to
understand procedures and resources for providing reasonable accommodations and be able to define sexual harassment and understand the supervisor’s role in preventing it.

**Course Length:** About 1.5 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

**AUD 8655**

**Human Resources for Supervisors**

The student will learn to understand and comply with human resource policies and regulations. The course provides the supervisor with an understanding of the Merit System Principles, prohibited personnel practices, position classification, staffing and recruiting, employee development, performance management, disciplinary actions, leave, grievances, labor relations, employee records, emergencies, and quality of work life programs.

**Course Length:** About 4 hours  
**Method of Delivery:** CD-ROM for non-DCAA personnel

**AUD B4121**

**Statistical Sampling**

Statistical Sampling concentrates on the knowledge and skills necessary to perform statistical sampling in the contract audit environment.

**Course Length:** 5 classroom days  
**Method of Delivery:** Resident

**AUD S5651**

**Retrieving and Analyzing Electronic Data Using SAS**

Students will learn to retrieve and analyze electronic contractor data using Base SAS for Windows.

**Course Length:** 5 classroom days  
**Method of Delivery:** Resident
