Defense Acquisition University

DEVELOPING QUALIFIED ACQUISITION PROFESSIONALS

2012 Course Catalog
At DAU, we believe that providing high-quality training to the Defense Acquisition Workforce is the best way to make a positive contribution to the warfighter.
MISSION
Provide a global learning environment to develop qualified acquisition professionals who develop, deliver, and sustain effective and affordable warfighting capabilities

Impact excellence in acquisition through:
- Acquisition certification and leadership training
- Mission assistance to acquisition organizations and teams
- Online knowledge-sharing resources
- Continuous learning assets

VISION
Enable the Defense Acquisition Workforce to achieve the right acquisition outcomes

GOALS
Provide an integrated, interactive learning environment that helps Defense Acquisition Workforce members, teams, and organizations improve acquisition outcomes

Continuously improve our infrastructure and mission support processes to optimize use of resources

Support congressional and DoD acquisition improvement initiatives through thought leadership, applied research, and engagement with key acquisition organizations

Foster an environment that encourages continuous development, promotes diversity, and rewards achievement to enhance job satisfaction and performance

Proactively engage our customers and stakeholders to understand their mission requirements and develop responsive solutions to enhance performance

INTRODUCTION
p. 06  Message from the President
p. 08  What’s New in DAU and the Defense Acquisition Community
p. 10  Where to Find Information
The Defense Acquisition University offers a multitude of learning assets to the Defense Acquisition Workforce. Whether you work for one of the military departments or a Defense agency, the training needs of your entire career will be facilitated by DAU.

While we take pride in delivering quality, timely, and pertinent training in our classroom and online courses, we recognize that learning doesn’t stop there. Our online knowledge-sharing and continuous-learning products are available to you around the clock. We also offer mission assistance, consulting, and interactive team training targeted to your organization’s specific needs. This catalog provides details of many of these learning assets. Additional information is available at www.dau.mil.

DAU is accredited by the Council on Occupational Education, so you can be sure the training you receive and the University’s business practices meet stringent criteria approved by the U.S. Department of Education. DAU also is a member of the International Association for Continuing Education & Training, and as such is authorized to grant continuing education units. We take our mission very seriously and strive every day to create the right learning experience for you and your organization so you can effectively accomplish your mission.

In my first year as president of DAU, I have witnessed firsthand the University’s commitment to developing qualified acquisition professionals. To further that commitment, in 2012, we are embarking on a journey that will integrate workforce planning and recruiting, learning and development, compensation and performance management, and succession planning across all components. And, to strengthen the learning and development part of this, we are creating an on-the-job training approach that leads to demonstration of qualifications in the critical acquisition-related duties and tasks of a career path.

I am convinced that the changes brought about by these efforts will improve acquisition outcomes for our warfighters. As these efforts move forward, I pledge to continue providing you the most current and accessible training, both in our courses and in your workplace, throughout your career.

Katrina McFarland
President
Defense Acquisition University
Coming in 2012! A Comprehensive Student Information System

Student information systems (SIS) help higher education institutions manage administrative and academic functions on one seamless platform. Portico, an SIS for the Defense Acquisition Workforce, will provide secure, 24 hours a day, 7 days a week, online access to the information students need.

For everyone with a stake in the training of the acquisition workforce, Portico has the potential to foster stronger communications and greater productivity through the adoption of global best practices. These best practices are derived from the many educational institutions that use this common technology platform to drive their core processes. Portico’s timing could not be better, given the growing demands to provide more training and more career guidance with fewer resources.

The SIS will offer users a personalized training and career development toolkit. Students can organize their experience according to their own preferences and professional goals. Portico also will enable users to scan the course catalog, register for courses, understand certification requirements, download pre-coursework, and communicate with faculty all through one simple interface. Need guidance or have a question on wait list policy? Access a quick self-help guide. Time for a change? This future platform will serve as a guide to keep the student ahead of the game. Select a career path and the SIS will generate a training scenario with the list of remaining courses and requirements. No confusing steps, no dead ends, and it’s always open for business.
DAU Mobile Portal

DAU recently launched a mobile portal to provide students the ability to learn on the go, including access to performance support tools for use both in and out of the classroom.

A focus on functionality in the portal design means these tools are immediately accessible through virtually any Web-enabled device, from smart phones to tablets. Mobile users now have a single point of reference to access class schedules, regional location and contact information, and assistance with resident and nonresident courses, as needed. The portal also includes real-time updates of acquisition-related news and direct access to DAU social media and iTunesU.

Students can instantly utilize assets related to training and education, job support, and more. The portal is designed to facilitate direct education assistance for immediate job performance impact.

Continually evolving, portal expansion will be directly informed by student and workforce feedback. Interactive poll questions invite user input to guide technology development and enhance accessibility.

In addition to serving as a source for current news, tools, and training systems, the DAU Mobile Portal will actively guide development of future offerings designed to support performance and learning.
YOUR PRIMARY SOURCE FOR THE LATEST INFORMATION ON COURSES AND CERTIFICATION:

icatalog.dau.mil/

AMERICAN COUNCIL ON EDUCATION (ACE) INFORMATION

When you click on a course description in the iCatalog, you’ll go to a course concept card (information) that will provide ACE-recommended college credits. Alternatively, you can go to www.militaryguides.acenet.edu/CourseSearch.asp to find ACE information.

DAU EQUIVALENCY PROGRAM

Go to icatalog.dau.mil/appq.aspx for a complete listing of currently acceptable equivalencies (those acceptable for current training requirements) and former equivalencies.

DAU FULFILLMENT PROGRAM

DAU provides Defense Acquisition Workforce members the opportunity to complete course prerequisites and program core and functional training requirements through its Fulfillment Program. The program permits the assessment of a workforce member’s demonstrated competencies (capabilities acquired through previous training, education, and/or experience) against the learning outcomes/objectives of select DAU courses. Go to icatalog.dau.mil/DAUFulfillmentPgm.aspx for more information about the Fulfillment Program.
OUR WORK

The Defense Acquisition University (DAU) is the one institution that touches every member of the Defense Acquisition Workforce throughout all professional career stages. The university provides a full range of basic, intermediate, and advanced certification training; assignment-specific training; mission assistance; and job-relevant applied research. The university also fosters professional development through consulting efforts, rapid-deployment training on emerging acquisition initiatives, online knowledge-sharing tools, and continuous learning opportunities.

Since the university’s founding, it has expanded to five regional locations throughout the United States, allowing the university to provide local training to the Defense Acquisition Workforce—training at the point of need. DAU also has strategically partnered with academic institutions, professional organizations, corporations, and government agencies to provide professional development, equivalencies, academic credit toward degree programs, as well as certificates for DAU courses.

OUR ORGANIZATION

The university’s leaders are committed to ensuring DAU provides the best learning capabilities to those who use the university’s learning resources.

The DAU president is the chief executive officer of the university and directs the acquisition education, training, mission assistance, and research activities of the university. The DAU vice president is responsible for the operations and execution of the university’s mission.

The DAU chief of staff coordinates the university’s strategic planning process, human resources management, professional development, logistics, and other support services.

The Planning, Policy, and Leadership Support Office is responsible for strategic planning, accreditation, corporate communications and outreach, the strategic partnership program, enterprise performance management, and faculty policy.

The Performance and Resource Management Directorate is responsible for business oversight and financial management of DAU’s resources relating to its program and operations, including all resource aspects of DoD’s planning, programming, budgeting, and execution process.

The Learning Capabilities Integration Center is responsible for learning asset management.

OUR ACCREDITATION

The Defense Acquisition University is accredited by the Commission of the Council on Occupational Education.

DAU selected the Council on Occupational Education (COE) as its accrediting body because the standards and criteria established by COE correspond with the university’s training certification mission and the broader view of learning and development. DAU was first awarded accreditation in 2003 and was reaffirmed in 2008.

OUR HISTORY

The Defense Acquisition Workforce Improvement Act (DAWIA), Public Law 101-510, Title 10 U.S.C, of the Fiscal Year 1991 National Defense Authorization Act was enacted to improve the effectiveness of the personnel who manage and implement defense acquisition programs. The Act required the creation of the Defense Acquisition University, and, per DoD Directive 5000.57, the university was to provide for the professional educational development and training of the acquisition workforce and research and analysis of defense acquisition policy issues from an academic perspective.
DAU’s regional deans oversee the day-to-day functions of their respective area of responsibility, ensuring that the DAU regions properly support professional development and the DAU partnership/acquisition-related events in the area. The Defense Systems Management College provides executive-level and international acquisition management training, consulting, and research.

The Global Learning and Technology Center is responsible for the technology support of DAU distance learning products and services, continuous learning modules, and knowledge-sharing platforms.

The David D. Acker Library and Knowledge Repository supports university research by providing the latest virtual learning and research opportunities afforded by technology to DAU students and alumni. The library also has an extensive collection of books, periodicals, and other research materials available to patrons.

The Operations Support Group provides public affairs, protocol, administrative and logistical services, publications, academic support services, and information systems support to all of DAU.

The Human Capital Management Advisor provides guidance to the DAU president on how to evaluate, design, and deploy human capital resources and processes.

The Pentagon liaison serves as a link between DAU and all elements of DoD senior staff. The liaison establishes, monitors, and closes out action items from DoD.

Organizations Co-located with DAU:
The Director, AT&L Human Capital Initiatives, performs Defense Acquisition Workforce strategic analysis, and human capital planning for the Office of the Under Secretary of Defense for Acquisition, Technology and Logistics.

The Director, Acquisition Career Management (DACM), for the Defense Agencies (4th Estate), assists in managing the accession, training, education, and career development of the DoD components outside the military departments. The office also collaborates with the Service DACMs in matters relative to Defense Acquisition Workforce education, training, and career development.

The Federal Acquisition Institute (FAI), established in 1976 under the Office of Federal Procurement Policy Act, facilitates and promotes career development and strategic human capital management for the acquisition workforce. In conjunction with its partners, FAI seeks to ensure availability of exceptional training, provide compelling research, promote professionalism, and improve acquisition workforce management.

**OUR FACULTY AND STAFF**

DAU’s faculty members have extensive experience in acquisition as well as the ability to communicate their knowledge in the classroom, online, and in the workplace during consulting efforts. Faculty members are expert practitioners who can draw upon real-world experience to relate to students in the classroom and online, and develop training products that are directly applicable to the current challenges students face. Many faculty members join DAU following high-impact careers in the military, defense industry, and the civil service because they are seeking an opportunity to share their experiences, to truly make a difference in the lives of the members of the Defense Acquisition Workforce, and to support the vitally important mission of DoD.

DAU’s staff members provide the support necessary to keep the university running efficiently, including operating and maintaining the university’s automation networks, and providing audio, video, and telecommunications in support of classes and DAU/acquisition events. DAU’s staff also provides services such as public affairs, protocol, human resources, administrative and logistical services, publications management and graphic design, academic support services, and information systems support to all of DAU. The university’s staff is highly skilled at the support it provides the university, and is essential to ensuring each student receives a positive experience at DAU.
**Our Facilities**

DAU’s facilities reflect the university’s commitment to providing a comprehensive learning environment. The university’s capabilities include:

- 87 classrooms located throughout the university’s five regional sites
- More than 150 breakout rooms that can be used for small group discussions during classes
- More than 2,000 laptops available for classrooms to allow each student his or her own computer
- TelePresence sites, allowing professors to remotely connect to classes and students
- A 400-seat main conference center
- Numerous small conference rooms, seating 25-100 people

The university has seen an unprecedented growth in the number of acquisition students it serves, and in response, DAU has increased its number of classrooms and continues to grow. The university also has established a teaching and learning lab, which will allow professors to test out new technologies that will aid in the delivery of course materials.
DAU Board of Visitors

Since its inception as an academic institution, DAU has received guidance from the DAU Board of Visitors. The Board of Visitors consists of individuals selected for their preeminence in academia, business, and industry. The members advise the Under Secretary of Defense for Acquisition, Technology and Logistics and the DAU president on matters such as the university’s organizational management, curricula, methods of instruction, and facilities. All Board of Visitors members, past and present, have been invaluable to the foresight, planning, and progress of DAU as an institution.

The DAU West Region is the primary acquisition learning location for professionals located in the Pacific Rim. The headquarters of DAU West Region is strategically located in San Diego to support a large contingent of the Defense Acquisition Workforce. From an ideal location on the Pacific Rim, San Diego is the anchor for a region poised for success in an era of growing needs for acquisition learning. The region also has satellite locations in Colorado Springs, CO; Los Angeles, CA; Port Hueneme, CA; and Pearl Harbor, HI.

The region’s primary customers are Navy Region Southwest, the Space and Naval Warfare Center, Naval Base Ventura County, and Los Angeles Air Force Base.

DAU has numerous partnerships with colleges and organizations in the DAU West Region. A listing of all DAU partnerships can be found at www.dau.mil/aboutdau/pages/partnerships.aspx.

The DAU Midwest Region campus is located in Kettering, OH, just south of Wright-Patterson Air Force Base near the city of Dayton. There are three satellite campuses within the region, located in Columbus, OH; Rock Island, IL; and Sterling Heights, MI.

The DAU Midwest Region faculty and staff members focus on teaching, research, and mission assistance (targeted training, consulting, and partnering with agencies). Their agenda includes working with organizations within the region and staying current on major issues and needs of the Defense Acquisition Workforce.

Highly knowledgeable and experienced faculty members teach resident Defense Acquisition Workforce Improvement Act certification classes in various functional disciplines at the Kettering and satellite campuses; as needed at DAU regional campuses nationwide; and at customer sites across the United States and worldwide when required. The region’s faculty support distance learning courses taught over the Internet.

Responsible for mission assistance (consulting and other noncertification training) for the Defense Acquisition Workforce within the entire U.S. Midwest area, the DAU Midwest Region serves multiple Department of Defense and other federal organizations. DAU has numerous partnerships with colleges and organizations in the DAU Midwest Region. A listing of all DAU partnerships can be found at www.dau.mil/aboutdau/pages/partnerships.aspx.

With its headquarters in the dynamic community of Huntsville, AL, DAU South Region supports the goals and objectives of the Defense Acquisition Workforce by providing products and services to the acquisition community. The faculty and staff members of the DAU South Region provide teaching, research, and mission assistance (targeted training, consulting, and partnering with agencies). They focus on working with their customers and staying current on major issues and needs of the acquisition workforce throughout the region.

The South region opened a new facility of approximately 68,000 square feet and state-of-the-art equipment in Huntsville in 2010. DAU South can accommodate a diversity of student needs, providing classrooms furnished to enhance the overall learning experience and with extensive e-Learning capabilities. The building also offers a fitness center, convenient parking, and convenient access to nearby shopping, a wide variety of dining facilities, and hotel accommodations.

In addition to its Huntsville campus, DAU South has two satellite facilities to further meet the needs of its customers at Eglin Air Force Base, FL, and Robins Air Force Base, GA.

DAU has numerous partnerships with colleges and organizations in the DAU South Region. A listing of all DAU partnerships can be found at www.dau.mil/aboutdau/pages/partnerships.aspx.

DAU Mid-Atlantic Region is strategically located in the town of California, MD, just 7 minutes from nearby Patuxent River Naval Air Station. The California, MD, site offers a state-of-the-art training facility, located amidst a large and growing Defense Acquisition Workforce. The Mid-Atlantic Region also has three additional training site locations: Chester, VA; Norfolk, VA; and Kaiserslautern, Germany.

The Mid-Atlantic Region’s employees serve a Defense Acquisition Workforce of approximately 23,000 members.

In addition, the Mid-Atlantic Region has learning organization agreements with the Navy Test Pilot School and the Marine Aviation Detachment.

DAU has numerous partnerships with colleges and organizations in the DAU Mid-Atlantic Region. A listing of all DAU partnerships can be found at www.dau.mil/aboutdau/pages/partnerships.aspx.
Global Reach: California, Maryland
Have questions? Contact daumidatlantic@dau.mil
The DAU Capital and Northeast Region provides acquisition training and mission assistance services to customers both internationally and regionally. The regional area covers the states of Maine, Vermont, New Hampshire, Connecticut, Massachusetts, Rhode Island, New York, Pennsylvania, New Jersey, Delaware, most of Maryland (excluding the Patuxent River Naval Air Station), and in Virginia from the Richmond area north, including the National Capital area and the District of Columbia. Due to its location in the national capital area, the region has a multitude of key customers, including the Army, Navy, Air Force, Marines, and defense agencies along with numerous federal agencies.

The DAU Capital and Northeast Region campus is co-located with DAU Headquarters at Fort Belvoir, VA. The post provides a full array of services such as a commissary, a post exchange, library, a fitness facility, and other services. The DAU Capital and Northeast campus itself provides fitness facilities, a library, and a cafeteria. Student parking is conveniently located nearby. The area surrounding the post offers a wide variety of dining establishments and hotel accommodations.

DAU has numerous partnerships with colleges and organizations in the DAU Capital and Northeast Region. A listing of all DAU partnerships can be found at www.dau.mil/aboutdau/pages/partnerships.aspx.
GLOBAL REACH: FORT BELVOIR, VIRGINIA
HAVE QUESTIONS? CONTACT daucne@dau.mil
Co-located with DAU Headquarters at Fort Belvoir, VA, the Defense Systems Management College (DSMC) is chartered to provide executive-level, international acquisition management, and requirements management training, consulting, and research. DAU’s Leadership Learning Center of Excellence is an integral part of DSMC.

A core faculty of former DoD and industry program managers and other senior acquisition practitioners manage a dynamic curriculum and mentors course participants both during and after their DSMC residency. Executive-level courses are tailored to the responsibilities and needs of senior leaders in the DoD and other organizations. Requirements Management courses meet the congressionally mandated certification training for operational leaders who identify and establish warfighting capability needs for DoD. International offerings include courses and seminars that promote excellence in structuring, negotiating, and executing international programs. The Leadership Learning Center of Excellence provides a portfolio of leadership courses for Defense Acquisition Workforce leaders and manages DAU’s Executive Coaching program.
Global Reach: Fort Belvoir, Virginia

Chapter Two

p. 34  Performance Learning
p. 34  Training and Continuous Learning Courses
p. 34  Mission Assistance
p. 35  Knowledge Sharing
p. 39  Other Services
Performance Learning

Underlying the foundation of training and development are DAU’s basic services: training courses, knowledge sharing, continuous learning, and mission assistance. All these services, individually and in combination, support the workforce throughout a professional’s career, from entry level to senior leadership.

As the Defense Acquisition Workforce’s premier learning and development center, DAU aligns its certification training with the specific career field requirements as outlined by the various acquisition career field functional leaders. In addition, the university has taken innovative measures to ensure that learning and acquisition support are available beyond certification, creating a total learning environment for career-long solutions at the point of need. The overview that follows summarizes DAU’s numerous services.

Training and Continuous Learning Courses

DAU delivers training courses in support of the DAWIA requirements, allowing a member of the Defense Acquisition Workforce to be certified at Levels I, II, or III. The Directors, Acquisition Career Management (DACMs) for the Services and DoD agencies manage attendance at these courses. Normally, the DACMs give priority to Defense Acquisition Workforce members who are pursuing certification in an acquisition career field, but nonacquisition professionals can take courses as well. For updates to these course descriptions during the training year, consult the online version of the catalog at icatalog.dau.mil.

DAU also delivers online learning assets designed to help members of the Defense Acquisition Workforce continue to learn about vital acquisition topics for personal awareness. The DAU Continuous Learning Center (CLC) provides those continuous learning modules. Links to modules from the Air Force Institute of Technology (AFIT), the General Services Administration (GSA), and the Navy are also offered. Several easy-to-use online modules sponsored by Harvard ManageMentor 10 provide information on topics fundamental to managerial success. These topics range from running an effective meeting or managing a project to negotiating skills. Information on these opportunities is available at www.dau.mil/clc. DAU continually develops and adds new offerings to the CLC site. To see what’s new, check the CLC website frequently.

Mission Assistance

Through its mission assistance efforts, DAU provides rapidly delivered expert resources and learning assets to the Defense Acquisition Workforce, providing the right people and the right products and services at the right time in response to requests for support.

Consulting Services are offered by DAU in most functional areas. Seasoned faculty members from all disciplines and regions can consult with government acquisition organizations and integrated product teams on either a long- or a short-term basis. Faculty members have extensive acquisition program experience, education, and training to provide the right solutions at the right time to solve individual, field organization, and agency acquisition challenges. Consulting and facilitation services are offered in areas such as strategic planning, group consensus problem solving, and planning of all types.

DAU offers a Program Startup Workshop to facilitate better government and industry teaming after contract award on defense acquisition programs. The 3- to 5-day workshop is tailored to match the specific needs of each program and is conducted jointly with government and industry teams. Ideally held 2 to 4 weeks after contract award, the workshop provides training on essential startup activities and creates an environment of teamwork, communication, and trust.

DAU also offers Group Consensus Problem Solving to assist in group deliberation, collaborative decision-making, and teamwork of all types. As an integral part of those processes, teams use networked computers to share information, develop plans, examine alternatives, and address complex problems. The university’s facilitated decision-making services use ThinkTank electronic meeting software for strategic planning, problem solving, team building, brainstorming, and other facilitated interventions. ThinkTank and other facilitation services can be provided at all DAU campuses.

Rapid-Deployment Training is a capability that DAU established in response to the accelerated rate of change to acquisition policies, procedures, and best practices. By
quickly focusing attention on high-value initiatives, DAU is able to develop and deliver training to large numbers of the Defense Acquisition Workforce soon after an initiative is implemented and in parallel with changes to our formal courses. Rapid-deployment training can be provided via multiple available media, including live webcasts, recorded video-on-demand and podcasts, classroom training, continuous learning modules, and local sessions. Experienced facilitators can be scheduled within days of release of new initiatives that affect the Defense Acquisition Workforce.

**Targeted Training** workshops and mini-courses are developed by DAU to meet specific, targeted needs of DoD acquisition organizations and program offices. DAU faculty members continually meet with acquisition professionals and organizations to understand their requirements; faculty can then tailor existing learning assets, such as DAWIA core courses, to meet the learning needs of the professionals or organizations. See Appendix D for a list of targeted training courses currently available.

**Knowledge Sharing**

Knowledge sharing—achieved by the blending of people, processes, and information technology—improves organizational performance through increased efficiency, effectiveness, and innovation. Leveraging advanced portal and collaboration technologies, DAU supports Defense Acquisition Workforce members at their point of need for informal learning and job performance support. The workforce can take advantage of online resources and interactive venues that facilitate the sharing of
documented knowledge, experiences, and lessons learned among individuals and organizations. DAU’s primary components of knowledge sharing are the AT&L Knowledge Management System (AKMS)—composed of the Defense Acquisition Portal (DAP), the Acquisition Community Connection (ACC), the DoD Acquisition Best Practices Clearinghouse (BPCh), the DoD Acquisition Encyclopedia (ACQuipedia), and the ACQuire search and discovery system—as well as the David D. Acker Library and Knowledge Repository. Users can view short videos and get additional details on all elements of the AKMS at https://acc.dau.mil/at&lkm.

**Defense Acquisition Portal (DAP)**
The DAP is the central repository for acquisition policy and reference materials. The DAP focuses on “Big A” processes—describing all phases of the acquisition process, from requirements generation and budget development, through overall management of the acquisition process.

Utilizing the DAP, the acquisition professional can quickly access necessary information to accomplish specific tasks directly related to program and project support. The DAP is organized as a series of pages under tabbed labels, making it easy for the user to locate information. The DAP provides the Defense Acquisition Workforce with information on and links to:

- Better Buying Power Initiative Gateway
- Defense Acquisition Guidebook
- Web-Enabled Integrated Defense Acquisition, Technology, and Logistics Life Cycle Management Chart
- Ask A Professor (AAP) system
- Special topic and functional “Gateways”
- FAR, DFARS, and other FAR supplements
- Acquisition processes
- Defense acquisition policy and regulations
- Education and professional development
- Career management and DoD human capital initiatives
- Community areas
- Overview of industry’s role in DoD processes
- Glossaries and acronyms
- Software tools
- News, publications, and events
- Other AT&L websites
- Guidebooks, handbooks, and forms
- DAU media library
- Rapid-deployment training

The DAP is currently in the first phase of a five-phase evolutionary development project. Future enhancements include additional Web capabilities, MyDAP personalization capability, exportable and selectable Web parts and services, reduced sign-on and log-on for DAU- and Service-related portals, and additional RSS services for notification of new and amended content. Users can access the DAP at https://dap.dau.mil.

**Acquisition Community Connection (ACC)**
The ACC is an online forum that includes communities of practice and collaborative workspaces centered on acquisition-specific topics. ACC is available to the Defense Acquisition Workforce 24/7 to collaborate, share, and connect with one another in an online environment. Community members are able to interact and share lessons learned and experiences to support job performance, avoid the duplication of effort, and advance the connection of people and ideas.

Recent upgrades to the ACC include an improved RSS feed capability with user subscription feature, filter-based navigation of content that facilitates content discovery, a simplified user interface that encourages member interaction and engagement, and CAC login.

Communities play a central role in helping the workforce stay connected to expertise and in providing the tools, resources, and connections that help people improve performance. The ACC software serves as the backbone for performance learning tools, such as ACQuipedia at https://acquipedia.dau.mil, the Defense Acquisition Guidebook at https://dag.dau.mil, and the Program Managers e-Tool Kit at https://pmtoolkit.dau.mil. Users can access the ACC at https://acc.dau.mil.

**Best Practices Clearinghouse (BPCh)**
The DoD Acquisition Best Practices Clearinghouse (BPCh) is designed to help improve DoD’s systems acquisition processes by facilitating the selection and implementation of recommended or proven practices appropriate to the needs of individual acquisition programs in a variety of functional and special topic areas. BPCh users learn from practical results that may be applied in their environment. Users can access the BPCh at https://bpch.dau.mil.
ACQuipedia
ACQuipedia is an online encyclopedia of common defense acquisition topics and was developed as a collaborative project to create content around acquisition-related topics. ACQuipedia provides the Defense Acquisition Workforce with quick access to information in a succinct and digestible format. Article content aggregates the most relevant references and learning assets to focus users and quickly provide high-value content. Each topic is identified as an article, and each article contains a definition, a brief narrative that provides context, and links to the most pertinent policy, guidance, tools, practices, and training on the subject. ACQuipedia articles support the Web-enabled Integrated Defense Acquisition, Technology, and Logistics Life Cycle Management Chart, community of practice libraries, and course material as well as the PM e-Tool Kit and other performance learning tools. Users can access ACQuipedia at [https://acquipedia.dau.mil](https://acquipedia.dau.mil).

Program Managers e-Tool Kit
DAU has converted the popular Program Managers Tool Kit into a Web version that is easy to update with the latest information; and key text and diagrams link directly to cited policy, related communities of practice, and comprehensive ACQuipedia articles. Visitors to the e-Tool Kit will encounter a table of contents listing all information in the handbook, and clicking on a topic will send them directly to that page in the handbook. Table of contents topics are available in the left-hand menu, and clearly labeled navigation buttons allow users to view each individual page in the handbook. Users can access the Program Managers e-Tool Kit at [https://pmtoolkit.dau.mil](https://pmtoolkit.dau.mil).

ACQuire Enterprise Search
ACQuire is the enterprise search engine for DAU educational and knowledge content. It allows users to select the information source—DAP, ACC, AAP, BPCh, the Defense Acquisition Guidebook, the DAU Home page, DAU continuous and distance learning modules,
and ACQuipedia—and search for exact terms, phrases, multiple terms, acronyms, or numerical references. The recently improved ACQuire search engine has several features designed to enhance the user’s search and discovery experience. As the search query is entered, ACQuire will offer suggested searches pulled from the DAU taxonomy, recent search history, and controlled vocabulary.

Users seeking additional information also have the option of selecting from a variety of commercial search engines, which will automatically use the same search query terms. ACQuire still maintains the search-within-search feature, allowing the user to refine the results based on additional search criteria and discriminators. Finally, ACQuire integrates the search results with ACQuipedia for prepopulated and matched terms and queries. Users can access ACQuire at https://acquire.dau.mil.

iTunes University
The first corporate university to appear on Apple’s iTunes University, DAU provides users with access to videos on a variety of topics for all Defense Acquisition Workforce career fields, and the university continues to add new videos. All content is free to the public, but users must first have iTunes installed on their computers. Those who have an iTunes account with Apple also can subscribe to a particular career field or topic channel and have content delivered as soon as it becomes available. The videos can be accessed at https://deimos.apple.com/WebObjects/Core.woa/Browse/dau.mil or by opening iTunes, clicking on the iTunes Store link, clicking on the Universities & Colleges link, and looking for Defense Acquisition University. iTunesU Media can also be accessed via iTunes-enabled mobile devices such as the iPhone, iTouch, or iPad.

Library and Knowledge Repository
The David D. Acker Library and Knowledge Repository supports the university’s curricula and its defense acquisition research. Full borrowing privileges are available to current DAU students, and alumni may register for weekend borrowing privileges. The library participates in interlibrary loans through the Online Computer Library Center. The David D. Acker Library website, www.dau.mil/pubs cats/Pages/Acker%20Library.aspx, offers extensive online research capabilities for DAU students, including an online library catalog. The online catalog provides easy searches by author, title, subject terms, keywords, date, and format. If a publication is available on the Web, the online catalog will provide a link.

OTHER SERVICES

Strategic Partnerships
DAU has established strategic partnerships with universities and colleges so that Defense Acquisition Workforce members can transfer DAU coursework toward college and university degrees and certificates. While each partnership is unique in what it offers, the objective of the partnership program is to provide workforce members with opportunities to maximize academic accomplishments by receiving credit for DAU courses toward a graduate, undergraduate, or certificate program offered by a strategic partner.

For help in finding a program that suits individual needs, prospective students can visit the DAU Strategic Partnership page at the DAU website (www.dau.mil/aboutdau/pages/partnerships.aspx.) Here are listed various colleges and universities with which DAU has current partnership agreements. To view specific information on the various partnership benefits offered by each school, simply click the school’s name to be linked to a corresponding landing page. Landing pages will provide additional information on degree and certificate programs, including a point of contact at the school and application directions.

The Strategic Partnership page also contains a link to the Excelerate program. This is a unique partnership with schools that offer Defense Acquisition Workforce credit toward master’s degrees and certificates of achievement for Level II and Level III Defense Acquisition Workforce Improvement Act (DAVIA) certification. For a current list of partners participating in the Excelerate program, go to www.dau.mil/aboutdau/aboutdocs/excelerate.aspx.

Equivalency Program
DAU has partnered with other education and training providers that offer or desire to offer courses, programs of instruction, or assessment processes that are substantially similar to the learning outcomes addressed in specific DAU courses. Equivalency courses can be used in lieu of a DAU course when seeking certification in an acquisition career field.

For current and potential providers of equivalency courses, go to www.dau.mil/studentinfo/learning/appg.aspx.
Senior Service College Fellowship
The Senior Service College Fellowship (SSCF) program at DAU conducts offerings in Huntsville, AL; Warren, MI; and Aberdeen Proving Ground, MD. This 10-month, in-resident leadership education program is a partnership between the Army and DAU designed to provide senior-level civilians equivalent training to their military counterparts in preparation for senior-level leadership responsibilities.

Target Attendees: Civilians at the GS-14 or 15 level (or equivalent pay band) in all acquisition career fields who are members of the Army Acquisition Corps and seek to develop and apply leadership skills and competencies.

Prerequisite(s): Level III certification in primary acquisition career field; commander’s letter of endorsement.

Participants in this program are selected by a central selection board convened annually by the Army Acquisition Corps in Washington, DC.

Upon completion of the program, participants will receive credit for SSCF attendance and credit for the Program Manager’s Course (PMT 401). This program also offers the opportunity to secure a master’s degree in leadership.

The program contains the following core areas: leadership, mentoring and research. National speakers, university courses, national security module, PMT 401, tours, and a number of DAU classes related to leadership are offered. The SSCF program assistance is funded by each fellow’s sending command. The program is intense and provides time to think and reflect without the distractions of the typical government workplace.

Center for Defense Acquisition Research
The DAU Center for Defense Acquisition Research supports the Defense Acquisition, Technology and Logistics (AT&L) community by focusing research on the acquisition of defense-related materiel and services. The Center helps bring analytical research and insight to bear on critical issues that affect policies, processes, and the workforce. These issues have been identified by the leaders of the entire AT&L community, across government, industry, and academia. The Center coordinates investigations performed by a wide range of researchers: DAU faculty, staff, and students; Federally Funded Research and Development Centers (FFRDCs); think tanks; academia; and members of the wider acquisition community, in both government and industry, whether in the United States or abroad.

Learn more about research products and join in research discussions in the Acquisition Research Community of Practice at https://acc.dau.mil/research or contact research@dau.mil.

Periodicals
In an effort to maximize resources, the Defense AT&L magazine and the Defense Acquisition Research Journal (ARJ) are now available to individual subscribers online only.

For the latest issue of Defense AT&L or to obtain a free subscription to Defense AT&L magazine and/or the Defense Acquisition Review Journal, go to www.dau.mil/pubscats/Pages/DefenseAtl.aspx. For the latest issue of Defense ARJ, go to www.dau.mil/pubscats/Pages/ARJ.aspx.

To be alerted by e-mail when the new issue of either publication is available, sign up for the DAU LISTSERV by sending an e-mail to darjonline@dau.mil and/or datlonline@dau.mil with “Add to LISTSERVE” in the subject line.

Publications

DAU students and government employees can obtain a free single copy of most publications from the DAU Publications Distribution Center in Bldg. 231, Room 9, at Fort Belvoir. Printed copies of the Defense AT&L and Defense ARJ are available on a limited basis while supplies last.

To receive a free copy by mail, send a request to DAU, ATTN: Publications, 9820 Belvoir Road, Suite 3, Fort Belvoir, VA 22060-5565; call 703-805-4923; or fax requests to 703-805-3726. Those who do not qualify for a free single copy from the DAU Press or who need multiple copies may buy copies directly from the DAU Publications Distribution Center by using an Inter-Agency/Military Interdepartmental Purchase Request or by writing a check payable to the U.S. Treasury.
The certification standards published in this Catalog are in effect as of Sep. 1, 2010. Updates are posted in the DAU iCatalog at www.icatalog.dau.mil as they occur. Check the iCatalog for current information on certification standards and courses.
Overview

The functional leaders are senior leaders who specialize in a functional area of acquisition, technology, and logistics. Requirements for career fields may change as a result of new technologies, mission requirements, or servicemember needs, and it is the job of the functional leaders to ensure that their respective career fields maintain relevancy. Functional leaders are involved in chairing integrated product teams to address career development issues and to identify training, education, and experience requirements.

The results from the integrated product teams help provide course relevance and direction of course content to curricula developers and course authors, as well as a rigorous, ongoing quality assessment of DAU course offerings.

An overview of each functional leader’s area of responsibility as well as the certification and core plus table for the functional area are provided on the following pages.
Acquisition and Program Management Functional Community

Acquisition professionals in the Program Management career field are concerned with all of the functions of a program management office (PMO) or a program executive office (PEO). Program management professionals serve in a wide range of PMO and PEO positions, including program integrators and analysts, program managers, PEOs, and their deputies. They may also serve in a number of support and management positions throughout the workforce. The fundamental responsibilities of the program manager are to balance the many factors that influence cost, schedule, and performance; to interpret and tailor application of the DoD 5000 Series regulations; and to ensure that high-quality, affordable, supportable, and effective defense systems are delivered to the warfighter as quickly as possible.

International Acquisition Functional Community

International Acquisition is a new career path created by the Under Secretary of Defense for Acquisition, Technology and Logistics. Initial execution of the career path began in fiscal year 2009, aligning it with the Program Management career field. The initial alignment with Level III program managers expanded to include Level II program managers in fiscal year 2011. International Acquisition establishes a formal career path within the overall Program Management career field. Formalizing the career path systematically with the personnel systems enables two important actions. First, specific manpower billets can be coded as international program management positions requiring individuals possessing both core and international acquisition qualifications to fill the respective positions. Second, the existing personnel management infrastructure will record each Defense Acquisition Workforce member’s achievement toward this special qualification. This information ultimately will provide visibility to members of senior management, enabling them to identify and select internationally qualified persons to lead international programs.
## Program Management Level I

### Type of Assignment | Representative Activities
---|---
+ Weapon Systems | • Participates in an Integrated Product Team (IPT) delivering a weapon system, Command and Control (C2)/network-centric system, or space system  
| | • Performs financial and status reporting, and basic logistics activities  
| | • Supports pre-award contract activities and workload planning and scheduling
+ Services | Assists in acquisition planning, assessing risk (technical, cost, and schedule), and contract tracking and performance evaluation
+ Business Management Systems/IT | Participates in a business process IPT, fundamentals of enterprise integration, and outcome-based performance measures
+ International Acquisition | Participates in a variety of international-related programs/tasks, either cooperative or security assistance in nature

### Core Certification Standards
1. **Required for DAWIA Certification**

+ Acquisition Training | ACQ 101 Fundamentals of Systems Acquisition Management
+ Functional Training | • SYS 101 Fundamentals of Systems Planning, Research, Development, and Engineering  
| | • CLB 007 Cost Analysis  
| | • CLB 016 Introduction to Earned Value Management
+ Education | Formal education not required for certification
+ Experience | 1 year of acquisition experience

### Core Plus Development Guide
2. **Desired training, education, and experience**

### Education:
Baccalaureate degree, preferably with a major in engineering, systems management, or business administration

### Experience:
1 year of acquisition experience (in addition to core certification experience)

1. The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.
2. When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

### Notes:
- “R” following a course title indicates the course is delivered as resident-based instruction.
- Some continuous learning (CL) modules have been created by extracting lessons in their entirety from a training course. If this is the case for the CL module(s) identified in the above core certification standards, the course the CL module was extracted from is identified in the “Notes” section of the CL course description and the course can be substituted to meet the certification standard.
### Program Management Level II

#### Type of Assignment | Representative Activities
--- | ---
+ Weapon Systems | • Structures and guides systems engineering activities  
• Establishes a risk/opportunity program; structures and conducts technical reviews  
• Works with contracting personnel  
• Maintains configuration control  
• Leads IPTs in support of developing and delivering a weapon system, C2 network-centric system, or space system

+ Services | • Structures and guides systems engineering activities  
• Establishes a risk/opportunity program; structures and conducts technical reviews  
• Performs most acquisition planning tasks as established in Attachment 1 to AT&L Services Memo of Oct. 2, 2006

+ Business Management Systems/IT | Leads IPTs, identifies and manages enterprise-level business systems and issues, and applies performance measures within the acquisition community and program office context that directly impact systems under development

+ International Acquisition | Participates in successful cooperative development, production partnership, or system modification/transfer during pre-system acquisition or system acquisition with allied and friendly nations, either cooperative or security assistance in nature

### Core Certification Standards

**Required for DAWIA Certification**

+ Acquisition Training |
  - ACQ 201A Intermediate Systems Acquisition, Part A  
  - ACQ 201B Intermediate Systems Acquisition, Part B (R)

+ Functional Training |
  - PMT 251 Program Management Tools Course, Part I  
  - PMT 257 Program Management Tools Course, Part II  
  - CON 110 Mission-Support Planning and either of the following completed on or after Nov. 15, 2005:  
    — SAM 101 Basic Software Acquisition Management  
    — IRM 101 Basic Information Systems Acquisition  
  — CON 115 To replace CON 110 Oct. 1, 2011 (to be deployed)

+ Education | Formal education not required for certification

+ Experience | 2 years of acquisition experience; at least 1 year of this experience must be in program management

### Unique Position Training Standards

| International Acquisition | PMT 202 Multinational Program Management (R)  
| PMT 203 International Security and Technology Transfer/Control (R) |

4. When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

NOTE: “(R)” following a course title indicates the course is delivered as resident-based instruction.
Persons in this career field perform contract auditing, accounting, and financial advisory services to DoD and other government agencies in negotiation, administration, and settlement of contracts and subcontracts. Duties include evaluating information about contractor economic assertions, comparing those assertions to established criteria, and reporting the results to interested third parties.

Some reasons for audits include proposal submissions, incurred cost, compliance with the Truth in Negotiations Act, compliance with cost accounting standards, contract terminations, claims for abnormal conditions, contractor financial condition, and contractor systems and operations.

- “(R)” following a course title indicates the course is delivered as resident-based instruction.
These career fields encompass all aspects of business and financial management. They include cost estimating and analysis, financial planning, formulating financial programs and budgets, budget analysis and execution, and earned value management. As advisors to commanders, program executive officers, program managers, and other acquisition decision makers, members of these career fields are responsible for business–financial management of defense acquisition programs in direct support of the defense acquisition process.

**Business—Cost Estimating**
This area is the area of Business where engineering judgment and experience are utilized in the application of scientific principles and techniques to the problems of cost estimation, cost control and profitability. The key objectives in cost estimating are to arrive at accurate estimates and avoid cost overruns. This functional community covers positions that manage, supervise, lead, or perform scientific work that involves designing, developing, and adapting mathematical, statistical, econometric, and other scientific methods and techniques. The work also involves analyzing management problems and providing advice and insight about the probable effects of alternative solutions to these problems.

**Business—Financial Management**
This area is defined as the area of Business concerned primarily with the total financial affairs of an organization, department, or program and the translation of actions past, present, and proposed into meaningful and relevant information for use in management. It includes the functions of budgeting, accounting, reporting, and the analysis and interpretation of the financial significance of past events and future plans. It sometimes also includes other related functions such as internal auditing, management analysis, and others. It is not primarily concerned with the technical procedures and methodology of those individual functions.

Financial management involves the art of interrelating data to obtain a perspective of the total financial situation that will assist managers in program planning and decision-making. A very simple operating program may require only a minimum of financial management, and this, in some cases, can be provided by the manager. Complex programs need broad financial advice and know-how and this can only be furnished following the synthesizing, analyzing, and interrelating of meaningful financial data with programming and planning information by an organization and officials particularly adept in financial matters.

### Financial Management Level I

#### Type of Assignment | Representative Activities
---|---
+ Budget/Program FM Analyst | • Applies basic concepts of budget and program principles, policies, procedures, concepts, standards, terminology, and a general knowledge of the financial management and business operation systems  
  • Possesses a basic knowledge of acquisition; recognizes the life-cycle process of an acquisition program  
  • Reviews, allocates, or manages acquisition resources and programs
+ EVM Analyst | Relates earned value management to acquisition and financial management associated processes, identifies DoD and DFARS earned value contractual requirements, calculates simple EVM metrics from EVM data

#### Core Certification Standards
(Required for DAWIA certification)

| Acquisition Training | ACQ 101 Fundamentals of Systems Acquisition Management
| Functional Training | BCF 102 Fundamentals of Earned Value Management  
  BCF 103 Fundamentals of Business Financial Management  
  BCF 106 Fundamentals of Cost Analysis
| Education | Formal education not required for certification
| Experience | 2 years of acquisition experience in budgeting, financial and/or earned value management

# Financial Management Level III

<table>
<thead>
<tr>
<th>Type of Assignment</th>
<th>Representative Activities</th>
</tr>
</thead>
</table>
| + Budget/Program FM Analyst | • Manages development and evaluation of budget and program improvement plans and resolves complex issues, identifies options, and negotiates with internal and external stakeholders for implementation  
• Advises senior management on fiscal aspects of program management, ensures fiscal integrity, supports integration of acquisition disciplines  
• Manages all aspects of the business financial management process for defense acquisition programs  
• Reviews, allocates, or manages acquisition resources and programs |
| + EVM Analyst | • Plans and manages the IBR process as program manager’s principal earned value advisor  
• Leads EVMS validation reviews as review director or principal deputy  
• Analyzes and applies EVM data to determine root causes of existing cost and schedule problems, to forecast potential cost and schedule problems, and to forecast final project costs |

## Core Certification Standards

1. **Required for DAU1A Certification**

### Acquisition Training
- Acquisition Training identified at Level II must have been completed

### Functional Training
- Functional Training identified at Level II must have been completed
- CLM 013 Work-Breakdown Structure
- CLM 031 Improved Statement of Work

### Education
- Formal education not required for certification

### Experience
- 6 years of acquisition experience in Budgeting, Financial and/or Earned Value Management

## Core Plus Development Guide

2. **Desired Training, Education, and Experience**

Contracting, Purchasing, and Industrial/Contract Property Management Functional Communities

Contracting
Contracting specialists create effective, efficient, and proper business arrangements, have a strategic focus on acquisition, and leverage DoD spending to use taxpayers’ money prudently based upon customers’ needs. The Contracting career field includes the positions of contract negotiator, contract specialist, contract administrator, contract termination specialist, contract price and/or cost analyst, procuring contracting officer, administrative contracting officer, termination contracting officer, small business specialist, and procurement analyst. These individuals develop, manage, supervise, or perform procedures involving the procurement of supplies and services (including construction and research and development); acquisition planning; cost and price analysis; solicitation packages; competitive source selections; preparation, negotiation, and award of contracts through sealed bidding or negotiation procedures; all phases of contract administration; and termination or closeout of contracts. Individuals are required to have knowledge of the legislation, policies, regulations, and methods used in contracting, as well as knowledge of business and industry practices, sources of supply, cost factors, cost and price analysis techniques, negotiation techniques, and general requirements characteristics.

Total Workforce Size: 30,366

Purchasing
Individuals in the Purchasing career field are typically purchasing agents or supervisory purchasing agents. This function requires the individuals to purchase, rent, or lease supplies, services, and equipment through either simplified acquisition procedures or placement of orders against pre-established contractual instruments to support operational requirements. It requires knowledge of legislation, policies, and regulations pertaining to these methods of acquisition, as well as knowledge of commercial supply sources and of common business practices for roles, prices, discounts, deliveries, stocks, and shipments.

Total Workforce Size: 1,296

Industrial/Contract Property Management
The Property career field includes the industrial property management specialist and industrial property clearance specialist, which includes the property administrator and plant clearance officer. It can also include contract and industrial specialists, if assigned contract property management responsibilities. Individuals in this career field oversee and manage life cycle processes for government-owned property being utilized by contractors; provide advice and assistance on property-related matters during the acquisition planning, contract formation, and contract management; review contractor’s purchasing system as it pertains to property; audit the contractor’s property management system; coordinate and process contract property disposal actions; perform investigations of instances of loss, theft, damage, or destruction of government property and grant relief or recommend liability; and develop policies and procedures for government property management.

Total Workforce Size: 501
## Contracting Level I

### Type of Assignment | Representative Activities
--- | ---
+ 1 Operational Contracting | Contracting functions in support of post, camp, station, or base
+ 2 Research and Development | Contracting functions in support of research and development
+ 3 Systems Acquisition | Contracting functions in support of systems acquisition to including all ACAT programs
+ 4 Logistics and Sustainment | Contracting functions performed by the Defense Logistics Agency or by other offices to sustain weapon systems
+ 5 Construction/A&E | Contracting functions in support of construction and/or architect and engineering services
+ 6 Contingency/Combat Operations | Contracting functions performed in a contingency or combat environment
+ 7 Contract Administration Office | Contracting functions primarily focused on contract administration
+ 8 Contract Cost/Price Analyst | Contracting functions primarily focused on advanced cost/price analysis
+ 9 Small Business Specialist | Contracting functions primarily focused on advising small businesses or on strategies for maximizing use of small businesses
+ 10 Other | Contracting functions that perform a variety of assignments or are at a headquarters, secretariat, or OSD

### Core Certification Standards1 (Required for DAWIA certification)

**Acquisition Training**

None Required

**Functional Training**

- **CON 090** Federal Acquisition Regulation (FAR) Fundamentals (R)
  Personnel who were serving in a Contracting-coded position on Sept. 30, 2010, are exempt from CON 090 through Sept. 30, 2012.
- **CON 100** Shaping Smart Business Arrangements
- **CON 115** Contracting Fundamentals
- **CON 170** Fundamental of Cost and Price Analysis
- **CLC 033** Contract Format and Structure for DoD eBusiness Environment

**Education**2

- At least 24 semester hours in accounting, law, business, finance, contracts, purchasing, economics, industrial management, marketing, quantitative methods, or organization and management
- Baccalaureate degree (any field of study)

**Experience**

1 year of contracting experience

### Unique Position Training Standards3

+ Level I Contracting personnel assigned to support an MDAP/MAIS program

**ACQ 101** Fundamentals of Systems Acquisition Management

### Core Plus Development Guide4 (Desired training, education, and experience)

**Type of Assignment** | All
--- | ---

**Training**

See Contracting Matrix on the following page

**EDUCATION:** None specified

**EXPERIENCE:** None specified

---

1 The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.

2 See 10 U.S.C. 1724 (provides for limited exceptions).

3 Workforce members assigned to the position(s) listed in the Unique Position Training Standards section should meet the training standard(s) identified within 1 year of assignment.

4 When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

**NOTES:**

- “(R)” following a course title indicates the course is delivered as resident-based instruction.
- Some continuous learning (CL) modules have been created by extracting lessons in their entirety from a training course. If this is the case for the CL module(s) identified in the above core certification standards, the course the CL module was extracted from is identified in the “Notes” section of the CL course description and the course can be substituted to meet the certification standard.

### Core Certification Standards

1. **Acquisition Training**
   - **ACQ 201A** Intermediate Systems Acquisition, Part A

2. **Functional Training**
   - **CON 360** Contracting for Decision Makers (R)
   - 1 additional course from the Harvard Business Management Modules
   - 1 additional course from the list below:
     - **ACQ 265** Mission-Focused Services Acquisition (R)
     - **ACQ 370** Acquisition Law (R)
     - **CON 232** Overhead Management of Defense Contracts (R)
     - **CON 334** Advanced Contingency Contracting Officer’s Course (R)
     - **CON 235** Advanced Contract Pricing (R)
     - **CON 244** Construction Contracting (R)
     - **CON 250** Fundamentals of Cost Accounting Standards—Part I (R)

3. **Education**
   - At least 24 semester hours in accounting, law, business, finance, contracts, purchasing, economics, industrial management, marketing, quantitative methods, or organization and management
   - Baccalaureate degree (any field of study)

4. **Experience**
   - 4 years of contracting experience

### Unique Position Training Standards

- Level III Contracting personnel assigned to or devoting at least 50 percent of their time in support of an MDAP/MAIS program
- **ACQ 201B** Intermediate Systems Acquisition, Part B (R)

**EDUCATION:** Master’s degree in business administration or procurement

**EXPERIENCE:** 4 additional years of contracting experience

---

1. The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.
2. See 10 U.S.C. 774 (provides for limited exceptions).
3. Workforce members assigned to the position(s) identified in the Unique Position Training Standards section should meet the training standard(s) identified within 6 months of assignment.
4. When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

**NOTES:**
- "(R)" following a course title indicates the course is delivered as resident-based instruction.
- Some continuous learning (CL) modules have been created by extracting lessons in their entirety from a training course. If this is the case for the CL module(s) identified in the above core certification standards, the course the CL module was extracted from is identified in the “Notes” section of the CL course description and the course can be substituted to meet the certification standard.

### Education:

- 32 semester hours of undergraduate work with emphasis in business.

### Experience:

- None specified

---

1 Level II is the highest certification level for this career field.
2 The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level. To attain certification at Level II, workforce members must also possess a Level I certification in Purchasing.
3 When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

NOTES:

- "(R)" following a course title indicates the course is delivered as resident-based instruction.
- Some continuous learning (CL) modules have been created by extracting lessons in their entirety from a training course. If this is the case for the CL module(s) identified in the above core certification standards, the course the CL module was extracted from is identified in the "Notes" section of the CL course description and the course can be substituted to meet the certification standard.
Note: The Systems Planning, Research, Development, and Engineering functional community covers three career paths: Systems Engineering, Program Systems Engineer, and Science and Technology Manager. The Systems Engineering and the Program Systems Engineer career paths fall under the Engineering and Technical Management functional leader. The Science and Technology Manager career path is overseen by a different functional leader.

As the functional lead for the Technical Management career fields—which include Production, Quality, and Manufacturing (PQM); Systems Planning, Research, Development, and Engineering—Systems Engineer (SPRDE-SE); and Systems Planning, Research, Development, and Engineering—Program Systems Engineer (SPRDE-PSE)—I want to take this opportunity to emphasize our focus on acquisition excellence. Our goal is to position the Defense Acquisition Workforce for success in the future by ensuring that we have the right mix of skills and capabilities in the workforce, focusing on technical excellence, and providing consistent and integrated policy and guidance to the technical management community.

In collaboration with DAU, the Services, and components, we have put in place an infrastructure that appropriately connects certification levels to position requirements to support an agile workforce.

Production, Quality, and Manufacturing (PQM)
The PQM career field plays a vital role in ensuring that DoD products are delivered on time, perform as expected whenever they are needed, and are cost effective. In order to accomplish this, PQM engineers and quality assurance professionals must be deeply and actively involved with critical defense programs throughout the acquisition life cycle.

The PQM curriculum has been updated to reflect that consideration of production readiness should no longer wait until the end of the development process. Producibility should be systematically examined throughout the development process as an integral part of the systems engineering technical reviews so manufacturing cost drivers can be eliminated in the early stages of system development.

PQM courses are designed to produce quality professionals who can advise and collaborate with customers and suppliers to help them integrate quality practices into their manufacturing processes. Acquisition professionals capable of creating this type of partnership achieve a better understanding of the customer’s business needs and are crucial to successful performance with a competitive edge.

We are dedicated to providing more learning assets at the point of need, which is critical to the success of our Defense Acquisition Workforce recruiting, development, and retention strategies.

Total Workforce Size: 9,622

Systems Planning, Research, Development, and Engineering—Systems Engineer (SPRDE-SE) and Program Systems Engineer (SPRDE-PSE)
The overall curricula for the SPRDE-SE and PSE career paths were designed to bring an enhanced depth of knowledge to the workforce at the appropriate level: entry, journeyman, or advanced. These curricula focus on the technical processes, technical management processes, integrated product team activities, and the ability to apply critical systems thinking concepts to complex technical management problems. The specific duties and qualifications of a SPRDE-SE or PSE workforce member may vary significantly, and a wide variety of engineering disciplines are represented within the SPRDE-SE and PSE career paths.
A primary goal of the new SPRDE-PSE career path is to facilitate development of a select cadre of more experienced systems engineers who possess cross-disciplinary technical skills grounded in broad-based training. These skills and training will better prepare them for critical senior leadership positions such as lead or chief systems engineer. The experience standards established for the SPRDE-PSE career path certification have been significantly increased, and the training standards have been expanded to include a variety of technical courses in addition to the core functional systems engineering courses. Effective implementation of the SPRDE-PSE career path will provide greater clarity and improved focus for the critical systems engineering talent within the technical management workforce.

**SPRDE-SE**

**Total Workforce Size: 39,311**

**SPRDE-PSE**

**Total Workforce Size: 406**
### Production, Quality, and Manufacturing Level I

### Education:
Baccalaureate degree in engineering, chemistry, physical science, mathematics, statistics, manufacturing or production management, industrial technology or management, business, quality assurance, or a related field

### Experience:
At least one 30-day rotational assignment at a contractor and/or government industrial facility that includes experience in quality, manufacturing, engineering, and contracting. Two (2) years experience in manufacturing, production, or quality assurance (in addition to core certification experience)

### Notes:
- “(R)” following a course title indicates the course is delivered as resident-based instruction.
- Some continuous learning (CL) modules have been created by extracting lessons in their entirety from a training course. If this is the case for the CL module(s) identified in the above core certification standards, the course the CL module was extracted from is identified in the “Notes” section of the CL course description and the course can be substituted to meet the certification standard.

1 The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.

2 When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.
### PRODUCTION, QUALITY, AND MANUFACTURING  LEVEL III

<table>
<thead>
<tr>
<th>Type of Assignment</th>
<th>Representative Activities</th>
</tr>
</thead>
</table>
| + Quality Assurance Engineer       | • Builds quality characteristics (i.e., performance, cost, durability, safety, ease of use, reliability, maintainability, availability, ease of disposal, simplicity of design, and configuration management) into the designs of the products and services  
• Ensures consistency of requirements as they flow down to the component level  
• Manages transition through various life-cycle phases  
• Influences continuous process-improvement activities |
| + Quality Assurance Specialist     | • Ensures the appropriate quality characteristics have been integrated into the product  
• Monitors the products and services through life cycle and the supply chain  
• Validates/verifies adherence to specified requirements through test and measurement activities  
• Manages/leads quality-assurance activities |
| + Manufacturing/Production Engineer | • Participates in manufacturing planning  
• Builds producibility in designs (tooling, facilities, and products)  
• Evaluates production capability and capacity of manufacturing processes  
• Influences continuous process improvement activities and the design process |
| + Manufacturing/Production Specialist | • Performs production surveillance  
• Monitors schedule and delivery processes  
• Manages/leads manufacturing/production readiness reviews  
• Manages/leads manufacturing/production processes and resources |

Facilities Engineering Functional Community

Mr. James Dalton, P.E.
Chief, Engineering and Construction U.S. Army Corps of Engineers

The Facilities Engineering career field encompasses a variety of professional individuals with diverse skills focused on the design, construction, and life cycle maintenance of military installations, facilities, civil works projects, airfields, roadways, and oceanic facilities. It involves all facets of life cycle management from planning through disposal, including design, construction, environmental protection, base operations and support, housing, real estate, and real property maintenance. Additional duties include advising or assisting commanders and acting as, or advising, program managers and other officials as necessary in executing all aspects of their responsibilities for facility management and the mitigation/elimination of environmental impact in direct support of the defense acquisition process.

Facilities Engineering Level I

Education:  
+ Baccalaureate degree in engineering, architecture, physics, chemistry, mathematics, community planning, business, or related fields  
+ Advanced degree from an accredited institution of higher learning in engineering, physics, chemistry, operations research, community planning, management, business, public administration, or related fields  
+ 12 semester credit hours selected from accounting, business finance, law, economics, industrial management, quantitative methods, or organization and management

Experience: 4 additional years of experience in acquisition positions of increasing responsibility and complexity

1 The Core Certification Standards section lists the training, education, and experience REQUIRED for certification at this level.
2 When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

NOTE: “(R)” following a course title indicates the course is delivered as resident-based instruction.
This career field includes computer scientists, information technology (IT) management specialists, computer engineers, telecommunications managers, IT program and project managers, etc., who directly support the acquisition of IT. Personnel in this career field typically provide direct support for acquisitions that use IT, including National Security Systems. They apply IT-related laws, policies, and directives, and provide IT-related guidance throughout the total acquisition life cycle. The employee typically identifies requirements; writes and/or reviews specifications; identifies costs; obtains resources (manpower, funding, and training); conducts or supports portfolio management, information assurance certification, Global Information Grid compliance, and IT architecture-related activities; and tests, evaluates, plans, obtains, and manages IT life cycle development and support (operations, maintenance, and replacement).
### Information Technology Level I

#### Type of Assignment | Representative Activities
--- | ---
+ CIO Office | Identifies and describes the following: policies, laws, and regulations; emerging IT acquisition strategies; best practices; IT-related performance measures and quality management; capital planning and investment control; acquisition planning, solicitation, and administration; and information assurance

+ Central Design Activity (CDA) | Identifies and describes the following: basic concepts of software engineering and development activities; enterprise architecture; best practices; IT systems engineering; information assurance; IT-related technologies; test and evaluation processes; and verification and validation processes

+ Project Office/Field Activities | Identifies and describes the following: IT program management approaches; emerging IT acquisition strategies; best practices; IT-related performance measures and quality management; acquisition planning, solicitation, and administration; information assurance; test and evaluation processes; verification and validation processes; and fielding and sustaining IT systems

### Core Certification Standards

(Required for DAWIA certification)

#### Type of Assignment | Representative Activities
--- | ---
+ Acquisition Training | ACQ 101 Fundamentals of Systems Acquisition Management

+ Functional Training | As of Nov. 15, 2005, the contents of IRM 101 and SAM 101 were merged. Since Nov. 15, 2005, the same content has been delivered under both course designators/names. Therefore, either of the following conditions must be met:

- IRM 101 Basic Information Systems Acquisition and SAM 101 Basic Software Acquisition Management if both courses were completed before Nov. 15, 2005; or

- IRM 101 Basic Information Systems Acquisition or SAM 101 Basic Software Acquisition Management if either course was completed on or after Nov. 15, 2005

+ Education | Formal education not required for certification

+ Experience | 1 year of acquisition experience in information technology

### Core Plus Development Guide

(Desired training, education, and experience)

#### Type of Assignment | CIO Off | CDA | PO/Fld Act
--- | --- | --- | ---
BCF 103 Fundamentals of Business Financial Management | + | | |
CLB 007 Cost Analysis | | + | +
CLB 016 Introduction to Earned Value Management | + | + | +

NOTE: “(R)” following a course title indicates the course is delivered as resident-based instruction.
The Life Cycle Logistics career field encompasses both acquisition logistics and sustainment activities, and includes professionals responsible for planning, development, implementation, and management of effective and affordable weapons, materiel, or information systems support strategies.

Life cycle logisticians perform a principal joint and/or DoD component logistics role during both the acquisition and operational phases of the system life cycle to:

- Ensure product support strategies meet program goals for operational effectiveness and readiness;
- Ensure supportability requirements are addressed consistently with cost, schedule, and performance;
- Ensure supportability considerations are implemented during systems design; and meet system materiel availability, materiel reliability, operations and support cost, and mean down time objectives. To be successful, they must therefore be proficient in the following competency areas:
  + Logistics Design Influence
  + Integrated Product Support (IPS) Planning
  + Product Support and Sustainment
  + Configuration Management
  + Reliability and Maintainability Analysis
  + Technical/Product Data Management Supportability Analysis

Life cycle logisticians pursue two primary objectives, namely to ensure weapons systems are designed, maintained, and modified to continuously reduce the demand for logistics; and to ensure the logistics support that is required be effective and efficient. The resources required to provide product support must be minimized while meeting warfighter needs.

Life cycle logisticians achieve this by ensuring the integration of the Integrated Product Support (IPS) elements to maximize supportability, reliability, availability, maintainability, and mission effectiveness of the system throughout its life cycle. They achieve this by influencing system design and providing effective, timely product support capability to achieve the system’s materiel readiness and sustain operational capability.

Emphasis is placed on ensuring materiel readiness at an optimal life cycle cost and integrating life cycle management principles by designing and implementing performance-based life cycle product support strategies to provide effective system support. Life cycle logisticians can work directly in a program management office, in support of the program manager, or in other supporting and sustainment logistics activity offices. Level III certified life cycle logisticians can also serve as DoD Product Support Managers, responsible for:

- Providing weapon systems product support subject matter expertise to the PM for the execution of the PM’s duties as the Total Life Cycle Systems Manager
- Developing and implementing a comprehensive, outcome-based product support strategy
- Promoting opportunities to maximize competition while meeting the objective of best-value, long-term outcomes to the warfighter
- Seeking to leverage enterprise opportunities across programs and DoD Components
- Using appropriate analytical tools and conducting appropriate cost analyses, to determine the preferred product support strategy
- Developing and implementing appropriate product support arrangements
- Assessing and adjusting resource allocations and performance requirements for product support to meet warfighter needs and optimize implementation of the product support strategy
- Documenting the product support strategy in the Life Cycle Sustainment Plan (LCSP)
- Conducting periodic product support strategy reviews and revalidating the supporting business case analysis

Thus, life cycle logisticians and product support managers are ultimately responsible not only for translating warfighter performance requirements into tailored product support spanning the system life cycle, but also for optimizing system readiness, availability, and operations and support costs.
# Life Cycle Logistics  Level I

## Type of Assignment | Representative Activities
--- | ---
**+ Acquisition Logistics**<br>- Plans/develops effective and affordable weapons, materiel, or information systems support strategies<br>- Ensures product support strategies meet program goals for operational effectiveness and readiness<br>- Ensures supportability requirements consistent with cost, schedule, and performance are addressed<br>- Plans and develops performance-based logistics as preferred DoD product support approach<br>- Ensures integration of all support elements to maximize system deployability, supportability, and mobility

**+ Sustainment**<br>- Implements effective and affordable weapons, materiel, or information systems support of fielded and/or out-of-production systems, including obsolescence, modernization, modification, sustaining engineering, workload allocation, public-private partnerships, supply chain management, and/or system retirement<br>- Executes and manages system performance-based logistics support strategy, ensuring system performance requirements are met

**NOTE:** *(R)* following a course title indicates the course is delivered as resident-based instruction.
Science and technology managers are typically scientists and engineers primarily involved in the material solution analysis and technology development phases of the defense acquisition system. They may, however, be involved in any phase of the acquisition process from basic research through deployment and demilitarization. Primary duties include developing overall program goals for science and technology funds; acquiring the services of scientists, engineers, and technical support personnel who are experts in their fields to perform science and technology research for DoD; providing funds to and oversight of science and technology performers (including universities, industry, and federal government organizations); and interfacing with the customer to expedite the transition of technology to the user.

---

1 The Core Certification Standards section lists the training, education, and experience needed for certification at this level.
2 The training listed in the Unique Position Training Standards section for workforce members assigned to these positions is recommended.
3 When preparing your Individual Development Plan (IDP), you and your supervisor should consider the training, education, and experience listed in this Core Plus Development Guide if not already completed.

**NOTE:** “(R)” following a course title indicates the course is delivered as resident-based instruction.
As the functional leader for the Test and Evaluation (T&E) career field, my primary goals are improving the quality of the T&E workforce and providing consistent and integrated T&E policy and guidance. Our responsibility to train and maintain the T&E workforce involves keeping the T&E functional and core acquisition competencies current, establishing certification standards, and developing T&E position category descriptions.

Our T&E courses provide essential knowledge that T&E professionals require to effectively participate in DoD T&E activities. In order to assist in reducing cost and schedule, and improving performance for major defense acquisition programs, T&E professionals need to have a foundation that includes understanding technical maturity and performance baselines; knowledge and application of technical reviews; design considerations; reliability growth; and the practical use of T&E concepts and principles during planning, execution, and reporting for a system or system-of-systems. In addition to the foundation, the Office of the Deputy Assistant Secretary of Defense, Developmental Test and Evaluation (ODASD(DT&E)) forecasts growing areas for expertise and education in interoperability, information and system assurance, reliability and maintainability, and enhanced use of modeling and simulation and stimulants.

As the functional leader, I provide oversight by reviewing DAU education and training requirements as well as validating the certification standards for each of the three T&E certification levels. ODASD(DT&E) also updates the requirements according to changes in statutory and regulatory acquisition policies, practices, and procedures. Currently, ODASD(DT&E) continues to develop learning modules for T&E in modeling and simulation and testing in a joint environment.

The T&E workforce requires increasing knowledge and skills to adequately identify and evaluate system vulnerabilities. Since T&E in joint programs and system-of-systems comprehension presents challenges, it is important to prepare the workforce for complex system dependencies and interoperability issues. A part of ODASD(DT&E)’s mission is to ensure that there is a high quality T&E workforce in order to provide the warfighter with affordable, supportable, and effective performance-based systems.
The Contracting Education Academy at Georgia Tech (The Academy) offers world-class training and solutions – in the field of acquisition and public sector contracting – for both the government and business communities. Our services include:
- open enrollment courses,
- on-site training, and
- consulting services.
### Test and Evaluation Level I

<table>

</table>
| **+ Headquarters and Staff (OSD, JS, COCOMs, JRTC, SYSCOMs, etc.)** | • Supports research and development of T&E policy, practices, metrics, and procedures  
• Supports development of metrics (e.g., CTPs, MOEs, MOPs, COIs, success criteria) identification, direction, and guidance applicable to the Service/agency involvement in T&E  
• Supports T&E office representative to T&E meetings and other forums  
• Supports tracking/auditing of the T&E aspects of products/systems in the acquisition process  
• Supports development of the T&E career management plan for recruiting, training, and retaining a professional T&E workforce  
• Supports development and execution of T&E processes, standards, methods, and techniques |
| **+ Program Management and Matrix Support** | • Supports the program’s T&E working-level IPT  
• Member of program’s T&E team developing a test and evaluation strategy (TES) and a test and evaluation master plan (TEMP)  
• Supports development of program’s TES, approach, process, schedule, and resource requirements  
• Supports implementation of metrics (e.g., CTPs, MOEs, MOPs, COIs, success criteria) relative to product/system under test  
• Supports development of T&E materials and data for technical and progress reviews, including risk assessment |
| **+ Range/Lab/Field Supporting Activities** | • Supports identification, process, schedule for T&E resources, including: workforce, infrastructure, and budgets to support testing as expected for the respective facility  
• Supports facility test plan development  
• Assists in test execution, data collection, analysis, and reporting  
• Supports the maintenance of the physical facility, environment, and coordination of renovations and repairs as necessary  
• Assists in the execution of Service/agency or DoD Information Assurance (IA) and System Assurance (SA) testing |

Acquisition Workforce Management and Administration

Chapter Four

p. 128 Overview of Acquisition Workforce Career Management
p. 129 U.S. Army DACM
p. 130 U.S. Navy and Marine Corps DACM
p. 131 U.S. Air Force DACM
p. 132 4th Estate DACM
p. 133 Registration Procedures for Non-DoD Students
p. 133 DAU Administrative Information
Overview of Acquisition Workforce Career Management

Directors, Acquisition Career Management (DACMs)
The DACMs assist in managing the accession, training, education, and career development of their respective components. There is a DACM representative for each of the military services as well as for the 4th Estate. The 4th Estate DACM represents civilians assigned to the Defense agencies outside the military services.

The DACMs coordinate with DAU to ensure the learning and developmental needs of the Defense Acquisition Workforce are addressed. The DACMs are instrumental in supporting enterprise human capital initiatives to create a high-performing Defense Acquisition Workforce. The following pages list important links and information regarding each DACM.

How to Register
To register for a DAU course, go to your appropriate DACM page in this catalog for links to registration websites and contact information. If you do not work as a member of the DoD—for instance, if you are a federal government employee in a civilian agency, an employee working for a company that supports DoD, or an international representative—go to the Registration Procedures for Non-DoD Students section of this catalog.

You are encouraged to review the DAU administrative information in this section, which provides an overview of DAU’s policies and procedures regarding attendance, cancellation, accommodations, transcript services, and other important information regarding taking a course at DAU.
The U.S. Army Director, Acquisition Career Management (DACM) is charged with the responsibility to implement the Defense Acquisition Workforce Improvement Act (DAWIA) and the associated supplemental guidance. Enacted in 1990, the objective of DAWIA is to improve the quality and professionalism of the entire acquisition workforce by focusing on improving the effectiveness of the processes we implement to execute all phases of the acquisition life cycle. The DACM is an advisor and staff assistant to the Assistant Secretary of the Army for Acquisition, Logistics, and Technology (ASA(ALT)) and represents the assistant secretary in all matters relating to efforts to improve the acquisition workforce and its associated acquisition processes through education, training, and career management. The Army DACM reports directly to the ASA(ALT) and also serves as the principal military deputy to the assistant secretary. The Army Deputy DACM serves also as the Director of the U.S. Army Acquisition Support Center, whose job is to support the Army’s acquisition mission through superior personnel development systems and management support capabilities, enabling the most effective and efficient equipping of the nation’s forces while maintaining an internal culture of constant organizational improvement.

The DACM promotes leadership and professional development of the Army acquisition workforce and ensures individual skill sets are matched with relevant work requirements, all while promoting an environment of open communication where the workforce can understand their role in equipping and sustaining the world’s premier fighting force.

The DACM’s responsibilities are to:
+ Establish and oversee the mission and vision of the Army Acquisition Corps (AAC) and the associated programs for the development and readiness of a professional civilian and military workforce
+ Oversee the AAC and the Defense Acquisition Workforce while establishing human capital plans, programs, and

strategies to accomplish the acquisition mission and vision for the Army
+ Ensure the readiness of a professional civilian and military workforce through relevant training, education, and experience opportunities
+ Oversee all career management activities for the AAC and Defense Acquisition Workforce (e.g., policies, training, opportunities, etc.) in accordance with statutory requirements and congressional mandates
+ Grant AAC membership and approve waivers
+ Designate senior-level representatives to provide guidance and to advise on matters that affect the education, training, and career development of the Defense Acquisition Workforce
+ Establish forums/opportunities to specifically address issues facing the acquisition community from the perspective of Army senior leaders
+ Represent the Army acquisition executive in all matters pertaining to the acquisition mission for the Army

Visit the Army’s acquisition website at asc.army.mil/ for information on acquisition career management policies and programs including such topics as:
+ Acquisition Corps career planning and certification
+ Legislation and policy
+ Tuition assistance and training opportunities
+ Waivers and forms
+ Defense Acquisition University training:

+ News and developments
+ FAQs and contact information
The U.S. Navy Director, Acquisition Career Management (DACM) is the focal point in the Department of the Navy (DoN) for the management and development of the acquisition workforce. Having the right people in the right job at the right time will translate to effective and efficient execution, delivering the finest warfighting capability in the world. The DACM seeks to improve the workforce through education, training, and career management.

The Navy DACM is focused on rebuilding the acquisition workforce and has developed a framework upon which the DoN will improve capacity and capability. The fundamental precept that guides the DACM office is that the current and future DoN warfighting development, procurement, and life cycle sustainment demands of its acquisition workforce continue to be high performing and competent across the spectrum of acquisition career fields.

The framework is built upon a six-pillar foundation:

+ Pillar 1: Rebalance the acquisition workforce
+ Pillar 2: Integrate acquisition workforce requirements into the Planning, Programming, Budgeting and Execution System
+ Pillar 3: Reinforce the science and engineering foundation
+ Pillar 4: Improve program manager and acquisition business skills
+ Pillar 5: Return to deliberate flag/SES acquisition community management
+ Pillar 6: Plan acquisition workforce sustainment

The DACM goals are to:

+ Revitalize the acquisition workforce through improved education, training, and career management
+ Focus on recruitment and retention of acquisition professionals with critical skills needed to increase the capability of the acquisition workforce
+ Implement policies and processes that lead to the successful rebuilding of the acquisition workforce

The DACM responsibilities are to:

+ Develop acquisition workforce strategies and policies
+ Collaborate with other DoD military services, agencies, and functional leaders on matters relating to the acquisition workforce education, training, and career development
+ Analyze acquisition workforce requirements to ensure the DoN acquisition workforce has the personnel and skills it needs, now and into the future
+ Manage critical acquisition positions/key leadership positions and ACAT I and ACAT II program manager assignments
+ Manage career development programs and opportunities
+ Ensure workforce reporting requirements are met

WHERE TO FIND INFORMATION

Visit the Department of the Navy Research, Development, and Acquisition website at https://acquisition.navy.mil for Navy-specific acquisition career management policies and procedures including topics such as:

+ Acquisition Corps
+ Career planning and certification
+ Legislation and policy
+ Naval Acquisition Development Program (interns and associates)

U.S. Air Force DACM
Mr. Patrick M. Hogan
+ Air Force DACM

The U.S. Air Force Director, Acquisition Career Management (DACM) is designated by the Assistant Secretary of the Air Force for Acquisition as the focal point for management and development of the acquisition workforce. The Air Force DACM works with the Office of the Under Secretary of Defense for Acquisition, Technology and Logistics; the Defense Acquisition University (DAU); other Services and defense agencies; Air Force acquisition career field functional managers; and Air Force acquisition workforce members in all efforts to improve the acquisition workforce through education, training, and career management.

The Air Force DACM responsibilities are to:
+ Assist the Air Force acquisition executives for space and non-space programs with oversight and execution of acquisition workforce responsibilities
+ Develop the Air Force acquisition professional workforce through directing, coordinating, and reviewing actions mandated by the Defense Acquisition Workforce Improvement Act (DAWIA) and DoD directives
+ Develop, implement, and oversee policies and procedures for the Air Force Acquisition Professional Development Program (APDP)
+ Establish programs, as required, to provide career development opportunities for the acquisition workforce in accordance with DAWIA, associated regulations, and Air Force acquisition workforce human capital strategic planning objectives
+ Develop, review, and coordinate policy regarding the Air Force acquisition workforce, including both organic (Air Force civilians and military) and contracted resources
+ Represent the Air Force as point of contact with DAU and other DoD military services and agencies for matters relating to the AT&L Workforce Education, Training, and Career Development Program
+ Oversee Air Force acquisition training selection boards, including the Program Manager's Course and Industrial College of the Armed Forces Senior Acquisition Course, for the acquisition community
+ Manage training matters associated with DAWIA implementation, including DAU course quotas, acquisition training and defense acquisition workforce funds, and student course registration
+ Centrally administer the Fiscal Year 2008 National Defense Authorization Act Section 852 Defense Acquisition Workforce Development Fund to ensure the Air Force acquisition workforce has the capacity it needs, in both personnel and skills
+ Establish and maintain acquisition career management information systems for training, waivers, continuous learning, certification, and acquisition personnel records review, as needed, to execute acquisition workforce responsibilities

WHERE TO FIND INFORMATION

Acquisition Career Brief
4TH ESTATE DACM

Mr. Jeffrey Birch
+ 4th Estate DACM

The 4th Estate Director, Acquisition Career Management (DACM) represents civilians assigned to the defense agencies outside the military departments—a community comprised of over 21,000 Defense Acquisition Workforce members. The 4th Estate DACM reports to the Director, Human Capital Initiatives, and is responsible for collaborating with the defense agencies on all facets of career development and management of the Defense Acquisition Workforce.

The 4th Estate DACM responsibilities include:
+ Supporting enterprise human capital initiatives to create a high-performing Defense Acquisition Workforce
+ Collaborating and coordinating with defense agencies to support implementation of the Defense Acquisition Workforce Development Fund and the Secretary of Defense Growth Strategy
+ Providing policy interpretations on Defense Acquisition Workforce Improvement Act (DAWIA) matters
+ Collaborating with senior leaders and functional leaders on matters relating to supporting and improving the Defense Acquisition Workforce
+ Ensuring career management tools are available to the 4th Estate community, including a continuous learning tracking system and online application processes for certification and Defense Acquisition Corps membership
+ Formulating concepts to develop innovative tools and resources to increase efficiencies

The following career management functions are performed at your specific agency:
+ Approval of applications for DAU training
+ Approval of DAWIA certification applications
+ Approval of Acquisition Corps applications
+ Approval of fulfillment requests
+ Processing and approval of waivers
+ Documentation of course equivalencies
+ Coding and management of acquisition personnel information

WHERE TO FIND INFORMATION
The 4th Estate DACM website, www.dau.mil/doddacm, provides additional information on the following areas:
+ Class registration
  https://www.atrrs.army.mil/channels/acqtas
+ Managing your acquisition career
+ Career management tools
+ DAWIA certification
+ Workforce manager resources
+ Workforce policy
+ 4th Estate metrics
+ 4th Estate DACM newsletter

Points of Contact:

Registration Procedures for Non-DoD Students

International Students
Foreign military and civilian employees of a foreign government must apply for DAU courses through their country’s training officer, who will coordinate the training request through the U.S. Army security assistance officer in the Office of Defense Cooperation or an appropriate official in the U.S. Embassy. The U.S. Army Security Assistance Training Field Activity (SATFA), which is the executive agent for foreign members attending DAU courses, will process each individual’s application through appropriate channels. The SATFA will coordinate all training requests with the DAU Non-DoD Registrar at nondod.registrar@dau.mil or 703-805-4498. Security assistance officers or U.S. Embassy officials sponsoring training requests from the host country should go to www.disam.dsca.mil/itm/ for information on training available through the foreign military sales training program.

Military and civilian employees of countries that are members of the North Atlantic Treaty Organization (NATO) should initiate their training requests through the SATFA by calling 757-788-3255. The SATFA desk officer for NATO affairs will put the student in contact with appropriate NATO training officials to process and coordinate the training request.

A non-U.S. citizen employed by a U.S. defense industry corporation, working for a foreign corporation that has a contract with DoD or any of the military departments, or who is assigned to a U.S. military agency or activity may be eligible to apply for DAU courses. For information about applying for a course, contact the DAU Academic Support Office at industry.registrar@dau.mil or 703-805-4498.

Acquisition Personnel with Federal Civilian Agencies
Federal civilian personnel interested in acquisition or acquisition-related training should first consult the Federal Acquisition Institute (FAI) website at www.fai.gov, which provides information about career, certification, and training programs. Federal civilian personnel interested in attending DAU- or FAI-sponsored training must submit an application using the FAI electronic registration system on the Web at https://www.atrrs.army.mil/channels/faitas/student/logon.aspx?caller=1, the FAI Internet Training Application (FAITAS) website. Federal civilian personnel can attend DAU and FAI courses at no cost, on a space-available basis for DAU courses. The electronic system streamlines the reservation process and allows prospective students to initiate their own training requests via the Internet.

For additional information, students should contact their local acquisition career managers. Points of contact available to assist students are listed on the FAI website. You can also contact the FAI help desk at 703-805-2300, Fax 703-805-2111, or visit www.fai.gov/contact.asp

Defense Industry Certification
Unless an organization has its own certification standards, there is no organization or association that confers certification in a functional area for defense industry employees similar to the certification program administered by DoD for its acquisition workforce members. Industry employees may demonstrate comparable training to the members of the DoD acquisition workforce by successfully completing DAU courses. They can register for courses at https://www.atrrs.army.mil/channels/nondod/logon.asp and will be accepted on a space-available basis.

DAU Administrative Information

Course Offerings
DAU courses are offered in a variety of modes:
+ Resident—Workforce member attends class at one of the DAU training sites.
+ Local—DAU instructor teaches at locations that have sufficient numbers of attendees to constitute a class.
+ Distance Learning—Course material is offered entirely or in part via the Internet.
+ Facilitated Online Learning Environment—Material is offered online; instruction may be online or in the classroom.
+ Hybrid—Course includes both distance learning and classroom (Parts A and B).

Online Requirements
To complete online coursework, you must have access to a computer with the following minimum capabilities:
+ Operating System: Windows XP Service Pack 3
+ Microprocessor speed: Pentium 4 (1.6-2.4 GHz)
+ Hard Drive: 40 GB
+ Memory: 1GB
+ Internet Connection: 56bps+ (1.5 Mbps recommended)
+ Audio: 16 bit sound card and speakers
+ CD-ROM drive: 12X
+ Monitor: 1024 X 768 minimum, font size or DPI set to normal or small
When logging on to the DAU Virtual Campus at https://learn.dau.mil, students should review the computer requirements in the “System Requirements” option under the “Help” menu. This will help students ensure their computers are able to run online courseware successfully. Some online courses have additional software requirements that are explained at the beginning of the course.

**Reporting Instructions**

After being accepted for admission into a DAU course, students will receive an e-mail from the university with instructions on how to proceed. In the case of online courses, an e-mail will explain how to access the course material online. For classroom courses, students will receive an e-mail with specific reporting instructions and information on housing, meals, facilities, and appropriate classroom attire.

DAU offers students Web-based support for classroom activities and pre-course assignments through the Blackboard learning management system. Blackboard provides websites for selected DAU courses so students can access readings and course activities on demand. Blackboard can support a variety of learning activities as required by a class: assignments, quizzes, surveys, and discussions. It supports group work and also provides a place to store and submit files to instructors. A student enrolled in a course using Blackboard will receive information about the course’s website in course welcome materials.

**Travel, Per Diem, and Reimbursement**

Each Service Acquisition Career Management Office or parent organization funds travel expenses and per diem for eligible students based on Service- or agency-specific policy. Students should consult the appropriate Acquisition Career Management Office for policy and guidance concerning travel requirements. It is very important that students arrive with a government credit card to pay for all legitimate travel-related expenses or, if needed, draw cash advances in lieu of receiving advance per diem payments. DAU cannot process travel claims or provide advance per diem payments. Students should know the name and telephone number of the government credit card program coordinator for their Services or organizations. This person will be the student’s point of contact for government credit card-related questions.

Defense Acquisition Workforce members may be eligible for funding of travel and per diem when attending courses required for certification. This is strictly based upon the Service component policy. Students should contact their Service component point of contact for the specific funding policy covering DAU training. Funding is not provided to cover travel and per diem costs for workforce members who attend DAU courses for the purpose of continuous learning.

**Course Registration and Quota Allocation**

DAU uses the Army Training Requirements and Resources System (ATRRS) to maintain course schedules, allocate quotas, and manage class registration. Agencies with quota allocations should register workforce members as early as possible before the class start date to ensure their employees are in the ATRRS system and that employees have sufficient time to make necessary arrangements for attending class. After applying for a course, a student will receive an e-mail identifying his or her status as either wait-listed or as having a reservation. Approximately 60 days before the class starts, those with class reservations will receive an e-mail from DAU (later for late registrants) providing reporting instructions, class start and end times, and location-specific information (e.g., points of contact, hotels, and directions). Points of contact for most courses and locations are provided in the online course schedule. Any workforce member who is registered and has not received reporting instructions 15 days prior to the class start date should contact the Academic Support Office at either 866-568-6924 (Option 1) or 703-805-3459 (Option 1).

**Attendance Policy**

Students are expected to attend all scheduled course sessions (including teleconferencing, satellite, and synchronous online sessions) and complete all coursework. Whenever possible, students shall request permission from the instructor in advance of the absences, which must be for valid reasons such as illness or family emergency. Cumulative absences that exceed 5 percent of contact time may be grounds for disenrollment.
(e.g., for a 40-hour course, students are expected to participate in at least 38 hours). Some courses permit students who miss periods of class time to complete supplemental work before receiving a graduation certificate.

DAU follows established DoD and Office of Personnel Management guidance for civilians, and Service regulations for military personnel concerning various categories of leave.

**Transcripts**
To obtain transcripts, students should go to [www.dau.mil/studentInfo/default.aspx](http://www.dau.mil/studentInfo/default.aspx) and click "Request a DAU Transcript.” The students will be directed to the online transcript system, where they will be asked to log on using either a Common Access Card (CAC) or Social Security Number (SSN)/date of birth. Once in the transcript system, students can print a transcript at their desks or request that an official transcript with a raised DoD seal be sent to a college. Transcripts are usually processed within five working days, though sometimes it takes longer; students will receive an e-mail notice when their transcripts have been processed. Questions regarding transcripts should be directed to the Academic Support Office at dau.transcript@dau.mil.

**Disability Accommodations**
Those with disabilities who are scheduled to attend DAU classes should notify their local training office and the Academic Support Office as soon as possible prior to the start date of the class to ensure that appropriate accommodations are made. DAU fully supports the requirements of Section 508 of the Rehabilitation Act Amendments of 1998. Section 508 requires federal agencies that develop, procure, maintain, or use electronic and information technology to ensure that federal employees with disabilities have access to and use of that information and data. To that end, all new DAU courseware is developed to comply with the standards set forth in Section 508.

**Student Policies**
A complete overview of all student policies can be found at [www.dau.mil/studentInfo/Pages/student_info.aspx](http://www.dau.mil/studentInfo/Pages/student_info.aspx).

**Academic Integrity**
Absolute integrity is expected of every DAU student in all academic undertakings. Integrity entails a firm adherence to a set of values, and the values most essential to an academic community are grounded on the concept of honesty with respect to the intellectual efforts of oneself and others. Academic integrity is expected not only in formal coursework situations, but in all university relationships and interactions connected to the educational process, including the use of university resources.

**Dress Policy**
Unless otherwise noted in the welcome letter or e-mail, civilian and military students are authorized to wear business casual attire: dress slacks, collared shirts, dress shoes/loafers and the equivalent attire for women. Examples of inappropriate attire are shorts; flip flops; strapless, excessively short or sheer garments; exposed midriffs; jeans; and athletic wear of any kind. The instructor may specify in advance exceptions to the above in support of a specific class event. Students also are requested to be cognizant that the heavy use of colognes and perfumes can be a distraction in class and cause allergic reactions in other students. In the case of DAU courses conducted at customer sites, alternative standards, consistent with those of the local command or organization, may prevail.

**Cancellation Policy**
If circumstances dictate canceling course attendance after a student receives notification of acceptance, the procedures set forth by the student’s respective Service or agency should be followed. This may afford other workforce members an opportunity to attend the course.

**Grievance Policy**
Any grievance a student may have, academic or otherwise, will first be addressed with the lead instructor of the course. If the lead instructor cannot resolve the issue to the student’s satisfaction, the issue can be elevated as outlined in DAU Directive 704, Student Academic and Administrative Policies. Directive 704 is available at [www.dau.mil/studentInfo/Pages/student_info.aspx](http://www.dau.mil/studentInfo/Pages/student_info.aspx).
Appendix A

Training Courses

Required course prerequisites are listed online in the iCatalog within each course concept card. A consolidated listing is also accessible from the iCatalog Home page at: http://icatalog.dau.mil/

See pages 128-133 for course registration procedures.
### ACQ 101
**Fundamentals of Systems Acquisition Management**

This course provides a broad overview of the DoD systems acquisition process, covering all phases of acquisition. It introduces the Joint Capabilities Integration and Development System; the planning, programming, budgeting, and execution process; DoD 5000-series policy documents; and current issues in systems acquisition management. Designed for individuals who have little or no experience in DoD acquisition management, this course has proven very useful to personnel in headquarters, program management, and functional or support offices.

**Course Length:** Students have 60 calendar days to complete this course  
**Method of Delivery:** Distance Learning

### ACQ 201A
**Intermediate Systems Acquisition, Part A**

Intermediate Systems Acquisition, Part A, uses computer-based training to prepare midlevel acquisition professionals to work in integrated product teams by providing an overview of systems acquisition principles and processes. Both ACQ 201A and ACQ 201B are required for DAWIA certification.

**Course Length:** Students have 60 calendar days to complete this course  
**Method of Delivery:** Distance Learning

### ACQ 201B
**Intermediate Systems Acquisition, Part B**

Intermediate Systems Acquisition, Part B, prepares midlevel acquisition professionals to work effectively in integrated product teams by understanding systems acquisition principles and processes. Both ACQ 201A and ACQ 201B are required for DAWIA certification.

**Course Length:** 5 class days  
**Method of Delivery:** Resident

### ACQ 265
**Mission-Focused Services Acquisition**

This course is designed to improve our tradecraft in the acquisition of services. It uses a multifunctional approach that provides acquisition team members with the tools and techniques necessary to analyze and apply performance-based principles when developing requirements documents and effective business strategies for contractor-provided services. The course uses the seven-step Service Acquisition process, a team-oriented approach, and multiple interactive, hands-on, learning sessions to apply the principles. ACQ 265 is designed for those who need to improve their skills in developing and defining service requirements, supporting business strategies, and effectively managing the resulting contractor performance. However, this course may also provide an opportunity for experienced acquisition personnel to improve their understanding of the Service Acquisition Process.

**Course Length:** 4 class days  
**Method of Delivery:** Resident

### ACQ 370
**Acquisition Law**

DoD policy now mandates that the acquisition process be conducted through integrated product teams. The employment of integrated product teams in the acquisition process has resulted in the involvement of many non-contracting government personnel. ACQ 370 provides an overview of government contract law, specifically laws and regulations that are applicable to government contracts.

**Course Length:** 4.5 class days  
**Method of Delivery:** Resident

### ACQ 401
**Senior Acquisition Course**

A preeminent course for members of the acquisition corps, the Senior Acquisition Course is delivered by the Industrial College of the Armed Forces (ICAF). The course consists of the 10-month ICAF curriculum, complemented by a choice of acquisition-related electives and individual/group research and writing. A limited number of professionals may take the Defense Acquisition University Program Manager’s Course, PMT 401, as a general elective for the Senior Acquisition Course and ICAF curriculum. Those who complete the Senior
ACQ 405
Executive Refresher Course
This course provides acquisition professionals an update on acquisition policy, processes, and lessons learned. Participants examine their roles and responsibilities as acquisition leaders in a changing environment. Guest speakers lead discussions on contemporary management and leadership topics, such as partnering with industry, contracting tools, resource allocations, human capital management, earned value oversight, performance-based logistics, and supply chain management.

Target Attendees: This course is for DAWIA Level III-certified members of all career fields who are (or have been) selected for O–6, GS–15, or the industry equivalent who are working in DoD weapons systems or information systems acquisition.

Course Length: 9 class days
Method of Delivery: Resident

ACQ 450
Leading in the Acquisition Environment
This action-based learning course provides an overview of the competencies and skills needed to lead in an acquisition environment. Experiential activities include role-playing, simulation, communication, and critical-thinking exercises; a leadership challenge; and completion of a 360° feedback instrument and executive coaching to develop action plans related to the feedback. Participants will learn to apply strategies for leading up, down, and across in an acquisition organization.

Target Attendees: This class is for civilians (GS 13–15) and military (O5–O6) in supervisory positions, Level III-certified (any career field/path), and who have at least 3 years of acquisition experience serving in a Level III-coded position. Industry and allied participants are eligible to attend and are encouraged to register on a space-available basis.

Course Length: 4 class days preceded by approximately 4 hours of pre-course work
Method of Delivery: Resident
ACQ 451
Integrated Acquisition for Decision Makers

Participant-driven, action-based learning exposes Defense Acquisition Workforce members to the multidisciplinary acquisition perspectives, integration challenges, and influencing strategies necessary for successful integrated acquisition decision-making. Through facilitated discussions, simulations, exercises, case studies, and exposure to decision-making tools, participants will formulate strategies that promote effective integration and collaboration for a current integration challenge. Participants will gain a wider view of the acquisition environment and their respective roles and responsibilities.

Target Attendees: This class is for civilians (GS 13-15) and military (O5–O6), Level III-certified (any career field/path), and who have at least 3 years of acquisition experience serving in a Level III-coded position. Industry and allied participants are eligible to attend and are encouraged to register on a space-available basis.
Course Length: 3.5 class days
Method of Delivery: Resident

AUD 1130
Technical Indoctrination

Newly hired auditors taking this course will learn the basic concepts, techniques, and procedures of contract auditing; the organizational structure of the Defense Contract Audit Agency; and audit guidance processes.

Course Length: 10 class days
Method of Delivery: Resident

ACQ 452
Forging Stakeholder Relationships

This action-based learning course introduces professionals to the methods and skills necessary to identify, assess, and promote the building of stakeholder relationships required for success in the acquisition environment. Experiential activities will include a precourse stakeholder assessment as well as simulation, communication, and critical-thinking activities that will facilitate the development of tailored stakeholder action plans. At the end of the course, professionals will be able to build ownership of acquisition outcomes across the enterprise.

Target Attendees: This class is for civilians (GS 13-15) and military (O5–O6), Level III-certified (any career field/path), who have at least 3 years of acquisition experience serving in a Level III-coded position. Industry and allied participants are eligible to attend and are encouraged to register on a space-available basis.
Course Length: 3 class days plus a few hours of pre- and post-course work
Method of Delivery: Resident

ACQ 453
Leader as Coach

This resident course focuses on the thinking, behaviors, skills, and strategies needed to accomplish a paradigm shift from managers who primarily direct and evaluate subordinates to managers who encourage and reward innovation, agility, listening, collaboration, continuous and purposeful growth, results, and accountability. As leaders, the students will develop greater personal awareness and increase the impact of their energy and the energy of their organizations. Students will do this through the learning and applying the principles and behaviors of effective performance coaches.

Target Attendees: Civilian and military Defense Acquisition Workforce leaders, primarily supervisors in grades equivalent to GS 13-15 and O4–O6, as well as leaders of IPTs.
Course Length: 4 class days
Method of Delivery: Resident

AUD 1320
Intermediate Contract Auditing

Staff auditors taking this course will obtain information needed to adequately plan and conduct audits. Class discussions, practical exercises, and group case studies are used to highlight problem areas and evaluate alternative courses of action.

Course Length: 5 class days
Method of Delivery: Resident

BCF 102
Fundamentals of Earned Value Management

In a virtual classroom environment, professionals learn additional information about earned value management (EVM), which is introduced in ACQ 101. The course summarizes the language, data reports, metrics, graphs, and management processes associated with EVM as they apply to DoD acquisition management. Professionals also learn the processes
related to the Performance Measurement Baseline, the Integrated Baseline Review, and the American National Standards Institute/Electronic Industries Alliance (ANSI/EIA) for EVM systems. Finally, professionals evaluate and compute basic EVM metrics and EVM metric-based estimates at completion.

**Course Length:** Students have 30 calendar days to complete this course  
**Method of Delivery:** Distance Learning

**BCF 103**  
**Fundamentals of Business Financial Management**

Using interactive, computer-based training, professionals will develop the skills necessary for formulating and executing a program office budget. Topics covered in this course include cost analysis; funding policies; the DoD planning, programming, budgeting, and execution process; the congressional enactment process; and the budget execution process.

**Course Length:** Students have 60 calendar days to complete this course  
**Method of Delivery:** Distance Learning

**BCF 106**  
**Fundamentals of Cost Analysis**

Professionals are introduced to policies and techniques that are used for the preparation of system cost estimates, including DoD estimating requirements and guidance, estimate use and structure, analogy estimates, parametric estimating, improvement curves, inflation, risk, economic analysis, and software cost estimating. Through practical exercises, professionals gain the opportunity to apply the policies and techniques to real-world examples.

**Course Length:** Students have 60 calendar days to complete this course  
**Method of Delivery:** Distance Learning

**BCF 107**  
**Applied Cost Analysis**

In this course, cost estimating techniques learned in BCF 106 are applied in developing cost estimates. Professionals will engage in guided discussions, investigate case scenarios, develop recommendations, and learn how to present their findings. Professionals also will explore techniques for using Excel and other computer applications to analyze data, develop cost-estimating relationships, and create supporting documentation.

**Course Length:** 4.5 class days  
**Method of Delivery:** Distance Learning

**BCF 203**  
**Intermediate Earned Value Management**

Professionals taking this course work as members of an integrated product team for the system development and demonstration phase of a small ACAT I program. In the context of integrated program management, participants review, develop, and experience the Earned Value Management (EVM)-related processes associated with requirements generation, acquisition strategy development, Request for Proposal development, source selection, risk management, Integrated Baseline Review, and analysis during program execution.

**Course Length:** 8.5 class days  
**Method of Delivery:** Resident

**BCF 204**  
**Intermediate Cost Analysis**

Intermediate Cost Analysis emphasizes development and application of cost-analysis techniques and estimate interpretation. The course addresses estimate definition and planning, data collection, formulation, review and presentation, and documentation. Estimating techniques—such as parametrics, analogies, expert opinions, and improvement curves—are addressed in more depth. Computations are done using automated cost estimating integrated tools.

**Course Length:** 9.5 class days  
**Method of Delivery:** Resident

**BCF 205**  
**Contractor Business Strategies**

Contractor Business Strategies is an active learning experience designed to improve professionals’ understanding of the federal government marketplace from a business perspective. Initially, participants are actively engaged in the life-cycle process by which a typical manufacturing company produces and sells a product, receives payment for that sale, and ultimately,
Appendix A

Training Courses

BCF 206

Cost/Risk Analysis

Cost analysts taking this course are given an overview of how to model the cost/risk associated with a defense acquisition program. Topics covered include basic probability concepts, subjective probability assessment, goodness-of-fit testing, basic simulation concepts, and spreadsheet-based simulation. Practical exercises and a small-group Monte Carlo simulation-based cost risk case reinforce the techniques taught.

Course Length: 3.5 class days
Method of Delivery: Resident

BCF 207

Economic Analysis

Through practical exercises and a group workshop, Economic Analysis prepares professionals to conduct economic analyses within the DoD environment. Topics include decision analysis, cost analysis, present value, and sensitivity analysis.

Course Length: 5 class days
Method of Delivery: Resident

BCF 208

Software Cost Estimating

Software Cost Estimating is designed for those who estimate and/or review the cost of software development and maintenance. Topics include life cycle management, development paradigms, capability evaluations, risk analysis, reuse, commercial off-the-shelf items, function points, Institute of Electrical and Electronics Engineers/Electronic Industries Alliance 12207, parametric models, and model calibration. Case studies allow participants to apply the course materials to real-life examples.

Course Length: 4.5 class days
Method of Delivery: Resident

BCF 209

Acquisition Reporting for MDAPs and MAIS

Acquisition Reporting for Major Defense Acquisition Programs (MDAPs) and Major Automated Information Systems (MAIS) programs provides training on how to prepare an Acquisition Program Baseline (APB), a Defense Acquisition Executive Summary (DAES), and a Selected Acquisition Report (SAR). Nunn-McCurdy unit cost reporting for MDAPs is also addressed. During the in-class lecture and computer-assisted case studies, the participants learn step-by-step report preparation using the Defense Acquisition Management Information Retrieval Web application. Participants are required to complete the DAU continuous learning module, Acquisition Reporting Concepts and Policy Requirements for APB, DAES, and SAR (CLB 014) prior to attending this class.

Course Length: 4 class days
Method of Delivery: Resident

BCF 211

Acquisition Business Management

Obtain hands-on experience in dealing with common financial issues in acquisition that include cost estimating; earned value analysis; planning, programming, budgeting, and execution; congressional enactment; and budget preparation and execution. In a 65-day window immediately prior to the resident portion of the course, participants must complete a self-paced review of basic concepts.

Course Length: Students have 65 days to complete online pre-course work; the resident portion is 5 class days
Method of Delivery: Resident

BCF 215

Operating and Support Cost Analysis

Participants learn the concepts and methodologies needed to develop operating and support cost estimates, total ownership cost reduction studies, cost as an independent variable,
management processes, and other management decisions in which operating and support costs are relevant.

**Course Length:** 4.5 class days  
**Method of Delivery:** Resident

**BCF 262**  
**EVMS Validation and Surveillance**

Gain the knowledge needed to review integrated management systems and to determine their compliance with the American National Standards Institute/Electronic Industries Alliance (ANSI/EIA) 748A Earned Value Management System (EVMS) standard. Course material, individual exercises, and group exercises review the 32 ANSI/EIA 748A EVMS guidelines and the processes associated with validation and surveillance of contractor and government integrated management systems.

**Course Length:** 8 class days  
**Method of Delivery:** Resident

**BCF 263**  
**Principles of Schedule Management**

The Principles of Schedule Management course provides knowledge needed to interpret network schedules required by DoD policy and the American National Standards Institute/Electronic Industries Alliance (ANSI/EIA) 748A Earned Value Management System (EVMS) standard. Course material, individual exercises, and group exercises using Microsoft Project demonstrate the schedule development/maintenance process. Two scored exercises require participants to create a Microsoft Project network schedule and apply a schedule assessment model to analyze a complex, 700-line Microsoft Project network schedule.

**Course Length:** 3 class days  
**Method of Delivery:** Resident

**BCF 301**  
**Business, Cost Estimating, and Financial Management Workshop**

This capstone course teaches professionals how to apply business, cost estimating, and financial management concepts, techniques, and on-the-job experience to functional interrelationships and opportunities among the disciplines of cost estimating, earned value management, and financial management.

**Course Length:** 9 class days  
**Method of Delivery:** Resident

**BCF 302**  
**Advanced Concepts in Cost Analysis**

The Advanced Concepts in Cost Analysis course is designed for mid- to senior-level cost estimators to apply their skills in developing and preparing cost estimates for all ACAT Levels within the MAIS and MDAP designation. Students will use their critical thinking and analytical skills to execute all steps in assessing credible, repeatable, and defensible cost estimates. Case study-driven practical exercises will require cost estimators to conduct research and perform leadership responsibilities in a small group decision-making environment.

**Course Length:** 5 class days  
**Method of Delivery:** Resident

**CON 090**  
**Federal Acquisition Regulation (FAR) Fundamentals**

FAR Fundamentals is a 4-week resident, foundational course for new hires that provides a total immersion into the Federal Acquisition Regulation (Parts 1-53) and the Defense Federal Acquisition Regulation Supplement (DFARS). The course will prepare the 21st century Defense Acquisition Workforce to operate successfully in a Web-enabled environment. CON 090 is a limited-lecture, research-intensive, exercise-based curriculum. Participants will analyze contracting business scenarios developed through research of the FAR and its supplements. The course is presented in four modules: Contracting Overview; Contract Planning; Contract Formation; and Contract Management. Students are expected to become familiar with FAR Parts 1-53. Students will be quizzed daily on knowledge of the FAR, lecture/lesson content, and homework. Students should be prepared to dedicate 2-3 hours per evening for homework. Classroom laptop computers will be provided for each student.

**Course Length:** 4 weeks in class  
**Method of Delivery:** Resident
CON 100

Shaping Smart Business Arrangements

Personnel new to the contracting career field will gain a broad understanding of the environment in which they will serve. Students will develop professional skills for making business decisions and for advising acquisition team members in successfully meeting customers’ needs. Before beginning their study of technical knowledge and contracting procedures, students will learn about the various DoD mission areas and the types of business arrangements and procurement alternatives commonly used to support each area. Information systems, knowledge management, as well as recent DoD acquisition initiatives also will be introduced in the course, which also will offer interactive exercises.

Course Length: Approximately 20 hours
Method of Delivery: Distance Learning

CON 115

Contracting Fundamentals

This course builds on the foundational elements of contracting gained from completing the prerequisite CON 090, FAR Fundamentals (classroom). The course is divided into three modules: Acquisition Planning and Developing the Customer’s Requirement, Mission Strategy Execution, and Mission Performance Assessment. Students are introduced to their role as a business advisor in the acquisition process. They learn basic mission support planning strategies, how to research the Federal Acquisition Regulation (FAR) and Defense Federal Acquisition Regulation Supplement (DFARS), how to conduct effective market research, how socioeconomic programs support the acquisition planning process and how to execute acquisition planning through solicitation and contract award, and also how to handle disputes and close out completed contracts.

Course Length: Approximately 45 hours
Method of Delivery: Distance Learning

CON 170

Fundamentals of Cost and Price Analysis

The course begins with an in-depth review of the Market Research process, and provides instruction to help students understand and analyze contractor pricing strategies. Students will learn to accomplish Cost-Volume-Profit analysis, calculate contribution margin estimates, and develop cost estimating relationships in order to accomplish an effective price analysis pursuant to FAR Subpart 15.4. The course provides an overview regarding the regulations and processes of cost analysis, and for requiring certified cost and pricing data. Finally, after learning the basic elements of price and cost analysis, students will build and defend a renegotiation objective, including a minimum and maximum pricing objective with a weighted guidelines assessment. After successfully defending their pricing objectives, students practice face-to-face negotiations.

Course Length: 5 class days
Method of Delivery: Resident

CON 200

Business Decisions for Contracting

Business Decisions for Contracting builds on contracting Level I pre-award business and contracting knowledge necessary to process complex procurements. The emphasis of this course is on planning successful mission-support strategies and executing an acquisition that optimizes customer mission performance. Participants will learn various techniques for building successful business relationships, the benefits of strategic sourcing and spend analysis, and the ins and outs of providing contract financing. Students will also take an in-depth look at subcontracting, how to conduct a formal source selection, and how to analyze the information necessary to determine contractor responsibility.

Course Length: Students have 60 calendar days to complete this course
Method of Delivery: Distance Learning

CON 216

Legal Considerations in Contracting

This course focuses on legal considerations in the procurement process. Participants are introduced to the basic principles and sources of law relevant to procurement, including fiscal law. The course also addresses various other legal issues that may develop during the course of a contract, such as protests, assignment of claims, disputes, fraud, contractor debt, performance issues, and contract termination.

Course Length: Students have 60 calendar days to complete this course
Method of Delivery: Distance Learning
CON 232
Overhead Management of Defense Contracts
Overhead Management of Defense Contracts provides an understanding of industry overhead costs and the costs’ impact on seller pricing/business strategies under various acquisition environments with differing contract types. Attendees will understand the development and application of overhead rates used in contract formation, administration, and closeout. The course-integrating case study provides hands-on application of the overhead-rate process in which attendees determine their own final overhead rates.

Course Length: 10 class days
Method of Delivery: Resident

CON 234
Joint Contingency Contracting
Joint Contingency Contracting develops skills for contracting support provided to Joint Forces across the full spectrum of military and disaster relief operations. Exercises focus on unique aspects of contingency, critical thinking skills, and the execution of appropriate contractual instruments.

Course Length: 9 class days
Method of Delivery: Resident

CON 235
Advanced Contract Pricing
Covering topics from price-based acquisition to the traditional cost-based environment, this course is designed for buyers, price analysts, and contracting officers tasked with obtaining fair and reasonable prices. CON 235 addresses market forces, the market research process, commerciality issues, and cost/price analysis techniques such as interviewing experts, analogy, decision theory, earned value statistics, parametrics, learning curves, and risk analysis.

Course Length: 10 class days
Method of Delivery: Resident

CON 237
Simplified Acquisition Procedures
Professionals participating in this course will gain training on Part 13 of the Federal Acquisition Regulation and Part 213 of the Defense Federal Acquisition Regulation Supplement, which cover simplified acquisition procedures (SAP).

Course Length: Students have 60 calendar days to complete this course
Method of Delivery: Distance Learning

CON 243
Architect-Engineer Contracting
This course, focusing on contracting for architect-engineers, covers issues across the contracting spectrum, including acquisition planning, source selection, proposal analysis, contract award and work, and contract management. Specific topics and practical exercises allow professionals to gain knowledge of the Brooks Act, SF-330, the slate and selection process, the review of government estimates, liability, Title II services, modifications, and contracting officer’s technical representative responsibilities.

Course Length: 5 class days
Method of Delivery: Resident

CON 244
Construction Contracting
This course focuses on construction contracting issues involving acquisition planning, contract performance management, funding, environmental concerns, construction contract language, construction contracting in the commercial setting, the Davis-Bacon Act, design/build, basic schedule delay analysis, constructive changes, acceleration, and construction contract quality management.

Course Length: 5 class days
Method of Delivery: Resident
CON 250
Fundamentals of Cost Accounting Standards—Part I

Fundamentals of Cost Accounting Standards—Part I provides detailed, hands-on instruction in the various aspects of Public Law 100-679, including the rules and regulations of the Cost Accounting Standards Board, cost accounting standards, and disclosure statements for federal contracts. This course addresses only those standards applicable to modified cost accounting standards coverage. Also addressed are those standards applicable to modified coverage, cost accounting practice changes and calculating cost impacts.

Course Length: 5 class days
Method of Delivery: Resident

CON 251
Fundamentals of Cost Accounting Standards—Part II

Fundamentals of Cost Accounting Standards—Part II provides detailed, hands-on instruction in the various aspects of Public Law 100-679, including the rules and regulations of the Cost Accounting Standards Board and cost accounting standards. Whereas Part I addresses only those standards applicable to modified cost accounting standards coverage, Part II addresses additional standards for full cost accounting standards coverage situations.

Course Length: 5 class days
Method of Delivery: Resident

CON 260A
The Small Business Program, Part A

The Small Business Program, Part A, provides an overview of the fundamentals of the DoD Small Business Program and focuses particular attention on the small business specialist’s role as a vital member of the acquisition team.

Course Length: Students have 24 calendar days to complete this course
Method of Delivery: Distance Learning

CON 260B
The Small Business Program, Part B

A follow-on course to CON 260A, this course focuses on developing the skills and knowledge necessary for a small business specialist. Associated programs and initiatives that support the program and DoD’s efforts to improve small business participation in both prime contracting and subcontracting will also be reviewed, with particular attention to the small business specialist’s role as a vital member of the acquisition team.

Course Length: 3 class days
Method of Delivery: Resident

CON 260
Intermediate Cost & Price Analysis

Intermediate Cost and Price Analysis continues to build upon the fundamental contract pricing principles covered in the Level I Contracting curriculum, Contract Pricing Reference Guide, and DoD Policy. The course is divided into three segments addressing contract pricing issues from pre-award, negotiation preparation–award, and post-award perspectives. In the course, students will be introduced to quantitative techniques and tools used to quantify and facilitate decision making in determining a fair and reasonable price. Students will apply various cost analysis techniques and quantitative tools to analyze a contractor’s cost proposal and to develop a government negotiation range and objective. The course is designed to prepare students for follow on DAWIA Level II certification courses, serve as a gateway into more advanced targeted contract pricing courses, and give the students some practical tools in pricing government contracts. The ultimate objective of the course is to help students become better business advisors in developing contract arrangements that are in the best interest of the government.

Course Length: 8 class days
Method of Delivery: Resident

CON 280
Source Selection and Administration of Service Contracts

This course builds on the foundation established through the Level I curriculum and the course prerequisites. The primary focus is on the acquisition of services under FAR Part 15 procedures, with an emphasis on performance-based acquisitions (PBA) for services, contract types, contract incentives, source selection, and contract administration. Students will learn the fundamentals of a performance-based service acquisi-
CON 360
Contracting for Decision Makers

Through realistic, scenario-based learning, students work individually and in teams to practice developing sound business solutions as valued strategic and expert business advisors. Students will learn to analyze complex contracting situations, with emphasis on critical thinking, problem solving, research, and risk reduction. Student course work is designed to contribute real solutions on real acquisition problems to senior leadership and local supervisors.

Course Length: 10 class days
Method of Delivery: Resident

CON 290
Contract Administration and Negotiation Techniques in a Supply Environment

In this case-based course, students apply contracting concepts and techniques learned in prerequisite courses to meet customer supply requirements and resolve complex contracting issues. Special emphasis is placed on applying legal concepts from CON 216, intermediate pricing concepts from CON 270, and negotiation techniques from HBS 428. Students experience the full spectrum of contracting processes and issues by following a supply requirement through all phases of the acquisition life cycle, from acquisition planning through contract close-out. Research, analysis, and communication skills are honed through development and presentation of a critical thinking project requiring in-depth focus on one area of contracting. Negotiation skills are sharpened through active student participation in two simulated contract negotiations.

Course Length: 9.5 classroom days
Method of Delivery: Resident

COR 222
Contracting Officer’s Representative Course

This course provides an overview of the responsibilities of the contracting officer’s representative, focusing on pre- and post-contract award duties and using numerous case-based scenarios. This is a fee-for-service on-site course delivered for requesting organizations after coordination between the organization’s representative and the appropriate DAU representative.

Course Length: 4.5 days
Method of Delivery: Resident

FE 201
Intermediate Facilities Engineering

Intermediate Facilities Engineering is required for Level II certification in Facilities Engineering. The course provides a broad understanding of the overall facilities engineering process and the roles/responsibilities of acquisition team members as they relate to the facility life cycle in support of military missions.

Course Length: Students have 60 calendar days to complete this course
Method of Delivery: Distance Learning

FE 301
Advanced Facilities Engineering

Advanced Facilities Engineering is the Level III certification course in the Facilities Engineering (FE) career field. Through
realistic, scenario-based learning, professionals work in teams to practice developing solutions to a variety of challenges that FE professionals encounter within DoD. Coursework is designed to teach professionals how to contribute solutions to senior leadership and how to provide resources for the FE career field via the course community of practice.

**Course Length:** 5 class days, preceded by required online assignments
**Method of Delivery:** Resident

### GRT 201
**Grants and Agreements Management**

Grants and Agreements Management presents the foundational knowledge required to work as a grants officer. Course participants learn about grants, cooperative agreements, and technology investment agreements. The course also provides a brief overview of other types of assistance transactions. Please note that this course does not address other transactions used to carry out prototype projects, which involve acquisitions instead of assistance, and therefore fall outside the scope of this course.

**Course Length:** 5 class days
**Method of Delivery:** Resident

### IND 200
**Intermediate Contract Property Administration and Disposition**

This course provides an overview of current contractual, regulatory, and statutory issues. Participants analyze case studies and participate in plant tours. The course is designed for experienced industrial property management specialists, property administrators, plant clearance officers, contracting officers, and their supervisors.

**Course Length:** 10 class days
**Method of Delivery:** Resident

### IRM 101
**Basic Information Systems Acquisition**

Within the framework of a program office IPT, this course covers introductory-level concepts in DoD information systems and software acquisition management. Key areas covered include DoD regulatory and technical frameworks, common software risks, software and system architectures, life-cycle reviews, and software development and integration processes. Software standards, information assurance, software and system measures, testing, contracting issues, software quality, and the role of process maturity, as well as best practices for the management of software-intensive systems are also introduced.

**Course Length:** Students have 60 calendar days to complete this course
**Method of Delivery:** Distance Learning

### IRM 202
**Intermediate Information Systems Acquisition**

The Intermediate Information Systems Acquisition course focuses on the application of DoD policies, concepts, and best practices for the management and acquisition of software-intensive and information technology systems. Exercises, lectures, group discussion, and a comprehensive student-led practicum are used in IRM 202 to cover topics ranging from strategic planning, information assurance, architectures, system engineering, requirements management, software design and development, risk management, contracting, cost estimation, metrics, process maturity, quality, and testing, among other areas.

**Course Length:** 10 class days
**Method of Delivery:** Resident
Distance Learning or Facilitated/Online

Resident/Local

**IRM 304**
Advanced Information Systems Acquisition

Via the use of case studies, the Advanced Information Systems Acquisition course focuses on decision making and management of the development of DoD information technology (IT) systems, the role of capital planning and investment control, use of enterprise architectures, information assurance, acquisition planning, and IT Systems Engineering. Supplemented with industry speakers who provide industry perspectives on IT management and contracting, IRM 304 integrates a variety of essential advanced topics critical to successful IT systems acquisition.

**Course Length:** 5 class days preceded by required online assignments
**Method of Delivery:** Resident

**LOG 103**
Reliability, Availability, and Maintainability (RAM)

Professionals who take this course will be able to understand the relationship between reliability, availability and maintainability (RAM) as a critical factor in design, performance, cost, and sustainment. The course addresses the cross-disciplinary actions of Program Management, Systems Engineering, Test and Evaluation, and both acquisition logistics and sustainment to evaluate the impact of reliability and maintainability decisions. Stressing a conceptual approach, the course presents basic RAM terminology and engineering practices. It discusses current legislation and DoD policy that have invigorated systems engineering and logistics engineering processes to improve the requirements process, minimize risk through reliability growth programs, and ensure effectiveness and suitability through developmental and operational test and evaluation.

**Course Length:** Students have 60 calendar days to complete this course
**Method of Delivery:** Distance Learning

**LOG 200**
Intermediate Acquisition Logistics, Part A

LOG 200 is the first part in a two-course series designed for intermediate acquisition logistics professionals. It provides a dynamic, real-time learning environment oriented toward developing the managerial and technical logistics competencies of the life cycle logistician. Special emphasis is placed on the roles and responsibilities of the life cycle logistician in the areas of regulatory environment, oversight, and review; management processes; technical activities; and the DoD planning, programming, budgeting, and execution process. The course requires participants to review current policy and guidance and demonstrate an understanding of how early integration of operational supportability into the system development process leads to achievement of DoD’s strategic logistics goals.

**Course Length:** Students have 60 calendar days to complete this course
**Method of Delivery:** Distance Learning
LOG 201

Intermediate Acquisition Logistics, Part B

LOG 201 is the second part in a two-course series designed for intermediate acquisition logistics professionals. The course provides a dynamic, group-based, facilitated learning environment oriented toward further developing logistics competencies required by the life-cycle logistician during weapons and equipment systems development. It challenges the professional to think critically, differentiate support alternatives, and provide solutions to ensure the early integration of operational supportability into the system development process. These skills are refined by instructor-facilitated group exercises and discussions. Special emphasis is placed on developing and delivering the required logistics inputs that ensure supportability is designed into a system.

Course Length: 5 class days
Method of Delivery: Resident

LOG 204

Configuration Management

This fast-paced, cross-disciplinary course teaches professionals about the interrelationship of configuration management to life-cycle activities as well as configuration management concepts and basic practices such as configuration identification, status accounting, audits and verification, configuration change management, performance measures, and configuration management planning. The course also provides an overview of requirements to design, develop, implement, oversee, and operate a configuration management program across the system life cycle. Professionals will gain knowledge of the application and impacts on configuration management by current and emerging issues such as total life cycle systems management, product data management, unique-item identification, evolutionary acquisition, performance-based logistics, condition-based maintenance, prognostics and health management, and diminishing manufacturing sources and material shortages.

Course Length: Students have 60 calendar days to complete this course
Method of Delivery: Distance Learning

LOG 206

Intermediate Systems Sustainment Management

The Intermediate Systems Sustainment Management course is a follow-on DAU course of instruction pertaining to DoD weapon system sustainment. The course provides a comprehensive understanding of logistics sustainment management principles and fundamentals including the roles, responsibilities and functions of a Logistician assigned to a major weapon systems acquisition program. The course explains the role of life cycle logistician during the sustainment phase of a weapon system’s life cycle; identifies concepts, policies, and practices of logistics/supply chain management as they apply to new and legacy systems during the sustainment phase of their respective life cycles; identifies best practices in developing and implementing Performance-Based Logistics support; explains materiel availability, materiel reliability, and mean down time principles; relates the principles contained in recent DoD guidance regarding logistics sustainment enablers; and explains the concepts of systems sustainment as described by DoDI 5000.02, para 3.9.

Course Length: Students have 60 calendar days to complete this course
Method of Learning: Distance Learning

LOG 235

Performance-Based Logistics

Performance-Based Logistics, Part A, provides a dynamic, real-time learning environment oriented toward developing a range of logistics competencies. It challenges the participant to review current policy and demonstrate an understanding of how early integration of performance-based support concepts into the systems-development process leads to the achievement of DoD’s logistics goals. It is intended for mid-level logistics professionals needing skills required to excel in today’s demanding and dynamic product-support environment.

Course Length: Students have 60 calendar days to complete this course
Method of Delivery: Distance Learning

LOG 340

Life Cycle Product Support

Life Cycle Product Support is designed to help prepare the life cycle logistician to perform in a senior-level life cycle logistics role over the life cycle of a system as a product support manager with emphasis on developing and implementing a life cycle product support strategy. Students will apply tools and
techniques from the 12 Step Product Support Strategy Process Model in analyzing and comparing alternative product support strategies for adoption. The course challenges students to think critically in instructor-facilitated group exercises to justify and make sound recommendations in coming up with the best mix of product support providers that will satisfy the warfighter’s outcome-based requirements.

**Course Length:** 4.5 class days  
**Method of Delivery:** Resident

**LOG 350**  
**Enterprise Life Cycle Logistics Management**

Enterprise Life Cycle Logistics Management prepares the life cycle logistician to perform in senior-level life-cycle logistics management and policymaking positions. Professionals are required to conduct research, engage in critical thinking exercises, and perform leadership responsibilities in a small group decision-making environment. Professionals engage in a dynamic, fast-paced, threaded exercise addressing complex relationships in life-cycle logistics support planning, acquisition policy, supportability analysis, program management, performance-based logistics, and business case analysis. The course spans a system’s entire life cycle from concept through demilitarization and disposal, including acquisition logistics planning events, and operations and support sustainment planning.

**Course Length:** 9.5 class days  
**Method of Delivery:** Resident

**PMT 202**  
**Multinational Program Management**

This course teaches the basics of international acquisition for members of the Defense Acquisition and International Affairs Workforces. The course emphasizes encouragement of armaments cooperation and interoperability with U.S. coalition and partner nations. National, DoD, and military department policies and regulations concerning international cooperative research, development, test, evaluation, production, and logistics support, as well as security assistance, are covered in some detail. The course identifies the roles and responsibilities of individuals, foreign governments, and industry involved in cooperative acquisition and security assistance programs. Students will learn about key types of agreements that promote U.S. international cooperation policy. The end goal is to provide the tools to prepare, formulate, and support a security assistance sale, direct commercial sale, cooperative acquisition, or hybrid international program.

**Course Length:** 5 class days  
**Method of Delivery:** Resident

**PMT 203**  
**International Security and Technology Transfer/Control**

This course teaches students to identify, analyze, and apply the laws, policies, and processes that govern International Security and Technology Transfer/Control. The course characterizes national security policy issues and export/import licensing constraints (as defined by the Departments of State, Commerce, and Defense) and guides evaluating their effects on domestic and international DoD programs. Students will learn the procedures for the export and import of defense and dual-use equipment and services, for handling classified and controlled unclassified program information, and for foreign visit control.

**Course Length:** 5 class days  
**Method of Delivery:** Resident

**PMT 251**  
**Program Management Tools Course, Part I**

This distance learning course consists of modules 1 through 8 of the former PMT 250 course. If you have completed PMT 250, you need not complete this course.

Program Management Tools provides application skills needed in a program office as an integrated product team lead. It is a follow-on course to ACQ 201B and is designed to enhance journeyman-level skills. This course prepares defense acquisition professionals for work in the program offices and for the Program Management Office Course, PMT 352, Parts A and B.

**Course Length:** Students have 60 calendar days to complete this course  
**Method of Delivery:** Distance Learning
### PMT 257
**Program Management Tools Course, Part II**
This facilitated online course consists of modules 9 and 10 of the former PMT 250 course. Students who have completed PMT 250 need not complete this course.

Program Management Tools provides application skills needed in a program office as an integrated product team lead. It is a follow-on course to PMT 251 and is designed to enhance journeyman-level skills. This course prepares defense acquisition professionals for work in the program offices and for the Program Management Office Course, PMT 352, Parts A and B.

- **Course Length:** 4 class days
- **Method of Delivery:** Facilitated/Online

### PMT 304
**Advanced International Management Workshop**
This course is designed to prepare professionals to participate effectively in the development and negotiation of defense armaments cooperation agreements ranging from simple data exchange annexes to complex cooperative development, production, and support agreements. Students who successfully complete this course will be able to synthesize, integrate, and apply U.S. policy on international cooperative defense acquisition, including policies of the Departments of Defense, State, Commerce, and Treasury. The final outcome of the week is formulating and practicing negotiation of international acquisition agreements in accordance with U.S. policies, statutes, and regulations.

- **Course Length:** 5 class days
- **Method of Delivery:** Resident

### PMT 313
**Advanced Technology Security/Control Workshop**
Reinforcing and advancing the principles of collective defense through security cooperation, the Advanced Technology Security/Control Workshop explores issues associated with the proper means of applying security principles and concepts and technology transfer. Professionals who successfully complete this course will be able to:

- Successfully navigate the technology security/control environment and effectively arrive at viable solutions
- Develop knowledge of and skills necessary to understand and apply U.S. arms export control policies
- Resolve the issues associated with international programs’ technology security/control

- **Course Length:** 4 class days
- **Method of Delivery:** Facilitated/Online

### PMT 352A
**Program Management Office Course, Part A**
The Program Management Office Course, Part A, is the first part of the Level III certification course in the Program Management career field. It is a follow-on to ACQ 201B and PMT 250 and is designed to train Level II certified professionals to be effective leaders in a program office by honing analysis, synthesis, and evaluative skills. PMT 352A focuses on key program management office knowledge and skills not covered in the prerequisite courses. This course must be completed prior to attending PMT 352B.

- **Course Length:** Students have 60 calendar days to complete this course
- **Method of Delivery:** Distance Learning

### PMT 352B
**Program Management Office Course, Part B**
The Program Management Office Course, Part B, is the second part of the Level III certification course in the Program Management career field. It is a follow-on to ACQ 201B and PMT 250 and is designed to train Level II certified professionals to be effective leaders in a program office by honing analysis, synthesis, and evaluative skills. In a classroom setting, PMT 352B gives attendees scenario-based practical exercises with topical themes such as interoperability, prototyping, and evolutionary acquisition.

- **Course Length:** 18.5 class days
- **Method of Delivery:** Resident

### PMT 400
**Program Manager’s Skills**
This course provides O-5/GS-14, Level-III PM Career Field acquisition professionals with the latest acquisition policies and proven practices in the areas of Requirements,
PMT 401  
Program Manager’s Course

This course is designed to improve DoD acquisition outcomes by strengthening the analytical, critical thinking, and decision-making skills of potential leaders of major defense acquisition programs and program support organizations. Applying the proven doctrine of “train as you fight,” participants analyze acquisition case studies representing contemporary acquisition program challenges and dilemmas; apply a broad cross section of knowledge of the acquisition environment and experience; and deepen their understanding of acquisition principles and practices through peer and instructor mentoring and coaching. Speakers, team projects, media training, and management simulations round out and enrich the course.

Target Attendees: Level III Program Management career field members who have demonstrated the potential to become major program or project managers. Also, limited numbers (up to 15 percent) of high-potential Level III acquisition professionals in other career fields, such as Contracting, Logistics, and Financial Management. Participants must be O-5 or GS-14 or above with extensive experience in acquisition, including 4 years in or directly supporting a program organization. Industry participants with equivalent experience are also sought. Board-selected ACAT I or II program managers should attend the course prior to beginning their assignment.

Course Length: 10 class days  
Method of Delivery: Resident
**PQM 201B**

*Intermediate Production, Quality, and Manufacturing, Part B*

This journeyman-level course requires participants to apply the manufacturing and quality planning processes and techniques learned in PQM 201A. Participants will work in integrated product teams to develop manufacturing and quality plans, apply lean techniques, use cost estimating techniques, and make progress payment recommendations based on completion of a physical progress review. Course content includes the contracting aspects of the job; use of continuous process improvement tools in a production environment; planning for manufacturing and quality; lean concepts; material control; and technical, ethical, and quality issues.

**Course Length:** 5 class days  
**Method of Delivery:** Resident

---

**RQM 110**

*Core Concepts for Requirements Management*

Core Concepts for Requirements Management allows professionals to study the role of both the requirements manager and requirements management within the “Big A” acquisition construct. It examines the capabilities and the process from an end-to-end perspective, highlighting the intersection between acquisition, resources, and requirements.

**Course Length:** Students have 60 calendar days to complete this course  
**Method of Delivery:** Distance Learning

---

**PQM 203**

*Preparation of Commercial Item Description for Engineering and Technical Personnel*

This course presents instruction on the preparation and use of commercial item descriptions, including characterization of commercial items, the development and use of market acceptability criteria, and the development of performance-based salient characteristics. Current policy on the use of commercial item descriptions and performance specifications is discussed. This course uses an interactive, asynchronous learning environment focused on self-paced learning that is demonstrated in a virtual group environment.

**Course Length:** Approximately 12 hours within 15 calendar days  
**Method of Delivery:** Facilitated/Online

---

**RQM 310**

*Advanced Concepts and Skills for Requirements Management*

Advanced Concepts and Skills for Requirements Management studies the functions of requirements managers and their supervisors. RQM 310 begins by reviewing the prerequisite material, Capability-Based Assessments (CBAs), and developing requirements. The course continues by examining the requirements manager’s interactions with the Defense Acquisition System (DAS), within the Joint Capabilities Integration and Development System (JCIDS), and with Functional Capability Boards (FCBs).

**Course Length:** 4.5 class days  
**Method of Delivery:** Resident

---

**PQM 301**

*Advanced Production, Quality, and Manufacturing*

This rigorous leadership course is structured around integrated production, quality, and manufacturing processes. Professionals will learn and practice advanced production and quality approaches supporting DoD acquisition activities. Key areas covered include problem-solving and decision-making issues relevant to successfully managing core technical areas.

**Course Length:** 10 class days  
**Method of Delivery:** Resident

---

**RQM 403**

*Requirements Management Executive Overview*

This course provides general officers, flag officers, and members of the Senior Executive Service with an executive-level understanding of the role of the requirements manager and of requirements management within the “Big A” acquisition construct. It examines the capabilities and process from an end-to-end perspective, highlighting the intersection between acquisition, resources, requirements, and the supporting processes. DAU has tailored RQM 403 to the needs of the executive and conducts the course on demand. Section 801 of the National Defense Authorization Act of Fiscal Year 2007 requires the Under Secretary of Defense for Acquisition, Technology and Logistics to establish competency requirements and a training program to certify DoD military and civilian personnel with responsibility for generating requirements for
Major Defense Acquisition Programs (MDAPs). This training meets the certification requirement for executives.

**Target Attendees:** This course is for DoD general/flag officers, career and political Senior Executive Service personnel with position duties that involve either leading or supervising the writing of MDAP requirements documents; adjudicating substantive comments concerning MDAP documents; validating or approving an MDAP requirements document; or participating in the approval chain for the document (for example, Functional Capabilities Board, Air Force Requirements Oversight Council, Army Requirements Oversight Council, and Resources and Requirements Review Board members).

**Course Length:** Varies depending upon the number of topics to be addressed; typically 1 class day

**Method of Delivery:** Resident

---

**RQM 413**

**Requirements Executive Overview (REO)**

DAU developed RQM 404 to meet the needs of the top executives and military officers and conducts the course on demand. This course provides four-star general officers, flag officers, and equivalent members of the Senior Executive Service with a top-level understanding of the role of requirements management within the “Big A” acquisition construct. It highlights the intersection between acquisition, resources, requirements, and the supporting processes. Section 801 of the National Defense Authorization Act of Fiscal Year 2007 requires the Under Secretary of Defense for Acquisition, Technology, and Logistics to establish competency requirements and a training program to certify DoD military and civilian personnel with responsibility for generating requirements for Major Defense Acquisition Programs (MDAPs). This training meets the certification requirement for four-star-level executives.

**Course Length:** Approximately 2 hours

**Method of Delivery:** Resident

---

**SAM 101**

**Basic Software Acquisition Management**

Within the framework of a program office IPT, this course covers introductory-level concepts in DoD information systems and software acquisition management. Key areas covered include DoD regulatory and technical frameworks, common software risks, software and system architectures, life cycle reviews, and software development and integration processes. Software standards, information assurance, software
and system measures, testing, contracting issues, software quality, and the role of process maturity, as well as best practices for the management of software-intensive systems are also introduced.

**Course Length:** Students have 60 calendar days to complete this course  
**Method of Delivery:** Distance Learning

### SAM 301  
**Advanced Software Acquisition Management**

Advanced Software Acquisition Management is the capstone course in the IT career field Level III certification sequence. SAM 301 is a seminar-based course for personnel in the IT career field who acquire, manage, engineer, test, and evaluate DoD software-intensive and IT systems. Via a series of student-led short research topics that are supplemented with senior-level guest lectures on current topics, SAM 301 provides insight into the risks, issues, and future challenges associated with developing and leading the development of DoD IT and software systems.

**Course Length:** 5 class days  
**Method of Delivery:** Resident

### STM 202  
**Intermediate S&T Management**

This course provides, for personnel associated with Science and Technology (S&T) project management and others, an understanding of the procedures and mechanisms DoD uses to transition advanced technologies into warfighting systems. Students will be able to describe the challenges in successfully transitioning technologies into DoD’s weapons systems acquisition process or transitioning them directly to the warfighter; to assess the implications of various technology transition mechanisms; and to apply effective technology transition practices.

**Course Length:** 3 class days  
**Method of Delivery:** Resident

### SYS 101  
**Fundamentals of Systems Planning, Research, Development, and Engineering**

This course is a technically rigorous, comprehensive introduction to systems engineering and the various technical management processes involved in its application. Based on the systems engineering processes outlined in the Defense Acquisition Guidebook, SYS 101 provides the essential foundations needed for systems planning, research, development, and engineering careerists and others—such as program management personnel and life cycle support managers—to effectively participate in the application and the management of DoD systems engineering processes and their related activities.

**Course Length:** Students have 60 calendar days to complete this course  
**Method of Delivery:** Distance Learning

### SYS 120  
**Defense Standardization Workshop**

The Defense Standardization Workshop covers DoD policies and procedures for developing, managing and using non-government standards, commercial item descriptions, and specifications and standards. Individual and group practical exercises emphasize the application of standardization tools, policies, and procedures described in CLE 028 Market Research for Technical Personnel, CLE 064 Standardization in the Acquisition Life Cycle, and CLE 065 Standardization Documents.

**Course Length:** 2.5 class days  
**Method of Delivery:** Resident
SYS 130
Specification Selection and Application

The Specification Selection and Application course provides instruction on the appropriate selection and correct application of nongovernmental standards, commercial item descriptions, specifications and standards, and related documents in the acquisition process. Emphasis is placed on current acquisition initiatives such as interoperability and the proper use of standardization documents.

Course Length: 2 class days
Method of Delivery: Resident

SYS 202
Intermediate Systems Planning, Research, Development, and Engineering, Part I

This distance-learning course provides an understanding of how DoD’s systems engineering technical and technical management processes can be applied to a notional system within the context of the acquisition life cycle. Course content includes the scope and role of systems engineering and its major technical inputs and outputs, timing of technical baselines, the role of technical reviews, important design considerations, and other related areas.

Course Length: Students have 60 calendar days to complete this course
Method of Delivery: Distance Learning

SYS 203
Intermediate Systems Planning, Research, Development, and Engineering, Part II

This course allows students to use the DoD systems engineering processes and techniques learned in SYS 202. Participants will work in integrated product teams and apply systems engineering technical processes and technical management processes to a defense system as its development progresses across the various phases of the acquisition life cycle.

Course Length: 5 class days
Method of Delivery: Resident
SYS 302
Technical Leadership in Systems Engineering

Designed for senior DoD acquisition personnel, SYS 302 is focused on the application of technical leadership skills within a typical DoD systems engineering environment. SYS 302 participants are expected to have sufficient background knowledge of the DoD’s systems engineering management processes, knowledge of the application of systems engineering to each acquisition phase, and the capability to apply these concepts to complex technical management problems involving critical thinking. As part of the SYS 302 course, participants will lead and participate in an engineering team that analyzes and resolves a variety of technical engineering critical issues. Class exercises are supplemented by lessons on current policy, architectures, and design considerations.

Course Length: 10 class days
Method of Delivery: Resident

TST 102
Fundamentals of Test and Evaluation

The Fundamentals of Test and Evaluation course emphasizes basic DoD test and evaluation (T&E) principles, policies, processes, and practices. TST 102 covers the integrated T&E processes outlined in the Defense Acquisition Guidebook and provides the essential foundation knowledge needed by T&E professionals and others to more effectively participate in DoD T&E activities.

Course Length: Students have 60 calendar days to complete this course
Method of Delivery: Distance Learning

TST 203
Intermediate Test and Evaluation

This course builds upon professionals’ knowledge, skills, and on-the-job experience relating to DoD test and evaluation (T&E) policies, processes, and practices. A number of problem-solving situations engage participants in the application of T&E concepts and principles. Course topics include the role of T&E in systems acquisition; T&E planning and the test and evaluation strategy; test and evaluation master plan development; managing a T&E program; and planning, conducting, and processing the results of T&E events.

Course Length: 5 class days
Method of Delivery: Resident

TST 303
Advanced Test and Evaluation

Designed for senior DoD acquisition personnel, the Advanced Test and Evaluation (T&E) course is focused around leadership and management issues in a T&E environment. TST 303 involves facilitated discussion of current DoD policies, strategies, processes, and practices as they are applied and used for the planning and management T&E for DoD systems. This course covers a variety of knowledge-building and interactive problem-solving skills using case studies developed around lessons learned from actual system acquisitions. Class discussion and study group efforts culminate in participant presentations based around case analysis and solution analysis. Knowledge and skills developed in this course will facilitate successful professional participation as a T&E member in integrated planning and development activities for major programs.

Course Length: 5 class days
Method of Delivery: Resident
See pages 128-133 for course registration procedures.

Appendix C
Business

CLB 007
Cost Analysis

Cost Analysis focuses on the basic cost analysis process, which is one of the fundamental building blocks of any acquisition program. At the end of this module, you should be able to define various financial management terms as they relate to the defense acquisition process, determine when various cost estimates should be prepared, what estimating methodology is most appropriate, and what cost data are of interest to various program stakeholders.

Course Length: Approximately 3.5 hours

CLB 008
Program Execution

Program Execution describes the budget execution process, including the legal concerns and potential impact of poor budget execution. At the end of this module, you should be able to describe the apportionment process (including rules for deferral and rescission), describe the funds execution process and laws that govern it, identify the purposes and contents of obligation and expenditure plans, and identify rules for reprogramming.

Course Length: Approximately 3 hours

CLB 009
Planning, Programming, Budgeting, and Execution and Budget Exhibits

Planning, Programming, Budgeting, and Execution and Budget Exhibits focuses on explaining the planning, programming, budgeting, and execution (PPBE) process, including the relationship of each phase to the systems acquisition process. At the end of this module, you should be able to recall the primary purpose of each of the phases of PPBE, identify the inter-relationship between PPBE and the defense acquisition system, and identify the purpose, content, and dimensions of the Future Years Defense Program.

Course Length: Approximately 3 hours

CLB 010
Congressional Enactment

Congressional Enactment focuses on appropriations and the funding policies that are associated with each appropriation. It relates a defense acquisition program's cost estimate to its programming and budgeting requirements.

Course Length: Approximately 3.5 hours

CLB 011
Budget Policy

Budget Policy focuses on appropriations and the funding policies that are associated with each appropriation. It will relate a defense acquisition program's cost estimate to its programming and budgeting requirements. At the end of this module, you should be able to identify the major appropriation categories of interest to the defense acquisition community, identify the funding policy that applies to each, recognize situations where exceptions to the funding policies are appropriate, and identify the most appropriate time-phased budget estimate to a given situation.

Course Length: Approximately 4.5 hours

CLB 014
Acquisition Reporting Concepts and Policy Requirements for APB, DAES, and SAR

This module provides information on the terminology, concepts, and policies pertaining to required acquisition reports such as the Acquisition Program Baseline (APB), the Defense Acquisition Executive Summary (DAES), and the Selected Acquisition Report (SAR). Upon completion of the module, students will be able to apply these concepts and policies in the preparation and review of reports generated using the Consolidated Acquisition Reporting software.

Course Length: Approximately 3 hours

CLB 016
Introduction to Earned Value Management

The Introduction to Earned Value Management module introduces the basics of earned value management (EVM) as it relates to acquisition program management. You will learn the
five independent earned value variables and the three most common EVM metrics. At the conclusion of this module, you should be familiar with EVM-related laws passed by Congress, the Office of Management and Budget’s implementation of these laws, and current DoD policy guidance regarding EVM requirements. Additionally, you should recognize how work scope, schedule, and resources are combined to establish the EVM performance measurement baseline.

**Course Length:** Approximately 1 hour

---

**CLB 017**

**Performance Measurement Baseline**

The Performance Measurement Baseline module introduces the earned value management language and processes associated with developing the performance measurement baseline. The course defines the concepts of total allocated budget, negotiated contract cost, authorized unpriced work, contract budget baseline, over-target baseline, summary-level planning packages, undistributed budget, management reserve, and the performance measurement baseline. The module describes a generic process for developing performance measurement baselines. It concludes by explaining the most common earned value techniques and relating the relative desirability and risks associated with each.

**Course Length:** Approximately 2 hours

---

**CLB 018**

**Earned Value and Financial Management Reports**

The Earned Value and Financial Management Reports module reviews the most common DoD data reports associated with earned value management, cost estimating, and financial management. It examines the purpose and relationship between the data item description and the contract data requirements list; identifies key players and purposes in reports; and outlines the DoD contract performance report and integrated master schedule tailoring guidance provided in the *Earned Value Management Implementation Guide*.

**Course Length:** Approximately 1 hour

---

**CLB 019**

**Estimate at Completion**

The Estimate at Completion module reviews the process for computing an estimate at completion range when given earned value management data. It defines the meaning of the cost performance index, the schedule performance index, and the to-complete performance index (TCPI) earned value metrics; reviews favorable and unfavorable trends cost performance index and schedule performance index performance trend charts; and walks through the calculations needed to compute an estimate at completion range by using the standard earned value management estimate at completion equation.

**Course Length:** Approximately 1 hour

---

**CLB 020**

**Baseline Maintenance**

The Baseline Maintenance module reviews the concepts associated with performance measurement baseline maintenance. It describes the Contract Performance chart and the cost/schedule variance earned value management metrics chart; defines what a front-loaded baseline, rubber baseline, over-target baseline, and single-point adjustment mean in the context of earned value management; and provides exercises in which students apply the knowledge they have gained.

**Course Length:** Approximately 1 hour

---

**CLB 023**

**Software Cost Estimating**

The Software Cost Estimating module provides an overview of DoD’s policy, guidance, and application of software cost estimating, and it enables the business or program manager to determine if an estimate is realistic and defendable.

**Course Length:** Approximately 2 hours

---

**CLB 024**

**Cost Risk Analysis Introduction**

The Cost Risk Analysis Introduction module provides the foundation for an understanding of risk management as it relates to cost estimation. It addresses program risks that help ensure program costs, schedule, and performance objectives are met.

**Course Length:** Approximately 3 hours
CLB 026
Forecasting Techniques
The goal of this module is to provide the learner with information on forecasting for the Defense Acquisition Workforce. This will include various forecasting techniques, approaches, and practical exercises, all designed to give the learner foundational knowledge of forecasting.

Course Length: Approximately 2 hours

CLB 029
Rates
The Rates module introduces the basics of wrap rate development as it relates to cost estimating. At the conclusion of this module, you should be familiar with and be able to describe portions of a cost estimate that require the use of wrap rate calculations. You will also be able to describe the components for building an estimate using engineering standards as well as calculate a wrap rate or Fully Burdened Labor Rate (FBLR).

Course Length: Approximately 2 hours

CLB 030
Cost Data Sources
The Cost Data Sources module introduces the basics of data sources and collection as they relate to cost estimating. At the conclusion of this module, you should be familiar with and be able to describe various data sources used in the construction of a cost estimate. You will also be able to explain the necessity of having programmatic and technical data in addition to cost data as well as give illustrations of various problems relating to the collection and analysis of data.

Course Length: Approximately 2 hours

Contracting

CLC 001
Defense Subcontract Management
This module provides an overview of the laws, government policies, and regulations that apply to subcontracts and subcontract management. The module addresses subcontracting activities from the perspective of the staff of a defense acquisition program office. Topics include: small business subcontracting plans; contractor purchasing system reviews and consent to subcontract; flow-down clauses; subcontract pricing; subcontract administration; and other topics in subcontracting.

Course Length: Approximately 4 hours

CLC 003
Sealed Bidding
The Sealed Bidding module builds upon the sealed bidding process presented in CON 110, Mission Support Planning. This course is designed to provide acquisition professionals experience in understanding and reviewing sealed bidding concepts and processes when contracting for supplies and services.

Course Length: Approximately 2 hours

CLC 004
Market Research
This module provides a foundational understanding of the benefits of effective market research to reduce acquisition costs and cycle times, and provide greater access to advanced technologies. The module covers the differences between tactical and strategic market research, and how to consolidate market research results to develop an acquisition strategy.

Course Length: Approximately 3 hours

CLC 005
Simplified Acquisition Procedures
This module is an interactive tutorial designed to provide federal procurement and acquisition professionals with a better understanding of contracting for supplies and services using simplified acquisition procedures. Please note that this module does not provide credit for CON 237.

Course Length: Approximately 2 hours

CLC 006
Contract Terminations
There are many ways to terminate the obligations of a contract. Most often, parties conclude their contract obligations by performing them. However, sometimes problems arise and parties cannot or will not complete their obligations under
the contract. By completing this module, you will be able to prepare and process a termination notice when appropriate.

**Course Length:** Approximately 2 hours

**CLC 007**

**Contract Source Selection**

This interactive module is designed to provide federal procurement and acquisition professionals with a better understanding of the source selection process and its goals. The module covers planning for source selection, the source selection organization, roles of source selection team members, and notifications and debriefings of offerors. The module emphasizes the importance of close communication between the government and offerors throughout the source selection process.

**Course Length:** Approximately 3 hours

**CLC 008**

**Indirect Costs**

An indirect cost is any cost not directly identified with a single, final cost objective, but rather is identified with two or more final cost objectives. Indirect costs are used for the pricing of contracts, interim contract billing, and the determination of actual contract costs. The purpose of this training module is to serve as a primer for those who are unfamiliar with indirect costs. The module can help prepare those who are planning to take CON 250.

**Course Length:** Approximately 1 hour

**CLC 009**

**Service-Disabled, Veteran-Owned Small Business Program**

The Service-Disabled, Veteran-Owned Small Business Program provides certain benefits for businesses owned by service-disabled veterans seeking contracts with the federal government. This training module explains the basic requirements of the program.

**Course Length:** Approximately 1 hour

**CLC 011**

**Contracting for the Rest of Us**

This module provides people who do not work in the Contracting career field with a basic knowledge of some of the essential processes and considerations that DoD Contracting professionals encounter to satisfy their customers' requirements. The module also provides an introduction to some of the topics that are covered in greater depth in other Contracting modules.

**Course Length:** Approximately 2 hours

**CLC 012**

**Contracting Officer’s Representative Overview (HCAA)**

The Contracting Officer’s Representative Overview for the Health Care Acquisition Activity (HCAA), U.S. Army Medical Command course provides students with a general knowledge of the varied roles and responsibilities involved in the contracting process. The course also provides insight for non-contracting personnel on the processes and procedures associated with contracting.

**Course Length:** Approximately 4 hours

**CLC 013**

**Services Acquisition**

This module describes a disciplined seven-step process for the acquisition of services, using the requirements roadmap process to define high-level objectives and tasks, standards, allowable variations, and method of inspection. It will teach the student how to develop acquisition documents such as the performance work statement (PWS) and quality assurance surveillance plan (QASP).

**Course Length:** Approximately 3 hours
CLC 020
Commercial Item Determination

The Commercial Item Determination module is designed to aid acquisition personnel in developing sound business strategies for procuring commercial items. It provides professionals a clear understanding of the guidance and tools contained in the Commercial Item Determination Handbook, which is a practical reference tool for use in commercial item acquisitions.

Course Length: Approximately 3.5 hours

CLC 023
Commercial Item Determination Executive Overview

This self-paced module explores the commercial item determination process as outlined in the Commercial Item Determination Handbook. The handbook is a practical reference tool for use in commercial item acquisitions. DoD has designed this module to aid acquisition personnel in developing sound business strategies for procuring commercial items, and to gain a clear understanding of the guidance and tools contained in the Commercial Item Determination Handbook.

Course Length: Approximately 30 minutes

CLC 024
Basic Math Tutorial

This Basic Math Tutorial module is provided for CON 217 students as well as anyone interested in increasing their basic math skills. Mathematics is a necessary and useful tool when determining price and cost reasonableness. Several performance support tools exist that can assist you with many of the calculations to accomplish your job; however, you may still need to perform your own calculations without the aid of a tool or calculator, and this module will help you practice the skills you’ll need to complete calculations without tools.

Course Length: Approximately 30 minutes

CLC 026
Performance-Based Payments Overview

This module presents an overview of the fundamental concepts of performance-based payments (PBPs) and the guidance necessary for implementing a PBP financing structure as part of a fixed-price contract.

Course Length: Approximately 1 hour

CLC 027
Buy American Act

The Buy American Act training module provides explanatory materials and practical examples that explain FAR Part 25 and DFARS 225, which make up the Buy American Act. This module is intended for contract specialists and contracting officers.

Course Length: Approximately 3 hours

CLC 028
Past Performance Information

This self-paced module addresses the rationale behind collecting past performance information, why it should be used, and how its use improves contractor performance. This module is based on the DoD Past Performance Integrated Product Team (IPT) Guidebook titled, A Guide to Collection and Use of Past Performance Information, which can be found at: http://www.acq.osd.mil/dpap/Docs/PPI_Guide_2003_final.pdf.

Course Length: Approximately 3 hours

CLC 030
Essentials of Interagency Acquisitions/Fair Opportunity

The module is designed to provide DoD acquisition professionals with a better understanding of the need to ensure that non-DoD contracting instruments are appropriately used by DoD. It provides an overview of current policy; key concepts and requirements on scope, competition, and fiscal law; and the roles and responsibilities of the requesting activities and assisting agencies.

Course Length: Approximately 2.5 hours

CLC 031
Reverse Auctioning

Reverse Auctioning is a self-paced module that provides a basic introduction of a new, Internet-based contracting
A-76 Competitive Sourcing Overview

The A-76 Competitive Sourcing Overview module is an introduction to the Office of Management and Budget Circular A-76 that implements the President’s Management Agenda for Competitive Sourcing. This overview course discusses the FAIR Act and A-76 program concepts, including the overall process, roles and responsibilities, legislation that affects DoD, and post-competition accountability.

Course Length: Approximately 1.5 hours

Contingency Contracting Simulation: Barda Bridge

The Barda Bridge simulation provides professionals with an immersion experience in pre-deployment and deployment decision making. It will provide feedback on how your decisions as a deploying individual and contingency contracting officer impact your family back home as well as your mission forward.

Course Length: Approximately 2 hours

Predictive Analysis and Scheduling

The Predictive Analysis and Scheduling module provides an overview of the various types of schedules that are used by Defense Contract Management Agency personnel and a background of how predictive analysis is utilized to determine and maintain schedules.

Course Length: Approximately 1 hour

Predictive Analysis and Systems Engineering

The Predictive Analysis and Systems Engineering module provides an overview of how predictive analysis plays a role in systems engineering. Professionals also learn about various systems engineering tools.

Course Length: Approximately 1 hour
CLC 042
Predictive Analysis and Quality Assurance

The Predictive Analysis and Quality Assurance module provides an overview of quality assurance activities and how they relate to the use of predictive analysis as a tool to form assumptions of future events.

Course Length: Approximately 1 hour

CLC 043
Defense Priorities and Allocations System

The goal of the Defense Priorities and Allocations System (DPAS) module is to ensure that government and industry users are thoroughly familiar with the priorities and allocations authority of the Defense Production Act. It also reveals the purpose of DPAS, which is to assure the timely availability of industrial resources to meet current and future national security and emergency preparedness requirements.

Course Length: Approximately 3 hours

CLC 044
Alternative Dispute Resolution

Alternative Dispute Resolution is a tool for resolving contract disputes without litigation. This module explains how to effectively use this tool when disputes arise.

Course Length: Approximately 4 hours

CLC 045
Partnering

The Partnering module is an overview of the benefits of developing good government-contractor relationships. The partnering concept, designed to enhance contractor performance—a key component of alternative dispute resolution—is one method used to prevent disputes as well as minimize disputes when/if they should occur.

Course Length: Approximately 2 hours

CLC 046
Green Procurement

Green procurement is the purchase of products and services with favorable energy or environmental attributes in accordance with federally mandated “green” procurement preference programs. DoD’s Green Procurement Program is a comprehensive strategy for implementing environmentally preferred practices while sustaining the overall mission. The overall objective of this lesson is to identify the objectives and background of DoD’s Green Procurement Program.

Course Length: Approximately 2 hours

CLC 047
Contract Negotiation Techniques

This module will help professionals obtain a better understanding of various analysis techniques and tools to use in the development of a contract’s negotiation range. After completion of this course, professionals will be better prepared to develop strategies for their contract negotiations.

Course Length: Approximately 2 hours

CLC 050
Contracting with Canada

The Contracting with Canada module provides professionals with an overview of the policies and procedures used when dealing and contracting with Canadian companies. This tutorial has been developed with the assistance of the Canadian Commercial Corporation, Canada’s international contracting agency responsible for U.S. defense contracting in Canada.

Course Length: Approximately 1 hour

CLC 051
Government Property

This module provides an overview of the policies, processes, and procedures used to manage government property in the possession of contractors.

Course Length: Approximately 1.5 hours
Continuous Learning Modules

**CLC 054**

**Electronic Subcontracting Reporting System (eSRS)**

The Electronic Subcontracting Reporting System (eSRS) module is an overview of the primary purpose of eSRS, which is to provide insight and transparency as to how government contracting dollars are being distributed among small and small disadvantaged businesses. The Internet-based eSRS streamlines the reporting process of subcontracting plans and provides agencies with access to analytical data on subcontracting performance.

**Course Length:** Approximately 1.5 hours

**CLC 055**

**Competition Requirements**

This module is structured to emphasize key concepts for promoting competition, appropriate to all personnel involved in the requirements and acquisition process. Competition is the cornerstone of the acquisition process. This training addresses responsibilities, policies, and procedures critical for ensuring that DoD funds are properly spent to obtain the right equipment, supplies, and services at the right price and on time. Maximizing competition is vital for delivering value to the warfighter and the American taxpayer.

**Course Length:** Approximately 2 hours

**CLC 056**

**Analyzing Contract Costs**

Here the student assumes the role of a contract specialist/intern who has been afforded the opportunity to work with the contracting officer of a large complex base operating services contract. The contracting officer acts as a mentor, providing guidance and direction as the student performs various cost and price analysis tasks presented in the course. The module involves simulation and is highly interactive, requiring active participation.

**Course Length:** Approximately 17 hours

<tbody>
<tr>
<td>CLC 057</td>
<td>Performance-Based Payments and Value of Cash Flow</td>
<td>This course provides an overview and introduction to Performance Based Payments (PBP) in structuring and negotiating Win-Win PBP agreements with contractors. A tutorial on the use of the Cash Flow model also is provided.</td>
<td>Approximately 4 hours</td>
</tr>
<tr>
<td>CLC 058</td>
<td>Introduction to Contract Pricing</td>
<td>This course will introduce students to the policies and procedures regarding contract pricing, cost accounting standards, and contract cost principles; proposal analysis techniques, Truth in Negotiations Act (TINA) requirements, defective pricing, and the importance of documenting contract negotiations. CLC 058 is intended to be the students' first exposure to this content and serves as a pricing “primer” and a prerequisite to CON 170, Fundamentals of Cost and Price Analysis.</td>
<td>Approximately 2 hours</td>
</tr>
<tr>
<td>CLC 060</td>
<td>Time and Materials Contracts</td>
<td>The Time and Materials Contracts module provides professionals with an overview of new time and materials contracting policies—including links to the Federal Acquisition Regulation and Defense Federal Acquisition Regulation Supplement changes—and examples of how those documents should be used.</td>
<td>Approximately 1 hour</td>
</tr>
<tr>
<td>CLC 061</td>
<td>Online Representations and Certifications Application (ORCA)</td>
<td>The goal of this module is to introduce the defense acquisition community to the use of the ORCA system in the representations and certifications process. The module will explain how ORCA automates the representations and certifications process, and demonstrate to vendors and contracting officials how to use the system.</td>
<td>Approximately 2 hours</td>
</tr>
<tr>
<td>CLC 062</td>
<td>Intra-Governmental Transactions</td>
<td>This module provides an introduction and overview of Intra-Governmental Transactions (IGTs). The module will introduce the basics of IGTs and the root causes of certain challenges, while introducing strategies for addressing problems. An in-depth study of the intra-governmental process through the Business Enterprise Architecture (BEA) and the Intra-governmental Value Added Network (IVAN) system is provided.</td>
<td>Approximately 3 hours</td>
</tr>
<tr>
<td>CLC 102</td>
<td>Administration of Other Transactions</td>
<td>This module is specifically about the administration of other transactions, 10 U.S.C. 237, which are conducted outside most federal procurement laws and regulations. This module is designed to help professionals distinguish other transactions from contracts, grants, and cooperative agreements; understand what regulations govern other transactions; learn responsibilities of the various parties involved in managing other transactions; describe the financial implications of other transactions; explain intellectual property, data, and real property rights under other transaction arrangements; and know the issues involved with modification and termination of other transactions.</td>
<td>Approximately 1.5 hours</td>
</tr>
<tr>
<td>CLC 103</td>
<td>Facilities Capital Cost of Money</td>
<td>This module will help professionals learn to develop a pre-negotiation position for facilities capital cost of money that is fair and reasonable, given market research and proposed information from the organization providing the offer. Professionals will learn to recognize elements affecting facilities capital cost of money, identify the steps to calculate the facilities capital cost of money (using DD Form 1861), and calculate facilities capital cost of money.</td>
<td>Approximately 1.5 hours</td>
</tr>
<tr>
<td>CLC 104</td>
<td>Analyzing Profit or Fee</td>
<td>Determining profit or fee involves rewarding the contractor for performance and acceptance of risk. But what is a reason-</td>

CLC 110
**Spend Analysis Strategies**

The Spend Analysis Strategies module describes one of several tools DoD and the federal government are using to gain critical insights into the procurement history and spend patterns for purchased goods and services. Ultimately, a spend analysis contributes to the foundation for identifying valuable strategic sourcing improvement opportunities.

**Course Length:** Approximately 1 hour

CLC 112
**Contractors Accompanying the Force**

This brief module will address the roles and responsibilities of a commander in planning for the use of contractors authorized to accompany U.S. armed forces, with a focus on the guidance in DoDI 3020.41, *Contractor Personnel Authorized to Accompany the U.S. Armed Forces*. The module will also introduce basic acquisition and contract management requirements related to implementing DoDI 3020.41 in field conditions.

**Course Length:** Approximately 1 hour

CLC 113
**Procedures, Guidance, and Information**

The Procedures, Guidance, and Information (PGI) module is a companion resource to the DFARS. The PGI is a Web-based tool to simply and rapidly access guidance and information relevant to Federal Acquisition Regulation and DFARS topics.

**Course Length:** Approximately 1 hour

CLC 114
**Contingency Contracting Officer Refresher**

It is important that contingency contracting officers (CCOs) be provided with the training they need to excel during their assignments. CCOs need to apply sound procurement techniques, understand funding implications, and effectively administer their contracts while demonstrating exemplary integrity and ethics. CCOs help DoD to accomplish its contingency mission and funnel much-needed funds into regional economies.

**CLE 001**

**Value Engineering**

Value Engineering (VE) is recognized as an effective technique for reducing costs, increasing productivity, and improving quality-related features of systems, equipment, facilities, services, and supplies for the purpose of achieving the essential functions at the lowest life cycle cost consistent with required performance. This module provides an overview of VE from both the acquirer and contractor perspective; how VE can be applied and implemented; and how VE change proposals can be effectively used.

**Course Length:** Approximately 3 hours

**CLE 003**

**Technical Reviews**

This module provides a systematic process for employing Technical Reviews to assess design maturity, technical risk, development status, and programmatic risk for acquisition programs. The module also presents essential, practical guidelines on the effective use of Technical Reviews as part of the DoD acquisition life cycle and also provides access to detailed, tailorable checklists for individual technical reviews that can be used to support their conduct.

**Course Length:** Approximately 3 hours

**CLE 004**

**Introduction to Lean Enterprise Concepts**

This module focuses on the Lean concepts most applicable to manufacturing and the management of industrial facilities. It addresses the five fundamental Lean principles; Lean value streams; Lean metrics; identifying manufacturing and information waste within an enterprise; and techniques for implementing Lean beyond the factory floor, including value stream analysis and mapping.

**Course Length:** Approximately 3.5 hours

**CLE 006**

**Enterprise Integration Overview**

The Enterprise Integration Overview module introduces fundamental Enterprise Integration (EI) concepts and EI implementation strategies, and describes suggested EI best practices. The course also gives professionals an overview of the legal and regulatory frameworks, and a typical EI acquisition life cycle.

**Course Length:** Approximately 3 hours

**CLE 007**

**Lean Six Sigma for Manufacturing**

As a continuation of the concepts developed in CLE 004, Introduction to Lean Enterprise Concepts, this module addresses the role Lean manufacturing plays as part of an integrated Lean technical process and includes its objectives and priorities. It also summarizes the most important lean tools and techniques such as single piece flow, level production (heijunka), waste (muda), kaizen, just-in time, jidoka, etc.

**Course Length:** Approximately 6 hours

**CLE 008**

**Six Sigma: Concepts and Processes**

Focusing on Six Sigma concepts most applicable to manufacturing and the management of industrial facilities, this module provides an in-depth overview of Six Sigma concept processes; the associated tools and how they can be applied to real-life situations for eliminating waste; and outlining various quality measurement methods.

**Course Length:** Approximately 8 hours

**CLE 009**

**System Safety in Systems Engineering**

System Safety in Systems Engineering provides an overview of the methodology defined in MIL-STD-882D, *Standard Practice for System Safety*. This module will help students understand how the MIL-STD-882D methodology should be integrated into the DoD systems engineering process for eliminating environment, safety, and occupational health (ESOH) hazards or minimizing their risks. It uses the DoD systems engineering V-model as a construct to identify key system safety activities conducted during each phase of the system’s life cycle.

**Course Length:** Approximately 3.5 hours
CLE 010

Privacy Protection

This module addresses the scope of privacy protection, including the laws, policies, and key guidance. It covers potential risks to privacy protection, procedures to promote privacy protection and ways to recognize privacy breaches. Via a series of three short case studies, the Privacy Protection module enables students to recognize and respond appropriately to fundamental privacy concerns when performing activities in acquisition, requirements development, and research.

Course Length: Approximately 1 hour

CLE 011

Modeling and Simulation for Systems Engineering

Modeling and Simulation (M&S) for Systems Engineering provides an overview of how M&S supports the DoD acquisition process, outlines relevant DoD acquisition policy and guidance, and summarizes how M&S supports systems engineering. Students will understand its effective use; the reuse of M&S assets; the key aspects of verification, validation, and accreditation; and how the government should plan for contracting support for M&S.

Course Length: Approximately 3 hours

CLE 012

Naval Open Architecture

This module explains open architecture principles and introduces students to the Naval Open Architecture approach, policies, and guidance. The module covers the benefits of the modular open systems approach; how open architectures are used in practice; how to contract for open architectures; and the steps associated with the open architecture assessment model. Examples of successfully implemented programs are provided as well as a set of resources that help an organization implement open architecture.

Course Length: Approximately 2 hours

CLE 013

Modular Open Systems Approach to DoD Acquisition

The DoD Modular Open Systems Approach combines an integrated technical and business approach to optimize the use of open systems on projects. This module describes that approach, its key principles, and how to implement and use it over the acquisition life cycle.

Course Length: Approximately 4 hours

CLE 015

Continuous Process Improvement Familiarization

This module familiarizes students with the various continuous process improvement methodologies such as Six Sigma, Lean, and the Theory of Constraints, which can be employed to improve overall organizational performance. Roles and responsibilities are addressed as well as effective deployment strategies.

Course Length: Approximately 1.5 hours

CLE 016

Outcome-Based Performance Measures

This module covers performance measurement terminology, DoD policy, and rationale for their creation; identifies how outcome-based performance measures can be linked to strategic plans; and provides guidance on formulating effective outcome-based performance measures for information technology investments as required by Title 40. Students will be familiarized with the Balanced Scorecard approach; ways and processes by which effective Outcome-Based Performance Measures can be developed; and the role of the post-implementation review.

Course Length: Approximately 3 hours

CLE 017

Technical Planning

This module presents essential and practical technical planning guidance to assist students in formulating a sound technical planning approach and how it should be integrated into the overall program planning process.

Course Length: Approximately 3 hours
CLE 018
E3 and Spectrum Supportability for Acquisition Professionals

This module introduces students to the proper ways to consider electromagnetic environmental effects (E3) and spectrum supportability (SS) as part of the DoD acquisition process and provides an appreciation of how E3 and SS certification impact systems acquisition. A checklist for E3/SS processes is provided and the associated tasks are reviewed to ensure E3/SS is taken into consideration during systems design, production, and integration to avoid degraded performance, program schedule delays, and funding issues.

Course Length: Approximately 2 hours

CLE 021
Technology Readiness Assessments

This module covers technology readiness assessments, critical technology elements, and technology readiness levels. Students will learn to recognize technology and management factors used in the critical technology elements identification process; the basic characteristics associated with various levels of technology maturity; the requirements for preparing and reviewing a technology readiness assessments; and technology maturation considerations.

Course Length: Approximately 3 hours

CLE 022
Program Manager Introduction to Anti-Tamper

This module introduces the program manager to the steps involved in integrating Anti-Tamper into a program or project in order to protect DoD critical program information. The student will learn the importance, the threats to critical DoD technology, current DoD initiatives and programs designed to mitigate them, how to plan for effective use of anti-tamper, and how it can be effectively integrated into the overall program.

Course Length: Approximately 3 hours

CLE 023
Modeling and Simulation for Test and Evaluation

This module discusses information assurance (IA) within defense acquisition programs. Students will gain an appreciation for its key attributes; the Global Information Grid and Network-centric warfare; the DoD regulatory requirements for implementing IA in DoD acquisitions; how to determine IA compliance requirements; and how to integrate IA into an acquisition program.

Course Length: Approximately 3 hours

CLE 025
Information Assurance (IA) for Acquisition Professionals

This module discusses the incorporation of IA into defense acquisition programs. This module will identify key IA attributes, IA statutory and regulatory requirements, IA strategies for acquisition programs, steps for successfully implementing IA, and an explanation of the IA certification and accreditation process. This module enables program managers and other acquisition professionals to integrate IA into acquisition programs.

Course Length: Approximately 4 hours

CLE 026
Trade Studies

The Trade Studies module addresses the important role that trade studies play in systems acquisition and discusses processes for conducting effective trade studies. It describes a four-phase process that can be used to initiate, develop, evaluate, and perform follow-on action with respect to trade studies and outlines success factors.

Course Length: Approximately 4 hours

CLE 028
Market Research for Engineering and Technical Personnel

Market Research for Engineering and Technical Personnel describes market research from the perspective of technical personnel. It explains the practical value and discusses the government mandate to conduct market research. The course addresses market research team membership, sources for obtaining market data, and techniques for technical evaluation and documentation of market information.

Course Length: Approximately 4 hours
CLE 029
Testing In a Joint Environment

This module will familiarize DoD test and evaluation personnel and other acquisition professionals with the basic principles and practices related to testing in a joint environment.

Course Length: Approximately 3 hours

CLE 034
DIACAP: Understanding The DoD Information Assurance Certification and Accreditation Process

In order to operate, each DoD information system must be certified and accredited using a standard set of activities defined within the Department of Defense Information Assurance Certification and Accreditation Process, or DIACAP. This module is designed to provide an understanding of that process.

Course Length: Approximately 2 hours

CLE 035
DTEPI Introduction to Probability and Statistics

The goal of this module is to provide participants with a basic introduction and understanding of the analysis and evaluation tools in the Test and Evaluation (T&E) career field. The DTEPI Introduction to Probability and Statistics module will cover the basics of probability and statistics for Test and Evaluation.

Course Length: Approximately 2 hours

CLE 036
Engineering Change Proposals for Engineers

This module addresses the important role that engineering change proposals play in systems acquisition. Students are introduced to engineering change proposals and requests for deviation. They also learn processes to effectively plan, request, submit, evaluate, recommend, and implement engineering change proposals.

Course Length: Approximately 5 hours

CLE 037
Telemetry

This module will provide an overview of telemetry, including the components of telemetry systems and applications. Coverage of the material begins with telemetry nomenclature; outlines a brief history of the field of telemetry; moves to the subsystems of a telemetry system; discusses the personnel who work with telemetry data; and touches upon range applications, testing, recording, display, and analysis of telemetry data.

Course Length: Approximately 6 hours

CLE 038
Time Space-Position Information (TSPI)

This Defense Test and Evaluation Professional Institute (DTEPI) learning module provides a general overview of TSPI, including the importance of the error volume concept associated with each of the methods to be discussed. This is followed by detailed sections on radars, the global positioning system, optical systems, other TSPI systems, and a discussion of various scoring or miss-distance measurement systems.

Course Length: Approximately 6 hours

CLE 039
Environmental Issues in Testing and Evaluation

This Defense Test and Evaluation Professional Institute (DTEPI) learning module focuses on the broad environmental issues and related procedures affecting the DoD mission related to testing and evaluation.

Course Length: Approximately 5 hours

CLE 040
IUID Marking

The goal of this module is to provide the student with knowledge of how to go about marking a data matrix on an item. It covers technical details of encoding the data matrix; standard practices, methods, and technologies for data matrix marking; and technical documentation requirements and quality considerations.

Course Length: Approximately 3 hours
CLE 041
Software Reuse

The goal of this module is to introduce software reuse. It explains the principles of effective reuse and how these principles can be applied to software reuse in the National Security Systems.

Course Length: Approximately 2 hours

CLE 045
Introduction to DoD Science and Technology Management

This module provides students with an understanding of DoD Science and Technology (S&T) review processes; the process of S&T development through basic research, applied research, and advanced technology development; the Service processes and DoD technology initiatives; and the concept of technology maturity, including the use of technology readiness levels, critical technology elements, and their use in acquisition technology readiness assessments.

Course Length: Approximately 2 hours

CLE 047
Grounding, Bonding, and Shielding

This module is relatively technical and provides students with a comprehensive understanding of the importance of a properly grounded, bonded, and shielded system for minimizing electromagnetic interference (EMI). Students become acquainted with specialized terminology, grounding schematics, bonding practices and types, and the basic rules for the implementation of shields to control radiated EMI.

Course Length: Approximately 2 hours

CLE 041
Assessing Manufacturing Risk

Assessment of manufacturing readiness focuses on identifying and mitigating manufacturing risk and ensuring that a program or technology is ready to move forward based on a manufacturing perspective. The goal is to enable students to conduct a manufacturing assessment as a part of the systems engineering processes.

Course Length: Approximately 6 hours

CLE 047
Capability Maturity Model-Integration (CMMI)

The CMMI product suite includes models, training, and appraisal methods that provide a set of best practices and an improvement path for suppliers and acquirers for internal process improvement. The CMMI can be used by both government and industry to increase process capability and improve organizational maturity.

Course Length: Approximately 1 hour

CLE 045
Human Systems Integration (HSI)

This module is designed to provide the learner with the basic understanding of HSI as part of DoD’s total systems engineering approach for optimizing system performance and minimizing total ownership costs. Students also will be introduced to the HSI domains of Human Factors Engineering, Personnel, Habitability, Manpower, Training, Environment, Safety and Occupational Health, and Survivability.

Course Length: Approximately 2 hours

CLE 044
Standardization in the Acquisition Life Cycle

The goal of this module is to explore the role of effective standardization in defense acquisition and its contribution to program success. It introduces you to standardization and its application across phases of the acquisition life cycle, discusses standardization policy in the DoD and addresses
the management and use of standardization documents. The module is designed for professionals involved in the development or management of standardization documents.

**Course Length:** Approximately 4 hours

### CLE 065

**Standardization Documents**

The goal of this module is to provide the student with knowledge of the standardization documents managed within the DoD. This module covers technical details of the specific purpose of each type of document; how to distinguish each type of document based on the document identifier; general rules for stating requirements in standardization documents; policy regarding the adoption and use of non-government standards; and format and content requirements for commercial item descriptions, Defense Specifications, Defense Standards, and Defense Handbooks. This module also provides an introduction to Federal Standards, Federal Specifications, and Guide Specifications.

**Course Length:** Approximately 4 hours

### CLE 066

**Systems Engineering for Systems of Systems**

This module is intended for program managers, project managers, systems engineers, technical team leaders, logistic support leaders, and others supporting systems of systems (SoS) work, particularly as part of a systems engineering team in an SoS environment. The goal of this module is to provide a resource for those in the systems engineering community by introducing the insights gained by the acquisition community on the issues and approaches to SE for SoS.

**Course Length:** Approximately 4 hours

### CLE 067

**Strategic Material Selection: Chemical Ranking System**

A Chemical Ranking System (CRS) is a tool for helping DoD users select safer chemicals and also decrease life cycle costs. A CRS can assist in evaluating the human health and environmental effects of a range of chemicals used by the DoD. This summary-level module describes the attributes of a CRS and highlights two DoD CRSs currently in use.

**Course Length:** Approximately 2 hours

### CLE 201

**ISO 9000:2000**

This module covers the basic elements of ISO 9000 and lessons learned regarding its implementation and use. The module will be of value to personnel actively engaged in manufacturing in contractor industrial facilities, depots, logistics centers, and shipyards. However, the ISO 9000 quality standards can be applied to any type of product, service, organization, or process, including software.

**Course Length:** Approximately 3 hours

### CLE 301

**Reliability and Maintainability**

This module defines Reliability, Availability, and Maintainability; explores the significant influence of reliability and maintainability on systems; and provides practical techniques that may be applied in an acquisition program to achieve the desired levels of reliability and maintainability.

**Course Length:** Approximately 4 hours

---

**GOVERNMENT PURCHASE CARD TRAINING**

### CLG 001

**DoD Government Purchase Card**

The DoD Government Purchase Card module presents the mandatory requirements and other guidelines to consider and apply, as appropriate, when using the government purchase card. Government purchase cardholders and billing officials will learn to be at ease with using the government purchase card responsibly and accountably.

**Course Length:** Approximately 3.5 hours
CLG 004
DoD Government Purchase Card
Refresher Training

The DoD Government Purchase Card Refresher Training module presents the mandatory requirements and other guidelines to consider and apply when using the government purchase card. This refresher course is based on the key points in the DoD Government Purchase Card Tutorial module as well as important new areas of emphasis. It was developed to provide refresher training for government purchase cardholders and approving officials.

Course Length: Approximately 3.5 hours

CLG 005
Purchase Card Online System (PCOLS)

This module is designed to inform students about the Purchase Card Online System (PCOLS) and how to obtain help and support when beginning to implement PCOLS within a Government Purchase Card (GPC) organization; it also provides a detailed presentation of all four PCOLS components currently being used.

Course Length: Approximately 4 hours

CL 001
International Armaments Cooperation (IAC), Part 1

This module is the first in a three-part series that covers laws, regulations, and policies for conducting IAC and describes the organizations and forums throughout the DoD that are stakeholders in IAC. Part 1 also addresses factors for consideration when planning IAC.

Course Length: Approximately 2 hours

CL 002
International Armaments Cooperation (IAC), Part 2

This module addresses policies and processes of the international agreements and the Foreign Comparative Testing Program; the Defense Research, Development, Test, and Evaluation Information Exchange Program; the Defense personnel exchanges; the Engineer and Scientists Exchange Program; the Administrative and Professional Personnel Exchange Program; and the Cooperative Programs/Projects Personnel program. This course is based on the DoD International Armaments Cooperation Handbook.

Course Length: Approximately 2 hours

CL 003
International Armaments Cooperation (IAC), Part 3

The International Armaments Cooperation (IAC), Part 3, is the third in a three-part series of classes that introduce the history and functions of IAC. This module addresses Defense cooperative trade and industrial logistics, and security and technology transfer requirements for IAC. This course is based on the DoD International Armaments Cooperation Handbook.

Course Length: Approximately 2 hours

CL 004
Information Exchange Program (IEP), DoD Generic Research, Development, Test, and Evaluation (RDT&E)

This module addresses DoD component-wide requirements for developing, coordinating, negotiating, and executing IEP annexes.

Course Length: Approximately 2 hours

CL 005
Information Exchange Program (IEP), Army-Specific Research, Development, Test, and Evaluation (RDT&E)

This module provides an introduction to Army-specific IEP; Army-specific IEP requirements; the use of U.S. Army International Online Information Analysis Center agree-
ments; annexes and activities development, coordination, and management system for developing the templates for the IEP annex package; and decentralization of the IEP annex development, coordination, negotiation, and conclusion process.

**Course Length:** Approximately 1 hour

### CLI 006

**Information Exchange Program (IEP), Navy-Specific Research, Development, Test, and Evaluation (RDT&E)**

This module ensures that Navy acquisition workforce members understand the Navy-specific procedures for implementing DoD’s IEP, why they should participate in the IEP, and how to execute IEP information exchanges.

**Course Length:** Approximately 1 hour

## LOGISTICS

### CLL 001

**Life Cycle Management & Sustainment Metrics**

This module addresses the development of life cycle management and sustainment metric, a critical element of Performance-Based Product Support. The module explores how these metrics are derived and the role of the life-cycle logistician in developing them and covers how these metrics evolve over the life cycle of a weapon system and how the logistician’s role evolves with them.

**Course Length:** Approximately 4 hours

### CLL 002

**Defense Logistics Agency Support to the Program Manager**

This module is designed to introduce participants to the capabilities of the DLA in delivering support to the warfighter. Professionals will be provided with an overview of the DLA and the benefits the agency provides to the program manager, operational units, and the Service inventory control points.

**Course Length:** Approximately 3 hours

### CLL 003

**Supportability Test and Evaluation**

The objective of this module is provide a resource to the logistics community to assist in managing the risks involved in developing, producing, operating, and sustaining systems and capabilities.

**Course Length:** Approximately 3 hours

### CLL 004

**Life Cycle Logistics for the Rest of Us**

The goal of this module is to provide individuals who do not work in the logistics field with a basic knowledge of some of the essential processes and considerations that DoD logistics professionals encounter to satisfy their customers’ requirements.

**Course Length:** Approximately 3 hours

### CLL 005

**Developing a Life-Cycle Sustainment Plan (LCSP)**

This module provides guidance to the program manager (PM), product support manager, and the life cycle logistician on the purpose of the LCSP, who should be involved with it, and how the LCSP should evolve in the Defense Acquisition Management Framework. CLL 005 also addresses the documentation of the program’s sustainment strategy and associated plans throughout the life cycle. Implementing the concepts contained in this module will help ensure that the PM’s plan for formulating, implementing, and executing the sustainment strategy is well thought out and addresses the focus areas the Office of the Secretary of Defense will concentrate on during program reviews. Upon completion of the module, the student will be able to understand how the LCSP fits into the Defense Acquisition Management Framework.

**Course Length:** Approximately 2 hours

### CLL 006

**Depot Maintenance Partnering**

The Depot Maintenance Partnering module will introduce professionals to ways in which depot maintenance partner-
Supportability Analysis

This module’s overall goal is to advance the knowledge and understanding of supportability analysis and how it is employed through all phases of the defense acquisition process. This course will examine supportability analysis with a particular emphasis on how the life cycle logistician will participate and utilize the results to influence the design and establish an effective and efficient product support package.

Course Length: Approximately 8 hours

DoD Packaging

This module will allow professionals to obtain knowledge of the value of the packaging, handling, storage, and transportation process. An effective knowledge and application of packaging, handling, storage, and transportation principles will benefit professionals throughout the life cycle of a program.

Course Length: Approximately 3 hours

Joint Systems Integrated Support Strategies (JSISS)

The Joint Systems Integrated Support Strategies (JSISS) module addresses the importance of integrated support strategies to a joint acquisition program, as well as DoD guidance and policy relevant to the development of joint strategies. In addition, the module will inform participants of the challenges and issues that must be addressed when planning for an integrated joint support strategy.

Course Length: Approximately 3 hours

Business Case Analysis

This module provides an overview of DoD’s policies and guidance. The primary focus is the structure, format, process, and methodology of business case analysis. The module also addresses the application of business case analysis in the DoD context, which is currently oriented toward supporting best-value selection of weapons system support strategies that use performance-based logistics.

Course Length: Approximately 3 hours
CLL 016

Joint Logistics

This module provides professionals with knowledge of functional assignments that involve joint planning, inter-Service, and multinational logistics support, as well as joint logistics in a theater of operations. By completing this module, professionals will recognize the important roles and responsibilities within the joint logistics environment; the capabilities that joint logistics delivers; the important factors related to planning, executing, and controlling joint logistics; and the factors that will ensure a successful future for joint logistics.

Course Length: Approximately 3 hours

CLL 017

Introduction to Defense Distribution

The Introduction to Defense Distribution module provides a brief overview of the vision, mission, and components of U.S. Transportation Command; assignment of the DoD distribution process owner; key players in the joint deployment and distribution enterprise, and their roles and responsibilities; different types of planning processes and tools; supply, transportation, and joint theater logistics processes and systems within joint deployment and distribution enterprise as well as key concepts of deployment and sustainment across these processes; and customer service transformational efforts.

Course Length: Approximately 2 hours

CLL 018

Joint Deployment Distribution Operations Center (JDDOC)

This module provides basic knowledge and comprehension of the JDDOC. It will provide DoD, other governmental and nongovernmental personnel a detailed understanding of the roles, responsibilities, organizational structure, and concept of employment of the JDDOC concept.

Course Length: Approximately 18 hours

CLL 019

Technology Refreshment Planning

This module provides professionals with an overview of technology refreshment planning as it applies across the weapons system life cycle. The module will cover basic concepts, regulatory material, and planning for and applications used in technology refreshment.

Course Length: Approximately 3 hours

CLL 020

Independent Logistics Assessments

This module provides professionals with an introduction to independent logistics assessments, which is a formal review of the state of a program’s logistics planning and documentation. This review occurs before Milestone B, before Milestone C, and before full-rate production. Independent logistics assessments checklists, handbooks, and references can also be used to assist in early logistics support and sustainment planning, including assisting in planning for Milestone A.

Course Length: Approximately 3 hours

CLL 022

Title 10 Depot Maintenance Statute Overview

The Title 10 Depot Maintenance Statute Overview module provides a review of the definition of DoD maintenance, the public policy environment within which DoD depot-level maintenance operates, the various sections of 10 U.S.C. impacting depot-level maintenance, and DoD policy for the maintenance of military materiel.

Course Length: Approximately 2 hours

CLL 023

Title 10 U.S.C. 2464 Core Statute Implementation

The Title 10 U.S.C. 2464 Core Statute Implementation module provides an introductory presentation of DoD maintenance; and it reviews the capabilities, methodology, policies, roles, and responsibilities required for services. Public law mandates that DoD maintain an organic core logistics capability with ready and controlled resources necessary to ensure effective and timely responses to mobilizations, national defense contingencies, and other emergency requirements.

Course Length: Approximately 3 hours
The Limitations on the Performance of Depot-Level Maintenance (50/50) is an introductory presentation of DoD maintenance. The module provides professionals with a review of Section 2466 of Title 10 U.S.C., which mandates that the Services and combatant commanders may not have more than 50 percent of depot maintenance performed by non-DoD personnel.

Course Length: Approximately 3 hours

The Depot Maintenance Inter-Service Support Agreements (DMISA) module is for maintenance inter-Service support offices; managers; and others who prepare, review, negotiate, and manage DMISAs. The module explains key duties and the process for creating DMISAs. Professionals will improve the efficiency of DoD depot maintenance planning activities through their successful implementation of DMISAs.

Course Length: Approximately 5 hours

The Depot Maintenance Capacity Measurement module provides professionals with a basic understanding of the methods used to measure, record, and report capacity and utilization data for organic activities that perform depot maintenance.

Course Length: Approximately 4 hours

The Condition-Based Maintenance Plus (CBM+) module provides the learner with an overview and introduction to depot maintenance management and operations needed in DoD legacy systems. The module will cover DoD maintenance, CBM+ information and background, essential elements, CBM+ implementation, and managing initiatives and measuring success.

Course Length: Approximately 2 hours

This module provides the learner with information on reliability centered maintenance (RCM) for the Defense Acquisition Workforce. This will include defining RCM, an introduction to the history and development, as well as the process and application of RCM. The overarching objective is for the student to understand RCM, its fundamental process and applications.

Course Length: Approximately 2 hours

This self-paced computer-based training program is designed to facilitate learning about different types of commercial and industry nonconforming, suspect, and counterfeit items, how these items enter the commercial and DoD supply chains, the economic impact of these items, and how to develop basic skills for identifying possible nonconforming and suspect counterfeit items. Participants also will learn how to mitigate the risks involved in procuring these items and how to report these items through the proper channels.

Course Length: Approximately 1.5 hours

Technical reviews provide oversight and management of the definition, development, and demonstration of system, subsystem, and component design in accordance with established systems engineering technical management processes and technical processes. This course describes the life cycle logistician’s role in technical reviews and how the logistician can leverage that involvement into better supportability for the system. This module will examine the most common tech-
technical reviews and the specific steps the life cycle logistician can take to prepare and participate in the review.

**Course Length:** Approximately 3 hours

---

**CLL 034**

**SLAMIS**

The SLAMIS module provides professionals with a basic understanding of the Army’s Standard Study Number-Line Item Number (SSN-LIN) Automated Management and Integrating System (SLAMIS). The module also describes the events that led to the development and need for this application addressing key equipment procurement, fielding, and sustainment issues.

**Course Length:** Approximately 4 hours

---

**CLL 054**

**Joint Task Force Port Opening (JTF-PO)**

Joint Task Force–Port Opening (JTF-PO) is a joint expeditionary capability that enables USTRANSCOM to rapidly establish and initially operate a port of debarkation and support a forward distribution node, facilitating port throughput in support of combatant commander-executed contingency response.

**Course Length:** Approximately 3 hours

---

**CLL 055**

**Joint Deployment and Distribution Performance Metrics Framework**

The requirement to improve JDDE support to the warfighter is well established; however, less established is the definition of performance based on warfighter need. A USTRANSCOM study produced a framework of enterprise-level performance based metrics. This framework provides a clear definition of performance levels needed to drive tangible improvement to the warfighter.

**Course Length:** Approximately 1 hour

---

**CLL 057**

**Level of Repair Analysis–Introduction**

The Level of Repair Analysis (LORA) is a critical component of the Supportability Analysis and Maintenance Planning processes and most important business decision made about physical supportability analysis during the acquisition of a system. This module describes the process of LORA, its benefits, its limitations and when it is conducted. This module also introduces the broad concept of supportability analysis and how LORA interfaces with other design and support analyses necessary to maintain the operational readiness of military systems and equipment.

**Course Length:** Approximately 2 hours

---

**CLL 058**

**Level of Repair Analysis–Theory and Principles**

This is part two of a two-part continuous learning series on LORA (CLLs 057 & 058). The principal purpose of LORA is to determine the most effective maintenance and support structure for a system through iterative evaluations of both economic and non-economic considerations. This module describes the analytical theory of LORA and its economic and non-economic factors. It describes the steps in conducting LORA as well as policies and processes that have shaped, and still guide, its implementation. The module also provides a detailed explanation of how LORA models are designed and how input data is structured. The module discusses how LORA develops a least-cost maintenance recommendation and how those costs are estimated.

**Course Length:** Approximately 2 hours

---

**CLL 119**

**Technical Refreshment Implementation Module**

This module introduces you to the basic concepts to be considered in assessing opportunities, planning and budgeting issues, and addresses the steps necessary to effectively manage the implementation of technology insertion or refreshing.

**Course Length:** Approximately 3 hours

<tbody>
<tr>
<td>CLL 201</td>
<td>Diminishing Manufacturing Sources and Material Shortages (DMSMS) Fundamentals</td>
<td>This module provides professionals with a working-level overview of DMSMS issues. While professionals will not be experts after completing the course, they will have a working knowledge of DMSMS history, issues, tools, and current initiatives, and will have seen real examples of successful proactive DMSMS programs. Professionals will understand why standardization of policies and procedures within the DMSMS community is so important and will become familiar with many other related topics.</td>
<td>Approximately 3 hours</td>
</tr>
<tr>
<td>CLL 202</td>
<td>Diminishing Manufacturing Sources and Material Shortages (DMSMS) Executive Overview</td>
<td>The module provides concise DMSMS information for executives or program managers who require an understanding of how DMSMS impacts their operations.</td>
<td>Approximately 1 hour</td>
</tr>
<tr>
<td>CLL 203</td>
<td>Diminishing Manufacturing Sources and Material Shortages (DMSMS) Essentials</td>
<td>The DMSMS Essentials module is for professionals who have a working knowledge of DMSMS regulations and policies, and it is recommended that professionals complete CLL 201 and CLL 202. This module focuses on DMSMS problems regarding electronics, as well as with mechanical items and materials. The module will introduce professionals to the Defense Logistics Agency’s DMSMS programs and capabilities, and will review basic techniques for component research.</td>
<td>Approximately 2 hours</td>
</tr>
<tr>
<td>CLL 204</td>
<td>Diminishing Manufacturing Sources and Material Shortages (DMSMS) Case Studies</td>
<td>This module is for professionals who have a working knowledge of DMSMS regulations and policies. In this module, professionals will have an opportunity to review some DMSMS program scenarios, evaluating for the program’s level of proactivity, and will be able to make DMSMS management decisions.</td>
<td>Approximately 2 hours</td>
</tr>
<tr>
<td>CLL 205</td>
<td>Diminishing Manufacturing Sources and Material Shortages (DMSMS) for Technical Professionals</td>
<td>This module covers the current processes, policies, and procedures used by technical professionals to practice proactive management. It focuses on the high-level best practices for running each program. Students can adjust the procedures and techniques to their Service as appropriate.</td>
<td>Approximately 2 hours</td>
</tr>
<tr>
<td>CLL 206</td>
<td>Parts Management Executive Overview</td>
<td>This module gives an overview of the parts management program, which is an integral part of the acquisition process for design, development, modification, and support of weapons systems and equipment. Parts management focuses on selecting the best parts at the design phase of an acquisition program under an overarching systems engineering umbrella.</td>

</table>
ACQUISITION AND MANAGEMENT

CLM 003  
Overview of Acquisition Ethics

This module reinforces the most important legal ethics standards governing interaction between government personnel and DoD contractors. Areas addressed include conflicts of interest; gratuities from contractors; the Procurement Integrity Act; job-hunting for a position with private industry while still employed with the federal government; restrictions on post-government employment of a former federal employee or officer; and ethical problems that can arise when both government and contractor personnel work in common spaces on common goals as a single team.

Course Length: Approximately 2 hours

CLM 012  
Scheduling

This module focuses on scheduling processes and tools that can be used to develop schedules for a defense systems acquisition project. Scheduling is the focus of the planning and control process and depends, to a great extent, on program risk and the resources available (time, money, facilities, manpower, and workforce skills). Scheduling is a roadmap for systems development, and thus, it is an inherent part of program management.

Course Length: Approximately 12 hours

CLM 013  
Work-Breakdown Structure

This module addresses two fundamental and interrelated types of work-breakdown structures: the program work-breakdown structure that is developed by a program management office and the contract work-breakdown structure that is developed by a contractor.

Course Length: Approximately 6 hours

CLM 014  
Integrated Product Team (IPT) Management and Leadership

This module introduces management and leadership concepts used to organize, manage, and lead an integrated product teams. IPTs are used throughout the acquisition process to open the cross-functional and cross-organizational lines of communication and are formed for the specific purpose of delivering a product for a customer.

Course Length: Approximately 8 hours

CLM 016  
Cost Estimating

This module focuses on basic cost-estimating tools and techniques. Cost estimates are one of the fundamental building blocks of the acquisition process. The cost estimate and its supporting budget are a part of the baseline against which a program’s progress and success are measured.

Course Length: Approximately 8 hours

CLM 017  
Risk Management

Risk is always a concern in the DoD systems acquisition process. The acquisition process itself is designed, to a large degree, to allow risk to be managed from conception to delivery of the system. Although risk is inherent in any program, risk management ensures managers take measures to assess and handle risks. This module focuses on tools and processes that can be used to manage risk on a defense systems acquisition project.

Course Length: Approximately 8 hours

CLM 021  
Introduction to Reducing Total Ownership Costs (R-TOC)

The Introduction to Reducing Total Ownership Costs (R-TOC) module provides professionals with R-TOC ideas, tools, and strategies with the acquisition and logistics communities. The module orient professionals to the R-TOC requirement, de-
CLM 030
Common Supplier Engagement
The Common Supplier Engagement module is designed to help professionals navigate through the changes that have occurred because of the government’s elimination of paper methods that were previously used in acquisitions. The module provides an overview of the electronic e-Business practices used in acquisitions, including topics on e-Business, e-Government, and how both of these relate to common supplier engagement.

Course Length: Approximately 2 hours

CLM 023
Javits-Wagner-O’Day (JWOD) Tutorial
The JWOD Tutorial module provides professionals and DoD purchase card holders a better understanding of the Javits-Wagner-O’Day (JWOD) Program. There are over 14 million Americans with severe disabilities, and the unemployment rate for people with severe disabilities is 70 percent. The JWOD Program helps people with disabilities who are unable to obtain or maintain employment on their own. The module provides an introduction to JWOD, to the purchase card, and to contracts, and provides answers to frequently asked questions.

Course Length: Approximately 1 hour

CLM 024
Contracting Overview
The Contracting Overview module gives an overview of the market research process, the process for developing criteria or factors for teams to use in evaluating contractors during source selection, and the use of the uniform contract format.

Course Length: Approximately 8 hours

CLM 025
Commercial-Off-The-Shelf (COTS) Acquisition for Program Managers
This module provides an overview of the fundamental challenges faced by organizations when they integrate commercial items to form a system; addresses the issues involved in buying from the commercial marketplace; summarizes lessons learned from programs that have made extensive use of commercial items; and offers suggestions.

Course Length: Approximately 3 hours
CLM 033
DAWIA II

The Defense Acquisition Workforce Improvement Act (DAWIA) was amended significantly during fiscal years 2004 and 2005. These amendments (generally referred as DAWIA II) provide a number of flexibilities to enable the DoD to more effectively develop and manage the Defense Acquisition Workforce. This module explains the transformation items that took place in DAWIA II.

Course Length: Approximately 3 hours

CLM 034
Science and Technology—Lesson from PMT 352A

This module, excerpted from the PMT-352A course, provides background on the importance of the science and technology (S&T) role in the systems acquisition process and identifies sources of science and technology information. It contains activities that allow participants to assess an S&T project’s compatibility with the Advanced Threat Infrared Countermeasure/Common Missile Warning System Program and recommend strategies for incorporating the emerging technology.

Course Length: Approximately 4 hours

CLM 035
Environmental Safety and Occupational Health—Lesson from PMT 352A

This module, excerpted from PMT 352A, focuses on the increased emphasis and importance of environmental safety and occupational health as they relate to acquisition management. Program managers must ensure their programs, regardless of acquisition category, comply with environmental safety and occupational health statutory and regulatory requirements.

Course Length: Approximately 4 hours

CLM 036
Technology Transfer and Export Control Fundamentals

This module is intended to provide awareness of the program manager’s role in technology transfer and export control, and international security and program protection, as well as the planning process for both.

Course Length: Approximately 2 hours

CLM 037
Physical Inventories

This module provides professionals with a basic awareness of the duties and responsibilities of an accountable property officer or property custodian. The module will describe the preparation, physical count, and reconciliation aspects of physical inventories as well as when and how they should be applied.

Course Length: Approximately 1.5 hours

CLM 038
Corrosion Prevention and Control Overview

The Corrosion Prevention and Control Overview module will provide professionals with training in corrosion prevention and control as well as serve as an accessible reference guide to answer future questions.

Course Length: Approximately 8 hours

CLM 039
Foundations of Government Property

The Foundations of Government Property module provides DoD financial accounting and property management professionals an overview of managing government property. This module will increase professionals’ knowledge and understanding of DoD property accountability and management and the DoD accounting and accountability approach to the property management life cycle. It also will introduce professionals to essential available tools that will help them manage government property.

Course Length: Approximately 1.5 hours
CLM 040
Proper Financial Accounting Treatments for Military Equipment (PFAT4ME)

This course is designed to provide a better understanding of how military equipment values are determined and the process used to ensure consistent execution; the important roles that program manager, business/financial management analysts, and procurement contracting officers play in this process; and the actions required by each role so a structure is in place that ensures proper PFAT4ME.

Course Length: Approximately 1.5 hours

CLM 041
Capabilities-Based Planning

The Capabilities-Based Planning module provides an overview of the DoD guidance and policies supporting capabilities-based planning. The module explains the processes, roles, responsibilities, and challenges involved in implementing capabilities-based planning to respond to emerging threats to national security.

Course Length: Approximately 3 hours

CLM 044
Radio Frequency Identification (RFID)

This module is designed to provide defense contracting officers with the knowledge necessary to insert the passive RFID Defense Federal Acquisition Regulation Supplement (DFARS) clause into appropriate contracts, thus streamlining DoD’s receiving process. The module also reviews RFID technology and DoD’s RFID implementation strategies.

Course Length: Approximately 3 hours

CLM 047
Fiscal and Physical Accountability and Management of DoD Equipment

This module builds upon the concepts presented in the Foundations of Government Property module. DoD professionals responsible for DoD fiscal and physical property management play a crucial role in the acquisition and life cycle of DoD equipment—both for the warfighter and for the American taxpayer. The module provides an overview of the acquisition and sustainment policy guidance, business rules, and life cycle management of DoD equipment.

Course Length: Approximately 2 hours

CLM 048
Audit Readiness Requirements for DoD Equipment

This module provides key personnel, both financial and non-financial managers, with “how-to” details on the requirements and processes necessary to prepare for an audit of DoD equipment requiring capitalization.

Course Length: Approximately 2 hours

CLM 049
Procurement Fraud Indicators

This module provides an awareness of procurement fraud indicators. This CLM was developed as a result of a department-wide review of vulnerabilities to fraud, waste, and abuse in contracting integrity, as directed by Congress.

Course Length: Approximately 2 hours

CLM 051
Time Management

This module introduces the basics of time management, including the identification of common time thieves and an analytical framework for rebalancing the life-work paradigm.

Course Length: Approximately 1 hour

CLM 101
Analysis of Alternatives (AoA) (USAF Process)

The Air Force Office of Aerospace Studies created this Analysis of Alternatives (AoA) module to provide an overview of the process used by the Air Force to conduct an AoA in support of requirements development and systems acquisition. AoAs
are prepared to help justify the need for starting, stopping, or continuing an acquisition program. Although this module was designed for Air Force employees, the information is beneficial to all DoD acquisition personnel.

**Course Length:** Approximately 2 hours

### CLM 103

**Quality Assurance Auditing**

The Quality Assurance Auditing module contains material that covers three general types of audits: system, process, and product. These audits are described in three distinct phases: planning and preparation, performance, and reporting and follow-up.

**Course Length:** Approximately 2 hours

### CLM 200

**Item-Unique Identification**

Item-unique identification enables item tracking in DoD business systems and provides reliable and accurate data for management, financial accountability, and asset management purposes. This module provides an overview of item-unique identification.

**Course Length:** Approximately 2 hours

### CLM 500

**ADL Implementation for Defense Acquisition Professionals**

This is an introduction and overview of the advanced distributed learning (ADL) basics, requirements, and components as well as DoD’s policies regarding repository and registry functions. The module also describes shareable content object reference model conformance to acquisition planning, project management, and instructional design.

**Course Length:** Approximately 3 hours

### CLR 030

**Environment, Safety and Occupational Health in Joint Capabilities Integration Development System (JCIDS)**

The module is designed to help the environment, safety and occupational health (ESOH) practitioner generate concise ESOH wording appropriate for JCIDS documents. The module offers practical guidance in negotiating the JCIDS process where different interests, ESOH related and non-ESOH related, often compete among stakeholders in a resource-constrained context.

**Course Length:** Approximately 4 hours

### CLR 250

**Capabilities-Based Assessment (CBA)**

The CBA module introduces planning and organizing capabilities-based assessments (CBAs). The module contains four lessons: CBA Definitions, Pre-Planning Research, CBA Team Building and Planning, and the CBA Study Phase. The module explains how to conduct and support effective and efficient Capabilities-Based Assessments (CBAs) in support of the Joint Capabilities Integration and Development System (JCIDS).

**Course Length:** Approximately 5 hours

### CLR 252

**Developing Requirements**

The Developing Requirements module explains how to develop key performance parameters (KPPs) and key system attributes (KSAs) and examines the relationship of KPPs and KSAs to technical requirements and how to get top-level requirements through staffing and validation.

**Course Length:** Approximately 5 hours
Feder al Acquisition Institute Courses and Modules

FAC 001
**HUBZone Empowerment Contracting Program—Certification and Eligibility**

This module familiarizes procurement officials with the certification and eligibility requirements for program participation in the Historically Underutilized Business Zone (HUBZone) Empowerment Contracting Program. The program encourages economic development in HUBZones through the establishment of federal contract award preferences for qualified small businesses located in such areas.

**Course Length:** Approximately 30 minutes

FAC 002
**HUBZone Empowerment Contracting Program—Contractual Assistance**

This module familiarizes procurement officials with the types of Historically Underutilized Business Zone (HUBZone) contracts and the HUBZone small business’ contract performance requirements. The HUBZone Program encourages economic development in HUBZones through the establishment of federal contract award preferences for qualified small businesses located in such areas.

**Course Length:** Approximately 1 hour

FAC 003
**HUBZone Empowerment Contracting Program—Historical Overview**

This module familiarizes procurement officials with the historical development of the Historically Underutilized Business Zone (HUBZone) Program and provides an explanation of the program’s statutory and regulatory development. The HUBZone Program encourages economic development in HUBZones through the establishment of federal contract award preferences for qualified small businesses located in such areas.

**Course Length:** Approximately 30 minutes

FAC 004
**HUBZone Empowerment Contracting Program—Protests and Appeals**

This module familiarizes procurement officials with the procedures for filing a Historically Underutilized Business Zone (HUBZone) protest and/or appeal. The HUBZone Program encourages economic development in HUBZones through the establishment of federal contract award preferences for qualified small businesses located in such areas.

**Course Length:** Approximately 1 hour

FAC 005
**Just-in-Time Compliance Training: Central Contractor Registration**

All DoD contractors must be registered in the Central Contractor Registration to help streamline the acquisition process and broaden the use and reliance upon e-Business applications. The Central Contractor Registration was established to eliminate the need to maintain paper-based sources of contractor information. This module provides an overview of the registration process.

**Course Length:** Approximately 1 hour

FAC 006
**The SAFETY Act**

The SAFETY Act is designed to encourage the development and deployment of anti-terrorism technologies and services that will substantially enhance the protection of the nation. This module will explain the SAFETY Act and explain how to create systems of risk management and litigation management in support of the Act.

**Course Length:** Approximately 1 hour
FAC 007
Certificate of Competency Program

The Certificate of Competency (COC) Program administered by the Small Business Administration (SBA) is authorized by Statutory Authority: Section 8(b)(7) of the Small Business Act 1953 and Regulatory Implementation. The COC Program allows a small business to appeal a contracting officer’s (CO) determination that it is unable to fulfill the requirements of a specific government contract on which it is the apparent low bidder. The COC is an appeal procedure available to the apparent successful small business offeror which gives the small business the opportunity to demonstrate it has the capability to perform on a specific federal prime government contract. This is not a Certificate of Compliance or Conformance, which contractors furnish to certify product conformance and quality. It is a determination that a firm is responsible or not to perform a specific government contract.

Course Length: Approximately 30 minutes

FAC 008
Competition in Contracting Act (CICA)

This module, targeted toward the United States Agency for International Development’s (USAID) procurement workforce, provides an overview of the Competition in Contracting Act (CICA). The module involves a review of the Federal Acquisition Regulation (FAR), the USAID Acquisition Regulation (USAID’s supplement to the FAR), and specific USAID’s guidance as related to CICA. Though targeted toward USAID’s procurement workforce, all USAID employees are encouraged to take the module.

Course Length: Approximately 1 hour

FAC 009
Set Asides for Small Business

Several types of procurements are reserved exclusively for the participation of small businesses. This module provides professionals with an overview of set-aside programs.

Course Length: Approximately 30 minutes

FAC 010
Small Business Innovation Research/Small Business Technology Transfer (SBIR/STTR) Programs

SBIR/STTR programs encourage small business to explore their technological potential, and provide the incentive to profit from its commercialization. By including qualified small businesses in the nation’s research and development arena, high-tech innovation is stimulated and the United States gains entrepreneurial spirit as it meets its specific research and development needs. This module provides an overview of SBIR/STTR programs.

Course Length: Approximately 1 hour

FAC 012
Managing an Effective Competitive Sourcing Program

This video was sponsored by the Chief Acquisition Officer Council to explain competitive sourcing processes, best practices, and lessons learned. Professionals will learn how to more effectively implement this key administration initiative. Video topics range from the basics and foundation of competitive sourcing, to planning standard and streamlined competitions, to lessons learned by practitioners.

Course Length: Approximately 1 hour

FAC 013
Shaping Smart Business Arrangements—Expert Edition

This module is designed for personnel newly assigned to the contracting workforce. Participants will gain a broad, comprehensive understanding of the environment in which they will serve; develop professional skills for making business decisions and advising other acquisition team members toward success in meeting customers’ needs; be introduced to knowledge management and information systems; and prepare to provide contracting support within the overarching business relationships of government and industry.

Course Length: Approximately 11.5 hours
Continuous Learning Modules

FAC 016
Buy American Act (BAA)
This module covers the BAA history, applicable statutes and regulations, the policy for supplies, and the exceptions and trade agreements that may waive the BAA. The module provides guidelines for applying the BAA to the solicitation and evaluation of supplies and, through a series of scenarios, guides the learner in applying those guidelines.

Course Length: Approximately 2 hours

FAC 017
Contracting Officer’s Technical Representative (COTR) Refresher
This refresher course consists of two modules: Module 1, titled Bridging the Gap, provides a review of course content taken from the COTR certification course using a game board main screen and a scoring device. Module 1 tests the learner’s ability to recall and apply key COTR concepts in response to scenario-based questions. Module 2, COTR Contract Administration, comprises 10 performance-based exercises, using a threaded case study of a service contract as the vehicle through which learners will exercise COTR’s authorities, duties, and responsibilities when administering a contract.

Course Length: Approximately 8 hours

FAC 018
Green Purchasing for Civilian Acquisition
The Green Purchasing for Civilian Acquisition course offers federal acquisition professionals an overview of the policies, requirements, and best practices for purchasing sustainable products and services.

Course Length: Approximately 2 hours

FAC 030
A-76 Post-Competition Accountability Training
This is a Federal Acquisition Institute interactive online training module that will help professionals understand how to manage a service provider awarded through the competitive sourcing process. This module explains the steps a federal government agency must take to successfully implement the results of a competition between a government entity and private sector vendors.

Course Length: Approximately 1.5 hours

FAC 031
Introduction to Small Business
The Introduction to Small Business module will introduce you to the small business program requirements related to the acquisition process. The module will identify the requirements of Small Business Programs, describe the various socio-economic small business programs, identify considerations that support small business programs, and describe the process of developing an acquisition strategy.

Course Length: Approximately 4 hours

FAC 032
Small Business: A Requirements Approach
Small Business: A Requirements Approach is a module that provides an overview of how requirements personnel can make effective use of small businesses.

Course Length: Approximately 3 hours

FAC 033
Contract Management: Strategies for Mission Success
The Contract Management: Strategies for Mission Success module focuses on improvements made to federal contract management through the collaboration of public and private sector acquisition professionals as part of the Partnership for Public Service’s Acquisition Innovation Initiative.

Course Length: Approximately 3 hours
FAC 034  
**Interagency Acquisitions Basics**

The Interagency Acquisitions Basics online training module is an interactive multimedia training presentation that defines and identifies the features and benefits of interagency acquisition, describes the different types of interagency acquisitions, and provides foundational understanding of what is required to make the decision to use this method, how to get started, keys to success, and resources available to support inter-agency acquisition activities.

*Course Length: Approximately 1 hour*

---

HARVARD BUSINESS SCHOOL PUBLISHING MANAGEMENTOR

HBS 301  
**Managing Difficult Conversations**

This module immerses managers in dialogue-based situations that foster learning by doing, where they make key decisions that drive the dialogue and ensuing results. The module helps managers identify and adjust thought patterns before approaching the difficult conversations that arise in business. The module provides firsthand experiences in a safe environment and gives managers the opportunity to use interactive tools and apply follow-up action plans.

*Course Length: Approximately 3 hours*

---

HBS 302  
**Negotiating for Results**

This module immerses managers in dialogue-based situations that foster learning by doing, where they make key decisions that drive the dialogue and ensuing results. Managers will learn how to avoid common traps and find common ground for opportunities. The interactive module helps managers prepare for and conduct effective negotiations that produce a winning edge for their organizations. The interactive environment will enable managers to tap expert insights, discover proven tactics, and sharpen their own skills for getting results when negotiating.

*Course Length: Approximately 3 hours*

---

HBS 303  
**Leading Teams with Emotional Intelligence**

This module immerses managers in dialogue-based situations that foster learning by doing, where they make key decisions that drive the dialogue and ensuing results. The module puts the students in situations where they must be flexible with their own emotional intelligence skills to drive high team performance. Engaging interactive exercises reveal the secret behind exceptionally productive teams. The interactive environment will enable managers to tap into expert insights, discover proven tactics, and sharpen their own skills in the area of emotional intelligence.

*Course Length: Approximately 3 hours*

HBS 306
Leading Teams with Emotional Intelligence High Bandwidth

This module immerses managers in dialogue-based situations that foster learning by doing, where they make key decisions that drive the dialogue and ensuing results. The module puts the student in situations where they must be able to flex their own emotional intelligence skills to drive high team performance. Engaging interactive exercises reveal the secret behind exceptionally productive teams. The interactive environment will enable managers to tap into expert insights, discover proven tactics, and sharpen their own skills in the area of emotional intelligence.

Course Length: Approximately 3 hours

HBS 401
Budgeting

This module takes students step by step through the process of building better, more accurate budgets in less time. Learn how to create a budget that functions as a critical strategic tool while exploring the advantages and disadvantages of new techniques and approaches. Includes easy-to-use budget templates for fast implementation of concepts.

Course Length: Approximately 2 hours

HBS 402
Business Case Development

This module takes you step by step through the process of building better, more accurate budgets in less time. Learn how to create a budget that functions as a critical strategic tool as you explore the advantages and disadvantages of new techniques and approaches. Includes easy-to-use budget templates for fast implementation of concepts.

Course Length: Approximately 2 hours

HBS 403
Business Plan Development

This module moves step by step through the process of preparing an effective plan for a business proposal. The steps taught are applicable to launching a new internal product as well as seeking funding for a new start-up business.

Course Length: Approximately 2 hours

HBS 404
Career Management

This module teaches students how to develop a straightforward approach to managing their careers or helping others manage theirs. Includes tools for matching interests, values, and skills to the right job or development opportunity, with valuable advice on resources such as career counselors, mentors, networking, informational interviewing, and professional development reviews.

Course Length: Approximately 2 hours

HBS 405
Change Management

This module is a practical guide to implementing, managing, and communicating change in an organization. Learn how to approach change with an open mind and use it as a stimulus to encourage new ideas and harness enthusiasm for further progress. This module includes steps to help units or organizations become change-ready and planning tools to address resistance to change.

Course Length: Approximately 2 hours

HBS 406
Coaching

Here students will learn how to get the best from their direct reports and, through coaching, help others master new skills. They will learn how to use a four-step process to facilitate the professional growth of those they’ve agreed to coach. Participants will discover how to strengthen their skills so they can be more effective coaches.

Course Length: Approximately 2 hours

HBS 407
Crisis Management

Every crisis is an opportunity to shine for managers who know what to do. This module instructs how to chart a course through crisis situations, from crisis plan development and contingency thinking to post-crisis management. Relevant for managers at all levels.

Course Length: Approximately 2 hours
HBS 408  
**Customer Focus**

Customer Focus is a vital orientation tool with value for every employee. This module covers the critical components of servicing internal or external customers, with a compelling overview of the importance of customer service, its relationship to customer satisfaction, and its link to company profitability.

**Course Length:** Approximately 2 hours

HBS 409  
**Decision-Making**

Effective business decisions require time and input from many individuals throughout an organization. In this module students will learn to identify underlying issues related to a decision, generate multiple alternatives, evaluate those alternatives, and communicate and implement the decision.

**Course Length:** Approximately 2 hours

HBS 410  
**Delegating**

In this module, students will learn how to use proven tools for assessing any assignment, matching employee skills to tasks, selecting the right person, and supporting the delegation all the way through completion. It includes strategies for communicating the assignment, monitoring progress, and dealing with "reverse delegation."

**Course Length:** Approximately 2 hours

HBS 411  
**Developing Employees**

Here students will be taught how to easily apply recommendations for addressing employees’ developmental needs. This module includes strategies for maximizing return on management, growing competent employees, and keeping star performers motivated. It also addresses use of development planning to help team members improve individual performance, make the most of career opportunities, and maximize contributions to an organization’s performance.

**Course Length:** Approximately 2 hours

HBS 412  
**Difficult Interactions**

Learn how to discuss and resolve difficult interactions in the workplace—whether with employees, peers, bosses, or even customers and suppliers. This module includes tools and techniques: Students decide which situations are worth resolving, find the source of the difficulty, productively discuss the emotions that difficult interactions can rouse, and overcome barriers to action.

**Course Length:** Approximately 2 hours

HBS 413  
**Dismissing an Employee**

Dismissing an employee is one of the most difficult, painful tasks a manager can face. Learn how to effectively manage a dismissal—including making key decisions before, during, and after the critical event. Handled skillfully, dismissing an employee can set a team—and a company—on a positive new path.

**Course Length:** Approximately 2 hours

HBS 414  
**Diversity**

Learn how to manage diversity to extract maximum value from employees’ differences—including how to recruit diverse talent, resolve diversity-related conflicts, and communicate with employees and customers from other cultures.

**Course Length:** Approximately 2 hours

HBS 415  
**Ethics at Work**

Here students will learn how to use a three-step framework to solve “right vs. right” ethical dilemmas and how to foster a climate of integrity within an organization.

**Course Length:** Approximately 2 hours
HBS 416

Feedback Essentials

Learn how and when to use various types of feedback to maximize openness and encourage learning. Covers information on establishing a receptive work environment, giving effective feedback, receiving feedback openly, being patient with noncommunicators, and managing barriers to feedback.

Course Length: Approximately 2 hours

HBS 417

Finance Essentials

This primer shows nonfinancial managers how their units fit into the company’s overall financial picture. Includes easy-to-understand explanations of the income statement, balance sheet, and cash-flow statement, plus practical advice for pulling together a department’s budget and justifying an investment or expenditure.

Course Length: Approximately 2 hours

HBS 418

Global Collaborations

This module focuses on how to manage a global collaboration—including how to negotiate, build trust, overcome language barriers, and navigate geographical as well as cultural challenges.

Course Length: Approximately 2 hours

HBS 419

Goal Setting

Here students learn how to organize their work around clear and meaningful objectives, with tools and techniques for establishing realistic goals, creating a task list, tracking milestones, and evaluating achievement.

Course Length: Approximately 2 hours

HBS 420

Hiring

Learn techniques for finding, interviewing, and selecting top performers. This module will cover information on screening resumes, checking references, asking effective questions, making the hiring decision, and extending the offer. It also includes tools for creating a job profile, preparing for an interview, and evaluating job candidates.

Course Length: Approximately 2 hours

HBS 421

Innovation and Creativity

Learn how to stimulate creative thinking in an intellectually diverse workgroup. Learn to assess and then tailor the physical and psychological environment to stimulate creative thought, and how to manage the process of innovation for maximum impact on an organization.

Course Length: Approximately 2 hours

HBS 422

Innovation and Implementation

This module provides a framework for turning an innovative idea into reality. Innovation is not only about generating creative ideas. Innovation results when a creative idea is put to use. However, the implementation phase is where many good ideas fail. Learn how to implement an innovation, from crafting a vision statement to managing resistance.

Course Length: Approximately 2 hours

HBS 423

Laying Off Employees

Implementing a layoff is one of the most difficult and painful tasks a manager can face. This module teaches how to effectively manage a layoff—including making key decisions before, during and after the critical event. Handled skillfully, a layoff can set a team—and a company—on a positive new path.

Course Length: Approximately 2 hours
HBS 424
Leading and Motivating
A synopsis of the essential tasks of leadership: setting direction, aligning people, and motivating others. Learn how to recognize the skills and characteristics of effective leaders, create an inspiring vision, and energize people to support and work toward goals.

Course Length: Approximately 2 hours

HBS 425
Managing Upward
Gain insight into developing a mutually rewarding relationship, with skills for communicating and negotiating with a manager. Students will learn tips on presenting problems or opportunities to a supervisor and accepting responsibility for proposed actions.

Course Length: Approximately 2 hours

HBS 426
Marketing Essentials
Developed especially for nonmarketing managers, this module includes fundamentals that will help people throughout the organization better understand the importance of marketing and how it relates to them.

Course Length: Approximately 2 hours

HBS 427
Meeting Management
This module is a timesaving guide to planning and conducting meetings from start to finish. It includes preparation, keeping the meeting on track, and follow-up. It gives expert advice for dealing with problem behaviors exhibited by meeting participants.

Course Length: Approximately 2 hours

HBS 428
Negotiating
Students will learn about the negotiation process, when different types of negotiations are appropriate, essential negotiating strategies, and how to become an effective negotiator. A practical guide includes: assessing interests of all parties, developing opportunities that create value, avoiding common barriers to agreement, and implementing strategies to make the negotiation run smoothly.

Course Length: Approximately 2 hours

HBS 429
New Manager Transitions
Learn what it means to be a manager, as well as how to navigate the complex and often stressful transition from individual contributor to a new manager.

Course Length: Approximately 2 hours

HBS 430
Performance Appraisal
This module provides instruction in how to prepare for, conduct, and follow up on performance evaluations—in ways that link employee performance to company and group goals. This topic includes information on how to use informal performance assessments and feedback as part of regular employee interactions, prepare for a formal performance meeting with a direct report, document a performance meeting, and create a development plan with an employee.

Course Length: Approximately 2 hours

HBS 431
Performance Measurement
A review of financial and nonfinancial measures used in all areas of organizational performance. It addresses both standalone measures (including ROI, EVA, and BET) and measurement frameworks such as dashboards, quality models, and the Balanced Scorecard. Included is a systematic process for tracking performance of initiatives that can generate improvements across the organization.

Course Length: Approximately 2 hours
HBS 432
**Persuading Others**

Learn how to master the art and science behind successful persuasion—and begin changing others’ attitudes, beliefs, or behavior to create win-win solutions. Formal authority no longer gets managers as far as it once did. To do their job—accomplishing work through others—managers must develop and use skills of persuasion rather than simply issue orders.

**Course Length:** Approximately 2 hours

HBS 433
**Presentation Skills**

Sound advice on preparing and delivering presentations that command attention, persuade, and inspire. Includes rehearsal techniques as well as tips for creating and using more effective visuals. Also addresses the importance of understanding objectives and the audience to create a presentation with impact.

**Course Length:** Approximately 2 hours

HBS 434
**Process Improvement**

Learn what business processes are; why improving them is essential; and how to carry out a business process improvement (BPI) initiative.

**Course Length:** Approximately 2 hours

HBS 435
**Project Management**

This module teaches the nuts and bolts of project management, including project planning, budgeting, team building, execution, and risk analysis. It also covers useful tools and techniques such as GANTT and PERT charts, work breakdown structure, and variance analysis.

**Course Length:** Approximately 2 hours

HBS 436
**Retaining Employees**

Why do employees stay with—or leave—their jobs? This model teaches strategies for attracting and keeping top performers, how to handle common obstacles to retention such as burnout and work/life imbalance, and how to develop programs that address the diverse needs and interests of a workforce.

**Course Length:** Approximately 2 hours

HBS 437
**Strategic Thinking**

This module offers practical advice for managers in charge of shaping and executing organizational strategy, including tips for analyzing opportunities, challenges, and the potential consequences of high-level action plans. It addresses identification of broad patterns and trends, creative thinking, analysis of complex information, and prioritization of actions.

**Course Length:** Approximately 2 hours

HBS 438
**Strategy Execution**

Learn what strategy is, how senior management and units work together to develop strategy, and how units support a company’s strategy by developing and executing action plans for strategic initiatives. In many companies, senior management and units are involved in the strategic planning process. Why? This ensures that a company’s strategies—both corporate and unit—are tightly aligned and can be successfully implemented. Learn how to contribute to the strategic planning process and support strategic initiatives by developing and executing action plans.

**Course Length:** Approximately 2 hours
HBS 439
Stress Management

This module offers practical, hands-on suggestions for managing workplace stress—from short-term “quick fixes” to long-term methods for both changing situations and changing how students respond to them. This module teaches the difference between positive stress that enhances productivity and negative stress that breeds tension, lowers productivity, and undercuts job satisfaction. Strategies are taught for dealing with underlying causes of worry and stress, with tactical advice and coping mechanisms for immediate problem management.

Course Length: Approximately 2 hours

HBS 440
Team Leadership

This module covers how to establish a team with the right mix of skills and personalities and a culture that promotes collaborative work. Included are steps to leading an effective team, and innovative, easy-to-implement self-evaluation tools. This course will help students decide if they should establish a team; to form a productive team; launch a team effort effectively; lead a team skillfully; and assess the team’s performance.

Course Length: Approximately 2 hours

HBS 441
Team Management

Learn about the problems that frequently throw a team off course and how to prevent them—or, if necessary, how to get a team back on track. Focus is essential to effective teamwork. Learn how to diagnose and overcome common problems—such as poor communication and interpersonal conflict—that can impede team progress. Learn to take corrective measures to remove team problems and improve team performance.

Course Length: Approximately 2 hours

HBS 442
Time Management

This module will teach students effective time management—how to take control of their schedules and use their time wisely. Students will learn to analyze how they spend time, and to prioritize tasks and avoid common time wasters. They also will be taught to identify which tasks are most critical to achieving their long-term goals; how to use scheduling tools for greater efficiency; and to put their schedules into action, evaluating and modifying them along the way, as needed.

Course Length: Approximately 2 hours

HBS 443
Virtual Teams

Learn how to form a virtual team, assess technology and communication needs, keep virtual projects on track, and ensure that virtual teams produce high-quality work. Module provides concrete suggestions for forming virtual teams, including assessing their technology and communication needs, structuring the team to build trust, and keeping the team on track.

Course Length: Approximately 2 hours

HBS 444
Writing Skills

Students will learn to put readers’ needs first to take the headache out of writing—and help extend their influence as managers. Skillful writing helps accomplish business objectives. This module will teach students to create clearer, more effective written communication and will include specific guidelines for preparing memos, letters, e-mails, and other common business documents.

Course Length: Approximately 2 hours

Standard Procurement System Training

SPS 100
Standard Procurement System and Federal Procurement Data System—Next Generation System Administrator

This module contains information required to work at a system-administrator level with the Standard Procurement System (SPS) and Federal Procurement Data System—Next Generation (FPDS-NG) Integration. SPS is one of the first...
SPS 104
Report Writing (WBT)

This course is an online version of the existing instructor-led training currently offered by the Joint Program Management Office. The purpose of the conversion is to open the training up to more procurement professionals than it is possible to accommodate in the classroom setting and it is a viable option for procurement professionals who cannot fit the classroom training into their busy schedules.

Course Length: Approximately 7 hours

SPS 105
Adapter Online Support Tool

This module was created to assist the user/learner in troubleshooting the most common problems the field encounters with the PD² Adapter. This module will review attributes, characteristics, and architecture to provide the learner with a better understanding of how to utilize the PD² Adapter.

Course Length: Approximately 2 hours

SPS 106
Database Maintenance

This module is an online version of the existing instructor-led training offered by the Joint Program Management Office. The purpose of this conversion is to provide a viable option for procurement professionals who cannot fit the classroom training into their busy schedules.

Course Length: Approximately 4 hours

**Business**

**TTB 001**  
*Activity-Based Costing Principles (ABCP)*

Provides an overview of the activity-based costing methodology, which allows acquisition professionals to establish a realistic cost (including indirect costs) for all activity resources for products and services.

**Course Length:** 3.5 class days

**TTB 002**  
*Budget Execution*

Reviews the monetary concepts of commitment, obligation, expenditure, and outlay. Discusses the preparation of obligation and expenditure plans, variance reports, and reclamas to budget adjustments proposed by higher headquarters.

**Course Length:** 1 class day

**TTB 004**  
*DoD Budget “Primer”*

Explores how funds are programmed, budgeted, enacted, and executed to enable a successful acquisition program.

**Course Length:** 1 class day

**TTB 007**  
*POM Development Process*

Provides an introduction to Program Objective Memorandum (POM) development in the context of the planning, programming, budgeting, and execution process, including how the POM is developed, the process of submitting it to the Office of Secretary of Defense (OSD), and how it is reviewed and adjusted during the OSD integrated program and budget review.

**Course Length:** 1 class day

**TTB 008**  
*Earned Value Management*

Examines the Earned Value Management (EVM) process, which is key in establishing a realistic program baseline and can help identify program trends for technical, cost, or schedule performance.

**Course Length:** 3 class days

**TTB 009**  
*Business Financial Management Integration into Programs*

Discover how the business financial manager integrates cost estimating, budget development, and defense, and ensures timely budget execution to enable the program manager to succeed.

**Course Length:** 1 class day

**TTB 010**  
*Integrated Baseline Review (IBR) Simulation Training*

The simulation assesses the experience and preparedness of an integrated baseline review (IBR) team by providing real-life challenges within a structured virtual environment. The simulation activities are combined with subject matter expert debriefing sessions.

**Course Length:** 1 class day

**Contracting**

**TTC 004**  
*Sole Source Commercial Item Pricing*

Examines when a sole source commercial supply or service should be used and provides methods to determine if the price is reasonable.

**Course Length:** 1 class day
TTC 005
Source Selection

Provides an overview of the source selection process, which applies to competitive negotiated acquisitions per Federal Acquisition Regulation (FAR) and the mandatory DoD Source Selection Procedures.

Course Length: 2 class days

TTC 006
Alternative Dispute Resolution

Reviews the Alternative Dispute Resolution (ADR) process, which can assist the government and contractor in resolving disputes, leading to mutual agreements that benefit both parties.

Course Length: 2 class days

TTC 014
Service Acquisition Workshop

Reviews the complete acquisition process, from team formation to requirements and business strategy development to contract award and performance assessment, to help an acquisition program begin its work efficiently.

Course Length: 4 class days

TTC 015
Negotiation Training for the Acquisition Workforce

This 2-day course teaches acquisition professionals how to use interest-based negotiation (IBN) techniques to reach mutually beneficial agreements with vendors, internal departments, colleagues, and other stakeholders. This interactive course includes dynamic hands-on negotiating exercises that allow participants to apply collaborative, problem-solving techniques to realistic acquisition challenges.

Course Length: 2 class days

TTC 016
RFP Module 1: RFP Review

The first module of the Request for Proposal (RFP) simulation training that provides participants the opportunity to review the RFP structure and evaluate a sample RFP, which may be offered as a stand-alone module. Based on the experiential learning model, whereby individuals make meaning from direct experiences, the program reveals the team’s degree of technical RFP readiness, as well as the ability of the team to work together to solve problems. This part of the simulation is approximately a day long. Teams may wish to go through the next two modules, Source Selection Evaluation Criteria Development and Source Selection Evaluation, once this module is complete.

Course Length: Approximately 6 hours

TTC 017
RFP Module 2: RFP Source Selection Evaluation Criteria Development

The second module of the Request for Proposal (RFP) simulation training that provides participants the opportunity to create a set of source selection evaluation criteria to be included in an RFP. Based on the experiential learning model, whereby individuals make meaning from direct experiences, the program reveals the team’s degree of technical RFP readiness, as well as the ability of the team to work together to solve problems. This part of the simulation is approximately a half day long. It is highly advised that the team follow this simulation with the Source Selection Evaluation simulation.

Course Length: Approximately 4 hours.

TTC 018
RFP Module 3: Source Selection Evaluation

The third module of the Request for Proposal (RFP) simulation training provides participants the opportunity to perform a source selection evaluation. Based on the experiential learning model, whereby individuals make meaning from direct experiences, the program reveals the team’s degree of technical RFP readiness, as well as the ability of the team to work together to solve problems. This part of the simulation is approximately a half day long. It is highly advised that the team go through the Source Selection Evaluation Criteria Development before going through this simulation.

Course Length: Approximately 4 hours.
**Professional Development**

**TTD 002**  
**Crucial Confrontations®**

Provides a step-by-step process for how managers can identify and resolve performance gaps, strengthen accountability, eliminate inconsistency, and reduce resentment throughout an office or organization.

Course Length: 2 class days

**TTD 003**  
**Leading Project Teams Course**

Emphasizes best practices of building and maintaining high-performing teams using practical examples and exercises.

Course Length: 3.5 class days

**TTD 004**  
**Myers-Briggs Type Indicator® Workshop**

The Myers-Briggs Type Indicator (MBTI) is a self-report personality inventory based on the theory of psychological type developed by Swiss psychiatrist Carl Jung. This workshop allows participants to complete the instrument and receive individual feedback on their results.

Course Length: 1 class day

**TTD 005**  
**Crucial Conversations®**

Provides solutions to how individuals, teams, and organizations can overcome problems stemming from under-communicating, withholding information, or failing to act with unity and conviction.

Course Length: 2 class days

**TTD 006**  
**Leading at the Speed of Trust**

Leading at the Speed of Trust is a two-day workshop that elevates “trust” from an undervalued or transparent element of organizational effectiveness to a visible element of strategic significance. Leaders and organizations learn that trust enables collaboration, innovation, effectiveness and efficiency and are able to harvest and reinvest the “dividends” of trust to improve the energy, performance and commitment of their workforce. This highly interactive workshop engages leaders at all levels in the real work of identifying and closing trust gaps that exist in their organization. Instead of paying Trust Taxes, you can begin to realize Trust Dividends. The workshop is based on the best-selling book The Speed of Trust by Stephen M.R. Covey. Participants learn from hands on activities—not theoretical models or hypothetical cases. Leaders measurably increase the speed and scale of results by improving trust with stakeholders, including their direct reports, peers, superiors and customers.

Course length: 2 class days

**TTD 007**  
**Strength Deployment Inventory® Workshop**

The SDI® (Strength Deployment Inventory®) is a proven, memorable tool for improving team effectiveness and reducing the costs of conflict. During the workshop, you will receive a brief overview of the tool, complete the assessment instrument, do a self-validation, participate in fun activities to reinforce learning, and receive general feedback.

Course Length: 4 hours

**TTD 008**  
**Intact Team Trainer (ITT) Simulation Training**

The ITT simulation is designed to foster team work, critical thinking, and decision-making skills applicable to the program management domain in general and is agnostic to discipline-specific subject-matter concerns. The simulation provides a role playing environment, based on learning through reflection on direct experience, to individual learners requiring them to solve program management challenges typically faced by defense program managers.

Course length: Approximately 8 hours
## Continuous Learning Modules

### Engineering and Technology

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Description</th>
<th>Course Length</th>
</tr>
</thead>
<tbody>
<tr>
<td>TTE 002</td>
<td>Problem-Solving Techniques for Quality Improvement (PSTQ)</td>
<td>How can you achieve continuous quality improvement of work processes? A very tough assignment. This course examines problem-solving methodology and statistical techniques, and offers a “tool kit” of ideas that may be used to achieve quality improvement goals.</td>
<td>3 class days</td>
</tr>
<tr>
<td>TTE 003</td>
<td>Navy Systems Engineering Guide</td>
<td>Reviews the Naval Air Systems Command (NAVAIR) approach to systems engineering, focusing on NAVAIR’s internal policies and procedures and how to tailor this corporate approach to specific programs or projects.</td>
<td>5 class days</td>
</tr>
<tr>
<td>TTE 004</td>
<td>DISA Information Systems Engineering Seminar (ISES)</td>
<td>Introduces a Defense Information Systems Agency software management team to basic information regarding procurement, acquisition, basic systems, and software engineering.</td>
<td>3 class days</td>
</tr>
<tr>
<td>TTE 005</td>
<td>Systems Engineering Plan (SEP)</td>
<td>Provides students with the knowledge, material, and understanding of internal program documentation to develop an executable SEP for their programs.</td>
<td>4 class days</td>
</tr>
<tr>
<td>TTE 006</td>
<td>Engineering Management Workshop</td>
<td>Using hands-on engineering experience and software-intensive skills needed to build an operating robot, students gain an understanding of the defense acquisition life cycle from a systems and software engineering perspective.</td>
<td>5 class days</td>
</tr>
<tr>
<td>TTE 007</td>
<td>Technology Assessment and Transition Management</td>
<td>Prepares students to conduct technology assessments; reviews mechanisms available to support transition; and provides training on technology development strategies, technology transition agreements, and other technology transition documentation.</td>
<td>2 class days</td>
</tr>
<tr>
<td>TTE 008</td>
<td>Resources for the Test and Evaluation Professional</td>
<td>Explores information and resources available to assist the test and evaluation workforce in performing their day-to-day duties.</td>
<td>1 class day</td>
</tr>
<tr>
<td>TTE 009</td>
<td>Design of Experiments—Industrial Strength</td>
<td>Provides an overview of the design of experiments methodology, which is an iterative product/process improvement method and an important part of a student’s Lean, Six Sigma, or quality improvement plans.</td>
<td>10 class days (accelerated version, 5 class days)</td>
</tr>
</tbody>
</table>
TTE 014
Technical Project Management Using Intermediate Product Breakdown Structures

Reviews how Naval Air Systems Command systems engineers/class desk officers should plan, organize, and manage engineering staffing efforts of acquisition programs.

Course Length: 2.5 class days

TTE 015
JCTD Executions (How to Run A JCTD)

Explores the necessary programmatic, technical, operational, and transition management skills and know-how students need to become effective, productive members of the Joint Capability Technology Demonstrations execution team.

Course Length: 2.5 class days

TTE 016
JCTD Transition Management Course

Introduces the Joint Capability Technology Demonstrations (JCTD) management team to procurement and acquisition situations that affect many JCTDs during transition.

Course Length: 5 class days

TTE 018
Reliability and Maintainability (R&M) for Engineers

Explores how to apply R&M models commonly used by DoD weapons system contractors to the design and development of equipment and systems.

Course Length: 3 class days

TTE 019
ISO 9000 – 2000

Introduction to the application, interpretation, and evaluation of the ISO 9000 series standards for quality management systems as used in defense acquisitions.

Course length: Approximately 2 class days

TTE 020
Software Acquisition Management Course (SAMC)

Focused around key software acquisition management competencies needed to successfully manage mission-critical software-intensive systems, the SAMC covers a wide variety of topics relevant for acquirers. The SAMC consists of a number of short classes and student exercises supported by a wide variety of topical articles, fact sheets, and summaries of suggested “best practices”. The SAMC can be tailored by DAU subject-matter experts to suit specific DoD customer as well as non-DoD agency needs.

Course length: Normally 4.5 class days

LOGISTICS

TTL 001
Performance-Based Logistics

Examines problem-solving and statistical methodologies, and provides students with techniques to improve work processes and achieve quality improvement goals.

Course Length: 2.5 class days

TTL 002
Provisioning Management

Examines management-level planning and oversight of logistics support development for a new system, ensuring students gain a sound understanding of the normal sequence of events in system provisioning.

Course Length: 3 class days
TTL 003
Reliability and Maintainability for Logisticians

Reliability and Maintainability (R&M) for Logisticians presents an overview of acquisition R&M policy and its application to logistics support.

Course Length: 3 class days

TTL 006
Logistics Test and Evaluation

Provides an overview of DoD Directive 5000.1 and DoD Instruction 5000.2, as well as acquisition processes involved with systems engineering, test and evaluation, acquisition logistics (including reliability, maintainability, and availability), and contractor operations and test reporting.

Course Length: 2 class days

TTM 001
Program Attorney’s Acquisition Overview Course

Provides program attorneys an overview of program management office functions, challenges, and processes involved in fielding needed capabilities within budget and schedule constraints.

Course Length: 5 class days

TTM 002
Risk Management Workshop

Provides an overview of risk management and explores a step-by-step process to identify, evaluate, and develop risk-handling strategies, allowing the student to effectively perform and communicate risk planning.

Course Length: 1 class day

TTM 003
New Program Startup Workshop

Emphasizes better government and industry teaming after contract award, and is tailored to match the specific needs of the each program.

Course Length: 3.5 class days

TTM 004
Program Management through the Looking Glass

Using the Looking Glass interactive behavioral management simulation, program managers and their team explore personal leadership and management styles and receive feedback on improving the team’s performance.

Course Length: 3 class days

TTM 005
Integrated Baseline Review Workshop

Reviews the Integrated Baseline Review (IBR) process—which was developed to assess the reasonableness, adequacy, and accuracy of this baseline plan—and provides tailored feedback on how best to conduct an IBR for a student’s particular project.

Course Length: 2 class days

TTM 007
Stakeholder Management

This fast-paced daylong workshop provides hands-on experience with identifying, prioritizing and analyzing stakeholders critical to DoD program success. Attendees will create action plans to improve their relationships with key stakeholders, increasing engagement/commitment and program outcomes. Practical tools, examples, and best practices from defense acquisition and sustainment programs are highlighted throughout.

Course Length: 1 class day
